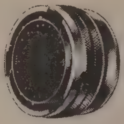
Bendix Electrical Connectors

SUBMINIATURE MIL-C-38999, MIL-C-27599 types



Design Characteristics

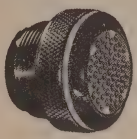
- lightweight, compact, hi-contact density
- environmental resistant
- quick positive coupling
- visual coupling confirmation
- mismating eliminated by 5 key/keyway design
- error proof alternate positioning

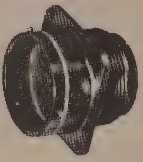
Customer Options

- five mounting styles
- 56 different contact arrangements, 3 to 128 circuits
- solder or crimp rear release contacts
- accept 26 - 12 AWG wire
- eight protective finishes
- coaxial (shielded) contacts available
- hermetic seal (glass fusion) receptacles available

JT, MS-JT	LJT	SJT
For applications requiring maximum weight/space savings and reliability. Also available in MIL-C-38999 (crimp) and MIL-C-27599 (solder) types. Catalog 12-090	Popular 100% "scoop-proof" (recessed pins) version of the JT family. Offers maximum contact protection against bending. Available in MIL-C-38999 and MIL-C-27599 types. Catalog 12-090	Further expansion of the basic JT family incorporating the 100% LJT scoop-proof feature and standard JT/PT mounting dimensions. Catalog 12-091

MINIATURE MIL-C-26482, MIL-C-83723 types





Design Characteristics

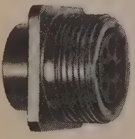
- medium sized, widely used
- environmental resistant
- quick positive coupling
- mismating eliminated by 5 key/keyway design

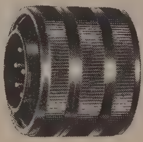
Customer Options

- 7 mounting styles
- solder or crimp front and rear release contacts
- accept 20 - 12 AWG wire
- 6 protective finishes
- coaxial (shielded) and thermocouple contacts available
- hermetic seal (glass fusion) receptacles available
- alternate positioning

PT, MS-PT	PT-CE	PTS-DR, MS-PTS-DR	PT-SE, MS-PT-SE
Basis of popular Bendix PYGMY line incorporating bayonet coupling and solder contacts. Approved to MIL-C-26482. Catalog 12-072	Lowest cost PYGMY type, featuring crimp front release contacts and a voidless insert and grommet assembly, offering continuous dielectric separation between contacts. Catalog 12-075	Featuring the latest innovations in connector technology including dielectric retention, crimp rear release contacts and closed entry socket design. Catalog 12-076	A derivative of the PYGMY line incorporating crimp, front release contacts with a metal clip retention system. Catalog 12-075

HEAVY DUTY MIL- C-22992 types





Design Characteristics

- 9 mounting styles
- multiple contact arrangements, 1-104 circuits
- solder or crimp contacts
- accept 20-0 AWG wire
- designed for use with jacketed cable
- alternate positioning

Customer Options

- largest size cylindrical
- environmental resistant
- quick mating, vibration resistant, easily maintainable threaded coupling

QWLD	QWL	QDP	Accessories
Waterproof series for power and control circuits, with 5 key polarization. Catalog 12-052	Compact heavy duty connector with single key polarization. Catalog 12-052	Crimp contacts in heavy shells. Bendix Electrical Connectors

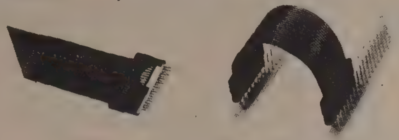
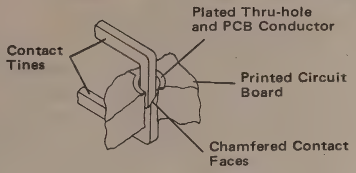
RECTANGULAR, NEW DEVELOPMENTS



Flat Cable

Low profile, highly reliable connector and a new terminating technique allows simultaneous gang termination without stripping or other wire preparation. True compatibility between flat cable usage and interconnection method now exists.

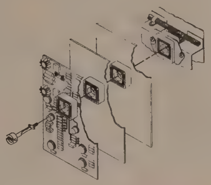
Brochure SL-287



Board Grabber

A unique concept for connection to printed circuit boards. The BOARD GRABBER contact utilizes plated thru-holes thus eliminating the need for gold plated board fingers, while offering zero card insertion force. Multipoint electrical contact and positive card retention offer excellent integrity and reliability even under vibration and shock.

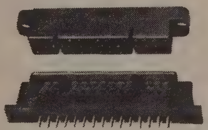
Consult Sidney Plant



Centre

A printed circuit board connector series designed to mount at or near the center of printed circuit boards to provide a greater number of electrical connections between boards, shorter PCB conductor runs, eliminate cross-overs and minimize multi-layer buildups. The Centre packaging concept offers a simple, rugged method of mounting and interconnecting boards and chassis, reduces back panel wiring, and acts as an exit/entry point for external interconnections.

Brochure SL-286



Automotive

A developing line of connectors for transportation, commercial, and industrial markets designed to provide excellent electrical/mechanical characteristics and reliability at low cost.

Consult Sidney Plant

Brush Contact

A totally new idea in contact design, offering low mating forces, redundant circuits and wide positional error allowances. Each contact is comprised of a number of small wires, forming a brush like unit applicable to virtually any application where pin and socket contacts are used. The meshing of the brush like contacts provides a multiplicity of circuit paths and low contact resistance.

Product Data Sheet 91

RECTANGULAR, RACK AND PANEL

Designed for use when the coupling requirements of cylindrical connectors are impractical, such as blind or inaccessible mating applications. Available in a variety of shell styles and mounting options, with crimp and solder contacts in various insert arrangements. MIL, ARINC, AIMS and filtered types are also available.

Catalog 12-032

RECTANGULAR, PRINTED CIRCUIT BOARD

Designed to provide reliable interconnection means with printed circuit boards. Available in a variety of contact spacings with crimp, solder or printed circuit contacts. Accessory polarization, floating contacts and other options are available to extend versatility.

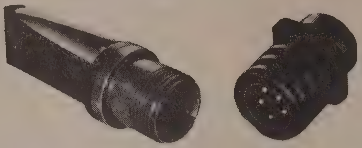
SPECIAL PURPOSE CYLINDRICAL



Heavy Power

Power "L", designed with safety in mind for heavy power interconnections in commercial, industrial or military applications. Features arc quencing capabilities, non-mating of incompatible power sources, and other safety assurances to make this an ideal connector for power applications up to 200 amp. Meets requirements of MIL-C-22992, Class L.

Catalog 12-052

Immersible

The Aquacon connector series is designed for oceanic or fluid immersion applications; offering 1500 PSI capability, metal to metal coupling, visual mating indicator and design flexibility, at low cost. Available in a wide range of circuit configurations.

Brochure SL-280

Filter

Designed to provide EMI protection for circuitry. Each circuit is individually filtered within the connector, eliminating the need for costly and bulky exterior network filters. Filter contacts in MF, HF, VHF and UHF ranges are available for a wide selection of connector types.

Catalog 12-120

High Temperature

Firewall connectors suitable for applications requiring continuous temperature operation to 1000°F. Components also provide suitable resistance to radiation and oxidizing environments.

Catalog 12-101

Breakaway

Designed to provide quick disconnect of a connector plug and receptacle, with axial pull. Mating is accomplished in normal fashion while disconnect is by axial pull on the coupling nut (via lanyard or other means) or manual rotational unmating.

Brochure SL-102

CUSTOM CABLING

The Electrical Components Division maintains a custom cabling department to design and manufacture high quality cabling for industrial, commercial, aerospace, oceanic and military applications. Skilled, experienced personnel are available to assist you with your cabling needs; with careful consideration given to all aspects of a particular installation.

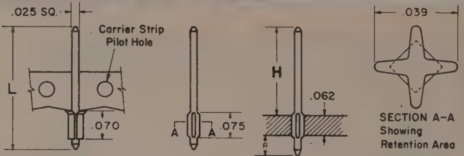
BergCon™ .025" SQUARE MODULAR INTERCONNECTION SYSTEM

BergCon is a complete, versatile system offering high density .100" grid stacking . . . end-to-end or side-to-side . . . across a wide range of connector types.



BergPin MALE TERMINALS FOR DISCONNECT AND WIRE-WRAPPING

System provides a fast, reliable method for staking pins in circuitboard. Here are the features that distinguish BergPin terminals from ordinary wire-wrapping pins:

Pin tip is designed to facilitate wire-wrapping or disconnect lead-in.

Uniform cross-section. Made from drawn, not stamped, material. Result: smooth, flat contact surfaces.

Available in six types of surface platings.

Sharp corners held to .003" maximum radius.

Star-wedge shape provides 8 lbs. retention (at nominal hole size) before soldering; up to 50 lbs. retention after soldering.

Pins are ¾-hard phosphor bronze.

Tapered lead-in will not damage plated through hole or multi-layer construction.

Pin tip is designed to facilitate lead-in when staking.

Part Number	Plating	Underplating	Material
75401-	30 mill min. gold*	50 mill min. nickel	Phosphor-bronze (¾ hard) ASTM B159-66
75402-	50 mill min. gold**	10 mill copper flash	Phosphor-bronze (¾ hard) ASTM B159-66

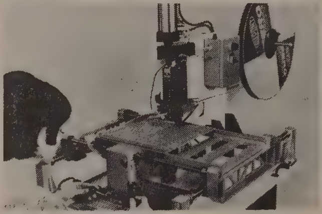
*MIL-G-45204 Type 2 **MIL-G-45204 Type 1 Class 1 ***MIL-T-10727A Type 1

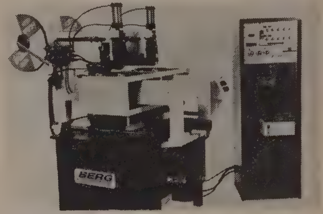
This listing gives the material, plating and underplating; it does not show the pin length or height above board. For these dimensions, we refer you to Berg Bulletin 105 which is available upon request.

BergPin STAKING MACHINES CUT COSTS, CONTROL QUALITY

PRODUCTION MACHINE (Model BP-161)
For staking boards with limited number of pins or boards with varying pin configurations. Operator manually locates hole position and initiates staking cycle for up to 2000 insertions per hour.

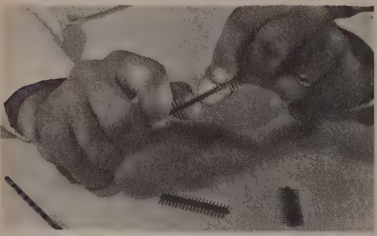


PANTOGRAPH MACHINE (Model BP-151)
Ideal for straight-line insertion in boards or for high quantities of identical boards. Stakes up to 3500 pins per hour.



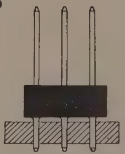
NUMERICALLY-CONTROLLED MACHINE (Model NC)
For high-speed automatic staking. Features a numerically-controlled, X-Y positioning system for programming pin-to-pin spacing and row patterns. Twin insertion heads simultaneously stake two identical boards at rates up to 12,000 per hour.

BergStik STRAIGHT AND RIGHT ANGLE HEADERS ON .100", .125" AND .150" CENTERS

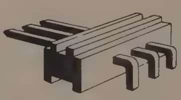


IT'S A SNAP! Headers can be broken to desired length by hand.

An inexpensive new method for inserting .025" sq. pins in boards for wire-wrapping or input/output usage. Suitable for high-volume production as well as prototyping. Supplied in many lengths and in choice of platings. Stackable to grid pattern on their respective pin centers. BergStik Headers are notched to allow user to break to any desired number of positions.



Straight Header



Right Angle Header

See Bulletin 140 for complete deails.

BergCon™ .025" SQUARE MODULAR INTERCONNECTION SYSTEM

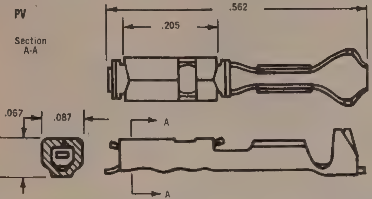
DUAL-METAL PV RECEPTACLES PROVIDE SUPERIOR ELECTRICAL AND MECHANICAL PROPERTIES

(Beryllium copper spring; ¼-hard brass body)

PV RECEPTACLES

. . . mate with .025" square pins on .125" grid or greater

The Berg "PV" connector is the most reliable .025" post receptacle in use today. This unique terminal provides a virtually constant retention force even after repeated cycles on a male pin. The spring of the PV is available in a choice of thicknesses enabling you to "design in" a retention force that is tailored to the application.



PV RECEPTACLE PART NUMBERS (CONTINUOUS STRIP)

Wire Gage, AWG	#18, #20, or two #22, two #24			#22, #24, #26, or two #26			#28, #30, #32

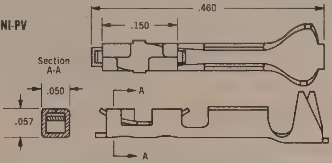
MINI-PV RECEPTACLES

. . . mate with .025" square pins on .100" grid spacing

The smaller version of the PV is of similar two-piece design for lasting retention after repeated disconnects. The Mini-PV is available in 4 varieties of platings including SPOT O' GOLD. (The latter gives you the electrical and mechanical properties of gold where you need it — in the contact area and in the spring.) Install the Mini-PV in a latch housing for 1 through 72 simultaneous connections. See application machines below.



Sizes shown are representative of line. See Bulletin 101 for additional listings.

MINI-PV RECEPTACLE PART NUMBERS (CONTINUOUS STRIP)

Wire Gage, AWG	#20, or two #22, two #24		#22, #24, #26, or two #26, two #28			#28, #30, #32, two #30, two #32

*Gold Contacts Only
For complete details, contact your local Berg Sales Engineer.

APPLYING PV RECEPTACLES

MODEL 200 PV CRIMPER

This electrically-operated bench press provides 1500 or more quality crimps per hour. Machine has 2½ ton capacity and features a short press stroke and direct clutch linkage. Size: 29" high x 26" long x 16" wide. Weight: 150 lbs. Power Requirements: 80-100 psi air; 120 V electrical.

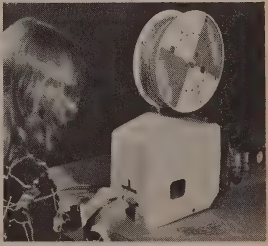
SEE BULLETIN 101 FOR ADDITIONAL INFORMATION

MODEL 250 PV CRIMPER

Air-powered unit is compact, delivers approximately 1000 terminals per hour (depending on operator dexterity.) Operates on 80 psi air. Uses 110 V for light source. Size: 26½" high x 18" long x 10" wide. Weight 50 lbs.

HAND TOOL (not shown)

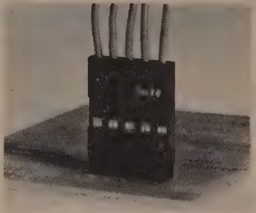
Sturdy. Duplicates the quality of crimping machines. Features a positive ratchet that does not release until full crimping pressure is applied to a terminal.



BERG ELECTRONICS/DIV. E. I. du PONT de NEMOURS & CO., INC./NEW CUMBERLAND, PA. 17070/TEL.: (717) 938-6711

BergCon™ .025" SQUARE MODULAR INTERCONNECTION SYSTEM

HOUSING (LATCH OR ROD TYPE)

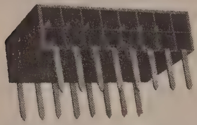


Berg Mini-Latch Housings allow simultaneous connection of as many as 72 Mini-PV terminated conductors; are available in many standard sizes.

Berg Lock-Rod Housings employ a lock rod to retain the terminal; ideal for applications requiring frequent wiring changes or for prototyping. Lock-Rod Housings connect as many as 31 Mini-PV terminated conductors in a single row — up to 62 in twin rows on .001" grid. Supplied 31 single row for .150" centers.

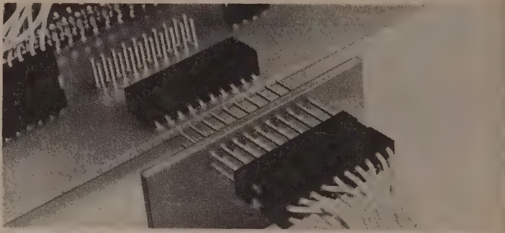
(See Bulletin 101 for complete details.)

PV CARD CONNECTORS — HORIZONTAL



These PV card connector blocks are right-angle designs precisely molded to mate with .100" or .150" grids of .025" square pins. They are suitable for horizontal mounting and are available in single or double row configurations. For example, the Berg card connector for .100" spacing accepts 5 through 52 terminations in a single row or up to 130 in double row. Housings for .150" spacing accepts 5 through 30 terminations in a single row of 10 through 86 in double row.

(For complete details on this complete line, request Bulletin 112.)



BergPin .025" square post and ferrule assemblies mate with Berg PV card connectors.

VERTICAL STAKE-TO-BOARD PV RECEPTACLE

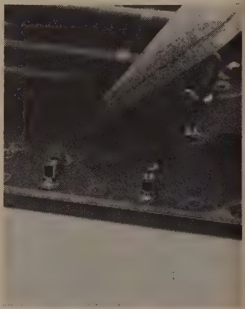
Receptacle stakes to PC board allowing dense packaging configuration by parallel mounting 1/16" glass-epoxy circuit boards. Features top or bottom entry which gives greater flexibility in placement on circuit board. Two-piece design provides lasting retention even after repeated cycling. Reliable application machines substantially reduce applied cost.

(See Bulletin 118 for additional information.)

HORIZONTAL STAKE-TO-BOARD PV RECEPTACLE

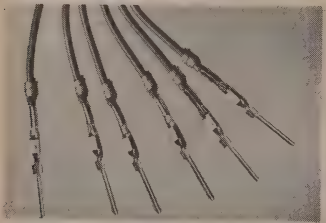
This version of the Berg PV receptacle is staked to the PC board, then wave soldered. Its design allows for dense packaging configurations in vertical mounting 1/16" glass-epoxy circuit boards. Horizontal PV receptacles can be employed with BergPin terminals to provide quick pluggability. Receptacles are supplied in strip form for high-speed machine staking. **(Write for additional information.)**

VERTICAL PV RECEPTACLE



HORIZONTAL PV RECEPTACLE

CRIMP-TO-WIRE MALE PIN



Compatible with BergCon .025" square interconnection system. Makes flying-type connector when mated with Berg Mini-PV receptacle and used with Mini-latch housing. Maximum current rating: 5 amperes. 5.0 milliohms maximum contact resistance when mated with a Mini PV contact. **(Write for additional information.)**

DAISY CHAIN FOR PRE-TESTING LAYOUTS

Here's a back-panel wiring system in easy-to-handle reel form. Consists of a continuous length of #28 gauge stranded wire with 250 insulated PV's crimped at constant intervals (2½" to 5" center-to-center spacing). Eliminates wire measuring, stripping, soldering, or expensive handtool terminating in your plant. **(See Bulletin 101.)**

MINI-JUMP CONNECTOR

MINI-JUMP, provides flexibility in circuit programming of mini-computers, card readers, printers, modems, and POS equipment. It allows for high density packaging; is stackable in both directions on .100" centers and up. Low-profile design permits tight packaging in the vertical plane. Mates with industry standard .025" square pins or .028" round pins. MINI-JUMP, which features Berg dual-metal receptacles, is supplied in a variety of package sizes. **(See your Berg Sales Engineer for additional information.)**

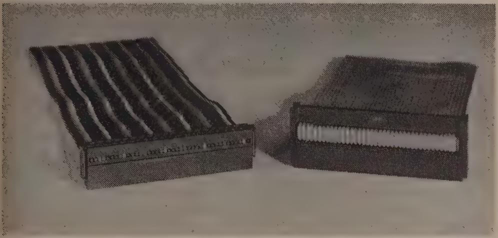
BERG ELECTRONICS/DIV. E. I. du PONT de NEMOURS & CO., INC./ NEW CUMBERLAND, PA. 17070/TEL.: (717) 938-6711

POSITIVE-LATCH Quickie

CONNECTORS TERMINATE MULTI-LEAD CABLE IN ABOUT 10 SECONDS

The Berg QUICKIE series of connectors is designed to interface with flat, flexible round conductor cable on .050″ centers. Connectors in this series eliminate the time problems and expense of pre-stripping.

STANDARD FEMALE CONNECTOR



This form is used to interface flat flexible round conductor cable on .050″ centers to .025 square wire-wrapping pins on .100″ square grid. (It also mates with .028″ round pins.) The standard QUICKIE Connector consists of two basic parts — the housing and the cover. A third part — the strain relief — is not essential in all uses.

QUICKIE ASSEMBLIES SUPPLIED WITH STRAIN RELIEFS

Type	Part Number	Cover Style

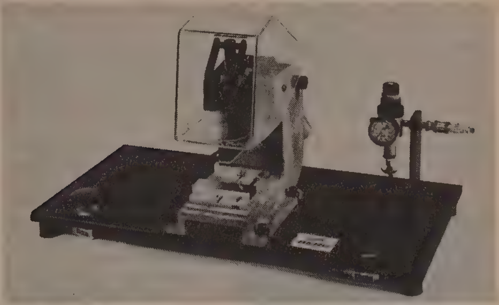
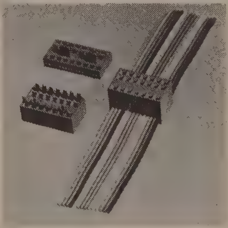
Notes: A — Closed end cover style
B — Thru end cover style

QUICKIE ASSEMBLY EQUIPMENT



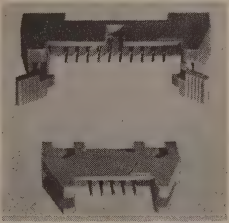
A hand-powered assembly tool and an air-powered machine are available to meet your specific production requirements. Both machines accommodate the various forms of the QUICKIE Connector.

QUICKIE DIP AND IC CONNECTORS



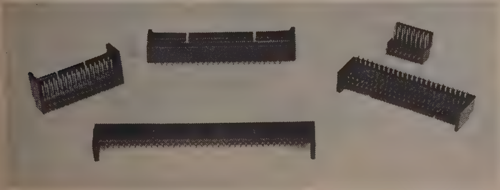
Female IC and Male DIP versions of the QUICKIE Connector are useful for system wiring interconnections and for test applications. Both types incorporate the same cable piercing action as the standard female QUICKIE Connector. For complete details, contact your Berg Electronics Sales Engineer.

QUICKIE SHIELDED RIGHT-ANGLE HEADERS



These headers which feature a positive-latch design, mate with standard female QUICKIE to provide round-pin termination on a .100″ grid. Shielding protects contact from damage while disconnected. Supplied in six sizes. (Also available without latches but with mounting holes.)

See Bulletin 131 for a comprehensive listing of the various forms of the QUICKIE Connector.



SHIELDED RIGHT ANGLE HEADERS FOR .100″, .125″ OR .150″ GRID

Headers consist of glass-reinforced Nylon housings having .025″ square pins on .100 grid which are molded in position for maximum strength. The configuration provides an integral top shield that serves to protect the pins from damage, plus side shields that prevent pin bending when female housings are removed. **See Bulletin 150.**

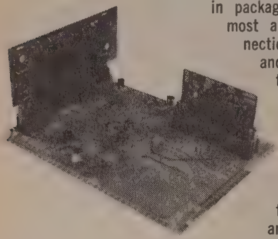
BERG ELECTRONICS/DIV. E. I. du PONT de NEMOURS & CO., INC./NEW CUMBERLAND, PA. 17070/TEL.: (717) 938-6711

BergLok MODULAR INTERCONNECTION BLOCKS

. . . A SIMPLE, RELIABLE WAY TO MOUNT REPLACEABLE DAUGHTER-BOARD MODULES IN ELECTRONIC ASSEMBLIES

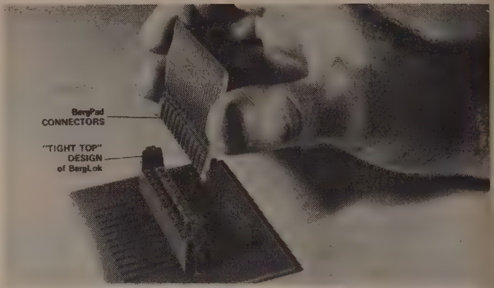
BergLok Connector Blocks provide a vertical mounting system for logic cards, ceramic substrates, and printed circuit cards, single or double sided. These blocks afford complete pluggability of modules into any conventional PC mother board, 1/16″ thick. Standard center-to-center spacing is .200″.

These connector blocks can be mounted in any position on the mother board and, thus, permit complete flexibility in packaging design and assembly. In most applications, BergLok Interconnection Blocks resist impact, shock and vibration without **supplementary support devices.**



Blocks have snap-lock base to anchor connectors firmly in mother board prior to wave soldering. No tools or fixtures needed. End-block latches lock daughter-boards firmly in place during handling and shipping. Yet boards can be easily removed for servicing or replacement.

(For complete details, request Bulletin 116.)



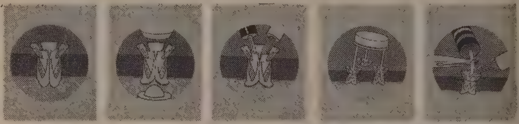
The tightly-controlled card guide that guarantees the stabilization of .062″ daughter board in BergLok blocks is known as **"Tight-Top."**

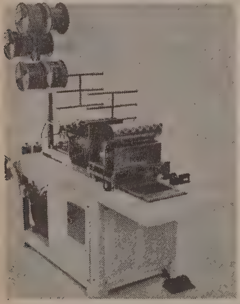
"BergPad," a terminal which is applied to the edge of P.C. board to replace copper-clad fingers, eliminates the problems of peel strength and wave solder thickness control. BergPad terminals can be applied to one side of the standard .062″ board or to both sides of .031″ to .045″ board. (Write for details or see your local Berg Electronics Sales Engineer.)

Griplet® LEAD-HOLDING CONNECTOR FOR PC BOARDS...

. . . MACHINE-INSERTABLE AT RATES UP TO 100,000 PER HOUR

The Griplet connector is inserted into holes in a PC board in order to hold component leads or wires at a desired depth. It protects the pads, firmly retains the inserted conductor and promotes a more reliable solder joint . . . while providing faster circuit assembly. Griplets are also used as a mechanical means of obtaining an electrical connection between two sides of a PC board.





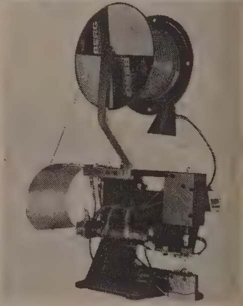
MULTIGRIP MACHINE

The Multigrip is designed for multiple inserting and staking of Griplet connectors in large quantities of identical boards. Rate: approximately eight boards per minute; inserts up to 70,000 Griplet connectors per hour. Berg also has several other Griplet model machines. **(See applicable product bulletin for complete details.)**

MODEL K

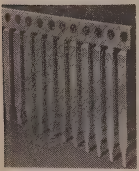
Semi-Automatic Machine. Designed for economy and reliability. Inserts and stakes one connector per cycle. Rate: approximately 1,800 per operator-hour.

(See Bulletin 301 for complete listing.)



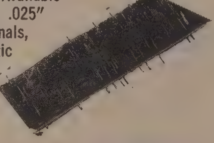
BergLance LOW-COST WIRE-WRAPPING POSTS...

. . . FOR RAPID, RELIABLE STAKING IN CIRCUIT BOARD



BergLance posts and application machines provide high-speed staking of termination points in circuit boards for radio, TV, electronic organ, and similar consumer electronic products. Available in 2 basic cross-sections (.025″ x .061″ and .025″ square) and with choice of lengths. Terminals, which are supplied in strip form for automatic insertion, have solder pre-coat and high-quality 60-40 tin lead finish.

(See Bulletin 107 for additional information.)



Berg "Shotgun" Machine has staking potential of up to 150,000 pins/day. Board area — 11″ x 12″. Many other machines available to meet prodution needs.

BERG ELECTRONICS/DIV. E. I. du PONT de NEMOURS & CO., INC./NEW CUMBERLAND, PA. 17070/TEL.: (717) 938-6711

Minisert™ LOW PROFILE, MINIATURE PC SOCKET

PROVIDES REPEATED PLUGGABILITY

The Berg MINISERT is a superior pluggable socket that assures positive retention in the circuit board prior to soldering, and spring-to-board electrical contact after soldering. The unique design of the MINISERT cup and spring extension allows solder to be drawn to the top surface of a two-sided board, producing a solder fillet on the top pad without overflow into the socket.

An elastomeric seal keeps foreign matter out of the socket before and after the component lead has been inserted. This seal remains in place throughout the life of the socket.

The MINISERT accepts round leads ranging from .012″ to .022″ diameter, or flat leads .008″ to .015″ thick by .015″ to .023″ wide. Sockets will fit a hole size ranging from .050″ to .058″ and are furnished on a metal carrier strip for insertion by the Berg MS-105 Machine. This machine provides substantial savings in time and in total applied cost.

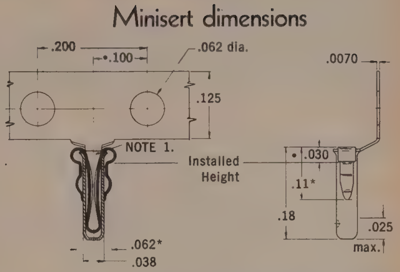
The MINISERT socket is also supplied in Kapton tape; it can be clipped to length for manual insertion in dual-in-line pattern or for terminating flat cable PC board jumpers. Those sockets are on .100″ centers. Supplied on reels of 25,000 or 5,000 socket quantities.

FEATURES

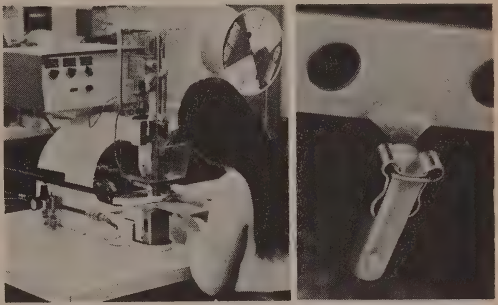
- Low-Profile — Extends only .030″ above and .088″ below a 1/16″ board.
- Fits wide range of hole sizes; accepts many sizes of round or flat leads.
- Provides repeated pluggability for dual-in-line packages, LED's, lamps, transistors, etc.

Part Number	Standard Packaging	Recommended Applicator
75060-007	25M per reel	MS-105
75060-008	5M per reel	MS-100
75315-001	Loose piece	Hand Tool
75540-001	25M reel (KAPTON)	Hand Inserted
75540-002	5M reel (KAPTON)	Hand Inserted

(See Bulletin 120 for complete details.)



NOTE 1. Elastomeric Seal keeps foreign matter out of the socket before and after component lead has been inserted. This seal remains in place throughout the life of the socket.



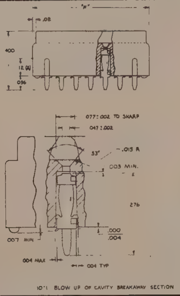
Berg pneumatically operated MS-105 machine inserts approximately 2,000 sockets per hour. A hand-operated (MS-100) insertion device is available for small runs; rate 800-1,000 per hour. A handtool kit can be purchased for prototyping purposes.

DUAL-IN-LINE SOCKET FOR IC PACKAGING ON .600″ CENTERS

Designed for low-cost, high-density production packaging, these sockets have universal mounting and packaging capabilities. They are available in solder-tail with 14, 16, 18, 22, 24, 28 and 40-lead configurations. Sockets will fit .040″ to .045″ diameter board holes.

Terminal material is .006 ASTM, 510 Phos. Bronze ¾-hard. Terminal platings are available in .0001-.0003 thick bright acid-tin pre-plating, or 13K gold inlay .0005 thick over .0005 nickel underplate with .00010 gold-flash over all.

One-piece socket bodies are precision molded of thermo-set phenolic resin which has excellent electrical, mechanical and thermal characteristics. A notch at one end of the body provides polarization. Standard color: black. Sockets are packaged in special IC tube carrier to facilitate feed to automatic equipment.



Dual-In-Line Sockets are packaged in special plastic tube carriers which serve to protect the sockets and to facilitate feed to automatic equipment. (Tubes can be used with Universal and Gardner-Denver Equipment).

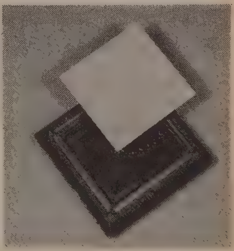
LOW-PROFILE DUAL-BEAM IC SOCKET

This new dual-in-line receptacle is compact and of low-profile design. It meets EIA standard RS-415; is low cost and available with Tin or Gold plating. It is designed to prevent solder wicking and to accept .015 x .040 leads. Features include press-fit terminal leg .033 ±.003 diameter-ventilated molding with dimples to allow easy cleaning of the completed PC board assembly.

(Write for complete details.)

LEADLESS RECEPTACLES

Berg Electronics is active in packaging designs which mate a leadless package to the mother-board thus giving a "wiping-pressure" type connection surface. This leadless receptacle system avoids "plated-thru-holes" in a board, and allows for the widest choice interconnection media. These packages simplify component assembly and/or replacement and eliminate the danger of damaging costly components with hot solder.



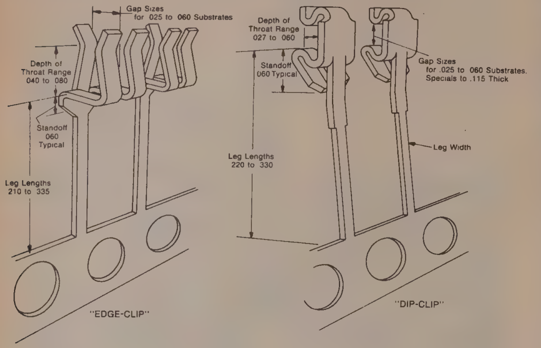
Write for additional information.

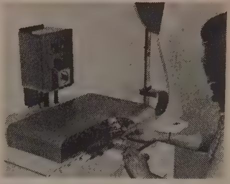
*Solok** TERMINATIONS FOR CERAMIC HYBRID MICROCIRCUITS

Solok* Terminations clip onto substrate rather than into holes drilled through it. They mechanically hold their position until soldered for a permanent connection. Berg offers a complete terminal application machine system. Its broad standard line is backed by an unusual custom design capability.

*DuPont Trademark

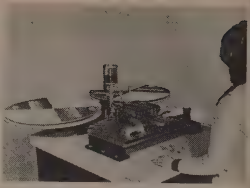
TWO BASIC TYPES . . . MANY CONFIGURATIONS





EDGE-CLIP MACHINE

This machine is used for single edge-mounted terminals. It can be programmed to install terminals at any given pad location or to skip terminals in an area where there is no pad. Rate: Up to 1500 packages per hour.



DIP-CLIP MACHINE

This semi-automatic machine is used for DIP type terminations; it, too, operates at rates up to 1500 substrates per hour. (Terminals must be ordered "left" and "right" handed for this machine.)

DEFINITION OF TERMS

1. **Depth of Throat** — Distance from edge of substrate to point where terminal contacts pad.
2. **Standoff** — Distance that terminal will hold substrate away from mounting board.
3. **Leg Length** — Distance from substrate to end of leg **with carrier strip removed.**
4. **Gap Size** — Opening in clip area of terminal designed to assure a mechanical hold on the substrate.

For complete details and specifications, contact your local Berg Sales Engineer or request Bulletin 124.

Lugs and Tie Points

FOR BOBBINS, COIL FORMS, SHIELD CANS, ETC.

Strip terminals and machines matched for rapid and uniform staking

THRU-LUG TERMINALS — are precision stamped with sections that, when staked, clinch the terminal securely to both sides of the board. Catalog Section #406.

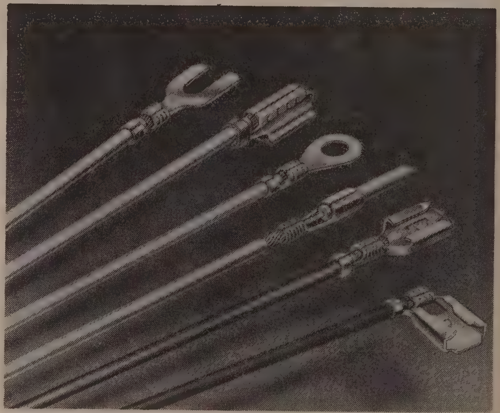
EXTRUDED COLUMN LUGS — designed for high-strength retention in circuit and terminal boards. Job-matched machines rapidly stake as many as six lugs simultaneously. Catalog Section #407.

COIL FORM AND BUTTERFLY TERMINALS — feature specially designed tips for rapid insertion and immediate retention in circuit boards. Provide wrapping and soldering points for coil winding wire. Catalog Section #202.

CAN LUGGING SYSTEMS — Berg offers a complete line of lugs for mounting shield cans to circuit boards. Designs include flat-sided or cylindrical can types for flush or elevated mounting and four styles to automatically key cans. Catalog Section #203.

BOBBIN TERMINATIONS — Berg's system for inserting lugs into molded bobbins eliminates costly insert molding and provides secure connection points. Available in thru-lug and blind-pocket types. Catalog Section #204.

Truon™ CRIMP-TO-WIRE TERMINALS AND SPLICES



Berg's Truon™ terminals are available in a full range of designs, including: straight and flag female receptacles, male tabs, rings, spades, taper pins and splices. All styles have matched application tooling for high-rate production with uniform, highly-reliable crimping with a gas-tight connection. See Bulletin #201.

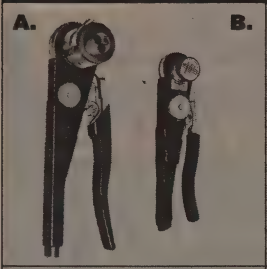
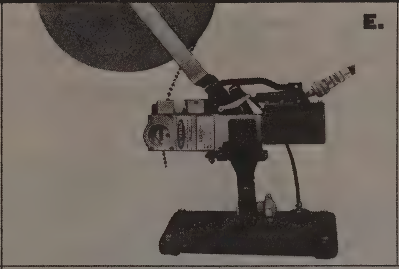
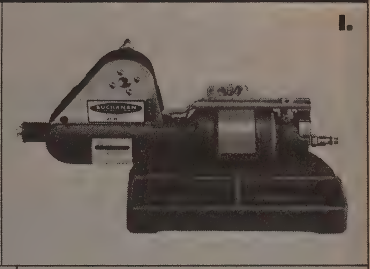
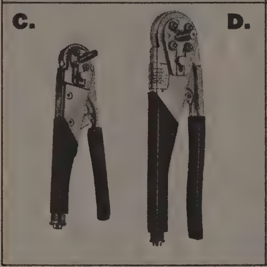
BUCHANAN

Headquarters for universal crimping tools









8-STEP ADJUSTABLE HAND TOOLS

Available in Standard and Miniature sizes which meet all the design and performance requirements of MIL-C-22520. Reliable, cycle-controlled tools with turret/positioner or "eyeball" operation, 8 crimp depths and octadent crimp.

A. Standard Tool (Cat. No. 615708) for wire barrel sizes #12 through #22 and wire sizes #12 through #26 AWG.

B. Miniature Tool (Cat. No. 615717) for barrel sizes 20 through 28 and wire sizes 20 through 32 AWG.

MICROCRIMP TOOLS

Available in Standard and Miniature sizes which meet all the performance requirements of MIL-C-22520. Infinitely adjustable cycle-controlled tools with direct reading indicators and octadent crimp.

C. Miniature Microcrimp Tool (Cat. No. 612118) for most miniature pin and socket contacts #20 and smaller and wire sizes #20 through #30 AWG.

D. Standard Microcrimp Tool (Cat. No. 612548) for pin and socket contacts #12 and smaller and wire sizes #12 through #26 AWG.

E. AUTOMATIC FEED PNEUMATIC CRIMP TOOL

Meets performance requirements of MIL-C-22520.
An octadent tool that automatically feeds contacts from disposable carriers. For portable or bench applications with proprietary or military contacts. Wire sizes #12 through #28 AWG. Contacts #12 through #20. Available with standard or miniature indenters.
Standard—Cat. No. 11148
Mini—Cat. No. 612916

C-FRAME TOOLS

Light weight, easy to operate, compact, cycle controlled. Available with various dies.

CTS Standard Size, Cat. No. 11545, for terminals 12-10 through 26-24. Meets performance requirements of MIL-T-22910.

F. CTM Miniature, Cat. No. 11707-1, for sizes 16-14 through 26-24. MS 90413-1A. Listed under QPL MIL-T-22910 CLASS 1.

G. CHS Standard Size, Cat.No.612648. Pop-in die. M22910/7-1. Listed under QPL MIL-T-22910 CLASS 1.

H. CHM Miniature, Cat. No. 612845. Fixed die. MS 90487. Listed under QPL MIL-T-22910 CLASS 1.

CD Tools. Special dies for special custom applications. Standard size (CDS) and miniature size (CDM). C-Frame or closed frame models.

I. EXTERNALLY ADJUSTABLE MANUAL FEED PNEUMATIC CRIMP TOOL

Meets performance requirements of MIL-C-22520.
Manual, cycle-controlled portable tool can be bench mounted (with a foot pedal). Octadent crimp. Wire sizes #12 through #30 AWG. Contacts #12 through #22. Size 8 contacts accommodated on application. Available with standard or miniature indenters. Uses MS 3191 or M22520/1 turrets for locating contacts. **Standard**—Cat. No. 612141
Mini—Cat. No. 615250

J. POSITIONER CONTROLLED TOOL

Conforms to MS 3191. This MIL Standard, non-operator adjustable, 4-indent cycle controlled tool crimps most proprietary and MS contacts, using inexpensive positioners.

Standard Positioner Controlled Tool Frame, MS 3191-A (Cat.No. 11210) wire sizes #12 through #26 AWG, for contacts #12 through 22.

MS 3191-1 and MS 3191-2 (Cat. Nos. 10692 and 11234) also available.

CW INDUSTRIES

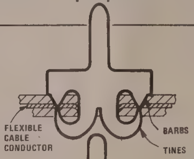
CeeWee† CONNECTORS FOR FLAT FLEXIBLE CABLES

For Complete Switch Specifications Request Catalog

†T.M. Appl. for

- Connection made without stripping cable, no nicks or scratches.
- Extremely rapid connection achieved easily.
- Built in strain relief, a standard.
- All connections made at the same time.
- Cold connections made; no heat damage possible.
- High temperature resistant thermoplastic insulator having outstanding chemical and electrical properties.

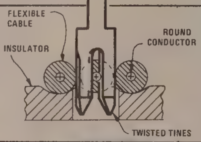
CONTACT TAIL CLINCHED TO CABLE



SERIES FOR FLAT FLEXIBLE CABLE WITH FLAT CONDUCTORS*

Contact is a special alloy stamping. Initially, the tines are vertical and unbent. A tool presses them through the cable. Contact is "in line" with conductor. A double clinch (from the two tines) is achieved for reliability. Very close (adjacent) centers possible.

CONTACT TAIL CUT INTO CABLE

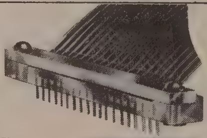


SERIES FOR FLAT FLEXIBLE CABLE WITH ROUND CONDUCTORS*

Tine edge bites through cable and into conductor for a good, clean contact. Conductor is thus twisted and placed in tension. Reaction forces assure continued additional firm contact of tines against conductor.

*Pat. applied for

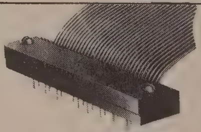
CF002-01



CF002-01 SERIES FOR FLAT FLEXIBLE CABLE WITH FLAT CONDUCTORS

Standard centers are .100"; closer centers are obtainable. Each contact tail makes multi-connections above and below each conductor.

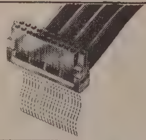
CF006-01



CF006-01 SERIES FOR RIBBON CABLE WITH ROUND CONDUCTORS

Standard centers are .050"; closer centers are achievable. Specially shaped contact tails assure constant reaction forces for reliable connections.

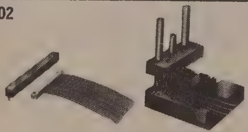
CF008-01



CF008-01 SERIES FOR RIBBON CABLE WITH ROUND CONDUCTORS ON .050" CENTERS

Tail uses standard CEE WEE pretwisted tines for connecting to Ribbon Cable. Contact nose has double leaf to accept .025" x .025" pins and .020 diameter pins. Built-in strain relief allows cable to come off vertically or horizontally.

CT002



UNIVERSAL FLAT CABLE ASSEMBLY TOOL — CT002

Compact, rugged, low-priced. Interchangeable parts adapt it to flat and round cable connectors. Fits standard arbor presses. Similar geared CT003 has built-in device to actuate upper ram.

Other components manufactured by CW INDUSTRIES include Slide, Toggle and Rocker Switches which are described in EEM Section 5100 and fully detailed in Catalog 2096. These include multi-purpose switches featuring miniaturization, having from 1 to 6 poles designed for loads up to 15.0 amps at 125 volts. Other CW components are Wire Wound Potentiometers detailed in Bulletin 2080 (3/4" diameter) and Precision Film Resistors available in 1/10 watt through 1/4 watt (RN55, RN60) and RN65). CW research and engineering facilities are always at your service, for consultation on any engineering or development problem.

For many years the electronic industry has relied on the wide range of products, engineering services and consistent production quality of Connector Corporation.

A limited cross section of Connector Corporation's line is illustrated. Your specific requirement can be exactly met and mass produced with good delivery. Many items can be supplied with leads attached and color coded, offering production savings for your assembly. Special items can be designed or developed at relatively low cost. Just let us know what you need.

Products are available in a wide range of insulations and contact materials:

Insulations include: general purpose or mica-filled low loss Phenolic, glass filled alkyd, polypropolene, ceramic,etc., in molded versions. Laminated types include XP, XXP, XXXP Phenolics, X2B Hard Rubber, Glass Epoxy, Glass alkyd.

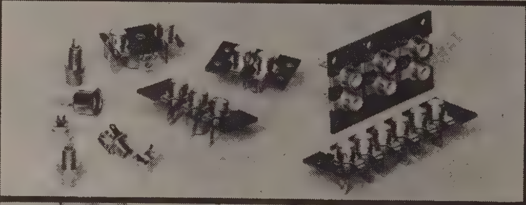
Contacts and Platings include: High tensile brass, phosphor bronze or beryllium copper with cadmium, electro tin, silver, hot tin dipped, silver-gold flash, gold plating, etc.

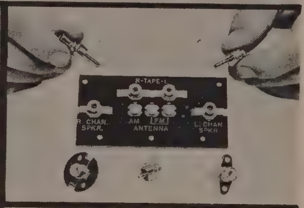
TUBE SOCKETS

Most standard and many special molded & ceramic configurations available as well as laminated socket types. Fixed or collapsible types of shielding are available.

MULTI PURPOSE PHONO CONNECTORS

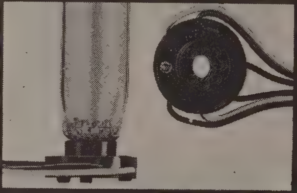
Sockets available in multiples up to 12 per section. Broad line of individual male and female types in a variety of mountings. Highly reliable for dependable repeated use.





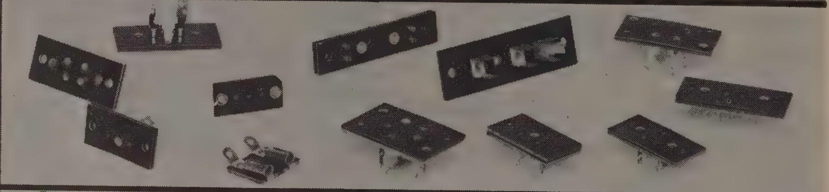
KINESCOPE SOCKET ASSEMBLIES

Include: Miniature Di Heptal Socket for 90° color tubes, 110° Eightar CRT sockets, miniature types for JEDEC E7-91, B7-247 basing (HEPTAL). Many special configurations and types may be furnished in quantity lots.



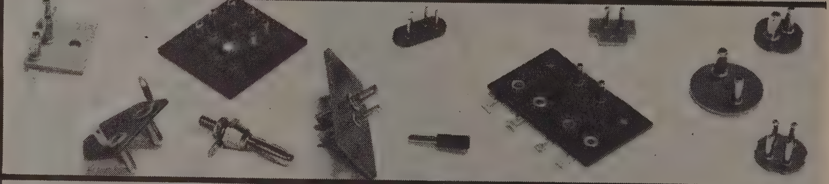
RECEPTACLES

Numerous varieties. Available in molded or laminated construction. Reliable contacts offer positive electrical and mechanical mating.



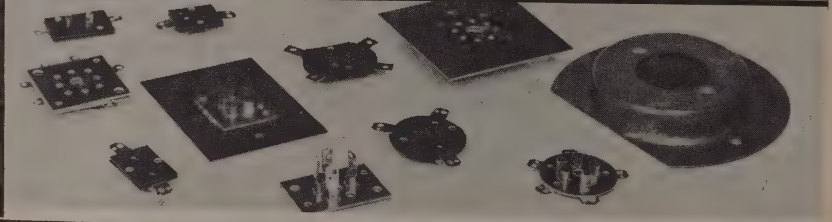
PLUGS

Numerous types available, with molded or laminated phenolic insulations. Leads may be supplied to specification.



BATTERY SOCKETS

Complete line for commercial & military batteries. Custom designed to your requirements.



CONNECTOR CORPORATION

6025 N. KEYSTONE AVENUE • CHICAGO, ILLINOIS 60646 • TELEPHONE: 312, 539-3108

TRANSISTOR SOCKETS

3- or 4-pin on .100 or .200 centers. TO3 power transistors.

NUVISTOR SOCKETS

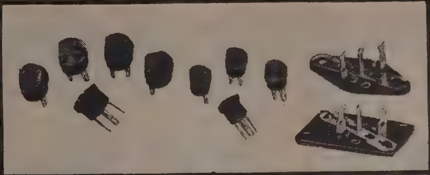
Miniature positive contact.

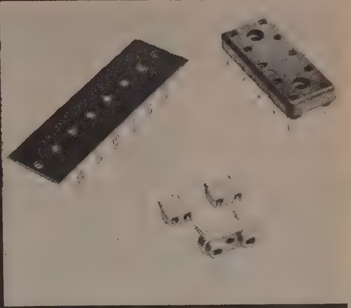
IC SOCKETS

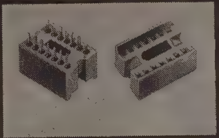
14-pin dual in-line on .100 centers.

CRYSTAL SOCKETS

Accommodate single and multiple crystals. Both p.c. and solder lug versions for crystals with .486, .273 and .192 pin centers and with .050 or .040 pin diameters. Available to MIL Specs.





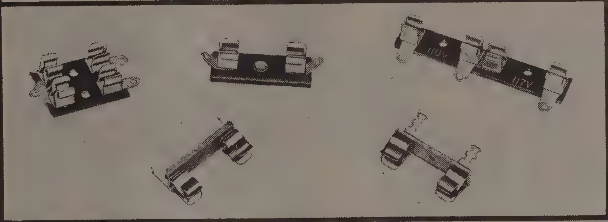


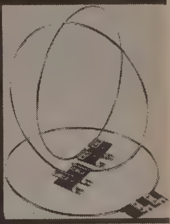
FUSE HOLDERS

Positive grip open type. Features: easy solderability, and versatility of construction which permit multiples or variations to your spec at reasonable cost.

UHF TV ANTENNAE

Attaches easily. Can be rotated in many different planes for optimum performance. Long life, trouble-free operation.



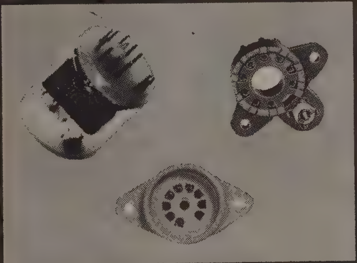


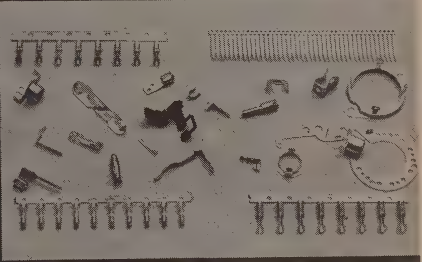
TRANSMITTER & HIGH VOLTAGE TUBE SOCKETS

Low loss at very high frequencies. Vented for maximum cooling of tube base and anode contact area by convection. Voltage breakdown characteristics are enhanced by barriers between contact positions.

PRECISION METAL STAMPINGS

Bulk or chain type contacts, terminals and flat stampings for your high production needs.



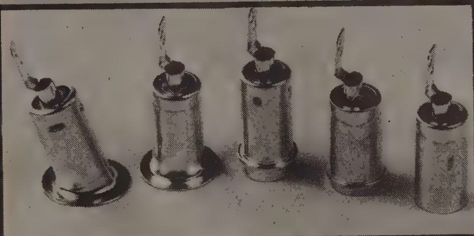


RF COAXIAL ANTENNA CONNECTORS

For auto receivers & similar applications. Rugged construction. Excellent contact resistance and retention.

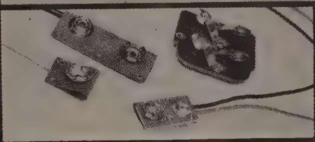
MULTI-PIN MALE/FEMALE CONNECTORS

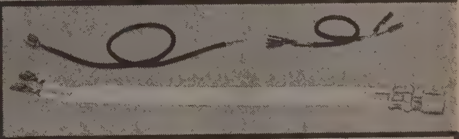
Provide quick reliable connect and disconnect for cable assemblies. Insert and extract easily, yet have reliable contact retention and resistance.



BATTERY CONNECTORS AND WIRE ASSEMBLIES

Snap-on and positive contact types available with wired leads if desired. Wire assemblies furnished to your specifications as to type of wire, length and termination attachments.





SEALECTRIC

SEALECTRIC SWITCHES AND RELAYS

For standard & special applications, send us your requirements.

Pictured below are additional items from our extensive standard product line, including some of our more recent designs and developments.

Just couple your requirements with our engineering expertise and precision tool, molding, metal and plastic fabricating capabilities.

The design and resulting product will fulfill your needs at the lowest possible cost. Either we'll modify one of our existing products for you, or design a new one to your specs — whichever meets your needs best.

The final product will be 100% produced in our own complete manufacturing facility with consistent quality control throughout.

For several decades, we have satisfied industry's needs for engineering expertise and manufacturing to precision quality at lowest cost.

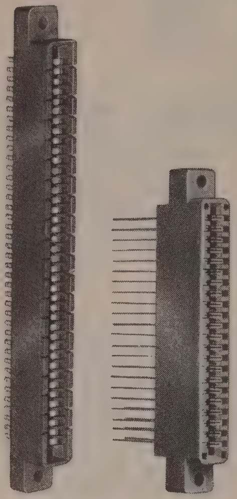
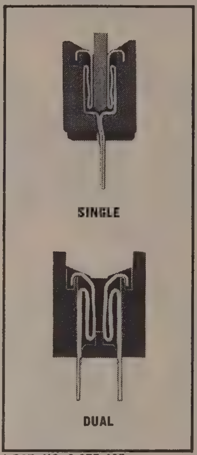
CONTINENTAL CONNECTORS

Precision Electronic Connectors For Commercial & Military Applications

SERIES 600 CARD-EDGE CONNECTORS FOR PRINTED CIRCUITRY



BELLOWFORM CONTACTS*



* PAT. NO. 2,875,425

Connector body molding material is made of a variety of compounds such as Diallyl Phthalate, for commercial and military applications. Contacts are gold plated phosphor bronze of beryllium copper with optional plating in accordance with all MIL SPECS or special customer requirements. These contacts, with "bellowform" construction, are durable and capable of withstanding thousands of insertions and withdrawals without failure; they are virtually indestructible.

Series 600 printed circuit connectors represent one of the most extensive lines of receptacle or card-edge types. A wide variety of single readout and double readout construction, with sizes from three to 210 contacts are available.

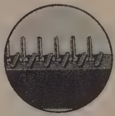
CONTACT CENTERS:
.050″, .075″, .100″, .125″, .140″, .150″, .156″ and .200″

BOARD THICKNESS:
1/32″, 3/64″, 1/16″, 3/32″ and 1/8″

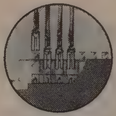
WIRING STYLES:
Eyelet lug for soldering, solderless-wrap terminations for wire-wrapping technique, contacts for dip or flow soldering and taper tab solderless wiring

EYELET LUG

SOLDERLESS-WRAP



DIP SOLDER

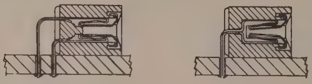


TAPER TAB

MIL SPECS:
Continental Printed Circuit Connectors meet or exceed applicable MIL-C-21097 specifications. They withstand a 50-hour salt spray test and ambient temperature range of −55°C to +125°C.

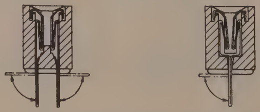
SELECTIVE PLATING — Continental's continuous process selective plating deposits an equal amount of gold on each contact. The contacts pass through various cleaning and plating baths, resulting in a controlled amount of gold uniformly deposited on the critical contact area. By plating gold on the contact surface only, selective plating automatically brings down your connector cost enormously.

PRINTED CIRCUIT APPLICATIONS



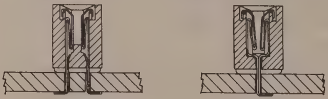
DUAL SINGLE

RIGHT ANGLE MOUNTING WITH CONTACTS FOR DIP SOLDERING TO UNDERSIDE OF PC BOARD



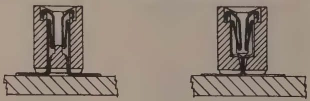
DUAL SINGLE

VERTICAL MOUNTING WITH CONTACTS FOR SRAIGHT OR RIGHT ANGLE HARNESS WIRING



DUAL SINGLE

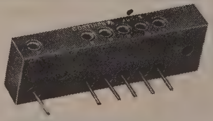
VERTICAL MOUNTING WITH CONTACTS FOR DIP SOLDERING TO UNDERSIDE OF PC BOARD



DUAL SINGLE

VERTICAL MOUNTING WITH CONTACTS SOLDERED TO TOP SIDE OF PRINTED CIRCUIT BOARD

PC TEST POINT



SERIES 672. Provide conveniently located test points to check printed circuitry. Available with 4, 5, 6, 8, 10, 11, 20, 21, 28, 30, 42 and 63 contacts which grip and hold securely a standard .080″ test probe. Connectors have recessed and floating pin terminals mounted at right angle to the test socket. Pins dip solder to printed circuit board.

CONTACT CENTERS:
.100″, .125″, .156″, .200″

WIRING STYLES:
.025″ and .045″ square wire-wrapping terminals

BOARD THICKNESS:
Accepts .054″ to .071″ (1/16″) board

TERMINATION:
Dual readout with various sizes from four to 100 contacts

PLATING:
Gold or tin

SERIES 600-100. .025″ SQUARE TERMINATIONS
12 to 100 terminals with .100″ contact centers

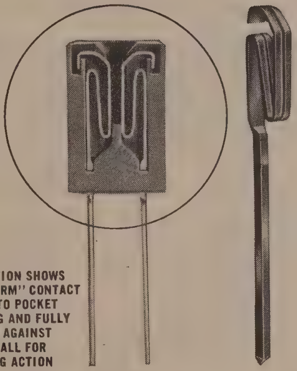
SERIES 6125-250. .025″ SQUARE TERMINATIONS
Four to 100 terminals with .125″ contact centers

SERIES 600-156. .045″ SQUARE TERMINATIONS
56, 60, 72 terminals with .156″ contact centers

SERIES 600-83. .045″ SQUARE TERMINATIONS
36, 56, 64 terminals with .200″ contact centers

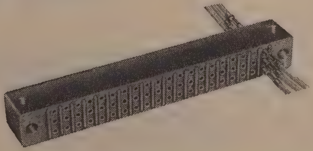
"Bellowform" Contacts have a coil spring action grip that clasps board firmly over 100% of the contact area. Exclusive design permits use of undersized or oversized board tolerances while maintaining low contact resistance. The contact "rides" with the pc board under extreme vibration conditions or misalignment. Our patented "bellowform" contacts are also ideal for microelectronic circuits where damage can occur with frequent insertions into cantilever type pc connectors, and for circuits with ceramic substrates that can wear conventional contacts.

Contacts are held in place mechanically with a 90° twist at the base of the molding. They can be replaced easily with a simple tool supplied by Continental Connector. We are the only company that manufactures printed circuit connectors with "bellowform" contacts for wire-wrapping applications using either .025″ or .045″ square terminations.



CROSS-SECTION SHOWS "BELLOWFORM" CONTACT HOOKED INTO POCKET OF MOLDING AND FULLY SUPPORTED AGAINST MOLDING WALL FOR COIL SPRING ACTION

TERMINAL BLOCKS



SERIES 145-58, 145-50 AND 145-48. Precision reamed solderless taper pin receptacles in single, dual and triple row construction, molded-in for highest durability. Available in any combination of feedthru individual or shorting terminals. Internal bus between any combination of terminals eliminates external wiring. Mounting holes for stacking, right angle and perpendicular mounting. Molding is glass filled Diallyl Phthalate, Type GDI-30 per MIL-M-14 specifications.

Precision Electronic Connectors For Commercial & Military Applications

RIGHT ANGLE SERIES PLUG & SOCKET TYPES FOR PRINTED CIRCUITRY

IN ACCORDANCE WITH MIL-C-55302, MIL-E-5400, MIL-C-28747 SPECIFICATIONS

.050″, .100″, .156″, .200″ CONTACT CENTERS

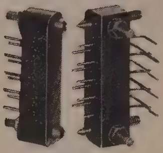
SERIES 145-5. 7, 9, 11, 15, 19, 23 contacts. Solder cup on socket, dip solder pin for plug. For use in airborne electronic equipment in accordance with MIL-C-55302 specs.

SERIES 600-1-45. 45 contacts on .050″ center spacing. Right angle configuration of three rows of dip solder contacts.

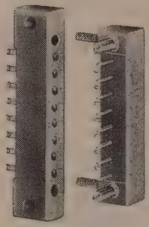
SERIES 600-1-50. 50 contacts on .100″ center spacing.

SERIES 600-70. 4, 8, 10, 12, 13, 22, 28 single row contacts on .156″ center spacing. Guide pins in plug and guide bushings in socket provide polarized mating of parts.

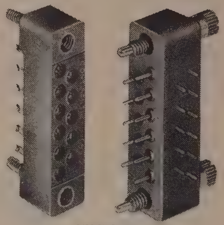
SERIES 683. 11, 18, 19, 23, 33, 38 with polarizing screwlocks or guidepins and guide sockets. Meet aircraft requirements for vibration and high altitude.



SERIES 145-5



SERIES 600-70



SERIES 683

SERIES J RIGHT ANGLE OR STRAIGHT THRU WIRING — .100″ CONTACT CENTERS

11, 21, 31, 51 CONTACTS

IN ACCORDANCE WITH MIL-E-5400 SPECS

These plug and socket connectors are widely used in all electronic systems. Their small size and rugged construction make them particularly adaptable to aircraft applications. They can be used for mounting on single or dual sided printed circuit boards of varying thickness. The contact configuration is excellent for flat cable use. Plug contacts are integrally molded into the rugged body material and are protected by a high strength, single piece molded shell of glass fiber reinforced phenolic. Molding configuration prevents mismatching of plug and socket.

Socket contacts are wire crimp removable and free floating. They feature a self-wiping action that eliminates the need for precious metal plating such as gold. Excellent conductivity and a low millivolt drop that meets MIL-SPEC requirements are assured.

ELECTRICAL AND MECHANICAL RATINGS:

Voltages	Breakdown	Recommended Test
At Sea Level	2000V. RMS	1325V. RMS
At 70,000 Ft.	400V. RMS	300V. RMS

Current Rating: 3 Amps Continuous .... 5 Amps Max.
Minimum Creepage Between Contacts .... .047″
Minimum Air Space Between Contacts .... .047″
Male Contact Pin Diameter .... .030″
Crimp Barrel for Socket Contact: Accommodates #22, #24, #26 AWG Wire

NOTES:

1. Body Material: Glass fiber reinforced phenolic Type MFE per MIL-M-14F.
2. Contact Material: Copper alloy, gold plated.
3. Socket contact 2500-S2A22-39 must be ordered separately.
4. For electroplated tin contact add suffix "SN" to connector part number (J21P90-15-SN).

CONTINENTAL CONNECTORS

Precision Electronic Connectors For Commercial & Military Applications

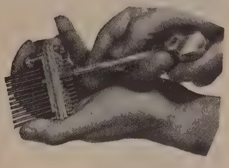
RACK AND PANEL CONNECTORS FOR VARIOUS EQUIPMENT

A complete line of high-reliability connectors for computers, missile, aircraft, communications and other critical electronic applications. In addition to standard specifications, these connectors can be supplied with such optional accessories as aluminum hoods, protective shells, polarizing screwlocks* and solder filled contacts. Various molding compounds are also available.

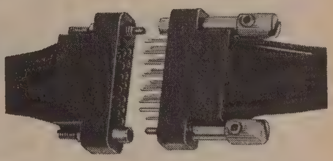
* PATENT NO. 2,746,022

MICROMINIATURE AND MINIATURE WITH CRIMP REMOVABLE CONTACTS

AVAILABLE WITH 7, 9, 14, 18, 20, 26, 34, 42, 50, 66, 75, 104 & 152 CONTACTS CONFORM TO MIL-C-22857 SPECIFICATIONS



Continental Connector's removable contacts and wire crimp terminations eliminate all connector soldering operations. Contacts are supplied separately and wired independently of connector body, and can be readily replaced with simple, low cost hand tools. Connectors are available with guide pins and sockets or screwlock hardware.

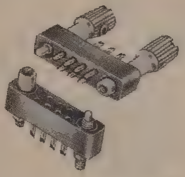


SERIES 25. Removable contact connectors are interchangeable with our Series 20 fixed contact types. .025″ and .045″ square solderless-wrap terminations with .062″ or .040″ pin diameters are also available. Optional aluminum hoods, protective shells and mounting plates can be supplied. Shielded crimp removable contacts for RG-178B/U and RG-196A/U coaxial cable can be intermixed in any combination with the standard type contacts. Select guide pins and sockets or polarizing screwlocks for mating hardware.

SERIES MMM. Five thru 75 contact sizes. Interchangeable with Series MM-22 fixed contact types. Can be supplied with guide pins and guide sockets, polarizing screwlocks and aluminum hoods.

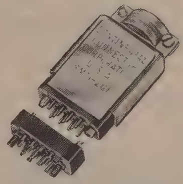
SERIES 25MM. Center screwlock locking device. Available with 50, 76, 100 and 200 contact sizes. Contacts are on .100″ centers.

FIXED CONTACT MICROMINIATURE, SUBMINIATURE, MINIATURE



SERIES MM-22 MICROMINIATURE. Five to 104 contacts. Ruggedized to withstand shock and vibration extremes. Meet MIL-C-28748 specs or commercial type. Available with guide pins and guide sockets, polarizing screwlocks, cable brackets and aluminum hoods.

Breakdown Voltage (sea level), 2000V. RMS • Current Rating, 3A • Minimum Creepage Between Contacts, .070″ • Minimum Air Space Between Contacts, .040″ • Contact Center Spacing, .093″ • Pin Diameter, .030″ • Solder Cup, #22 AWG wire.



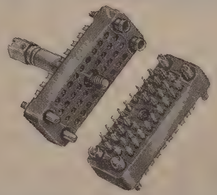
SERIES SM-20 SUBMINIATURE. Five to 104 contacts. Meet MIL-C-28748 specs or commercial type. Optional features include guide pins and guide sockets, polarizing screwlocks, protective shells and aluminum hoods.

Breakdown Voltage (sea level), 2000V. RMS • Current Rating, 5A Continuous, 7.5A Maximum • Minimum Creepage Between Contacts, .078″ • Minimum Air Space Between Contacts, .045″ • Contact Center Spacing, .125″ • Pin Diameter, .040″ • Solder Cup, #20 AWG wire.

SERIES 20 MINIATURE. Five to 104 contacts. Similar to above except larger size. Meet MIL-C-28748 specs or commercial type. Hexagonal configuration with 1, 4, 5, 7, 9 and 10 contacts is also available.

Breakdown Voltage (sea level), 3000V. RMS • Current Rating, 5A Continuous, 7.5A Maximum • Minimum Creepage Between Contacts, .125″ • Minimum Air Space Between Contacts, .070″ • Contact Center Spacing, .150″ • Pin Diameter, .040″ • Solder Cup, #20 AWG wire.

CENTER SCREWLOCK



SERIES 1900. 10, 22, 34, 50, 78, 104 and 152 contacts. Double lead thread action screwlock, stainless steel side channels and closed entry contacts for maximum reliability. Series 2500 available with 152 removable contacts.

Breakdown Voltage (sea level), 3000V. RMS • Current Rating, 10A Continuous, 13A Maximum • Pin Diameter, .062″ • Minimum Creepage Between Contacts, .110″ • Minimum Air Space Between Contacts, .050″ • Contact Center Spacing, .150″ • Solder Cup (also solderless-wrap and taper pin) #16 AWG wire.

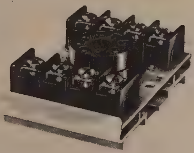
Curtis® relay socket assemblies

TYPES RS2, RS4 AND RS6

For popular cradle relays. Designed for applications with relatively low power requirements, Curtis type RS2, 4 and 6 relay sockets are rated for 5 amps at 125 volts. These compact relay sockets feature a maximum profile of only 29/32″. Relay sockets are mounted on high quality printed circuit board material. Barrier type terminal blocks have #2-56 terminal screws with surface clamps handling up to #16 wire, AWG. Track is type TR1, pre-punched vinyl.

SPECIFICATIONS

Model	Overall Dimension (OD)	Units per 48″ Track	Receptacle Type	For Use With
RS2	2″	24	10-pin	2 P.D.T. relays with 2 coil leads
RS4	2¼″	21	16-pin	4 P.D.T. relays with 2 coil leads
RS6	3″	16	22-pin	6 P.D.T. relays with 2 coil leads



TYPES RS8 AND RS11

Octal base and 11-pin relay socket assemblies in TR2, pre-punched, vinyl track save mounting time — tracks need just 2 or 3 mounting screws per 4-foot length. Recessed, slotted center chamber permits rocking relay without fracturing center post. Clearance hole in printed circuit board accommodates relay center posts. Barrier type blocks have #6-32 screws for #12 wire. Ratings are 10 amps, 250 volts.

SPECIFICATIONS

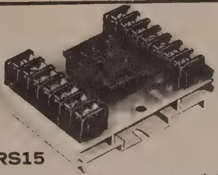
Model	Overall Dimension (OD)	Units per 48″ Track	Receptacle Type	For Use With
RS8	2″	24	Octal	Standard industrial 2 pole relays
RS11	2⅞″	16	11-pin	Standard industrial 3 pole relays

TYPES RS12 AND RS16

Accommodates modern, blade terminal relays. Mounted in TR3, pre-punched, vinyl track, these 8-pin and 11-pin socket assemblies can be snapped in or removed vertically without disturbing adjacent units. Capacity of RS12 and RS16 relay socket assemblies is 10 amps at 250 volts. Wave-soldered, coated circuit boards terminate in barrier type blocks with #6-32, nickel-plated screws to handle #12 AWG wire. Center distance of connectors is 7/16″.

SPECIFICATIONS

Model	Overall Dimension (OD)	Units per 48″ Track	Receptacle Type	For Use With
RS12	2⅞″	16	11-pin	3 P.D.T. relays with 2 coil leads
RS16	2¼″	22	8-pin	2 P.D.T. relays with 2 coil leads



TYPES RS14 AND RS15

Miniature relay sockets RS14 and RS15 incorporate miniature, SE series, barrier type terminal blocks. #2-56 screws and clamps for up to #16 wire (AWG) eliminate lugging and looping. Capacity is 5 amps, 125 volts. Terminal center-to-center distance is ¼″. Assemblies mount in pre-punched, vinyl track — RS15 in TR1, RS14 in TR2. As with all Curtis relay socket assemblies, the base is high quality printed circuit board material, wave-soldered and coated.

SPECIFICATIONS

Model	Overall Dimension (OD)	Units per 48″ Track	Receptacle Type	For Use With
RS14	2″	24	14-pin	Miniature 4 P.D.T. relays with 2 coil leads (no ground)
RS15	2¼″	21	15-pin	Miniature 4 P.D.T. relays with 2 coil leads and ground

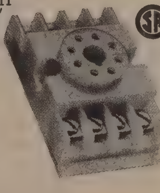
TRACK

Type TR1
Vinyl track 2 3/16″ wide with mounting holes 3/16″ x 5/8″ on 2″ centers. For relay socket types RS2, RS4, RS6 and RS15. 48″ lengths.

Type TR2
For relay socket types RS8, RS11 and RS14. 48″ lengths, vinyl with 3/16″ x 5/8″ holes on 2″ centers. 2⅞″ width.

Type TR3
Heavy vinyl track, 3⅜″ wide, with 3/16″ x 5/8″ holes on 2″ centers. Used with relay sockets RS12 and RS16.

NEW! CUS 8, 12 and 16
RELAY SOCKET ASSEMBLIES



- For octal-base or square-base, barrier type plug-in relays and timers
- Economical, yet virtually unbreakable (Molded of UL recognized white nylon)
- Compact, unitized design saves space
- 10 amp, 250/300 volt ratings
- Base mount or snap into TR2 or TR3 track
- Handles wire sizes up to No. 12AWG, without lugging

CURTIS INDUSTRIES, INC.
8000 West Tower Avenue, Milwaukee, Wisconsin 53223 Phone (414) 354-1500

DEPENDABLE DALE® CONNECTORS

SERIES EBT 156

PHYSICAL and ELECTRICAL
Number of Contacts: 6, 8, 10, 12, 15, 18 or 22
Contact Spacing: .156″
Board Thickness: .054″ to .070″
Board Slot Depth: .330″ **Current Rating:** 5 amps
Test Voltage between Contacts: At Sea Level: 1800 VRMS
At 70,000 feet: 450 VRMS
Insulation Resistance: 5000 meg. min.
Contact Resistance: 30 millivolts max. at rated current

COMPONENT MATERIAL
Body: Glass-filled phenolic per MIL-M-14, Type MFH, black
Contacts: Nickel silver per QQ-C-585, alloy 770, spring temper. Gold flash or tin plate optional.
Polarizing Key: Glass-filled nylon
Optional Threaded Mounting Insert: Nickel plated brass. (Type Y)
Optional Floating Mounting Bushing: Cadmium plated brass. (Type Z)

APPLICATION For use with 1/16″ printed circuit boards requiring an edgeboard type connector on .156″ centers.

SERIES SPC 155

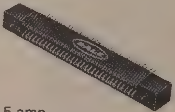
(Choice of even or staggered contacts)

PHYSICAL and ELECTRICAL
Number of Contacts: 33 per side
Contact Spacing: .100″
Card Thickness: .056″-.068″ (1/16″)
Card Slot Depth: .200″
Current Rating: 0.5 amp.
Test Voltage between Contacts: At Sea Level: 1200 VRMS
At 50,000 feet: 675 VRMS
Insulation Resistance: 5000 megohms min. at 100 VDC
Contact Resistance: 20 millivolts max. at rated current with gold plating

COMPONENT MATERIAL
Body: Glass-filled phenolic per MIL-M-14, Type MFH, black
Contacts: Beryllium copper, gold plate per MIL-G-45204; gold flash or tin plate per MIL-T-10727

APPLICATION For use with 1/16″ printed circuit boards. Contacts can be located opposite each other or staggered. Ideal for "mother board" applications.

SERIES EBTL 050



PHYSICAL and ELECTRICAL
Number of Contacts: 8, 16, 20, 25, 32, 50 or 64 per side
Contact Spacing: .050″
Board Thickness: Size 1 = .027″-.035″
Size 2 = .056″-.068″
Board Slot Depth: .200″ **Current Rating:** 0.5 amp
Test Voltage between Contacts: At Sea Level: 1200 VRMS
At 50,000 feet: 675 VRMS
Insulation Resistance: 5000 meg. min.
Contact Resistance: 10 millivolts max. at rated current

COMPONENT MATERIAL
Body: Glass-filled phenolic per MIL-M-14, Type MFH, black
Contact Backer Strips: Epoxy glass laminate per MIL-P-18177, Type GEE, black
Contacts: Beryllium copper per QQ-C-533, alloy 172. Gold plate per MIL-G-45204.
Polarizing Key: Polycarbonate

APPLICATION For use with 1/32″ and 1/16″ printed circuit boards in integrated thin film, and semiconductor circuitry with .050″ contact spacing.

SERIES 300

300 PR

300 S

PHYSICAL and ELECTRICAL
Number of Contacts: 7, 15, 19 and 25
Contact Spacing: 0.250″, staggered rows provide a .125″ grid.
Contact Gauge: #20 AWG
Minimum Creepage Path between Contacts: 5/32″
Minimum Air Space between Contacts: 7/64″ **Current Rating:** 7.5 amps
Breakdown Voltage: At Sea Level: 3600 VRMS
At 70,000 feet: 975 VRMS

COMPONENT MATERIAL
Contact Pin: Phosphor Bronze
Contact Socket: Phosphor Bronze
Contact Plating: Gold Plated
Guide Pins: Stainless steel, passivated
Standard Body: Glass-filled diallyl phthalate per MIL-P-19833, Type GDI-30F, green. Other body material supplied upon request.

APPLICATION Where permanent mounting of male connector to a printed circuit board is required with mating female connector available.

SERIES 303

303S-45

303PR-45

PHYSICAL and ELECTRICAL
Number of Contacts: 45
Contact Gauge: #22 AWG
Minimum Creepage between Contacts: 1/16″
Minimum Air Space between Contacts: 1/64″
Contacts, Center to Center: .050″
Voltage Breakdown, Contact to Contact and Contact to Ground: At Sea Level: 1200 VRMS • At 70,000 feet: 325 VRMS
Current Rating: 3 amps

COMPONENT MATERIAL
Contact: Phosphor Bronze, Gold Plated
Contact Plating: Gold Plated
Studs, Pilot Pins, Washers, Nuts: Corrosion-resistant steel, passivated
Standard Body: Glass-filled diallyl phthalate per MIL-M-19833, Type GDI-30F, green

APPLICATION For use in equipment requiring printed circuit connectors of the dip solder type with mating female connector.

SERIES 315

315 PR-50

315 S-50

PHYSICAL and ELECTRICAL
Number of Contacts: 50
Contact Termination: Male contacts available in right angle dip solder, or solder cup termination
Contact Spacing: 0.200″, staggered rows provide a 0.100″ grid
Contact Gauge: #20 AWG
Minimum Creepage Path between Contacts: 7/64″
Minimum Air Space between Contacts: 1/16″
Current Rating: 7.5 amps
Breakdown Voltage, Contact to Contact: At Sea Level: 2500 VRMS
At 70,000 feet: 600 VRMS

COMPONENT MATERIAL
Contact Pin: Phosphor Bronze, Gold Plated
Contact (closed entry) Socket: Phosphor Bronze, Gold Plated
Guides and Hardware: Stainless steel, passivated
Body: Glass-filled diallyl phthalate per MIL-P-19833, Type GDI-30F, green

APPLICATION Designed for dip solder printed circuit applications requiring 50 contacts. Also available with solder cup termination for rack and panel applications.

SERIES 330

330 PR-12-3

330 S-12

PHYSICAL and ELECTRICAL
Number of Contacts: 12
Contact Spring: .150″
Contact Size: .040″ dia.
Minimum Creepage Path between Contacts: 7/64″
Minimum Air Space between Contacts: 7/64″
Current Rating: 7.5 amps
Breakdown Voltage: At Sea Level: 2500 VRMS
At 70,000 feet: 600 VRMS

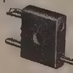
COMPONENT MATERIAL
Contact Pin: Phosphor Bronze, Gold Plated
Contact Socket: Phosphor Bronze, Gold Plated
Eyelets: Brass, Cadmium Plated
Body: Phenolic, CFG (black)

APPLICATION Where permanent mounting of male connector to a printed circuit board is required with mating female connector available. Polarization available.

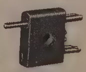
SERIES G20 & G16

PHYSICAL and ELECTRICAL
Minimum Creepage Path between Contacts: G20 = 1/4″; G16 = 13/64″
Minimum Air Space between Contacts: G20 = 3/16″; G16 = 5/32″
Breakdown Voltage:
At Sea Level – 6100 VRMS (G20); 4900 VRMS (G16)
At 70,000 feet – 1100 VRMS (G20); 950 VRMS (G16)
Current Rating: G20 = 7.5 amps; G16 = 13 amps

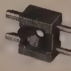
COMPONENT MATERIAL
Standard Body: Glass-filled diallyl phthalate per MIL-M-19833, Type GDI-30 green
Pin Contacts: Brass
Socket Contacts: Phosphor Bronze
Contact Plating: Gold over Nickel



GP20-2DG



GS20-2DG



GP16-2DG

GS16-2DG

APPLICATIONS Broad...thru hole permits use of building block technique or flat mounting. Locking device on G16 permits secure mounting. Optional G16 hood provides "short out" protection.

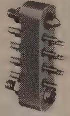
DEPENDABLE DALE® CONNECTORS

SERIES SM20

PHYSICAL and ELECTRICAL

Number of Contacts: 5, 7, 11, 14, 20, 26, 34, 42, 50, 75
Contact Spacing: 0.125″
Contact Gauge: #20 AWG
Minimum Creepage Path between Contacts: 5/64″
Minimum Air Space between Contacts: 3/64″
Current Rating: 7.5 amps
Breakdown Voltage: At Sea Level: 2000 VRMS
At 70,000 feet: 500 VRMS

SMS20



SMP20

COMPONENT MATERIAL

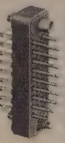
Contact Pin: Brass
Contact Socket: Phosphor Bronze. Beryllium copper also available.
Contact Plating: Gold Plated
Guides: Stainless steel, passivated
Screwlocks: Stainless steel, passivated
Standard Body: Glass-filled diallyl phthalate per MIL-P-19833, Type GDI-30F, green. Other body material supplied upon request.

APPLICATIONS For use wherever space is at a premium and a high quality connector is required in avionics, automation, communications, controls, instrumentation, missiles, computers and guidance systems.

SERIES MM22 and MM24

PHYSICAL and ELECTRICAL

Number of Contacts: 5, 7, 9, 11, 14, 20, 26, 29, 34 and 44
Contact Spacing: 3/32″
Contact Gauge: MM22 Series = 22 gauge. • MM24 = 24 gauge
Minimum Creepage Path between contacts: 5/64″
Minimum Air Space between contacts: 3/64″
Current Rating: MM22 Series = 5 amps
MM24 Series = 3 amps
Breakdown Voltage: At Sea Level: 2000 VRMS
At 70,000 feet: 500 VRMS



MMP22-34SL

MMS22-34SL

MMP22-5

MMS22-5

COMPONENT MATERIAL

Contact Pin: Phosphor Bronze
Contact Socket: Phosphor Bronze
Contact Plating: Gold Plated
Screwlocks: Stainless steel, passivated
Guides: Brass, gold plated
Standard Body: Glass-filled diallyl phthalate per MIL-P-19833, Type GDI-30F, green. Other body material supplied upon request.

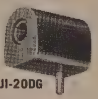
APPLICATIONS Especially suited for use in airborne, instrumentation and portable equipment applications or wherever the following requirements must be met: Minimum space and weight without sacrifice of performance, high quality materials, long service life, high vibration and shock resistance, and positive locking.

SERIES PJ

PHYSICAL and ELECTRICAL

Current Rating: 7.5 amps
Socket Contact Engages: 0.080″ dia. probe

PJEI-20DG



PJI-20DG

COMPONENT MATERIAL

Standard Body: Glass-filled diallyl phthalate per MIL-M-19833, Type GDI-30F, green.
Pin Contacts: Brass
Socket Contacts: Phosphor Bronze
Contact Plating: Gold Plated

APPLICATION Printed circuit checkout and testing.

MODEL 500 SR5

PHYSICAL and ELECTRICAL

Number of Contacts: 5
Contact Spacing: 0.150″
Contact: Accepts .080″ dia. probe
Current Rating: 5 amps
Breakdown Voltage: At Sea Level: 3000 VRMS
At 70,000 feet: 676 VRMS

COMPONENT MATERIAL

Contact Socket: Phosphor Bronze
Contact Plating: Gold Plated
Standard Body: Glass-filled diallyl phthalate per MIL-P-19833, Type GDI-30F, green. Other materials available upon request.

APPLICATION Permanent or semi-permanent test points for checkout and testing of printed circuits.

PHONE: 605-665-9301

SERIES QX32

PHYSICAL and ELECTRICAL

Minimum Creepage between Contacts: 9/64″
Minimum Air Space between Contacts: 7/64″
All male contacts are .093″ in diameter. Current ratings vary only because some solder cups are made for #12 AWG and others for #16 AWG.

QX32S-1

QX32P

QX32S

Voltage Breakdown Contact to Contact (#12 AWG solder cup): At Sea Level: 3300 VRMS
At 70,000 feet: 712 VRMS
Current Rating: 23 amps #12 AWG • 13 amps #16 AWG
Voltage Breakdown Contact to Contact (#16 AWG solder cup): At Sea Level: 3600 VRMS • At 70,000 feet: 750 VRMS

COMPONENT MATERIAL

Closed Entry Socket Contacts: Phosphor Bronze*, Gold Plated
Inserts and Hardware: Stainless steel, passivated*
"O" Ring: Synthetic rubber **Boot:** Neoprene
Body Material: Glass-filled diallyl phthalate per MIL-M-19833, Type GDI-30F, green. Consult factory for other materials.

For use with QX32S, a shorting plug to ground static electricity is available. Contact factory for details.

*Contact factory. Beryllium copper can be specified to ordinance drawing 10182288.

APPLICATION Used in the firing system of missiles.

SERIES 400 and 401

PHYSICAL and ELECTRICAL

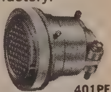
Voltage Breakdown, contact to contact:
At Sea Level: 2000 VRMS
At 70,000 feet: 500 VRMS
Minimum Creepage Path between Contacts: 5/64″
Minimum Air Space between Contacts: 3/32″
Contacts, center to center: .150″

400PF

400RM

COMPONENT MATERIAL

Molded Body: Glass-filled diallyl phthalate per MIL-M-19833, Type GDI-30F, green. For other materials, contact factory.
Hood: Aluminum, anodized (on 401PF)
Shells, Mounting Nut and Coupling Nut: Aluminum, clear anodized.
Contact Pins: Brass, Gold Plated
Contact Socket: Phosphor Bronze, Gold Plated
Lock Ring: Brass, cadmium plated
Retaining Ring: Stainless steel **Protective Cap:** Polyvinyl



401PF
Mates with
Series 400RM

APPLICATION Series 400: For use in equipment requiring a 41, 51 cr 55 pin sealed connector, with a mating non-sealed female connector. **Series 401:** For identical applications where hood is required. Mates with Series 400RM connectors.

SERIES S20

COMPONENT MATERIAL

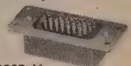
Molded Body: Orlon-filled diallyl phthalate per MIL-M-14F, Type SDI-5 (blue), furnished as standard.
Contact Pin: Brass, Gold Plated
Contact Socket: 4 tine beryllium copper, gold plated
Coaxial Insulator: Teflon
Coaxial Socket Body: Brass, silver plating standard. Gold also available.
Coaxial Socket Contact: Beryllium copper, gold plated
Shell and Retaining Plate: Aluminum, cadmium plated and gold iridited

Coaxial Contacts are for use with Adapter No. 2710-10 by Cannon or No. 5988 by Greymar and fit RG 188/U cable.

S20P-41 and S20S-41

PHYSICAL and ELECTRICAL

Minimum Creepage Path between Contacts: 1/8″
Minimum Air Space between Contacts: 1/16″
Contacts, center to center: 3/32″
Ambient Temperature Range: −67° F to +250° F
Approximate Weight: S20S-41 = 1.5 oz.
S20P-41 = 1.0 oz.



S20P-41

S20S-41

Voltage Breakdown, contact to contact: At Sea Level: 2500 VRMS
At 70,000 feet: 600 VRMS
Current Rating: 10 amps

S20P-13-4R and S20S-13-4R

PHYSICAL CHARACTERISTICS

Minimum Creepage Path between Contacts: 7/64″
Minimum Air Space between Contacts: 1/16″
Contacts, center to center: .150″
Ambient Temperature Range: −67° F to +250° F
Approximate Weight: S20P-13-4R = 1.8 oz.
S20S-13-4R = 1.3 oz.

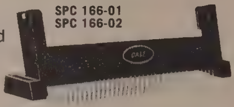
S20S-13-4R

DEPENDABLE DALE® CONNECTORS

SPECIAL DISPLAY STYLES

SERIES SPC 166

Liquid Crystal Digital Display (LCD) Connectors



- Compatible with 8 Digit LCD displays manufactured by Rockwell International Microelectronics, Inc., American Microsystems, Inc., and Hamlin Inc.

SPC 166-03
DALE

- Integral card guides for support of LCD
- Guide spring to provide LCD registration at right edge of connectors
- Custom height and angle variations can be provided at moderate tooling cost
- Low unit cost. Specifically developed for high volume calculator applications
- Staggered grid termination (.100 x .100) for ease of wave soldering.

PHYSICAL CHARACTERISTICS

Number of Contacts: 80 maximum

Contact Spacing: .050″

Slot Depth: .230″

Display Thickness: Connector accommodates LCD with an overall thickness of .125″ ± .015″ and a thickness of .057″ to .065″ in the insertion area.

ELECTRICAL CHARACTERISTICS

Current Rating: .5 amp.

Test Voltage between Contacts:
Sea Level – 1,200 VRMS
50,000 feet – 675 VRMS

Insulation Resistance: 5,000 Megohms at 100 VDC

COMPONENT MATERIAL

Body: Glass-filled phenolic per MIL-M-14, Type MFH, black

Contacts: Beryllium copper

Contact Plating: Electro-deposited tin, 200 micro-inches minimum.

SERIES SPC-173

Gas Discharge Display Connectors
Accepts NDP 1252-8 Display

- Compatible with 8 Digit gas discharge displays manufactured by National Electronics, Inc., Geneva, Illinois
- Models available with flange or without mounting flange
- Low unit cost. Specifically developed for high volume calculator applications.

PHYSICAL CHARACTERISTICS

Number of Contacts: 21

Contact Spacing: .156″

Slot Depth: .300″

Display Thickness: Connector accommodates display .050″ to .068″

ELECTRICAL CHARACTERISTICS

Current Rating: .5 amp.

Test Voltage between Contacts:
Sea Level – 1,200 VRMS
50,000 feet – 675 VRMS

Insulation Resistance: 5,000 Megohms at 100 VDC

COMPONENT MATERIAL

Body: Glass-filled nylon, black

Contacts: Beryllium copper

Contact Plating: Electro-deposited tin, 200 micro-inches minimum.

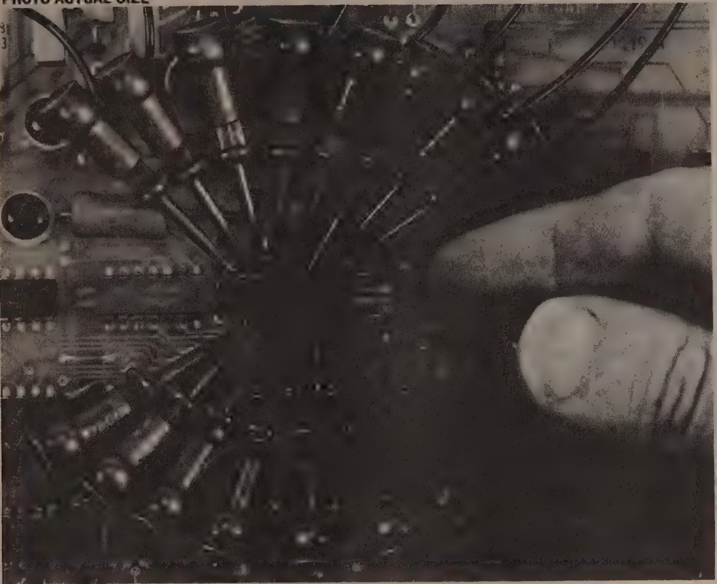
E-Z-HOOK® ...THE PROBLEM SOLVERS

PHOTO ACTUAL SIZE



THE NEW MICRO XM-1 TROUBLE SHOOTER ADDS A LITTLE LENGTH TO OUR LINE

(1.75" — 4.45 cm) long and VERY little weight (less than 1 gram). Ideal for difficult IC testing. Connect DIRECT to IC... Reduce resistance build-up. Same high quality construction as our models X-100W. (2.25" — 5.7 cm) and XL-1, (5" — 12.7 cm): Durable heat and chemical resistant nylon body, Gold-plated Beryllium copper contact, Stainless steel spring. Single contact point makes fast, safe, short-free connections... assures accurate readings.

AVAILABLE IN 10 RETMA COLORS:
Red, Black, Blue, Green, Orange, Yellow, White, Violet, Brown or Gray.

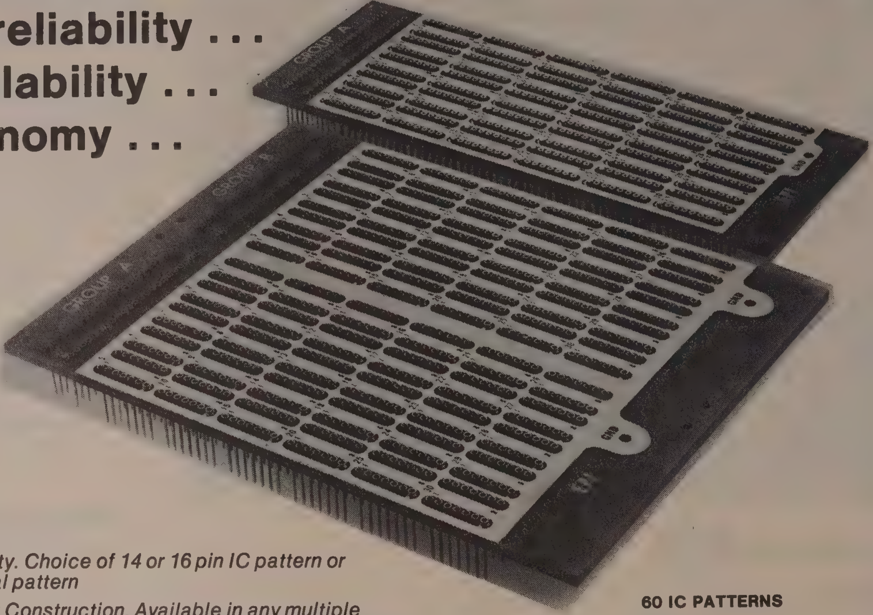
IC PACKAGE PANELS

epi

for reliability . . . availability . . . economy . . .



60 IC PATTERNS

- *Flexibility. Choice of 14 or 16 pin IC pattern or universal pattern*
- *Modular Construction. Available in any multiple of 30 IC patterns, up to 240 patterns, or from 9 to 54 rows of the universal pattern*
- *Ground and power distributed to each IC pattern*
- *Gold plated beryllium copper contacts for reliable retention of IC leads*

Electro Packaging, Inc. manufactures a complete line of standard and custom IC panels for a wide variety of applications in the OEM industry. As a subsidiary of Electro Circuits, Inc., a long established PC board manufacturer, EPI has extensive capability for custom service, large inventories of standard augat compatible panels, excellent quality, competitive pricing and excellent delivery. Pricing and other information may be obtained by contacting your nearest EPI representative or call direct to our factory.

EMC
Interconnection Specialists

CUSTOMIZED WIRE-WRAP® PANELS for any application...

Superior design and superb construction result in EMC's unsurpassed performance in pin-in-board packaging panels. The EMC line includes a wide selection of hi-density Wire-Wrap® panels, with input/output sections for male/female cable assemblies or plug-in edge connectors. EMC panels are available in 2 or 3 levels of wrap, with 12 to 180 or more positions. Five patterns are standard (14 or 16 pin, with V and G committed or uncommitted, plus universal). Board thicknesses of ⅛" or 1/16", as well as a variety of terminal plating styles, are available.

Custom panels are designed to reduce wrapping costs to an absolute minimum, to conform to special I/O requirements, and in layouts and shapes to complement existing systems.

All EMC panels utilize patented* Nurl-Loc® Funnel-Entry terminals, recognized throughout the industry for superior holding power and ease of assembly. The Nurl-Loc design prevents twisting during wrapping, and greatly simplifies terminal replacement, if needed. Most important, Nurl-Loc spreads stress evenly throughout the board, resulting in flatter non-warping panels with more accurate true positions of terminals. The Funnel-Entry feature vastly simplifies manual or automatic I.C. lead insertion.

*U.S. Pat. No. D-223,109 Nurl-Loc® Electronic Molding Corp.

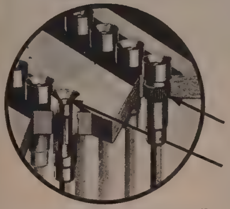
HIGH DENSITY NURL-LOC® I.C. PANEL

IN 2 & 3 LEVELS OF WIRE-WRAP®



EMC Panels utilize non-warping, glass-epoxy board, in 1/16" or 1/8" thicknesses, 30 to 360 IC positions, with I/O sections of edgeboard tabs or connector clusters, power and ground planes, in many combinations.

NURL-LOC® Terminals (patented) prevent twisting during wrapping.

Funnel-Entry simplifies manual or automatic insertion of I.C. leads.

Consult factory for Customized Panels for any application.

SUPPLEMENT TO TERMINALS CATALOG NO. 73

This ready-reference lists the most widely applied components from the catalog. For convenience in selection, each popular item is both pictorially shown and tabulated according to its specific plating, material and color combinations available for immediate delivery from stock.

For detailed specifications on components consult the catalog page called out in the tabulation. Information on mounting tools is found on Page 3 of Catalog No. 73.

Contact the factory for details and catalog.

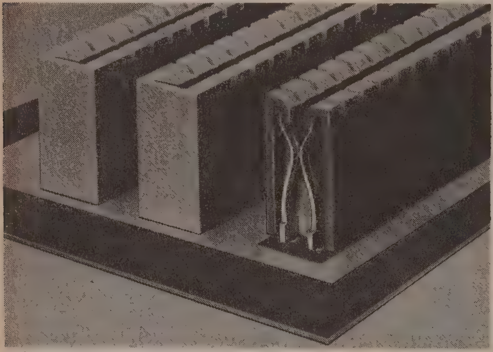
BACKPANEL CONNECTOR SYSTEMS

PACKAGING WITH EDGE-PAC® AND MULTI-PAC®

ELFAB CORPORATION exemplifies the concept of total backpanel packaging. Utilizing its own resources and technological development, ELFAB stands out as an innovative leader in solderless press-fit glass planar systems. All the elements of the back plane — printed circuit boards, contacts, plating and molding of insulators — are controlled and produced in our modern facility. Our patented EDGE-PAC® and MULTI-PAC® P.C. connector backpanels were developed during 1968-69 and have been in production since early 1970. Our connector grid systems offer maximum design flexibility in replacing your existing discrete or metal plate connector assemblies.

EDGE-PAC® SYSTEMS

The ELFAB EDGE-PAC® SYSTEM is a card edge backpanel concept which offers a bifurcated, pre-loaded, precision stamped contact rigidly mounted into a printed circuit board. The insulator is designed to lay over the contacts and is of a nature which permits unlimited sizes of connectors to be specified.



MULTI-PAC® SYSTEMS

The use of the MULTI-PAC® PROCESS on backpanels results in cost savings by the reduction or elimination of external wiring. The backpanel material is glass-epoxy board so that wiring can be etched on the surface in place of the external point-to-point wiring, thereby reducing costs. The MULTI-PAC® PACKAGING SYSTEM permits using up to eight planes of circuitry without the cost and problems of conventional multilayer boards. Discrete two-sided, plated-thru boards are used and sandwiched together utilizing high force press-fit contacts, offering gas tight interfaces between the contacts and the plated-thru hole, in each board.

The EDGE-PAC® Connector is designed to accept a .062 thick printed circuit card and terminates with a .025 square post on a .100, .125, .150, and .156 grid for automatic and semi-automatic wiring. Custom designed Backpanel Interconnect Systems can be specified using the design information shown below.

FEATURES

1. Contacts are press-fitted directly into a P.C. board, making the board or boards a structural part of the connector.
2. Contact is preloaded to guarantee minimum contact pressure under worst case conditions.
3. Ground planes, voltage buses and signal lands can be etched directly into the structural P.C. board member.
4. All or part of the wiring can be eliminated by etched circuits. See Multi-Pac® features.
5. Insulator is held on by interference fit with the base shoulder of each contact, therefore, allowing modular construction to give any length of connector desired without tooling.
6. Insulator design provides closed entry for complete protection of contacts.
7. Electrical connection is made between P.C. board and contact by press-fitting into plated-thru holes (no soldering required). Result is a highly reliable gas tight connection.
8. Connectors can be spaced at .375 minimum center to center for 1212, 1515 and 1562 Series.
9. The .025 square tail is positioned accurately for automatic wiring of backpanel assembly.
10. Total cost reduction.

TELE-PAC™ 8500 Series

Telephone and Communications I/O Connectors

Developed by ELFAB as an extension of our reliable press-fit contact system, the 8500 series receptacle is mateable with standard telephone 25 pair connectors. Utilizing similar design features of EDGE-PAC®, the contacts make solderless, gas tight connections with the plated-thru hole. Can be used with single, two and three board MULTI-PAC® SYSTEM assemblies.

HIRAM JONES

Teflon† Insulated * Press-Type * Terminals and Test Jacks

TEFLON†

(TFE-FLUOROCARBON) per MIL-P-19468 has outstanding mechanical and electrical properties over a wide range of frequencies and temperatures (−100°C to +250°C), extreme chemical inertness, high heat resistance, zero water absorption and complete anti-hesiveness which make it a superior insulation.

TERMINALS

MATERIAL: Half-hard Brass per QQ-B-626, Comp 22.
FINISH: Standard plating is Gold per MIL-G-45204. Other finishes supplied on request.

INSTALLATION TOOLS

Tools are available for all HIRAM JONES components. Specify Part Number and prefix "S." Example: S-602 Assembly Tool.

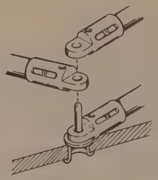
manufacture and design of circuit components

WIRE TERMINATION SYSTEM



Design Features

SOLDER-WICKING BARRIER

The design of HIRAM JONES 9W Wire Termination Systems provides a solder-wicking barrier, assuring flexibility of the wire and thus minimizing wire failures due to fatigue.

Wires are inserted in the 9W Crimp Terminals and crimped in place. Full engagement of the wire is determined by means of the inspection hole provided in each crimp terminal. The 9W Crimp Terminals are then attached to their mating Terminal Posts and soldered in place.

The entire termination is made without application of solder to the wire itself. It is, therefore, impossible for solder to "wick" up the wire.

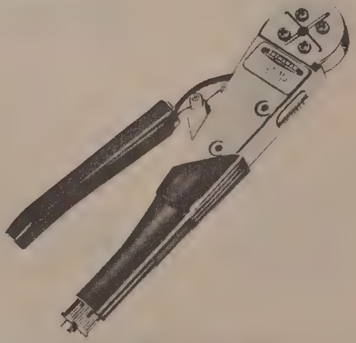
EQUIPMENT SERVICEABILITY

HIRAM JONES 9W Wire Termination System provides all the advantages of a hard wired system without the disadvantages of foreshortening of the service loop when disconnection and reconnection is required. The ease with which connections are made is a feature which is particularly advantageous in systems where connectors are undesirable, yet assemblies or sub-assemblies must be disconnected from time to time for service or replacement. To disconnect HIRAM JONES 9W Crimp Terminals, simply heat and lift off the mating terminal post. Reconnect by resoldering the 9W Crimp Terminals to the terminal post. Neither the mechanical nor electrical joint is affected by repeated removal and resoldering.

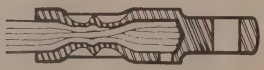
Increased Production Efficiency

By permitting pre-assembly of wires by unskilled operators, HIRAM JONES 9W Wire Termination Systems reduce production costs. Wires may be cut to length, stripped, and the 9W Crimp Terminals crimped in place. Final assembly consists of simply laying the pre-assembled Crimp Terminal on its mating terminal post and soldering in place.

MINIATURE MICROCRIMP TOOL



CROSS-SECTION OCTADENT CONFIGURATION



The 9W Miniature Microcrimp Tool (Buchanan No. 612118) is cycle-controlled to assure crimping to the selected depth. Once the crimping operation is started, the tool cannot be opened without completing its cycle.

9W LOCATORS — Specially designed locators are available for each of HIRAM JONES 9W Crimp Terminals. The use of one 9W Miniature Microcrimp Tool and the custom-designed 9W Locators is recommended to guarantee the precise crimp depth setting for each Crimp Terminal. When ordering, specify part number — i.e., 9W-206 Locator.

OCTADENT CRIMP — The 9W Miniature Microcrimp Tool produces an octadent configuration which provides uniform displacement of wire and crimp terminal material. The wire strands and the crimp terminal material are formed together in a solid mass with little or no reduction of the mil area of the wire strands.

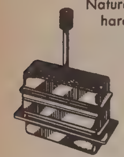
HUGHES HIGH TECHNOLOGY CONNECTORS and CABLES FOR THE TOUGHEST JOBS.

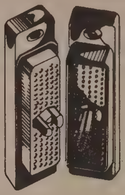
MINIATURE SERIES



Nature gives armadillos hard shell protection. We give it to our D series connectors. Stainless steel armor to keep 'em foolproof. They align perfectly. Fully environmental. 5 sizes.

- High density miniature using 20 gauge contacts.
- "Wrap-around" stainless steel shell for maximum protection in a minimum profile.
- Flanged or unflanged configuration.
- Contact arrangements of 18, 38, 66, 90, and 138 contacts.
- One-piece diallyl phthalate body.
- Silicone seals.
- Proven PolarHex center jackscrew.
- Available in non-environmental, environmental, and potting versions.

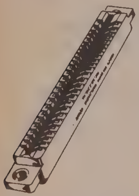
SUBMINIATURE SERIES



The way we make subminiatures, they're more subminiature. More fully packed. Same contact size and spacing, only we get 110 contacts to the inch.

- Highest contact density available — 110 size 22 contacts per square inch.
- Proven PolarHex center jackscrew coupling mechanism.
- Contact arrangement of 38, 88, 108, 132, and 244 contacts.
- Crimp removable front release, rear release, fixed contact and fixed filter contact — all intermatable.
- Available in non-environmental, environmental, and potting versions.

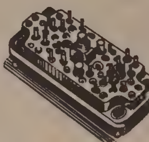
PRINTED CIRCUIT CONNECTORS



Miniature and subminiature printed circuit connectors in 10 sizes with 10 to 96 contacts. We're good at the numbers game.

- Withstand vibration, shock, and warping without losing electrical continuity.
- Bifurcated dual-socket contacts.
- 50 mil, 100 mil and 156 mil centers.
- Contact arrangements of 10, 20, 30, 40, and 50 positions, double readout (EPC submin. version).
- Contact arrangements of 15, 20, 30, 43, 48, and 68 positions, dbl. readout (EMS miniature, 100 mil ctrs; ERS miniature 156 mil ctrs).
- Bussing characteristics.
- Through or threaded mounting inserts available.
- PC board keying capabilities.

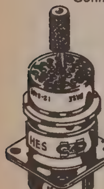
UNIVERSAL SERIES



You decide what goes where. The crimp removable contacts are interchangeable in either body. The big difference at Hughes is the positive way they get together. The PolarHex way.

- Pin and/or socket contacts in the same body.
- Proven PolarHex center jackscrew.
- Glass-filled diallyl phthalate body.
- Standard contacts and coax contacts in same body.
- 12 available configurations with up to a maximum of 321 contacts in a variety of combinations of #16, #18 and #20 gauge contacts and coax (or #8 gauge) contacts.

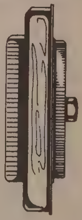
SUBMINIATURE BULLS-EYE SERIES



We invented the Bulls-Eye™ Connector and created a reputation as circular subminiature specialists. Shows you what a little concentration can do: 102 contacts in a #18 shell.

- Highest contact density in a circular subminiature with no decrease in contact spacing — 50% to 200% higher density than comparable connectors.
- Mounts in standard MS cutouts.
- Proven PolarHex center jackscrew.
- Lightweight stainless steel shell; diallyl phthalate body.
- Standard MS configurations. But with differences in contact density: Six shell sizes/contact density arrangements: 8/14, 10/30, 12/48, 14/66, 16/72 and 18/102.
- Cable or flanged configurations.
- Crimp snap-in size 22 contacts.
- Available in non-environmental, environmental, and potting versions.

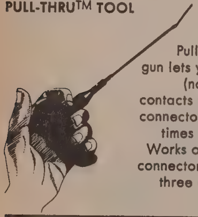
SUBMINIATURE FILTER CONNECTORS



Filter pin connectors in both rectangular and circular subminiatures. Nobody else guarantees a 100,000 to 1 reduction of RF energy.

- High contact density — 110 size 22 crimp removable contacts/sq. in.
- Complete RFI protection.
- Glass-filled diallyl phthalate bodies.
- Proven PolarHex center jackscrew.
- Contact arrangements of 38, 88, 108, 132, and 244 contacts.
- Working voltage: 200 vdc (25° & 85°C) 150 vdc (—55° & 125°C) Dielectric Withstanding Voltage (Hi-Pot): 500 vdc (for 5 sec, 50 ma max charging current). Feed-Thru Current: 3.0 amp. RF Current: 0.25 amp max. Insul. Resist.: 10,000 megohms, min. (After 2 min electrification at 200 vdc, 1 megohm current limiting resistor.); Capacitance: 1750 pf, nominal. Atten., min.: 40 db @ 100 MHz, 50 db @ 200 MHz to 10 GHz.

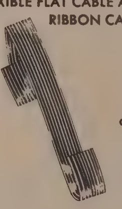
PULL-THRU™ TOOL



New Pull-Thru™ gun lets you pull (not push) contacts through connectors. Four times as fast. Works on many connectors. With three contact sizes.

- Covers three contact sizes: 16, 20, and 22 gauges.
- Permits desired contact cavity to be loaded from front face of connector.
- Grasps the contact body . . . not the wire — eliminating damage during insertion.
- Positive contact alignment through seals and block.
- Can use wire sizes equal in diam. to rear of the contact.
- Allows connector wiring at least four times faster than with conventional tools.

FLEXIBLE FLAT CABLE AND RIBBON CABLE



Contour Cable™ happened here first: Flexible circuits. Flat, conductor cable. Ribbon cable. Custom cable/ harness assemblies.

- Flat conductor cable in similar or varied cross sections — with uniform or non-uniform spacing, varying insulation thickness, with different insulation materials on the two sides.
- Flexible circuitry ideal for conductor system requiring circuits with 3-dimensional routing in a flat medium, or when point-to-point wiring must exhibit simple or complex flexibility in a flat plan — or both.
- Ribbon cable in 2 to 100 conductors wide. Sizes 22 to 28 AWG, solid or stranded, with color-coded PVC insulation.

A lot of companies can provide you with cables and connectors to solve your simple requirements. Including Hughes.

But if you're not sure about your needs, or if you require quality, don't gamble. Involve Hughes.

High technology through design excellence is our specialty. And it may even cost less in the long run.

Hughes Connecting Devices, 17150 Von Karman Avenue, Irvine, CA 92705. (714) 549-5701.

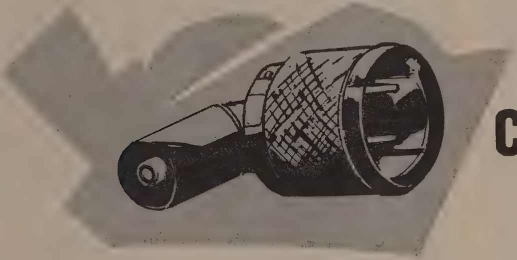
CONNECTOR SELECTION GUIDE

This guide lists some of the more popular connector configurations, both standard and special.

It is designed to help you select the proper connector series and the appropriate catalog from which to specify your requirements. Determine your basic application: Rectangular, Rack/Panel, Circular, Microminiature, Printed Circuit, Input/Output, Filters, or Special Application connectors.



CANNON ITT

Go to the appropriate heading in the chart. Below each heading are several blocks listing the various connector series. Check these requirements with the data on the right side of each block. Write or telephone ITT Cannon Electric, 666 E. Dyer Rd., Santa Ana, California 92702, (714) 557-4700, for the proper catalog for detailed product data and ordering information, or consult your nearest ITT Cannon sales office.

SURE SEAL™ connectors

SS CATALOG

High performance, low cost environmentally sealed connectors with rugged multiple moisture seals. Meets automotive/industrial standards including vibration, shock, temp. cycling, salt water spray and immersion, petroleum derivitives, and industrial gases.

Filters – RFI/EMI

DPXJ

Rack/panel filter connectors in single, two, three or four gang shells interchangeable with standard DPX, DPXMA, DPXME and meets requirements of ARINC 404. Provide optimum attenuation of RFI/EMI.

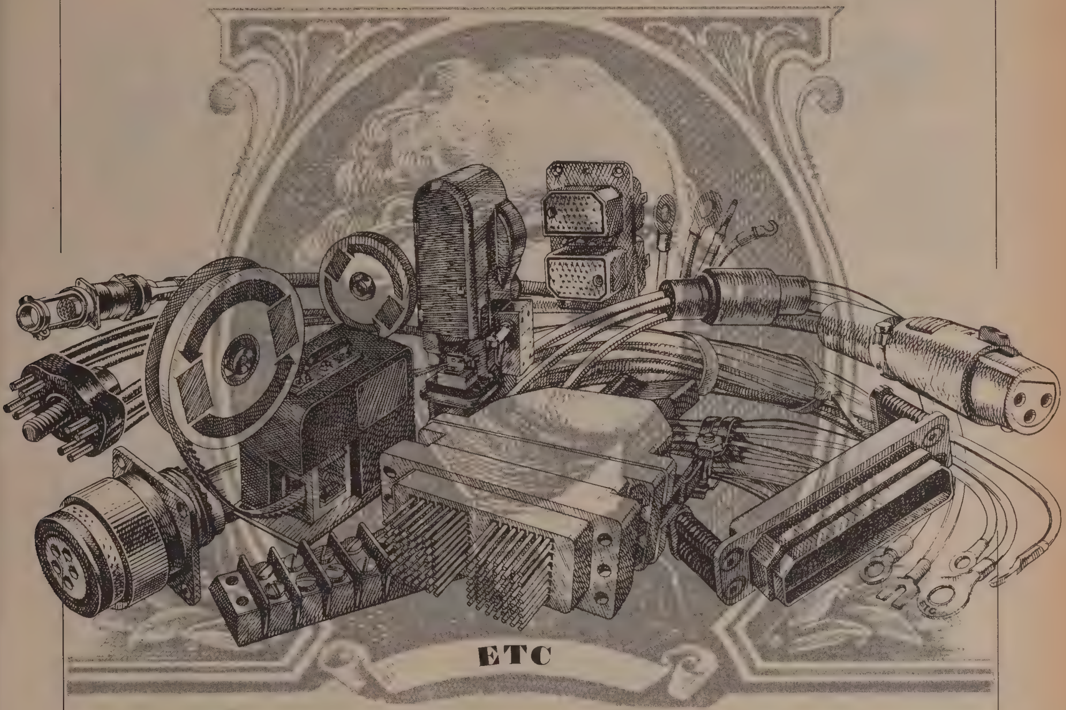
ETC JOINS CANNON



Loose Piece Terminals • Continuous Strip Terminals • Barrier-type Terminal Blocks (closed and open back) • Cable Ties • Low-cost Commercial Connectors • Hand Crimp, Semi-automatic Tape & Continuous Strip Automatic Tooling. With common marketing goals, distribution and manufacturing techniques, the former ETC/ELECTRIX Division, leader in termination products, tooling and general purpose connectors, has been fully integrated as Cannon's new ETC Terminal Products Unit. Its products are available through a national network of stocking distributors. Now, in more areas than ever, the name to look for is Cannon.

For further information, contact Cannon's ETC Terminal Products Unit, ITT Cannon Electric, 29000 Aurora Road, Solon, Ohio 44139; or ITT Cannon Electric, International Telephone and Telegraph Corporation, 666 E. Dyer Rd., Santa Ana, CA 92702. (714) 557-4700.

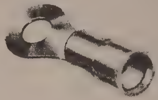
CANNON ITT

Connecting devices for every need

Terminals

- Wire Ranges: #26 thru #4/0 AWG, Loose Piece. Mounted on Tape or in Continuous Strips in #26 thru 10 sizes.
- Tongue Types: Ring, Rectangular, Spade, Flanged Spade, Hook, Slotted Ring and Snap Spade.
- Approvals: Terminals are covered by UL., CSA and Military Specifications, where Applicable.



AVIKRIMP® — Tin-plated brass sleeve strengthens barrel. Color coded Nylon insulating sleeve adds more wire protection. Operating temperatures: continuous duty — −40°F to 250°F, intermittent duty — to 350°F. WIRE RANGE: #26-10
Also available on tape.

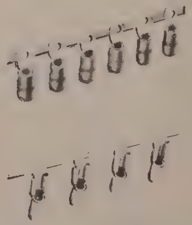
INSULKRIMP® — PVC insulation sleeve permanently attached to butted seam barrel (#22-10) or brazed seam barrel (#8-2). Operating temperatures: continuous duty— −40°F to 167°F, intermittent — to 300°F.
WIRE RANGE: #22-2
Also available on tape.

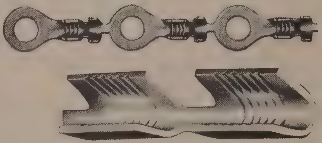
NYLAKRIMP™ — Ideal for larger wire applications involving temperature extremes and vibration. Rigid, overhanging Nylon insulating sleeve covers silver-brazed barrel. Withstands continuous duty temperatures from −60°F to 250°F.
WIRE RANGE: #8-4/0

VIBRAKRIMP® — Made for excessive vibration applications. Seamless tin-plated brass sleeve covers basic KRIMPTITE barrel. Its overhang prevents wire flex. Single crimp terminates wire.
WIRE RANGE: #22-10
Also available on tape.

VERSAKRIMP™ — Has silver brazed barrel. Seam will not open under stress or wire pull. Crimps using many types of tooling. Ideal for solid or stranded wires.
WIRE RANGE: #22-4/0
Also available on tape.

KRIMPTITE® — One piece, non-insulated design. Ideal general purpose terminal for uses where special features are unnecessary. Full length barrel makes crimping easy.
WIRE RANGE: #26-10
Also available on tape.





AUTOMATED STRIP AND TAPED TERMINALS, quick disconnects and magnet wire splices from #26 thru #10 AWG sizes. Popular tongue types, barrels insulated or open with insulation support. Quick disconnects available in straight or flag designs.

Quick Connects

- Female Receptacles and Male Tabs

PDQ™ quick connect receptacle terminals handle 26-12 AWG wires and .110 x .020, .110 x .032, .187 x .020 and .250 x .032 inch male tabs. Insulated or non-insulated barrels. Available loose piece, on tape or continuous strip. Meet N.E.M.A. and U.L. standards. Male tabs and single or twin tab lugs are .250 thru .110 inches wide for PDQ female receptacles.

Cable Ties

NYLON CABLE TIES are one-piece self-locking straps that quickly and safely speed harness assemblies. Different sizes handle bundle diameters up to 4″. Rugged application tools provide the right tension and cut ties flush with tie heads.

Connectors & Splices

GENERAL PURPOSE CONNECTORS quickly connect 1 to 36 circuits. Snap-in pin/socket contacts for #30-14 AWG wire sizes. .093 and .062 pin diameters. Molded nylon housing. Panel mounted or free hanging.

CLOSED-END CONNECTORS feature tin-plated connector insert protected by a translucent nylon insulation. A single crimp secures stripped wire. WIRE RANGE: #22-10

BUTT AND PARALLEL SPLICES — Stripped wires insert at each end of splice. A crimp at each end on butt splices, a single center crimp on parallel splices, provides a secure connection. Available in insulated and non-insulated styles. WIRE RANGE: #22-4/0.

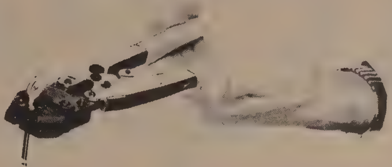
ETC Terminal Products Unit

CANNON ITT

Connecting devices for every need

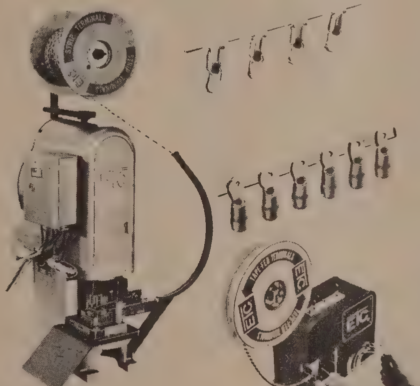
Crimping Tools

- Hand Operated and Semi-automatic . . . Matched-to-terminal Designs . . . Free 30-day Evaluation Trials



RATCHET HAND TOOLS — Special ratchet mechanism won't allow terminal to be released until fully crimped. Handles terminals and splices from #26 thru #10 AWG.

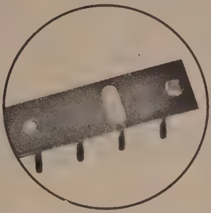
PORTABLE AIR TOOLS — 27 oz. AT-200 hand tool uses standard air pressure to crimp #26 thru #6 AWG terminals and splices. Bench adapter accessories available.



AUTOMATIC FEED TAPE AND STRIP PRESSES — Terminals are loaded into crimping dies automatically. Cycled for up to 3,600 terminations per hour. Crimps #26 thru #10 AWG sizes. Air and electrically operated models.

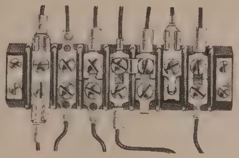
Terminal Blocks

- Closed Back . . . Open Back . . . Military Blocks



Closed Back

Open Back



TWIN SCREW — Choose closed back design with molded-in plates and protected mounting holes. Or open back design. Rated 5 to 30 amps. Complete selection of lugs and hardware.

SINGLE SCREW — These blocks weigh less and occupy less space. Same design features as their twin screw counterparts. 5 to 30 amp. rating. Full selection of lugs and hardware.

TERMINAL BLOCK TERMINALS — Match-fitting to blocks assures reliability in sizes 26 thru 10 AWG. Spade, Flanged Spade and Rectangular tongues are 3/16", 19/64", 21/64" or 27/64" wide.

ETC copper terminals and splices are electroplated with tin, made from .032 stock, feature V-notch serrations in barrel for best wire grip. Insulated terminals are color-coded for easy wire identification. Where applicable, terminals are covered by UL, CSA and Military specification approvals. Quick disconnect terminals are tinplated brass construction.

Heavy Duty parts (HDX at end of part number) have .050" Copper stock in #16-14 wire range and should be crimped by 12-10 tooling.

TAPE-FED PARTS

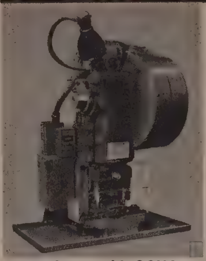
Terminals, Splices and Quick Disconnects are available on Tape for automated crimping. To order Tape-Fed parts, suffix the part number with a "T". Example: A-320-04-T.

ETC Terminal Products Unit

CANNON ITT

Here's a sampling of Connecting Devices from Cannon...

and there's more where these came from!



Customer Tooling

Lower your *total installed cost* by installing a high speed crimping press and using continuous strip terminals, quick connects, blades, tabs and the other wire connecting devices shown.

Press shown with OSHA required guards and protective devices.

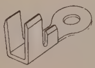
TERMINALS

#10 to #24 AWG. Non-insulated or with insulation supports where vibration is excessive. Tin and other platings available.

Ring Tongues

Part No. RX-20
Basic part: .020 brass,
#16-20 AWG.

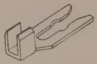
Part No. RX-100
Basic part: .030 brass,
#14-18 AWG.



Part No. R-81
Basic part: .020 brass,
Insul. Range: .120-.170, #14-18 AWG.

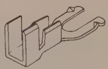
Part No. R-98
Basic part: .030 brass,
Insul. Range: .140-.200, #10-12 AWG.

Spade Tongues



Part No. S-300
Marine Application
Basic part: .032 brass,
#12-16 AWG.

Part No. S-2
Standard Spade,
Basic part: .020 brass,
Insul. Range: .060-.100, #18-20 AWG.

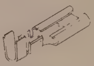


Part No. SG-17
Grip design tongue
Basic part: .025 brass,
Insul. Range: .130-.180, #14-18 AWG.

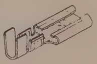
Part No. SP-60
Insulation Piercing for Tele/Communication Equip., Insul. Range: .055-.090,
#20-24 AWG.

Quick Connects

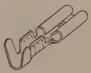
General use on appliances: fits .187 and .250 mating tabs.



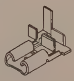
Part No. Q-6
For .032 x .250 tab,
Insul. Range: .120-.170, #14-18 AWG.



Part No. Q-95
For .188 x .020 tab,
Insul. Range: .090-.130, #16-20 AWG.



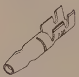
Part No. QJ11
For .020 x .205 tab,
Insul. Range: .085-.125, #18-22 AWG.



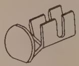
Part No. Q-25R
For .250 x .020 tab,
Insul. Range: .090-.170, #16-20 AWG.

Automotive Connecting Devices

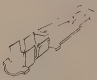
Wide range of devices in wire ranges to cover most applications.



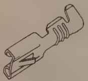
Part No. MT-740
Multiple Connector
Insul. Range: .090-.190, #12-18 AWG.



Part No. BC-55
Bulb Contact for head/stop lights.
Insul. Range: .075-.121, #18-16 AWG.



Part No. 89
Multiple Connector
Insul. Range: .075-.160, #14-20 AWG.

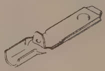


Part No. Q-220
Multiple Connector for .250 x .032 tab,
Insul. Range: .109-.187, #12-18 AWG.

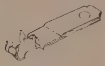
Part No. F-60
Multiple Connector
Insul. Range: .090-.190; #12-20 AWG.

Blades

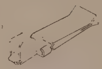
Male, female and grounding contact blades for cord and live set mfgs; #14-20 AWG. Male blades are available polarized.



Part No.
6MBHX44-247
Material: Brass
#16-20 AWG.

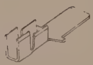


Part No.
11MBH44-250
Material: Brass
#18-20 AWG.



Part No. F-288
Wiper Blade, Material: Brass, #14-18 AWG.

Tabs



Part No. T-80
1/4 Male Tab,
with or without insulation supports,
#14-18 AWG.

Part No. TX-83
.187 Male Tab,
with or without insulation supports,
#14-18 AWG.

OTHER CONNECTING DEVICES

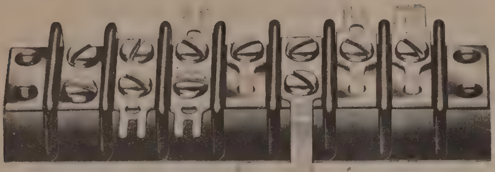
Part No. PF-401
Printed Circuit Contact
Insul. Dia: .065
#22 AWG.

Part No. CC-140
Crown Crimp
Screw Sizes: 6, 8, 10
#16-18 AWG.

ETC Terminal Products Unit

CANNON ITT

ETC® TERMINAL BLOCKS–CLOSED and OPEN BACK



- **STYLE A** Standard Twin Screw
- **STYLE B** Single Solder Lug
- **STYLE C** Double Solder Lug
- **STYLE D** Internal Feedthru
- **STYLE E** External Feedthru
- **STYLE F** Solder/Internal Feedthru
- **STYLE G** Push-on/Internal Feedthru

ETC Terminal Blocks are available with closed or open backs. The part number tables on these pages show the closed back number. See tables for ordering open back version. Standard block material is general purpose phenolic. Other materials available that meet or exceed Mil. Spec. requirements: MIL-M-14F and MIL-M-19833.

Open Back Blocks are available with Lugs and Quick Disconnect Blades permanently riveted to the Block. Lugs available with rivets are: Double Solder Lug; Solder/Internal Feedthru; Push-on Internal Feedthru. To order riveted version, change first digit of Open Back Block from "2" to "1".

57000 SERIES: A 6-32 x 3/16" binder head screw version of the 27000 Series is available. Use 57000 in place of 27000.

67000 SERIES: A 6-32 x 3/16" binder head screw version of the 37000 Series is available. Use 67000 in place of 37000.

5 amp Twin Screw

CLOSED BACK ONLY: 1 to 26 terminal sections. (52 screws). Standard screws are 2-56 x 5/32" binder head brass nickel-plated.

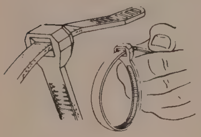
LOCKING MOUNTING CLAMPS

TIES CAN BE COLOR CODED AS PER MILITARY SPECIFICATION. CONSULT FACTORY FOR COLOR CODING INFORMATION.

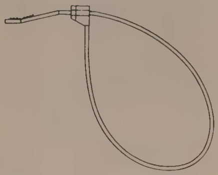
The *"Can Do"* Cable Ties*...With These Quality Features

SELF-LOCKING HEAD



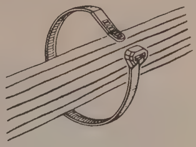
Easy application by tool or by hand.
Will not loosen when pulled tight.

COMPACT, ONE-PIECE DESIGN



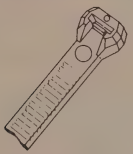
Rugged Nylon with no metal parts. Designed to exceed MIL-S-23190C. Installation tool cuts off excess tie automatically, for low-profile configuration with no protruding edges.

RELEASABLE LOCATING TIP



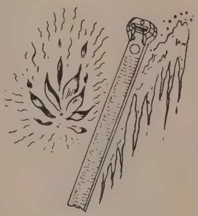
Double-bend tip locates around wires. Guides operator's hand for easy 90° insertion, even in confined areas. Second bend prevents snagging. Tip can be inserted in head and later released. Makes for easier positioning of ties on bundle.

WIDE BUNDLE-GRIPPING SERRATIONS



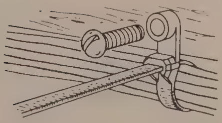
Hug wires tightly. Won't pierce wire insulation as with string, or narrower ties.

ALL-ENVIRONMENT NYLON



100% Nylon (MIL-M-20693). Tough, resistent to temperature extremes, diluted acids, solvents, grease, alkalies, and fungus growth.

SINGLE-UNIT MOUNTING HEAD



Mounting clamp is integral part of tie head for quick attachment to panel or chassis with screw, rivet or bolt.

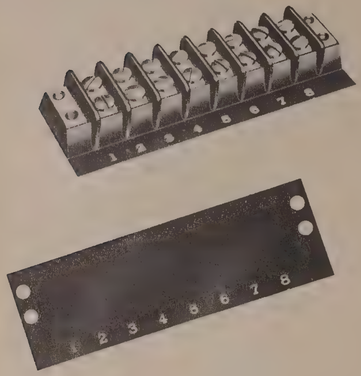
ETC® MARKER STRIPS



ETC Marker Strips serve the dual purpose of affording additional insulation protection and serving as a method of terminal identification. Numbers are ⅛" high and are imprinted in white on a dark surface. Twin or Single Screw Blocks.

Insulating Strips — Open-back blocks are available with permanently bonded insulating strips. Suffix "-88" to block part number. To order unbonded insulating strip, do not suffix printing style code (see ordering system below).

Permanently Bonded Marker Strips: To order, suffix "-91" for a printed marker strip bonded to block. Suffix "-92" for an unprinted marker strip bonded to block.

Available material:

XP	Paper base phenolic (black)
VF	Comm. grade vulcanized fiber (black): MIL-F-1148
XXXP	Paper base phenolic (black): L-P-513
NPG	Nylon cloth phenolic: MIL-P-15047
GMG	Fiberglass, Melamine: MIL-P-15037
GEE	Fiberglass, Epoxy: MIL-P-18177

NOTE: A special moisture and fungus-proof varnish can be provided to seal the surfaces and edges of the Marker Strips, in accordance with MIL-V-173A.

CONNECTORS
E. F. JOHNSON COMPANY

COAXIAL CONNECTORS

The JCM is a miniature (3mm) connector that is fully compatible with SMA types, at a fraction of SMA prices.

The JCM is designed for commercial and industrial applications where low cost is a major factor, and SMA compatibility is required.

The non-galling gold finish is resistant to wear and abrasion.

Cable clamp JCM plugs and jacks consist of 5 or fewer parts which are easily assembled. Only one set of stripping dimensions is required for all cables from 0.075 to 0.216" overall diameter. Panel, bulkhead, and PC mounting receptacles are preassembled.

Beryllium copper center contacts assure superior spring qualities and lowest contact resistance.

Available on special order basis with nickel plating for especially cost conscious applications.

MATERIAL

Center Contact		Beryllium Copper, heat treated
Other metal parts		Half hard brass
Insulators		TFE Fluorocarbon per MIL-P-19468
Plating:	Center contact	copper flash, gold plated. 000025
	Other metal parts	copper flash, gold plated. 000025 or copper flash, nickel plated. 0001

*Electrical performance depends on cable size, frequency, and connector type. For JCM mated pair connecting RG 58 A/U cable, VSWR averages less than 1.15 at 4GHz. Test reports available on request.

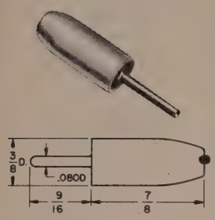
Tip plugs and Printed circuit connectors

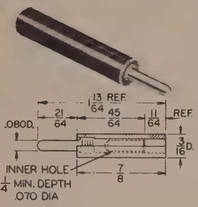
Tip plugs



Solderless Tip Plug

Completely insulated, molded sleeve. Recessed metal head prevents exposure of metal surfaces when engaged in any standard tip jack. All metal parts are nickel-plated brass. Designed for solderless connection of up to 16 gauge stranded wire. Fits all standard tip jacks. Current rating: 10 amps.

Cat. No. 105-0300-001 . Net $0.25
(See color chart under Tip Jacks)



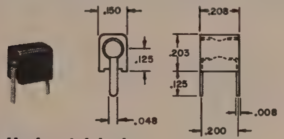
Sub-miniature Tip Plug

For use with miniature jack, .080" dia. tip. Nickel-plated machined brass body, solder type lead connection.

Cat. No. 105-0770-001 . Net $0.25
(See color chart under Tip Jacks)

Printed circuit connectors

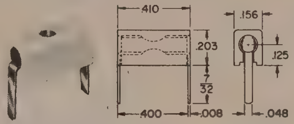
The sub-miniature Tip Jacks and Tip Plugs described below are rated at 5 amperes maximum current capacity. Operating voltage is 1500 volts RMS at sea level and 350 volts RMS at 50,000 feet. Contact resistance is less than 2 milliohms; capacitance between two adjacent jacks less than one pF. at 1 MHz. Body material is made of tough, low-loss polyamide per MIL-M-20693A; able to stand extremely hard usage. Tip Plugs have a one-piece machined contact. Jacks equipped with beryllium copper contacts. Jack contacts and terminals are silver-plated.



New Horizontal Jack

New design accepts 0.080" diameter tip plug in either end. Silver-plated and Irridited beryllium-copper formed contact. Two terminals. Approximately one-half size of standard Tip Jack.

Cat. No. 105-1100-001 . . . . Net $0.10
(See color chart under Tip Jacks)

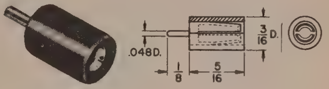


Horizontal Jack
(U.S. Patent No. 3,208,027)

Unique design accepts .080" diameter tip plug in either end, or from top or bottom! Silver-plated beryllium copper formed contact. Two terminals.

Note: Available as a special in production quantities without cross hole.

Cat. No. 105-0750-001 . . . . . . Net $0.12
(See color chart under Tip Jacks)



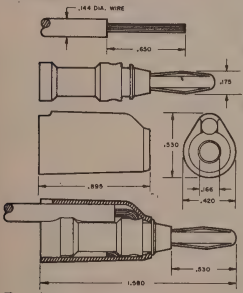
Vertical Jack

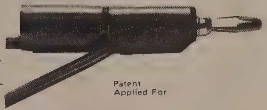
Mounts through single .052" hole, requires minimum mounting area. Silver-plated, machined beryllium copper contact.

Cat. No. 105-0850-001 . . . . . . Net $0.18
(See color chart under Tip Jacks)

Patchcord Stacking Plugs

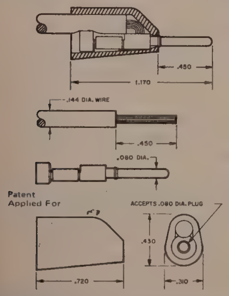
Developed for custom patchcord assembly and replacement of damaged molded patchcord plugs. Allows assembly of patchcords with any length and color. Used with standard 0.144" diameter rubber or extra-flexible polyvinyl insulated wire. Plug body precision machined brass with 0.0002" nickel plating. Polyamide housing available in 6 colors. Operating temperature range −55°C to +105°C.

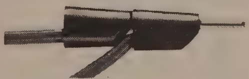




Patent Applied For

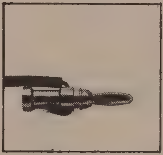
Stacking Standard Banana Plugs
Current rating: 15 amps. Assembly with special tool and fixture is recommended. 6 colors.
Cat. No. 108-1080-001
Net $0.46
(See color chart under Tip Jacks)



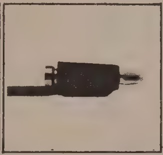


Stacking .080 Standard Tip Plugs
Current rating: 10 amps.
Cat. No. 105-1200-001
Net $0.45
(See color chart under Tip Jacks)

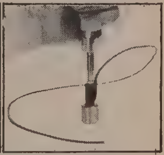
ASSEMBLY PROCEDURE



1. Feed stripped wire through cross-hole of metal contact.



2. Insert contact and wire into housing.



3. Place into fixture. Place tip of tool into rear of contact. Snap contact into place.

Engineering Kits available containing material to assemble 30 patchcords in six colors from E. F. Johnson Company.

Standard Banana Patchcord Stacking Plug Engineering Kit
Cat. No. 108-1299-001
Net $24.95

STANDARD BANANA PLUGS

This group of standard banana plugs has accurately machined brass studs which extend the full length of the plugs, providing extra strength. Springs are nickel-silver—highly resistant to corrosion. Bodies and hardware .0001 nickel-plated. All banana plugs listed below are available with beryllium copper springs and nickel, cadmium, or silver plating, when desired. A wide selection of miniature solder-type plugs is also available on special order—however, quantities in special platings or plugs should be sufficiently large for economical production runs. Solder terminal and nut or screw furnished.

Cat. No.	Dwg.	S	P	D	H	Thread	Net Price

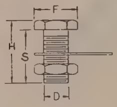
108-1000-001

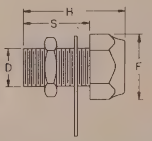
MINIATURE BANANA PLUGS

Extremely small insulated banana plugs with precision machined phosphor bronze body, nickel-plated. One-piece springs are beryllium copper, nickel-plated, .120" dia. Polyamide sleeve. Current rating: 5 amps.

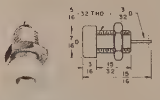
Cat. No. 108-1000-001............................**Net Price $0.42**
(6 colors—see chart)



108-0740-001



108-0760-001



108-0900-001

STANDARD BANANA JACKS

High quality, machined brass banana jack. Nickel-plated. Furnished complete with solder terminal and nut.

Cat. No.	F	D	S	H	Hole Dia.	Thread	Net Price
108-0740-001	3/8"	1/4"	17/32"	5/8"	.166"	1/4"-28	**$0.24**

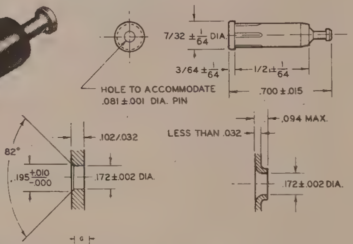
This jumbo banana jack will accommodate plugs such as the 108-0770-001 and the 108-0771-001 listed above. Machined brass, nickel-plated. Furnished complete with solder terminal and nut.

Cat. No.	F	D	S	H	Hole Dia.	Thread	Net Price
108-0760-001	9/16"	3/8"	21/32"	1"	.277"	3/8"-32	**$0.76**

BANANA JACK

Completely insulated molded body with cadmium-plated insert. Accommodates banana plugs of nominal .175" diameter. Voltage breakdown: 10,000 volts DC. Capacity to 1/16" panel: 2.4 mmf. nominal. Mounts in 21/64" diameter circular, "D", or double flat hole (1/4" across flats). Single nut furnished for mounting—no other mounting hardware needed.

Cat. No. 108-0900-001............................**Net Price $0.16**
(See Color Chart under tip jacks)



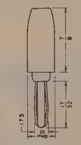
108-1100-001

RIB-LOC® PRESS-IN BANANA JACKS

Johnson RIB-LOC design permits substantial production line savings—no mounting hardware to handle and assemble. RIB-LOC banana jacks install by pressing into proper size chassis hole. Accept .120" tip plug in recessed contact. Silver-plated brass contact. Brass solder terminal silver-plated and Iridited for good solderability. Insulating body molded of low-loss polyamide. Current rating: 10 amps. Peak withstanding voltage: 5,000 volts. Capacity to 1/8" panel: 1.4 pF nominal.

Cat. No. 108-1100-001............................**Net Price $0.13**
(6 colors—see chart)

108-0772-001



108-0300-001

JUMBO INSULATED BANANA PLUGS

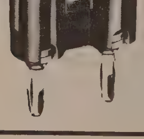
These jumbo size insulated banana plugs are similar in design to the standard types listed above, but are somewhat larger in size. With brass nickel-plated bodies, and nickel-silver springs. The 108-0772-001 has a black plastic handle—the 108-0772-002 has a red plastic handle.

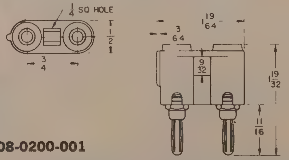
Cat. No.	S	P	D	H	G	O	Net Price
108-0772-001	1 3/4"	3/4"	.300"	2 25/32"	3/8"	5/8"	**$1.35**
108-0772-002	1 3/4"	3/4"	.300"	2 25/32"	3/8"	5/8"	**1.35**

SOLDERLESS BANANA PLUGS

Compact, high voltage insulated plug for a wide variety of applications. Designed for fast, solderless connection of up to 16 gauge stranded wire. Body and pin are constructed of one-piece, nickel-plated brass with high grade nickel-silver springs. Sleeve is molded. Current rating: 15 amps.

Cat. No. 108-0300-001............................**Net Price $0.29**
(See Color Chart under tip jacks)





108-0200-001

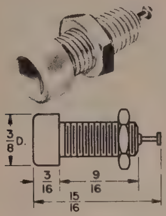
DUAL BANANA PLUGS

Extremely versatile dual banana plug for solderless connection. Molded body incorporates polarity indication and strain relief hole for wire leads. Springs are high quality nickel-silver—bodies are nickel plated. Accurately machined brass studs extend full length of pins for extra strength. Voltage breakdown: 10,000 VDC. Capacity plug to plug: 1.3 pf. Current rating: 15 amps.

Cat. No. 108-0200-001 (solderless)................**Net Price $1.15**
(See Color Chart under tip jacks)

E. F. JOHNSON COMPANY®

Tip jacks



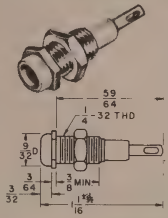
DELUXE TIP JACK

(U.S. Patent No. 2,704,357)

Molded body with recessed closed entry design contact. Silver-plated beryllium copper contact spring. Brass solder terminal is hot tin dipped. Current rating: 10 amps. Voltage breakdown: 11,000 VDC. Capacity to ⅛" panel: 2.0 pf. ¼-32 nut furnished.

Cat. No. 105-0600-001. Net Price $0.27

(See color chart below)

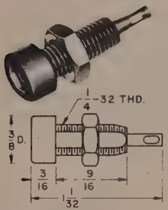


METAL-CLAD TIP JACKS—STANDARD

Molded body, nickel-plated machined brass jacket. Formed, silver-plated phosphor bronze contact. Current rating: 10 amps. Voltage breakdown: 7,000 volts DC. Capacity to ⅛" panel: 3.8 pf. ¼"-32 nut furnished.

Cat. No. 105-0250-001. Net Price $0.25

(See color chart below)

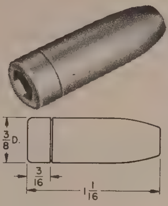


STANDARD TIP JACK

Molded body with recessed, cadmium-plated formed phosphor bronze contact. Current rating: 10 amps. Voltage breakdown: 9,000 volts DC. Capacity to ⅛" panels: 2.0 mmf. ¼"-32 nut furnished.

Cat. No. 105-0800-001. Net Price $0.16

(See color chart below)



JACK AND SLEEVE ASSEMBLY

(U.S. Pat. No. 2,704,357)

Includes Deluxe Tip Jack (105-0601-001 to 105-0613-001), less mounting nut, with inside threaded molded sleeve. Ideal for patch cords, or insulated rear connection of panel mounted tip jack.

Cat. No. 105-0700-001. Net Price $0.35

(See color chart below)

METAL-CLAD TIP JACKS—MILITARY

High reliability tip jack for military use or demanding industrial applications. Highest quality materials — withstand severe environmental temperature, vibration and salt spray conditions. Complies with MS-16108, Rev. F of MIL-STD-242A. Closed entry contact design prohibits entry of tip plug .085" or larger—prevents accidental contact damage by careless probe insertion. Heavy nickel-plated brass jacket. Gold-plated beryllium copper contact spring greatly exceeds minimum insertion/withdrawal cycle requirements of MS-16108. Current rating: 5 amps. Voltage breakdown: 8,000 volts DC. Capacity to ⅛" panel: 3.8 pf. ¼"-32 nut and lock washer furnished. Terminal Style: "A". (Terminal Style "C" per MS-16108 available on special order in production quantities.) Brass solder terminal is gold-plated.

Cat. No. 105-0200-200. Net Price $0.56

RIB-LOC™ PRESS-IN TIP JACKS

Johnson Rib-Loc design permits substantial production line savings—no mounting hardware to handle and assemble. Rib-Loc tip jacks install by pressing into proper size chassis hole. Accept .080" tip plug in recessed, closed-entry type contact that rejects plugs .085" or larger to prevent accidental contact damage. Silver-plated beryllium copper contact spring. Brass solder terminal silver-plated and Iridited for good solderability. Insulating body molded of low-loss polyamide. Current rating: 10 amps. Voltage breakdown: 5,000 VDC. Capacity to ⅛" panel: 1.4 pf nominal.

Cat. No. 105-1040-001. Net Price $0.20

(See color chart below)

COLOR CHART

NOTE: Connectors, unless otherwise specified, are available in 6 molded colors to Federal Standard 595. Other colors listed are available as specials. Catalog number for color desired is determined by adding color numbers on chart below to 6th and 7th digits of catalog number listed for series. EXAMPLE: 105-0800-001 in Violet, add color number for Violet (12) to 6th and 7th digits of series number, and order 105-0812-001. To order 105-1040-001 in Violet, add 12 to 6th and 7th digits of series number and order 105-1052-001.

Color	No.	Color	No.	Color	No.
White*	01	Orange	06	Violet	12
Red*	02	Yellow*	07	Grey	13
Black*	03	Brown	08		
Green*	04	Blue*	10		

*Indicates colors available from stock. Other colors listed are, for some items, available as specials.

E. F. JOHNSON COMPANY®

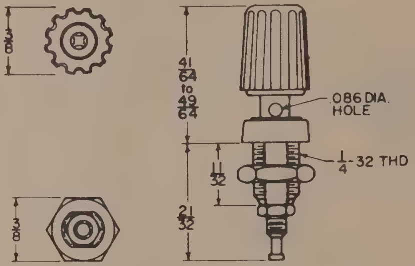
Binding posts

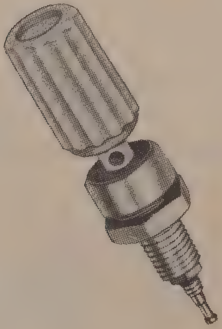
Compact, insulated, pre-assembled binding posts with molded body and silver-plated shank. Fluted thumb nut self-captivated. Connection made at solder stud, or lug may be slipped over threaded portion and secured with a nut. Single tip plug fits hole in top of miniature binding post; banana plug accepted by two larger binding posts. Insulation resistance greater than 200 meg. after MIL-T-5422B humidity test. (U.S. Pat. No. 2,806,999.)

New miniature binding post designed for compact test equipment applications. Rated at 15 amps. thumb nut to terminal, 5 amps. tip jack to terminal. Voltage breakdown: 5,000 volts DC. Capacitance to ⅛" panel; 3 pf. Mounts in 17/64" diameter circular hole; "D" or double flat hole—.219" across flats. Equipped with single ¼"-32 nut for fast mounting—no time-consuming spacers or mounting hardware required. No. 111-0200 accepts .080" dia. pin probe. No. 111-0400 accepts .120" dia. banana plug.

Available in 6 colors: white, red, black, green, yellow, and blue.

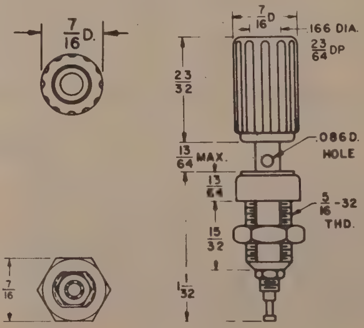
Cat. No. 111-0200-001	**Net Price $0.80**
Cat. No. 111-0400-001	**Net Price .58**





Rated at 15 amps. Current carrying capacity. Voltage breakdown: 8,000 volts DC. Capacitance to ⅛ panel: 3.3 pf. Mounts in 21/64" diameter circular hole; "D" or double flat hole—¼" across flats. Single 5/16-32 mounting nut furnished—no other hardware required.

Cat. No. 111-0100-001..**Net Price $0.50**
(10 colors available—see color chart)



STANDARDIZED TERMINAL BOARDS

STANDARDIZED TURRET TERMINAL BOARDS

Cut your production cost by eliminating the tooling and setup charge usually applied to nonstandardized boards. Terminals are securely riveted and hot tinned for easy soldering.

TERMINALS: Your choice of most popular types.
Made of Brass: QQ-626, comp. 22, ½ hard.
Hot Dip Solder finish: Mil-F-14072 Type 221.

Material: Your choice of either PBE or GEE Phenolic.

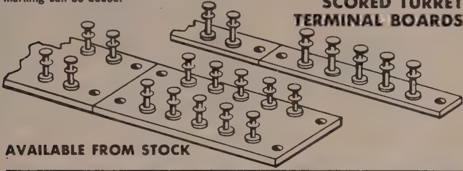
PBE: Paper base electrical, Mil-P-3115C, Temp. 250° F max. Type XXXP.

GEE: Glass Epoxy, Mil-P-18177, Temp. 300° F max. Type G-10.

Five sections **SCORED** for easy **separation** M'tg. holes in each section.

These boards **CAN BE MODIFIED** with terminals staked in all holes, scoring eliminated. Marking can be added.

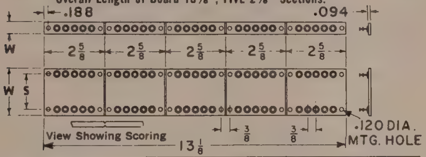
SCORED TURRET TERMINAL BOARDS



AVAILABLE FROM STOCK

3/8" SPACING AND SCORED

3/32" THICK PHENOLIC — Choice of 4 Types of Terminals
Overall Length of Board 13⅛", FIVE 2⅝" Sections.



Five sections **SCORED** for easy operation.
M'tg. holes in each section.

CHOICE OF TERMINALS

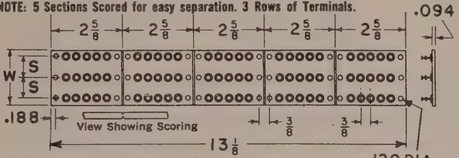
UNIVERSAL TERMINAL BOARDS

Designed for production or experimental use, these **standardized boards** are well suited for any electronic application requiring a sturdy mounting surface for resistors, condensers and components.

TERMINAL: 1503-3 HOT TIN DIP finish for easier soldering and infinite shelf life.

MATERIALS: PBE (Paper Base Elect. Mil-P-3115C type XXXP)
GEE (Glass Epoxy Mil-P-18177 type G-10)

NOTE: 5 Sections Scored for easy separation. 3 Rows of Terminals.



MODIFICATIONS: Other materials and terminals of your choice supplied. Marking may be added.

Assembled. with **TERMINAL** 1503-3

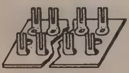
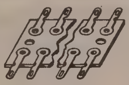
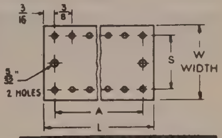
READI-MADE TERMINAL BOARDS

- ECONOMICAL
- SAVE TOOLING COST
- DELIVERY FROM STOCK
- RANGE OF SIZES
- APPROVED MATERIALS







Readi-Made Terminal Boards are ideal for General Use. Excellent for mounting resistors, condensers, etc. Choice of Terminals.

MATERIAL: 1/16" thick Bakelite (Mil Spec 3115C-Pbe-P grade).

TERMINALS: 1204 and 1268 are stamped from .023 thick brass. 1539 is turned from 3/16" dia. brass rod.

PLATING: 1204 is Cadmium plated. 1268 and 1539 are Hot Tinned for easy soldering.

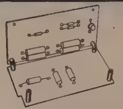
HINGED STANDOFFS FOR TERMINAL BOARDS

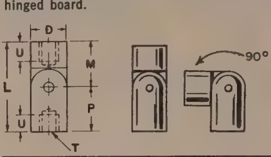


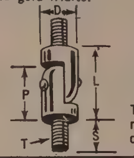
Only 2 screws used to fasten board in place or open the hinged board.

- APPLICATIONS UNLIMITED
- TIME SAVER
- CUT COST OF SERVICING
- SPACE SAVER
- INTERCONNECT CIRCUITS OR SERVICES WITHOUT DANGER OF SHORTING
- WIRING EXPOSED FOR EASY TEST

Material: Made of Brass MIL Spec. QQ-B-626A Comp. 22—½ Hard.

Finishes: Cadmium plate per QQ-P-416 Type 2 Class 2 and gold Iridite.





These standoffs mount at front of the board.

ELECTRONIC COMPONENTS

PLUG IN HOUSINGS

Enhance the appearance and give that professional look to your products using these molded housings. Ideally suited for packaging relays, logic packages, networks and miniature circuitry. Durable, lightweight covers that will withstand vibrations and rough usage.

HEADERS: Molded of GP black phenolic and fit standard sockets. Pins are brass. Nickel plated guide hole tapped 8-32 for terminal board mounting stud.

- **Variety of molded materials**
- **Good chemical resistance**

MATERIAL CHARACTERISTICS:

Polystyrene: For general purpose use where high impact strength is not required and temperature would not exceed 170°F.

Butyrate: 3 times the impact strength of Polystyrene and excellent electrical properties, use wherever temperatures of 210°F exist.

Nylon: Impact strength slightly less than Butyrate but recommended for use where temperatures are as high as 300°F.

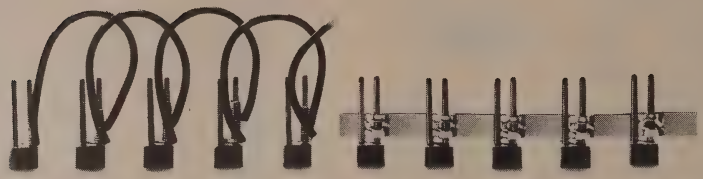
KEYSTONE ELECTRONICS CORP., 49 BLEECKER ST., NEW YORK, N. Y. 10012 • (212) 475-4600

One termination method is surer, faster and costs less.



Obviously.

Engineers nationwide are switching from wire wrap to a new, simpler way of connecting common spaced pins in electronic chassis. The Lear Siegler Pin Bar.

The reasons are clear:

Terminations are surer because each Pin Bar is "spec" built to fit your pins precisely. No chance for human error. Pin Bars mean 100 percent reliable gas tight terminations that will outlast the life of the chassis.

Assembly is faster because each bus terminates all pins at once – with a remarkably simple tool.

That adds up to low cost terminations. Pin Bars can cut your wire wrap costs in half. Typically from 10 cents down to 3-6 cents per pin. One major manufacturer has already demonstrated a $68 savings per chassis using Pin Bars. You may, too. Write for more information and free Pin Bar samples to:

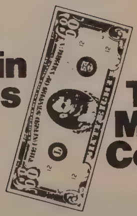
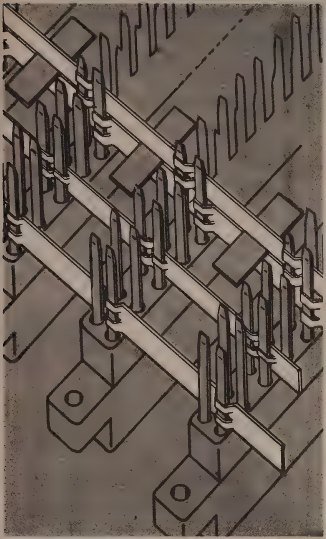
Pin Bars



The Money-Saving Connection

LSi Pin Bar® means:



- Thousands of "hi-rel" solderless bussing connections per hour at a fraction the cost of your present busing method.
- Fast, simple, "foolproof" connections that lower production costs — eliminate continuity checks.
- Low uniform contact resistance that will electrically enhance any circuit — especially frequency applications.
- Efficient back panel design (greater pin exposure, increased discrete wiring area and easier checkout).
- A "spec" performance electrical component produced to your exact requirements.

solderless bus bar for common connections

SPECIFICATIONS

Terminal Spacing and Length: Selectable.

Spacing Tolerance: ±0.010″ between terminals — ±0.020/foot cumulative.

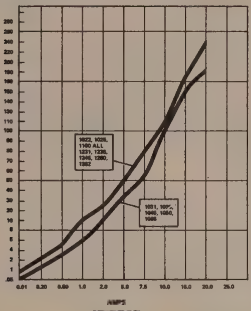
Material: 1000, 1200 Series: Beryllium Copper Alloy #172 per QQ-C-533.
1100 Series: Beryllium Copper Alloy #175 per QQ-C-533.

Standard Finishes:
Tin: Electro-tin plate, fused, per MIL-T-10727, Type I, 0.0003″ thickness.
Gold: Gold plate per MIL-G-45204, Type II, 0.000050″ minimum thickness over nickel plate per QQ-N290, 0.000050″ minimum thickness.

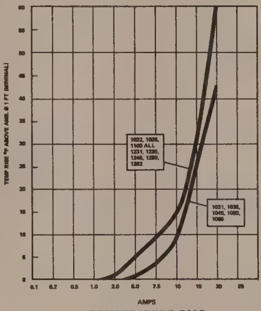
Options: Insulation, special finishes, unique end configurations.

Insertion: Manual or semi-automatic insertion equipment available.

PERFORMANCE DATA



IR DROP



TEMPERATURE RISE

The following performance data meets or exceeds MIL-STD-202 "D" (Full Report Available).

Thermal Shock: Method 107, Condition A.

Mechanical Shock: Method 213, Condition H.

Vibration: Method 201.

Corrosion Resistance: Method 101, Condition B 48 Hour Exposure Salt Spray.

Contact Voltage Drop: 0.533 millivolts maximum per amp.

Gas Tight Contact: 10 minutes of 1:1 hydrochloric/nitric acid followed by 10 minutes of ammonium sulfide fumes.

DESIRED PIN BAR CONFIGURATION

Alternate Pins (Series 1000 & 1200)		Connector Pin Size	Adjacent Pins (Series 1100)
	1022	.022″ x .036″	1122
	1025	.025″ x .025″	1125
1031	1231	.031″ x .062″	1131
1035	1235	.035″ x .050″	1135
1045	1245	.045″ x .045″	1145
1050	1250	.050″ x .035″	1150
1062	1262	.062″ x .031″	1162

HOW TO ORDER

An 11-digit number is used for ordering. An example would be as follows:

1031	— 0.500 —	32 —	G or	T
Model No.	Connector Spacing 0.500″	No. of Connectors	gold finish	tin finish

mueller clips

a complete line of

ALLIGATOR TEST & BATTERY CLIPS

Mueller Electric Co. CLEVELAND, OHIO 44114

"60 SERIES" ALLIGATOR CLIPS

U.S. Patent No. 3,321,736

No. 60—CONVENTIONAL TYPE

New slim design with full-meshing teeth. Convenient, round thumb grip, barrel connection for banana plug. Equipped with small soldering lip. Strong spring with a hard bite. Cadmium plated. 2" long.

EACH NET.......................... $0.14 LOTS OF 10.......................... $0.102

No. 60-S—SCREW CONNECTION

Eliminates necessity for soldering. Otherwise same as No. 60.

EACH NET....$0.16 LOTS OF 10... $0.118

No. 60-NS—ALLIGATOR NEEDLE CLIP

Like No. 60-S, but with insulation piercing needle in one jaw. Screw connection. 2" long. 10 per box.

EACH NET.......................... $0.30 LOTS OF 10.......................... $0.228

No. 60-CS—COPPER ALLIGATOR CLIP

Solid copper version of No. 60-S. Screw connection. 2" long. 10 per box.

EACH NET.......................... $0.25 LOTS OF 10.......................... $0.187

No. 60PR-2—SPECIAL BARREL FOR TEST PROD OR PHONE TIP

Barrel crimped to provide friction fit on standard test prod or phone tip. Holds prod on test, frees hand for other work.

EACH NET.......................... $0.20 LOTS OF 10.......................... $0.151

No. 62 FLEXIBLE VINYL INSULATOR

Red and black insulators for Alligator Clips 60, 60-S, 60-CS, 60PR-2, 60-NS.

EACH NET..........................$0.09 LOTS OF 10.......................... $0.071

No. 60-HS—STEEL ALLIGATOR CLIP WITH INSULATED HANDLE

Same as No. 60-S except equipped with red and black insulating sleeves on end. Very convenient for distinguishing leads. Has screw connection also. Cadmium plated. 2 11/32" long. Shipped half red, half black.

EACH NET.......................... $0.22 LOTS OF 10..........................$0.164

No. 60-CHS—COPPER ALLIGATOR CLIP, INSULATED HANDLE

Solid copper version of No. 60-HS. Screw connection. Shipped with half red, half black insulating sleeves. 10 per box.

EACH NET.......................... $0.30 LOTS OF 10.......................... $0.228

"70 SERIES" ALLIGATOR CLIPS

U.S. Patent No. 2,762,028

Features simplified design, fast connection of wire with cord strain relief ears, patented hinge construction and lower cost.

No. 70—FOR SOLDERED CONNECTION

Steel, cadmium plated. 1¾" long.

EACH NET..... $0.11 LOTS OF 10...... $0.081

No. 70-S—SCREW CONNECTION

Otherwise same as No. 70.

EACH NET..... $0.13 LOTS OF 10...... $0.098

No. 70-CS—COPPER SCREW CONNECTION

Solid copper version of No. 70-S.

EACH NET...... $0.22 LOTS OF 10..... $0.168

No. 72— SKIN-TIGHT INSULATOR FOR 70 SERIES ALLIGATOR CLIPS!

For the first time complete, skin-tight, one-piece insulation for a standard size Alligator Clip! Covers entire clip right down to nose. Special tip slot permits full jaw opening without exposing teeth.

EACH NET.......................... $0.08 LOTS OF 10.......................... $0.061

MICRO-GATOR CLIP

(Smallest Insulated Clip Ever Made)

U.S. Patent No. 2,762,028 Trademark Reg.

Micro-Gator

Micro-Gator with Insulator

The alligator clip with the microscopic tip! This is the alligator clip you now can use where no other clip will do . . . on printed circuits, in tight spots and on tiny terminals too crowded for anything but its microscopic tip. Including separate skin-tight insulator the tip is no bigger than the head of a pin! Yet the Micro-gator has ample thumb grip, and plenty of bite to stand up straight on the smallest terminals. Ample 7/32" jaw spread. 1 3/32" long. Solder connection. Skin-tight flexible vinyl insulator (sold separately) has "lip-action" tip slot so that jaws stay covered whether open or closed.

No. 34 (Steel, cadmium plated)

EACH NET.......................... $0.09 LOTS OF 10.......................... $0.066

No. 34-C (Solid Copper)

EACH NET.......................... $0.12 LOTS OF 10.......................... $0.086

No. 36 (Insulator for Nos. 34 and 34-C)

EACH NET.......................... $0.06 LOTS OF 10.......................... $0.044

MINI-GATOR CLIP

U.S. Patent No. 3,321,736

Trademark Reg.

Mini-gator

Mini-gator with Insulator

Indispensable for testing or incorporation into miniaturized equipment. New design features rivet hinge for greater strength, full-meshing teeth to grip finest wires. Skin-tight flexible Vinyl insulator (sold separately) covers completely — has slotted "lip action" tip. Clip weighs 1/20th oz., has tiny 11/64" O.D. nose, but ample 3/16" jaw spread 1 3/32" long. Crimping ears. Solder connection. Surprisingly strong bite penetrates corrosion and coatings.

No. 30 (Steel, cadmium plated)

EACH NET.......................... $0.11 LOTS OF 10.......................... $0.082

No. 30-C (Solid Copper)

EACH NET.......................... $0.13 LOTS OF 10.......................... $0.10

No. 32 (Insulator for Nos. 30 and 30-C)

EACH NET.......................... $0.06 LOTS OF 10..........................$0.044

COMPLETELY INSULATED ALLIGATOR CLIPS

Patent Pending

No. 63 or 63-C Clip

Sold only as a unit, with factory-applied insulators.

Completely insulated right down to the nose. Flexible 2-piece skin-type vinyl insulator of high dielectric strength, with "lip action" slotted tip that permits opening of clip without exposing metal. Insulator nose is only 13/64" O.D. The tight fitting sheath preserves all the slimness of the Alligator Clip, still giving complete protection against shorts in even the tightest spots. Screw connection easily made by slipping insulator forward. 2⅛" long.

No. 63—INSULATED ALLIGATOR CLIP (STEEL)

Composed of Mueller No. 60-S Alligator Clip steel, cadmium plated, screw connection, complete with 2-piece vinyl insulator. Shipped half with red insulators, half black. 10 per box.

EACH NET..........................$0.30 LOTS OF 10..........................$0.228

No. 63-C—INSULATED ALLIGATOR CLIP (COPPER)

Composed of Mueller No. 60-CS Alligator Clip, solid copper, screw connection. Shipped half with red insulators, half black. 10 per box.

EACH NET.......................... $0.36 LOTS OF 10.......................... $0.273

CROCODILE CLIPS

No. 85 or 85-C Clip with No. 87 Insulator

No. 85-T Clip

No. 85—A very small clip with slender, elongated jaws for getting into tight places in radio or electrical test work. Screw connection. 2⅛" long.

EACH NET.......................... $0.16 LOTS OF 10.......................... $0.12

No. 85-C—Same as No. 85,, except solid copper with phosphor bronze spring, brass screw. A radio frequency, entirely non-ferrous test clip. 10 per box.

EACH NET.......................... $0.32 LOTS OF 10.......................... $0.243

No. 85-T—Crocodile "Tip-Clip"—equipped with standard phone tip on one jaw, otherwise same as No. 85. Ideal for use as a prod, for ordinary clip connections and for connections to insulated binding posts having nonremovale heads. 2⅝" long. 10 per box.

EACH NET.......................... $0.42 LOTS OF 10.......................... $0.314

Use No. 87 Insulators for clips 85, 85-C and 85-T. Red and Black. Cover entire clip except nose. Protect against short and shock. Help to distinguish leads.

ALLIGATOR TEST & BATTERY CLIPS

Mueller Electric Co. CLEVELAND, OHIO 44114

TEST CLIPS

No. 45 PEE WEE

A very small test clip for radio, ignition, meter and similar work. 1½" long. Jaw spread 5/16". Steel, cadmium plated.

EACH NET..........................$0.14 LOTS OF 10.........................$0.104

No. 45-C
Solid Copper R.F. Test Clip

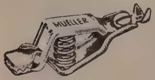
No. 45-C Clip
No. 47 Insulator

Solid copper radio frequency test clip. Phosphor bronze spring, brass screw. Will not heat up in high frequency test work, entirely non-ferrous. 1½" long. 10 per box.

EACH NET........................ $0.26 LOTS OF 10....................... $0.196

Use No. 47 Insulator for clips 45 and 45-C.

No. 48-B



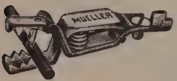
A small test and battery clip for radio use and general testing purposes. 2" long. Jaw spread ½". Steel, cadmium plated. 10 per box.

EACH NET......$0.22 LOTS OF 10..... $0.168

No. 48C—Solid Copper. Same size as 48-B.

EACH NET..........................$0.32 LOTS OF 10........................ $0.238

No. 50-C Needle Clip



Solid copper. Needle pierces insulation of wire for quick test contact. 2¼" long. 10 per box.

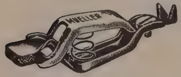
EACH NET.... $0.50 LOTS OF 10..$0.374

No. 51-C—Large crocodile clip. Same as 50-C but without needle. 10 per box.

EACH NET.... $0.36 LOTS OF 10.... $0.272

Use No. 49 insulator for Clips 48-B, 48-C, 50-C and 51-C.

No. 27



A high grade test clip with meshing teeth on three sides of jaws. For laboratory and shop test work 2 7/16" long. Jaw spread ⅝". Steel, cadmium plated. 10 per box.

EACH NET..........................$0.26 LOTS OF 10........................$0.196

No. 27-C—Solid copper. Same size as No. 27. 10 per box.

EACH NET......................... $0.46 LOTS OF 10......................... $0.342

Use No. 29 Insulator for clips 27 and 27-C.

LARGER SIZES OF CLIPS

MUELLER *QUALITY* BATTERY BOOSTER CABLES

Highest quality cables, equipped with famous Hippo-Clips, for boosting "dead" 6 or 12-volt vehicle batteries with an external battery. Cables are pure copper, finely stranded for high flexibility and covered with rubber insulation which stays flexible in the coldest weather and resists oil, grease and acid. 413 strands of No. 30 wire in the 4-gauge cable and 259 strands of No. 30 wire in the 6-gauge cable. The many fine features of the Hippo-Clips alone are listed elsewhere on this page. The clips are both soldered to the cable and clinched around the cable insulation by means of clinching ears.

Packaged: pair of cables with clips in a bright, attractive display carton. Standard shipping container 10 cartons.

No. 8A6—8 ft., 6-gauge, with No. 41A Hippo-Clips (Steel, bright copper plated)
NET PRICE PER PAIR......$11.10

No. 12A6—12 ft., 6-gauge, with No. 41A Hippo-Clips (Steel, bright copper plated)

NATIONAL TEL-TRONICS

ntt

STATE ROAD HILL, MEADVILLE, PA. 16325
A division of Electro-Audio Dynamics, Inc. (814) 724-6440

For all your connector and component needs, there is no larger or more reliable source than National Tel-Tronics. Having produced parts for over twenty-five years for all the major OEM equipment manufacturers, National Tel-Tronics has a vast background of component and connector experience on which to draw. Complete tool shop, stamping facilities and in house production capability enable us to have the flexibility to rapidly produce a vast range of electronic connectors and components, either standard or to the customer's specific requirements. Many of our standard parts are listed here. If you don't see your specific requirement, contact our company for a fast and reliable quotation.

PHONO PLUGS AND JACKS

Choose from the largest selection of types; solder, all-crimp, shielded, short and long shell, handled and insulated versions.

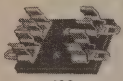
FUSE MOUNTING BASES AND HOLDERS

Designed for 3AG type fuses, fuse mounting bases are available in a variety of materials from 1/16" to 3/16" XP phenolic and UL rated FR materials, in both single and multiple configurations. Panel mount fuse holders for 3AG short type fuses are available in both straight and space-saving right-angle configurations with ribbed and fluted caps. The panel mounted fuse holder parts are CSA and UL approved.

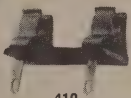
408

449

450F



403



410

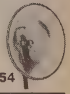
450RA

ANODE AND HIGH VOLTAGE CONNECTORS

Anode connectors to 40 KV rating for BW and color television, and oscilloscopes, are available in a variety of configurations. Spring clips and solderless stainless-steel clips assure continuity. Anode cups are standard in neoprene rubber, flame retardant grade PVC or silicone rubber variations in sizes of 1½", 1¾" and 3". Anode connectors are UL approved.

250

239



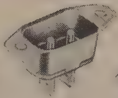
254

INTERLOCK RECEPTACLES

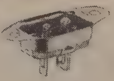
Both flush and bathtub type receptacles for AC connections are standard in a variety of materials from XP phenolic through UL approved flame retardant materials. Solder type, polarized and quick disconnect type pins are standard. Molded snap-in types are also available in flame retardant materials. All the interlocks are approved by Underwriter's Laboratories and Canadian Standard Assn.

712

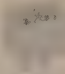
716



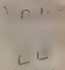
726



732



60-740

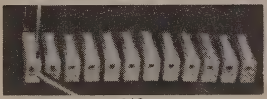


60-746

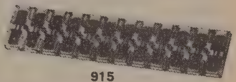
MOLDED TERMINAL BLOCKS

A variety of molded terminal blocks in flexible PVC are available as standard items. Screw type connections, screw driver slot, and .250 quick disconnect connections are standard. Standard size blocks are in a 12 position configuration but can be cut to smaller size if desired.

905



910



915

COMPRESSION TYPE TERMINAL BOARDS AND BLOCKS

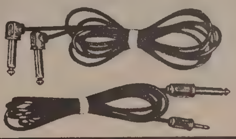
Two types of compression type boards are available from stock. Series 927 features push-button multi-covered terminals which are mounted on phenolic or FR type boards. Available in six different colors in single or multi-roll configurations. A white molded PVC terminal block with red push-button is also available in a 12 position length. This can also be cut to smaller sizes if desired.

900

927

MOLDED CABLE AND HARNESS ASSEMBLIES

A complete molding facility allows great flexibility in providing the audio and electronics industry with a variety of molded cable assemblies. Standard molds includes phone plugs and jacks in 2 and 3 conductor configurations, phono plugs and jacks, miniature phono plugs and miniature jacks, mike connectors, ultra-miniature plugs, coaxial connectors and various adapters. Coaxial and zip cord cables are readily available as well as those for more special applications. Custom assemblies include molds designed to customer specifications and also include capability of amp and molex crimp type assemblies, wire harnesses and multiple conductor assemblies.



DIN CONNECTORS

NTT European style "Europlugs" are available in two, three and five contact arrangements in both male and female versions. In-line and panel mounted types are standard in both flush and extended barrel configurations.

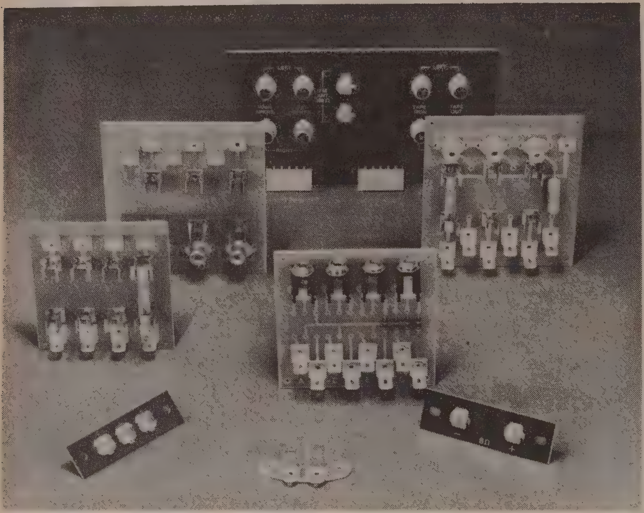
PRINTED CIRCUIT BOARDS AND ASSOCIATED HARDWARE SUPPLIED COMPLETELY ASSEMBLED



One-call, one-source for your printed circuit boards completely assembled with your choice of hardware... delivered to you all ready for component insertion. This unique exclusive single-source service saves you valuable dollars in costs and countless hours in long lead times. Prototypes can be supplied in as little as *48 hours if standard hardware is specified.

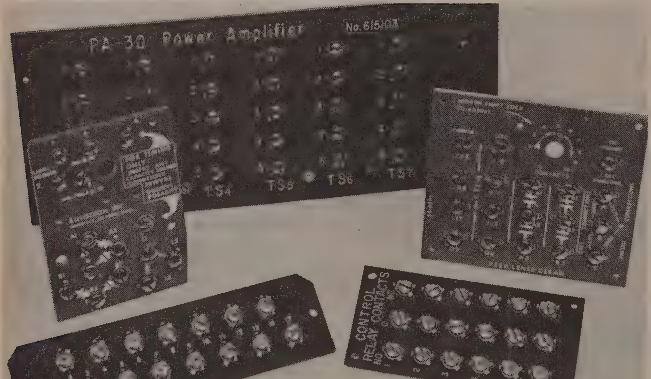
F A E P ©

You get superior quality printed circuit boards manufactured to the highest industry standards by Astro Circuit's new F.E.P.© "Fast-Etch-Process." Simple or extremely complex PC boards to your exact requirements including single-sided, double-sided, plated through holes and infra-red reflow.

Completely assembled terminal boards in any combination of insulating materials and hardware can be supplied in *rapid time and at very competitive prices. All grades of laminated phenolics and fibers including UL/FR materials can be supplied.

* S.O.S. — Speed Order Service

TERMINAL BOARD ASSEMBLIES



Whether it be for an existing part, or a new design, NT-T is your best source for total service for terminal board assemblies. Faster deliveries and cost savings are yours because of our years of engineering know-how and manufacturing experience.

We offer a wide selection of stock tooling configurations to produce terminal boards to your requirements. For special configurations and designs our special tooling charges are nominal. Board materials are stocked in most grades of paper based materials up to XXXP. Glass epoxy, glass polyester, glass melamine and FR grades are available upon request. Boards can be printed or embossed to your requirements. A wide variety of quick connect/disconnect terminals, screw-terminals, lugs and clips are available and can be provided in any combination desired.

QUICK-DISCONNECT TYPE TERMINALS AND TERMINAL BOARD ASSEMBLIES

Choose from a virtually limitless selection of National Tel-Tronics quick-connect/disconnect terminals and other component holding and/or mounting hardware. Standard configurations include multiple blade terminals. All terminals are available in .020″ and .032″ thicknesses with electro-tin plating over brass. Special terminal designs available to your exact specifications including special plating, etc. All variations can be assembled on standard size strips as well as panels to customers specifications.

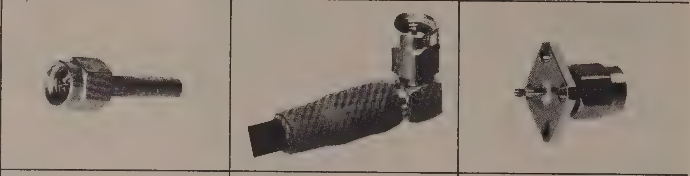
OSM COAXIAL CONNECTORS and ADAPTERS

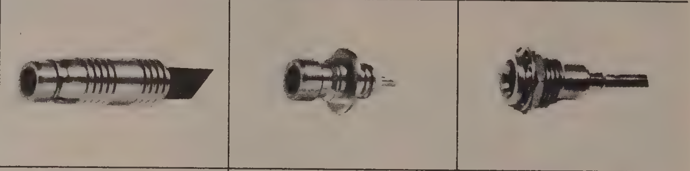
OSM

Miniature, high performance, reliable, low VSWR connectors. Dc to 26 GHz. For use on 50 ohm small and medium size semi-rigid and flexible cable. Military designation is SMA.



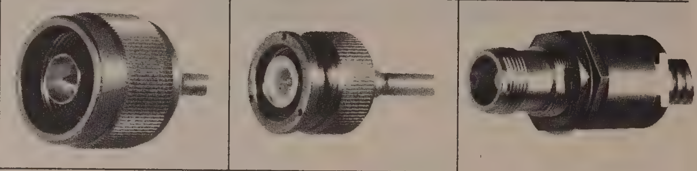
OMQ/OSQ

New miniature and subminiature quick connect, positive interlock series, Dc to 5.0 GHz. Low cost. All crimp assembly. For use on both semi-rigid and 50, 75 and 95 ohm flexible cable.



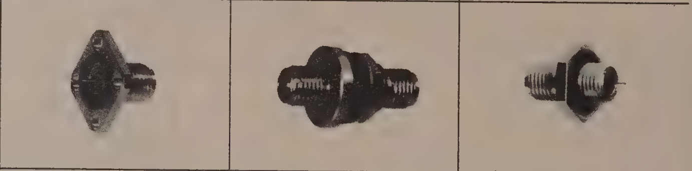
TYPES N, TNC, SC

Reliable, low VSWR connectors designed to maximize performance at higher frequencies. For use on 50 ohm semi-rigid cables. Bulkhead feedthrough and right angle models available.



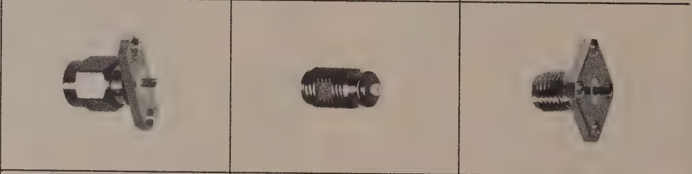
HERMETIC SEAL TYPES

OSM and OSSM connectors meet many applications including launches to microstrip in sealed packages. Flange mount, bulkhead feedthrough, MIC and in-series adapters.



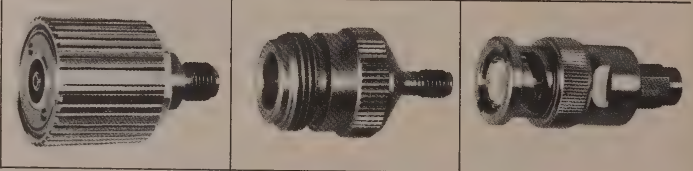
MIC TYPES (OSM & OSSM)

Low VSWR connectors for use with microstrip integrated circuits. Also usable with strip transmission line. Many configurations available to provide design versatility.



BETWEEN-SERIES ADAPTERS

Over 125 combinations for interconnection between 14 connector series. 100% computer tested to assure low VSWR and reliability.



Send for 1975 catalogs of OSM Connectors, Adapters and Components. Included are specifications, detailed outline drawings and applications data.

OVER 100,000 STRONG

Every month over 100,000 buyers and specifiers like yourself receive Electronic Products Magazine . . . that makes us the largest electronics magazine around. And we're the largest for a darn good reason . . . we give you what you need: a practical editorial approach . . . one that's application and new product oriented. Editorial that offers solutions to the problems you face in your everyday task of designing and building electronic systems and subassemblies. The type of information you can put to use now.

If you're not getting EPM . . . why not write our circulation manager for a qualification form and join the over 100,000 strong.

We are proud of the service and quality of the products we manufacture. Customers and others having an interest in our products are welcome to visit us at any time.

POMONA TEST ACCESSORIES . . .

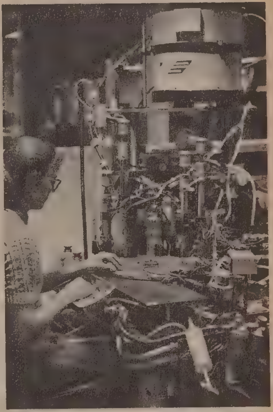
Designed to Meet Rigid Industrial and Military Applications

Pomona Electronics provides an extremely broad, versatile line of electronic test accessories, usable by virtually anyone working with any electronic equipment.

Specialization in items such as molded patch cords, cable assemblies, test socket adaptors, ¾″ spaced molded accessories, molded test leads, connecting leads and other design accessories make Pomona Electronics your best source for electronic test accessories.

Our complete engineering facilities are geared to assuring excellent product quality. Every item is the result of choosing the best in materials, and carefully planning the processing and assembly.

We offer wide distribution and off-the-shelf delivery at all times. Our processing and shipping facilities are geared to fast, accurate deliveries to meet your most demanding delivery schedule.



POMONA ELECTRONICS A Division of International Telephone and Telegraph Corporation

QUANTITY PRICE DISCOUNT SCHEDULE

For the convenience of our many industrial customers who purchase Pomona products in quantities, we offer a simplified ordering procedure.

You will find a code letter printed next to the single-item net price of every model listed in the general catalog. This code refers to the particular quantity discount price schedule that applies to each individual item.

To find the quantity discount price for a specific model, simply note the net price, and quantity discount schedule code letter listed for the item in the catalog. Then, referring to the industrial price list, locate the net price in the left-hand column, and the code letter in one of the right-hand columns. This will give you the quantity discount price for that particular item.

3/4" SPACED MOLDED BANANA PLUGS

POMONA ELECTRONICS

General Specifications listed below apply to items using banana plugs in this catalog.

FEATURES . . .

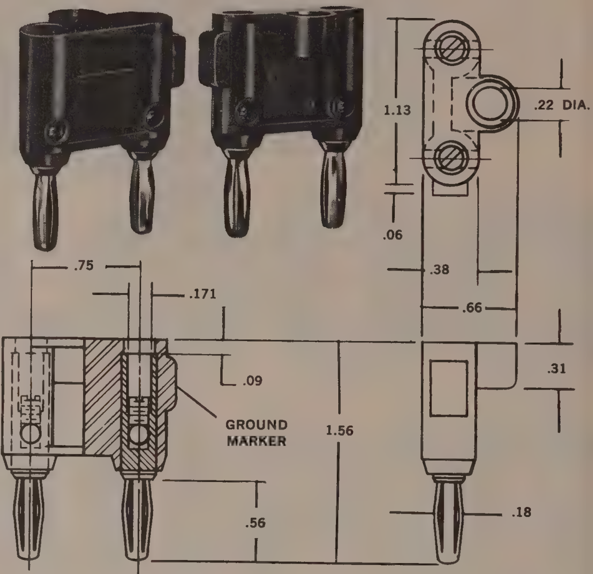
- One piece beryllium copper heat treated spring for maximum long life.
- Rounded spring design results in maximum contact area.
- STACK-UP feature allows an unlimited number of connections at the same electrical point.
- Tough thermoplastic molded directly on to the metal body of the plugs and connectors.

SPECIFICATIONS . . .

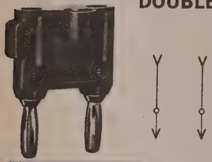
- Fits standard 0.166 dia. banana jacks.
- Spring, beryllium copper alloy 170 per QQ-C-533.
- Plug body, Brass per QQ-B-626, Alloy #360.
- Nickel plated per QQ-N-290, Class 2.
- Contact resistance less than 0.001 ohms per banana plug.

RATINGS	Models: MDP; MDP-ST; 1330; 1330-ST; 2970
■ Capacity :	0.8 pf to 10 MC
■ Current :	15 Amps. Cont., 30 Amps. Int.
■ Voltage :	5000 W.V. D.C.
■ Temperature :	—25°C to +85°C, operating temp.

ACTUAL SIZE



DOUBLE BANANA PLUG

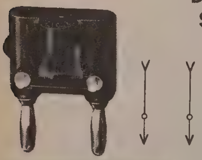


Double banana plug on 3/4" centers; set screws secure leads; simplifies cable construction or component mounting; banana jacks permit top Stack-Up for multiple connections.

COLORS: Black, Brown, Red, Orange, Yellow, Green, Blue, Violet, Gray, White.

MODEL MDP (Specify Color) QUANTITY DISC. CODE Ⓐ **NET .85**

DOUBLE BANANA PLUG WITH SOLDER TURRET TERMINALS

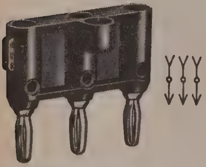


Similar to Model MDP, except has solder turret terminals for permanent noise-free connections of cables and components. Double banana plug on 3/4" centers; banana jacks permit top Stack-Up for multiple connections.

COLOR: Black

MODEL MDP-ST QUANTITY DISC. CODE Ⓐ **NET 1.00**

TRIPLE BANANA PLUG

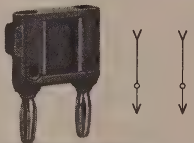


Triple banana plug on 3/4" centers; set screws secure leads. Ideal for balanced line 2 conductor shielded cable assemblies. Banana jacks permit top Stack-up for multiple connections.

COLORS: Black, Red.

MODEL 2970 (Specify Color) QUANTITY DISC. CODE Ⓐ **NET 1.75**

COMPONENT MOUNTING DOUBLE BANANA PLUG

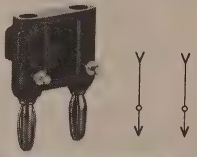


Double banana plug on 3/4" centers; set screws secure leads; features recess for mounting small components; banana jacks permit top Stack-Up for multiple connections.

COLORS: Black, Red

MODEL 1330 (Specify Color) QUANTITY DISC. CODE Ⓐ **NET .85**

COMPONENT PLUG WITH SOLDER TURRET TERMINALS

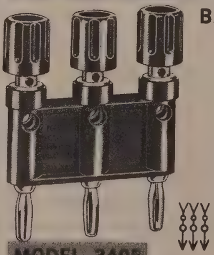


Similar to Model 1330, except has solder turret terminals for permanent noise-free connections of components, etc. Double banana plug on 3/4" centers: Banana jacks permit top Stack-Up for multiple connections.

COLORS: Black, Red.

MODEL 1330-ST (Specify Color) QUANTITY DISC. CODE Ⓐ **NET 1.00**

BINDING POSTS TO TRIPLE BANANA PLUG



Features insulated binding posts on 3/4" centers for rapid mounting and interchangeability of components. Binding posts allow top Stack-Up for multiple connections. Side Stack-Up provided by thru-holes in plug body.

UPPER: Insulated Triple binding posts, on 3/4" centers. Cross holed (.166 dia.) in body provide side Stack-Up connections.

LOWER: Triple banana plug, on 3/4" centers.

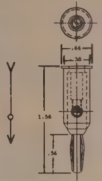
COLORS: Body, Black. Binding Posts, Red/Black/Black.

MODEL 3405 QUANTITY DISC. CODE Ⓐ **NET 4.95**

BANANA PLUG ACCESSORIES

POMONA
ELECTRONICS

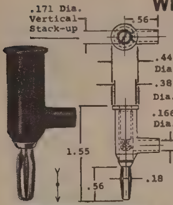
SOLDERLESS BANANA PLUG—STACK-UP



Wire firmly held in place with internal set screw, eliminating soldering. Assembly of test leads simplified.
UPPER: Banana jack, .171 dia.; Brass, nickel plated.
LOWER: Banana plug, one piece nickel plated beryllium copper spring for use with standard 0.166 dia. banana jack.
COLORS: Black, Brown, Red, Orange, Yellow, Green, Blue, Violet, Gray, White.

MODEL 1325 (Specify color) QUANTITY DISC. CODE Ⓐ **NET .60**

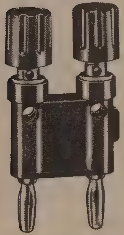
SOLDERLESS BANANA PLUG WITH SAFETY COLLAR—STACK-UP

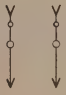


Features: Integral safety collar insulates exposed wire leads. Wire firmly held in place with internal set screw, eliminating soldering. Assembly of test leads simplified.
UPPER: Banana jack, .166 dia.; Brass, nickel plated.
LOWER: Banana plug, one piece nickel plated beryllium copper spring for use with standard 0.166 dia. banana jack.
COLORS: Black, Brown, Red, Orange, Yellow, Green, Blue, Violet, Gray, White.

MODEL 1825 (Specify Color) QUANTITY DISC. CODE Ⓐ **NET .60**

BINDING POSTS TO DOUBLE BANANA PLUG





Features insulated binding posts on ¾″ centers for rapid mounting and interchangeability of components. Binding posts allow top Stack-Up for multiple connections. Side Stack-Up provided by thru-holes in plug body.
UPPER: Insulated double binding posts, on ¾″ centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.
LOWER: Double banana plug, on ¾″ centers.
COLORS: Body, Black. Binding Posts, Black/Red.

MODEL 1286 QUANTITY DISC. CODE Ⓐ **NET 2.75**

BINDING POST TO SINGLE BANANA PLUG

Features insulated binding post. Binding post allows top Stack-Up for multiple connections. Side Stack-Up provided by thru-hole in plug body.
UPPER: Insulated binding post. Cross hole (.166 dia.) in body provides side Stack-Up connections.
LOWER: Single banana plug, one piece nickel plated beryllium copper spring for use with standard 0.166 dia. banana jack.
COLORS: Black, Red.

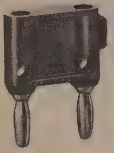
MODEL 2894 (Specify color) QUANTITY DISC. CODE Ⓐ **NET 1.75**

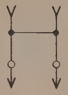
METAL SHORTING BAR

Low profile, nickel plated brass shorting bar. Double banana plugs on ¾″ centers swaged to 3/32″ thick brass bar. Resistance, less than 1.5 milliohms installed. Current rating: 15 Amps. Cont., 30 Amps. Int.

MODEL 1855 QUANTITY DISC. CODE Ⓐ **NET 1.25**

INSULATED SHORTING BAR

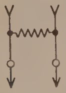




Ideal as a connecting link for use with ¾″ spaced banana jacks. Banana plugs internally solder-bonded with #14 AWG wire. Banana jacks provide top Stack-Up. Cross holes (.166 dia.) in body provide side Stack-Up connections. Resistance less than 1.5 milliohms installed. Current rating 15 Amps. Cont., 30 Amps. Int. "Shorting Bar" marked on top of plug.
COLORS: Natural, Black, Red.

MODEL MDP-S (Specify Color) QUANTITY DISC. CODE Ⓐ **NET 1.25**

MOLDED PRECISION RESISTOR



Ideal where rapid interchange of resistance values is required. Used in breadboarding, R & D labs., Standards, Terminations, etc. Deposited carbon 1% resistor, ½ watt, molded internally. Resistor soldered to double banana plug, on ¾″ centers. Top Stack-Up provided for multiple connections. Cross holes (.166 dia.) in body provide side Stack-Up connections. Resistance value stamped on top of plug.

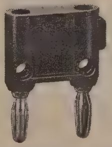
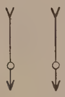
MODEL MDP-R (Specify Value) QUANTITY DISC. CODE Ⓐ **NET 3.25**

ADAPTER—.080 TIP JACKS TO DOUBLE BANANA PLUG

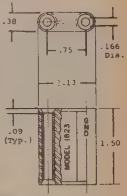




Permits .080 Tip plugs to be used with equipment having banana jacks.
UPPER: Tip jacks, beryllium copper, gold flashed; spaced on ¾″ centers to accept .080 dia. pin tip plugs.
LOWER: Double banana plug, on ¾″ centers, nickel plated. Cross holes (.166 dia.) in body provide side Stack-Up connections.
COLOR: Black.

MODEL 1845 QUANTITY DISC. CODE Ⓐ **NET 1.25**

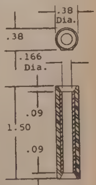
DOUBLE BANANA PLUG SPLICE



Provides rapid method for splicing cables. Reduces necessity of storing extra long cables. Molded thermoplastic body eliminates shock hazard by completely enclosing banana plug contact. Brass, nickel plated banana jacks. .166 dia., on ¾″ centers.
COLORS: Black, Red.

MODEL 1823 (Specify color) QUANTITY DISC. CODE Ⓐ **NET .75**

SINGLE BANANA PLUG SPLICE



Provides rapid method for splicing single banana plug patch cords. Reduces the necessity of storing extra long patch cords. Molded thermo-plastic body eliminates shock hazard by completely enclosing banana plug contact. Brass, nickel plated banana jack, .166 dia.
COLORS: Black, Red.

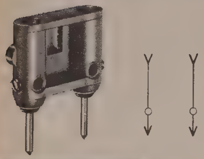
Standard Package: 10 Black
or 10 Red (Specify)

MODEL 1829 (Specify color) QUANTITY DISC. CODE Ⓐ **NET .40**

.080 PIN TIP PLUG ACCESSORIES

POMONA
ELECTRONICS

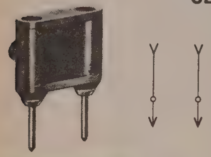
COMPONENT MOUNTING — TIP JACKS TO DOUBLE PIN TIP PLUG — SET SCREWS



Features set screws on side of body to secure leads or components. Recess permits mounting of small component parts.
UPPER: Tip jacks, beryllium copper, gold flashed, spaced on ¾″ centers, to accept .080 dia. pin tip plugs.
LOWER: Pin tips, .080 dia. on ¾″ centers. Brass, nickel plated.
COLORS: Black, Red.

MODEL 2192 (Specify color) QUANTITY DISC. CODE Ⓐ NET 2.25

COMPONENT MOUNTING PLUG— BANANA JACKS TO DOUBLE PIN TIP —SET SCREWS

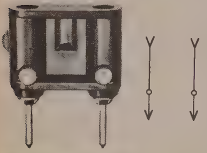


Permits single or double banana plugs to be used in equipment having tip jacks. Features recess for component mounting. Internal set screws firmly secure wire leads.

UPPER: Banana jacks, .166 dia., on ¾″ centers. Brass, nickel plated.
LOWER: Pin tips .080 dia. on ¾″ centers. Brass, nickel plated.
COLOR: Black.

MODEL 1858 QUANTITY DISC. CODE Ⓐ NET .95

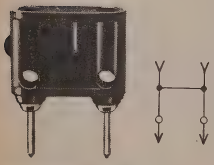
PLUG — COMPONENT MOUNTING — DOUBLE PIN TIP PLUG—SOLDER TURRETS



Features recess for mounting components. Gold flashed solder turrent terminals for permanent noise-free connections.
UPPER: Tip jacks, beryllium copper, gold flashed; spaced on ¾″ centers to accept .080 dia. pin tip plugs.
LOWER: Pin tips, .080 dia. brass, nickel plated.
COLORS: Black, Red.

MODEL 1904 (Specify color) QUANTITY DISC. CODE Ⓐ NET 1.75

INSULATED SHORTING BAR



Used as a connecting link with equipment having tip jacks. Plugs internally solder bonded with 14 AWG wire. Top stack-up feature.
Current rating: 5 AMPS. cont., 10 AMPS. int. "Shorting Bar" marked on top of plug.
UPPER: Banana jacks, .166 dia. on ¾″ centers. Brass, nickel plated.
LOWER: Pin tips, .080 dia. on ¾″ centers. Brass, nickel plated. Cross holes (.166 dia.) in body provide side Stack-Up connections.

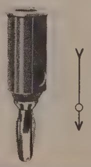
MODEL 1432 (Specify Color) QUANTITY DISC. CODE Ⓐ NET .35 ea.

ADAPTER — .080 TIP JACK TO BANANA PLUG



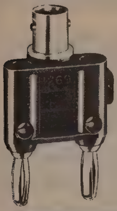
Permits .080 dia. pin tip patch cords to be used with equipment having banana jacks. Insulation molded to plug body.
UPPER: Tip jack, beryllium copper, gold flashed. Accepts .080 dia. pin.
LOWER: Banana plug, one piece nickel plated beryllium copper spring for use with standard 0.166 dia. banana jack. Cross hole (.166 dia.) in body provides side Stack-Up connection.
COLORS: Black, Red.

MODEL 1809 (Specify Color) QUANTITY DISC. CODE ● NET .75

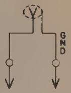
See YELLOW SECTION for Local Sales Offices and Key Personnel

BNC TEST ADAPTERS

POMONA ELECTRONICS



ADAPTER — BNC RECEPTACLE TO DOUBLE BANANA PLUG



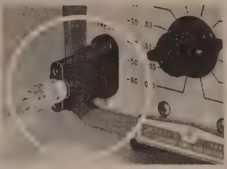
Permits BNC plug to be used with equipment having banana jacks. Excellent for adapting laboratory VTVM, oscilloscopes and signal generator inputs to readily available coaxial cables.

UPPER: BNC receptacle.

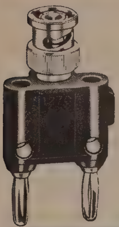
LOWER: Double banana plug, on ¾″ centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.

COLOR: Black.

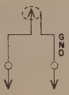
MODEL 1269 QUANTITY DISC. CODE Ⓐ **NET 3.50**



Now! Increase the flexibility of your laboratory with the use of POMONA Molded test accessories. Minimize the necessity of stocking a large quantity and variety of coaxial cables by using POMONA molded adapters. Tough thermo-plastic material molded to plug body or connectors insures maximum strength, moisture resistance and excellent insulative properties.



ADAPTER — BNC PLUG TO DOUBLE BANANA PLUG



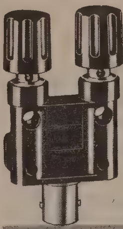
Permits BNC receptacle to be used with equipment having banana jacks. Minimizes number of coaxial connections for maximum efficiency.

UPPER: BNC plug.

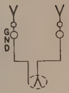
LOWER: Double banana plug, on ¾″ centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.

COLOR: Black.

MODEL 1270 QUANTITY DISC. CODE Ⓐ **NET 4.25**



ADAPTER — BINDING POSTS TO BNC RECEPTACLE



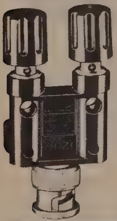
Permits single or double banana plugs to be used with equipment having BNC plug.

UPPER: Insulated binding posts, on ¾″ centers with .166 dia. banana jacks. Cross holes (.166 dia.) in body provide side Stack-Up connections.

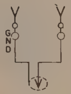
LOWER: BNC receptacle.

COLOR: Body, Black. Binding Posts: Black/Red.

MODEL 1452 QUANTITY DISC. CODE Ⓐ **NET 4.95**



ADAPTER — BINDING POSTS TO BNC PLUG



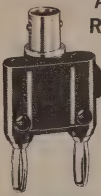
Permits single or double banana plugs to be used with equipment having BNC receptacle. Excellent for use with laboratory oscilloscopes.

UPPER: Insulated binding posts, on ¾″ centers with .166 dia. banana jacks. Cross holes (.166 dia.) in body provide side Stack-Up connections.

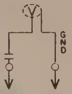
LOWER: BNC plug.

COLOR: Body, Black. Binding Posts: Black/Red.

MODEL 1296 QUANTITY DISC. CODE Ⓐ **NET 5.25**



ADAPTER — SIGNAL ISOLATOR — BNC RECEPTACLE TO DOUBLE BANANA PLUG



Permits BNC male connector to be used with equipment having banana jacks. General purpose ceramic capacitor molded internally. Rated @ .01 mfd ±20%, 200 WVDC. Insulation resistance 10,000 megohms min. Ideal for isolating DC signals from VTVM inputs and signal generator outputs.

UPPER: BNC receptacle.

LOWER: Double banana plug, on ¼″ centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.

COLOR: Blue.

MODEL 1868 QUANTITY DISC. CODE Ⓐ **NET 8.50**

ADAPTER — SINGLE BINDING POST TO BNC PLUG

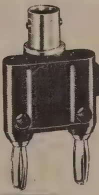
Permits single banana plug to be used with equipment having a BNC receptacle. Connector body features a Non-Tarnish finish.

UPPER: Insulated binding post for multiple stacking.

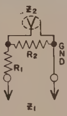
LOWER: BNC Plug.

COLOR: Binding Post: Black or Red (specify)

MODEL 3430 (Specify color) QUANTITY DISC. CODE Ⓐ **NET 2.50**



ADAPTER — BNC MATCHING PAD



Adapts 600 OHM sources to 50, 75 or 93 OHM cables. Excellent for matching signal generators and VTVM's to standard coaxial cables. Ideal for receiver alignment. Molded in deposited carbon resistors 1%, ¼W.

UPPER: BNC receptacle.

LOWER: Double banana plug, on ¾″ centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.

MODEL	COLOR	RANGE — OHMS	NET	QUANTITY DISC. CODE
1656-1	Yellow	600 to 50	12.50	Ⓐ
1656-2	Red	600 to 75	12.50

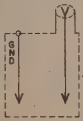
1656-4	Blue	300 to 50	12.50	

ADAPTER — BNC RECEPTACLE TO SHIELDED BANANA PLUGS

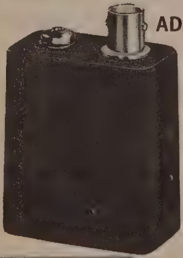


Permits BNC plug to be used with equipment having banana jack binding posts. Black anodized aluminum shield reduces noise Pick-up more than 70 DB. Ideal for low level inputs to oscilloscopes, wave analyzers, etc.

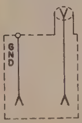
UPPER: BNC receptacle.

LOWER: Shielded double banana plug, on ¾″ centers.

MODEL 1645 QUANTITY DISC. CODE Ⓐ **NET 4.85**



ADAPTER — BNC RECEPTACLE TO SHIELDED BANANA JACKS



Permits BNC plug to be used with equipment having banana plugs. Black anodized aluminum shield reduces noise pick-up more than 70 DB. Ideal for low level inputs to oscilloscopes, wave analyzers, etc.

UPPER: BNC receptacle.

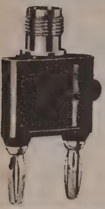
LOWER: Shielded double banana jacks, on ¾″ centers.

COLOR: Black.

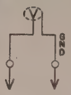
MODEL 1681 QUANTITY DISC. CODE Ⓐ **NET 4.85**

TNC & TYPE N ADAPTERS

POMONA ELECTRONICS



ADAPTER — TNC RECEPTACLE TO DOUBLE BANANA PLUG



Permits TNC plug to be used with equipment having banana jacks. Perfect for connecting modern control systems to laboratory test equipment.

UPPER: TNC receptacle.

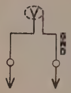
LOWER: Double banana plug, on ¾″ centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.

COLOR: Black.

MODEL 1340

QUANTITY DISC. CODE Ⓐ **NET 8.85**

ADAPTER — TYPE "N" RECEPTACLE TO DOUBLE BANANA PLUG



Permits Type "N" plug to be used with equipment having banana jacks. Ideal for connecting R.F. equipment to conventional test equipment.

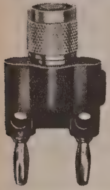
UPPER: Type "N" receptacle.

LOWER: Double banana plug, on ¾″ centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.

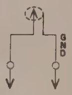
COLOR: Black.

MODEL 1740

QUANTITY DISC. CODE Ⓐ **NET 7.50**



ADAPTER — TNC PLUG TO DOUBLE BANANA PLUG



Permits TNC receptacle to be used with equipment having banana jacks. Minimizes your stock of coaxial cables.

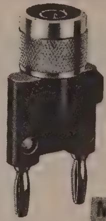
UPPER: TNC plug.

LOWER: Double banana plug, on ¾″ centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.

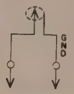
COLOR: Black.

MODEL 1981

QUANTITY DISC. CODE Ⓐ **NET 8.85**



ADAPTER — TYPE "N" PLUG TO DOUBLE BANANA PLUG



Permits type "N" receptacle to be used with equipment having banana jacks.

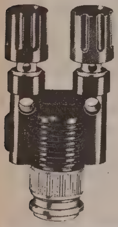
UPPER: Type "N" plug.

LOWER: Double banana plug, on ¾″ centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.

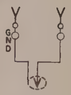
COLOR: Black.

MODEL 1770

QUANTITY DISC. CODE Ⓐ **NET 9.50**



ADAPTER — BINDING POSTS TO TNC PLUG



Permits single or double banana plugs to be used with equipment having a TNC receptacle. Exceptional for signal insertion with rapid interchangeability of terminations.

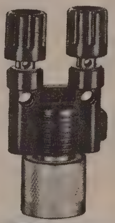
UPPER: Insulated binding posts, on ¾″ centers with .166 dia. banana jacks. Cross holes (.166 dia.) in body provide side Stack-Up connections.

LOWER: TNC plug.

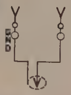
COLOR: Body, Black. Binding Posts: Black/Red.

MODEL 1982

QUANTITY DISC. CODE Ⓐ **NET 8.85**



ADAPTER — BINDING POSTS TO TYPE "N" PLUG



Permits single or double banana plugs to be used with equipment having Type "N" receptacle. Binding posts allow component insertion.

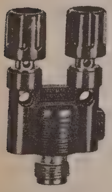
UPPER: Insulated binding posts, on ¾″ centers with .166 dia. banana jacks. Cross holes (.166 dia.) in body provide side Stack-Up connections.

LOWER: Type "N" plug.

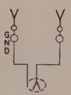
COLOR: Black. Binding Posts: Black/Red.

MODEL 1796

QUANTITY DISC. CODE Ⓐ **NET 9.50**



ADAPTER — BINDING POSTS TO TNC RECEPTACLE



Permits single or double banana plugs to be used with equipment having TNC plug. Useful for rapid interconnection of systems and components.

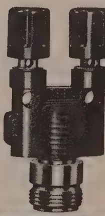
UPPER: Insulated binding posts, on ¾″ centers with .166 dia. banana jacks. Cross holes (.166 dia.) in body provide side Stack-Up connections.

LOWER: TNC receptacle.

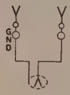
COLOR: Body, Black. Binding Posts: Black/Red.

MODEL 1976

QUANTITY DISC. CODE Ⓐ **NET 7.85**



ADAPTER — BINDING POSTS TO TYPE "N" RECEPTACLE



Permits single or double banana plugs to be used with equipment having type "N" plug. Useful for rapid interconnection of systems and components.

UPPER: Insulated binding posts, on ¾″ centers with .166 dia. banana jacks. Cross holes (.166 dia.) in body provide side Stack-Up connections.

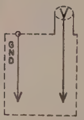
LOWER: Type "N" receptacle.

COLOR: Body, Black. Binding Posts: Black/Red.

MODEL 1992

QUANTITY DISC. CODE Ⓐ **NET 7.85**

ADAPTER — TNC RECEPTACLE TO SHIELDED BANANA PLUGS



Permits TNC plug to be used with equipment having banana jack binding posts. Black anodized aluminum shield reduces noise pick-up more than 70 DB.

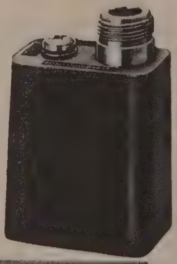
UPPER: TNC receptacle.

LOWER: Double banana plug, on ¾″ centers.

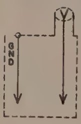
COLOR: Black.

MODEL 1975

QUANTITY DISC. CODE Ⓐ **NET 7.85**



ADAPTER — TYPE "N" RECEPTACLE TO SHIELDED BANANA PLUGS



Permits type "N" plug to be used with equipment having banana jack binding posts. Black Anodized aluminum shield reduces noise pick-up more than 70 DB.

UPPER: Type "N" receptacle.

LOWER: Double banana plug, on ¾″ centers.

COLOR: Black.

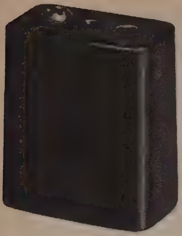
MODEL 1983

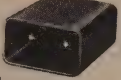
QUANTITY DISC. CODE Ⓐ **NET 7.85**

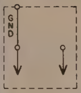
SHIELDED BANANA PLUGS & UHF ADAPTERS

POMONA ELECTRONICS

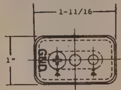
SHIELDED DOUBLE BANANA PLUG IN-LINE CABLE ENTRY

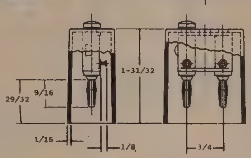






RATED: 15A CONTINUOUS
1200 WVDC
3400 VDC BREAKDOWN
2.5 PF @ 1 MC





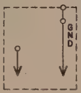
- Shielded double plug ¾″ spaced
- Die cast aluminum shell, black anodized
- Noise pick-up reduced 70 DB
- Gold flashed solder turret terminals for positive reliable cable connections
- One piece nickel plated beryllium copper springs for use with standard 0.166 dia. banana jack binding posts.
- Rounded banana spring design results in maximum contact area and minimum contact resistance
- GND clearly molded in shell
- Cable opening, 7/32″ diameter

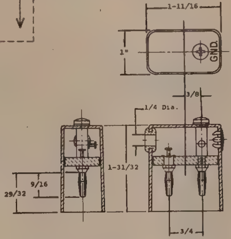
QUANTITY DISC. CODE A NET 3.95

MODEL 1433

SHIELDED DOUBLE BANANA PLUG RIGHT ANGLE CABLE ENTRY

RATED: 15A CONTINUOUS
2800 PEAK WV
5000 VDC BREAKDOWN
2.0 PF @ 1 MC.





- Shielded double plug, ¾″ spaced
- Polycarbonate insulating base
- Die cast aluminum shell, black anodized
- GND clearly molded in shell
- Noise pick-up reduced 70 DB
- One piece nickel plated beryllium copper springs for use with 0.166 diameter banana jack binding posts.
- Rounded banana spring design results in maximum contact area and minimum contact resistance
- Vinyl grommet and nickel plated snap button supplied

QUANTITY DISC. CODE A NET 4.95

MODEL 1791

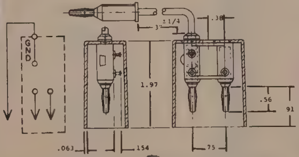
BALANCED LINE SHIELDED DOUBLE BANANA PLUG

- Unique 3 terminal design allows connection to shielded two conductor cable while maintaining balanced conditions
- Minimizes ground loop errors in low signal level applications
- Die cast aluminum shell, black anodized
- Noise pick-up reduced at least 70 DB
- Gold flashed solder turret terminals for reliable noise free connections
- One piece nickel plated beryllium copper springs for use with standard 0.166 dia. banana jack binding posts.

RATED:

15A Continuous
1000 WV Peak; line to shield
2000 WV peak; line to line
2500 V peak breakdown; line to shield

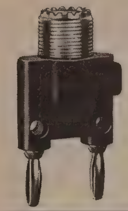
5000 V peak breakdown, line to line
2.0 pf @ 1 MC Capacity; line to line
3.0 pf @ 1 MC. capacity; both lines to shield.

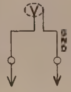


QUANTITY DISC. CODE A NET 7.50

MODEL 1921

ADAPTER — UHF RECEPTACLE TO DOUBLE BANANA PLUG



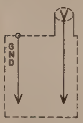


Permits UHF plug to be used with equipment having banana jacks.
UPPER: UHF receptacle, ⅝″ dia.
LOWER: Double banana plug, on ¾″ centers. Cross holes (.166 dia.) in body provide side Stack-Up connections.
COLOR: Black.

MODEL 1707

QUANTITY DISC. CODE A NET 5.85

ADAPTER — UHF RECEPTACLE TO SHIELDED BANANA PLUGS

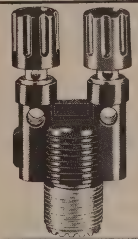


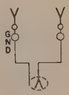
Permits UHF plug to be used with equipment having banana jack binding posts. Black anodized shield reduces noise pick-up at least 70 DB.
UPPER: UHF receptacle, ⅝″ dia.
LOWER: Double banana plug on ¾″ centers.
COLOR: Black.

MODEL 1708

QUANTITY DISC. CODE A NET 7.50

ADAPTER — BINDING POSTS TO UHF RECEPTACLE



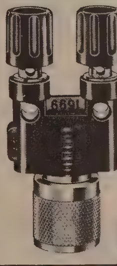


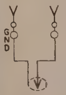
Permits single or double banana plugs to be used with equipment having UHF plug.
UPPER: Insulated binding posts, on ¾″ centers with .166 dia. jacks. Cross holes (.166 dia.) in body provide side Stack-Up connections.
LOWER: UHF receptacle, ⅝″ dia.
COLOR: Body, Black. Binding posts: Black/Red.

MODEL 1792

QUANTITY DISC. CODE A NET 7.50

ADAPTER — BINDING POSTS TO UHF PLUG





Permits single or double banana plugs to be used with equipment having a UHF receptacle, ⅝″ dia. Convenient for use with modern oscilloscopes. Center conductor binding post Red; Ground, Black.
UPPER: Insulated binding posts, on ¾″ centers with .166 dia. jacks.
LOWER: UHF plug.

MODEL 1699 QUANTITY DISC. CODE A NET 5.85

ADAPTER — BINDING POST TO UHF PLUG

Permits single banana plug to be used with equipment having a UHF receptacle, ⅝″ dia. Adds flexibility to your oscilloscope.
UPPER: Insulated binding post with .166 dia. banana jack.
LOWER: UHF plug.

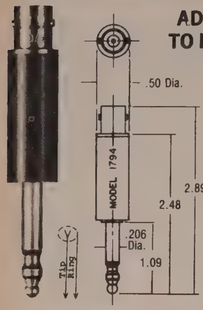
MODEL 1698

QUANTITY DISC. CODE A NET 4.85

PHONE PLUG TEST ADAPTERS

POMONA ELECTRONICS

ADAPTER — BNC RECEPTACLE TO PJ-068/WE-309* PHONE PLUG



Permits BNC plug to be used with equipment having three circuit phone jacks for .206 dia. phone plugs. Readily adapts equipment to available BNC coaxial cables. Tip connected to inner contact of connector and Ring connected to shell. Sleeve, no connection.

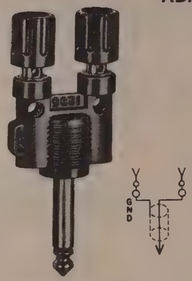
UPPER: BNC receptacle, UG1094/U.
LOWER: Phone Plug, PJ-068/WE-309*
COLOR: Black.

*WE-309 Interchangeable with PJ-068.

MODEL 1794

QUANTITY DISC. CODE Ⓐ **NET 8.85**

ADAPTER — BINDING POSTS TO PHONE PLUG



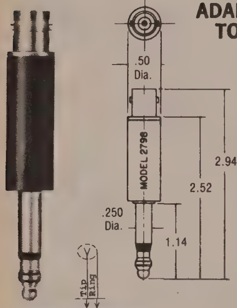
Permits single or double banana plug to be used with equipment having phone jacks. Ideal for rapid mounting of components and test leads.

UPPER: Insulated binding posts, on ¾" centers with .166 dia. banana jacks. Cross holes (.166 dia.) in body provide side stack-up connections.
LOWER: Standard ¼" dia. phone plug, 1⅜" long.
COLOR: Body, Black.
BINDING POSTS: Black/Red.

MODEL 1265

QUANTITY DISC. CODE Ⓐ **NET 4.85**

ADAPTER — BNC RECEPTACLE TO PJ-051* PHONE PLUG



Permits BNC plug to be used with equipment having three circuit phone jacks for .250 dia. phone plugs. Readily adapts equipment to available BNC coaxial cables. Tip connected to inner contact of connector and Ring connected to shell. Sleeve, no connection.

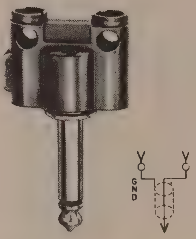
UPPER: BNC receptacle, UG1094/U.
LOWER: Phone Plug, PJ-051*
COLOR: Black.

*PJ-051 Interchangeable with WE-310

MODEL 2798

QUANTITY DISC. CODE Ⓐ **NET 7.85**

ADAPTER — BANANA JACKS TO PHONE PLUG



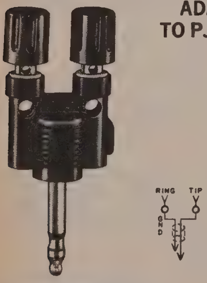
Permits single or double banana plugs to be used with equipment having phone jacks.

UPPER: Double banana jack, on ¾" centers. Cross holes (.166 dia.) in body provide side stack-up connections.
LOWER: Standard ¼" dia. phone plug, 1⅜" long.
COLOR: Black.

MODEL 1580

QUANTITY DISC. CODE Ⓐ **NET 4.50**

ADAPTER — BINDING POSTS TO PJ-068/WE-309* PHONE PLUG



Permits single or double banana plug to be used with equipment having three circuit phone jacks for .206 dia. phone plugs. Ideal for rapid mounting of components and test leads. The PJ-068 and WE-309 Plug have the same mechanical dimensions.

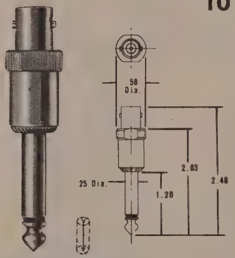
UPPER: Insulated binding posts on ¾" centers with .166 dia. banana jacks. Cross holes (.166 dia.) in body provide side stack-up.
LOWER: Phone Plug, PJ-608/WE-309*
COLOR: Body, Black. Binding Posts: Black/Red.

*WE-309 Interchangeable with PJ-068.

MODEL 3365

QUANTITY DISC. CODE Ⓐ **NET 8.85**

ADAPTER — BNC RECEPTACLE TO PHONE PLUG



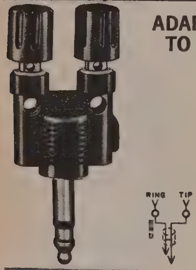
Permits BNC plug to be used with equipment having standard ¼" dia. phone jacks. Readily adapts equipment to available BNC coaxial cables. All metal construction to insure proper shielding.

UPPER: BNC receptacle, UG1094/U.
LOWER: Standard ¼" dia. phone plug, 1³⁄₁₆" Long.

MODEL 1297

QUANTITY DISC. CODE Ⓐ **NET 5.85**

ADAPTER — BINDING POSTS TO PJ-051* PHONE PLUG



Permits single or double banana plugs to be used with equipment having three circuit phone jacks for .250 dia. phone plugs. Tip connected to hot side of adapter and Ring connected to ground side. Sleeve, no connection.

UPPER: Insulated binding posts on ¾" centers with .166 dia. banana jacks. Cross holes (.166 dia.) in body provide side stack-up.
LOWER: Phone Plug, PJ-051*
COLOR: Black

ADAPTER — PHONE PLUG JACK TO DOUBLE BANANA PLUG

Permits a standard 2 conductor ¼″ dia. phone plug to be used with equipment having banana jacks or binding posts.

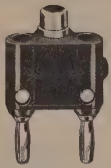
UPPER: Phone plug jack, accepts standard ¼″ dia. phone plug, 1³⁄₁₆″ long.

LOWER: Double banana plug on ¾″ centers. Cross holes (.166 dia.) in body provide side stack-up connections.

COLOR: Black.

MODEL 4044

QUANTITY DISC. CODE Ⓐ **NET 6.85**



ADAPTER – PHONO JACK TO DOUBLE BANANA PLUG

Permits Phono plug to be used with equipment having banana jacks or binding posts. Quickly converts a cable with a phono plug to a double banana plug.

UPPER: Phono jack.

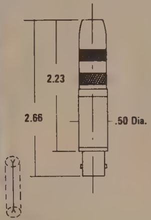
LOWER: Double Banana plug, on ¾″ centers. Cross holes (.166 dia.) in body provide Side Stack-Up connections.

COLOR: Black.

MODEL 1442

QUANTITY DISC. CODE Ⓐ **NET 4.85**

ADAPTER — PHONE PLUG JACK TO BNC RECEPTACLE



This adapter allows a cable with a 2 conductor ¼″ dia. phone plug to be attached to a cable with a BNC plug. All metal construction for proper shielding.

UPPER: Phone plug jack, accepts standard ¼″ dia. phone plug, 1³⁄₁₆″ long.

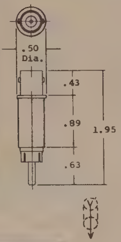
LOWER: BNC receptacle UG1094/U.

MODEL 4026

QUANTITY DISC. CODE Ⓐ **NET 6.85**

ADAPTER – BNC RECEPTACLE TO PHONO PLUG

ELECTRONA
2957



Permits BNC plug to be used with equipment having phono jacks. Readily adapts equipment to available BNC coaxial cables. All metal construction to insure proper shielding.

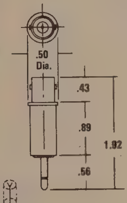
UPPER: BNC receptacle UG1094/U.

LOWER: Phono plug.

MODEL 2957

QUANTITY DISC. CODE Ⓐ **NET 3.95**

ADAPTER — BNC RECEPTACLE TO TINI-PLUG



Permits BNC plugs to be used with equipment having Tini-Jacks. Readily adapts equipment to available BNC coaxial cables. All metal construction to insure proper shielding.

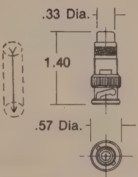
UPPER: BNC receptacle UG1094/U.

LOWER: 2 conductor Tini-Plug.

MODEL 3857

QUANTITY DISC. CODE Ⓐ **NET 4.85**

ADAPTER — PHONO JACK TO BNC PLUG



Permits phono plug to be used with equipment having BNC receptacles. Quickly converts a cable with a phono plug to a BNC plug. All metal construction to insure proper shielding.

UPPER: Phono jack.

LOWER: BNC plug.

MODEL 4054

QUANTITY DISC. CODE Ⓐ **NET 3.85**

ADAPTER — TWO BNC JACKS TO BNC PLUG — "IN LINE T"

Excellent for use where space requires cables to come straight out instead of at a right angle. Die cast aluminum housing with baked enamel finish. All metal construction to insure proper shielding.

UPPER: (2) BNC receptacles UG1094/U.

LOWER: BNC plug UG1104A/U.

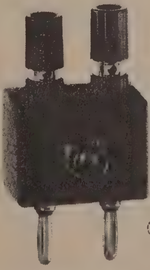
COLOR: Blue.

MODEL [illegible]

QUANTITY DISC. CODE Ⓐ **NET 14.85**

ADAPTER — BINDING POSTS TO DOUBLE BANANA PLUG WITH BNC JACK

With this combination adapter it is possible to connect to equipment, cables with both, double banana plugs and BNC plugs. Excellent for use with signal generators. Die cast aluminum housing with baked enamel finish.



UPPER: Insulated binding posts on ¾″ centers. Black/Red.

CENTER: BNC receptacle, UG1094/U.

LOWER: Banana plugs on ¾″ centers, nickel plated.

Color: Blue.

LOWER: Shielded single banana plug.

MODEL 2990 QUANTITY DISC. CODE A NET 2.95

COAXIAL TEST ACCESSORIES

POMONA ELECTRONICS

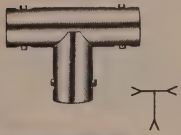
ADAPTER — BNC JACK TO JACK

Allows the interconnection of two coaxial cables with BNC plugs.

FEATURES:
- Non-Tarnish finish.
- 50 Ohm impedance.
- Teflon insulation.
- Gold flashed beryllium copper contacts.

MODEL 3283 QUANTITY DISC. CODE A NET 1.85

ADAPTER — BNC "T" — 3 JACKS

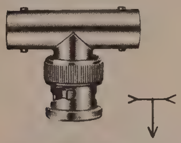


Allows the interconnection of three coaxial cables with BNC plugs.

FEATURES:
- Non-Tarnish finish.
- 50 Ohm impedance.
- Teflon insulation.
- Gold flashed beryllium copper contacts.

MODEL 3284 QUANTITY DISC. CODE A NET 6.25

ADAPTER — BNC "T" JACK — PLUG — JACK

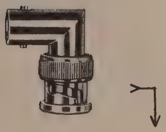


With this adapter, equipment or coaxial cables having a single BNC jack are changed to two BNC jacks.

FEATURES:
- Non-Tarnish finish.
- 50 Ohm impedance.
- Teflon insulation.
- Gold flashed beryllium copper female and outer male contact.

MODEL 3285 QUANTITY DISC. CODE A NET 4.50

ADAPTER — RIGHT ANGLE BNC JACK TO BNC PLUG



Adapts straight BNC plug to right angle BNC plug.

FEATURES:
- Non-Tarnish finish.
- 50 Ohm impedance.
- Teflon insulation.
- Beryllium copper female and outer finger contact.
- Gold flashed female and male contact.

MODEL 3534 QUANTITY DISC. CODE A NET 3.95

NEW

BNC CAP FOR PLUGS — WITH BEAD CHAIN

Female dust cap for protection of BNC plugs from dirt and accidental shorting.

FEATURES:
- Non-Tarnish Finish
- 3⅛" Bead Chain
- .28 Dia. hole in lug

MODEL 4157 QUANTITY DISC. CODE A NET 1.50

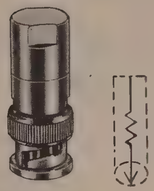
BNC CAP FOR JACKS — WITH BEAD CHAIN

Male dust cap for protection of BNC jacks from dirt and accidental shorting.

FEATURES:
- Non-Tarnish finish.
- 2¼" Bead Chain.
- .14" Dia. hole in lug.

MODEL 3839 QUANTITY DISC. CODE A NET 1.25

RESISTOR TERMINATED PLUG



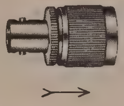
Ideal for terminating coaxial lines etc.

FEATURES:
- 1% resistor, ½ watt.
- Resistance value stamped on body.
- Non-Tarnish finish.
- Teflon insulation.
- Gold plated male contact.

(Ohms) 50, 75, 93, 100, 600

MODEL 3840 (Specify Value) QUANTITY DISC. CODE A NET 4.50

ADAPTER — BNC JACK TO UHF PLUG

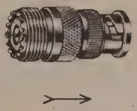


Allows the use of a BNC plug on equipment having a UHF Jack.

FEATURES:
- Non-Tarnish finish.
- Rexolite insulation.
- Gold flashed beryllium copper female contact.
- Gold flashed male contact.

MODEL 3286 QUANTITY DISC. CODE A NET 2.50

ADAPTER — UHF JACK TO BNC PLUG



Allows the use of a UHF Plug on equipment having a BNC Jack.

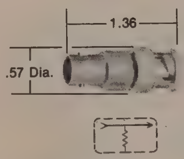
FEATURES:
- Non-Tarnish finish.
- 50 Ohm impedance.
- Rexolite insulation.
- Gold flashed Phosphor Bronze female UHF and male BNC contacts.

MODEL 3287 QUANTITY DISC. CODE A NET 3.85

BNC 50-OHM FEED-THRU TERMINATION

NEW

Ideal for terminating PULSE, MICROWAVE or UHF instruments in their characteristic impedance.



1st end: Female BNC
2nd end: Male BNC
50-Ohm termination resistor, 1%, ½W.

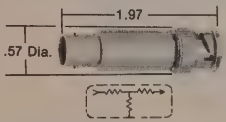
FEATURES:
- Non-Tarnish Finish.
- Teflon Insulation.
- Gold Plated Contacts.
  Maximum VSWR: DC to 250 MHz: 1.1
  250 MHz to 500 MHz: 1.2

MODEL 4119 QUANTITY DISC. CODE A NET 14.85

BNC 50-OHM ATTENUATORS

NEW

For use with PULSE, MICROWAVE, or UHF instruments.



1st end: Female BNC
2nd end: Male BNC
50-Ohm, 2-Watt T-Pad Network

FEATURES:
- Non-Tarnish Finish
- Teflon Insulation
- Gold Plated Contacts

MODEL	ATTENUATION	VSWR	ATTENUATION (LIMITS)

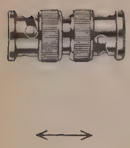
ELECTRONICS

ADAPTER — BNC PLUG TO PLUG



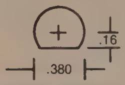
Allows the interconnection of two coaxial cables with BNC Jacks.

FEATURES:
- Non-Tarnish finish.
- 50-Ohm impedance.
- Teflon insulation.
- Beryllium copper outer finger contacts.
- Gold flashed male contacts.

MODEL 3533 QUANTITY DISC. CODE A **NET 3.75**

BNC PRESSURIZED BULKHEAD RECEPTACLE

NEW



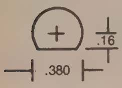
Excellent for use with equipment which requires pressure differences. Front hole mounting.

FEATURES:
- Non-Tarnish finish.
- 50-Ohm impedance.
- Teflon insulation.
- Gold flashed Beryllium copper contacts.
- Silicone rubber O-Ring.
- Mounts in panels up to .242 thick.

MODEL 4158 QUANTITY DISC. CODE A **NET 4.25**

BNC HERMETIC SEALED BULKHEAD RECEPTACLE

NEW



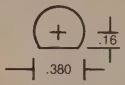
Excellent for use with equipment which requires a hermetic seal for pressure differences. Front hole mounting.

FEATURES:
- Non-Tarnish finish.
- 50-Ohm impedance.
- Teflon insulation.
- Gold flashed Beryllium copper contacts.
- Mounts in panels up to .369 thick.

MODEL 4159 QUANTITY DISC. CODE A **NET 4.95**

BNC BULKHEAD RECEPTACLE

NEW



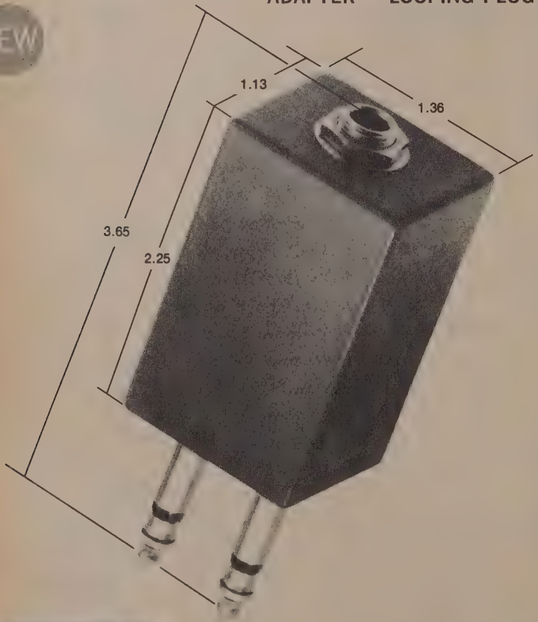
Ideal for use where space requirements between connectors are at a premium.

FEATURES:
- Non-Tarnish finish.
- 50-Ohm impedance.
- Teflon insulation.
- Gold flashed Beryllium copper contacts.
- Mounts in panels up to .134 thick.

MODEL 4160 QUANTITY DISC. CODE A **NET 1.50**

ADAPTER — LOOPING PLUG WITH MONITOR JACK

NEW



With this combination adapter it is possible to monitor the looping plug circuit. Die cast aluminum housing with baked enamel finish.

UPPER: Phone Jack (Accepts ¼″ Dia. PJ-051 Plug).

LOWER: (2) Phone Plugs, PJ-051 on ⅝″ Centers (Equivalent to WE-310).

COLOR: Blue

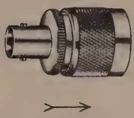
ADAPTER — BNC JACK TO TYPE "N" PLUG

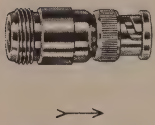


Allows the use of a BNC Plug on equipment having a type "N" jack.

FEATURES:
- Non-Tarnish finish.
- Teflon insulation.
- Gold flashed contacts.

MODEL 3288 QUANTITY DISC. CODE Ⓐ **NET 2.50**

ADAPTER — TYPE "N" JACK TO BNC PLUG

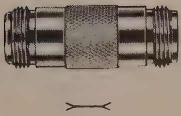


Allows the use of a Type "N" plug on equipment having a BNC jack.

FEATURES:
- Non-Tarnish finish.
- Teflon insulation.
- Beryllium copper female "N" contact and BNC outer finger contact.
- Gold flashed female "N" and male BNC contact.

MODEL 3535 QUANTITY DISC. CODE Ⓐ **NET 3.95**

ADAPTER — TYPE "N" JACK TO JACK

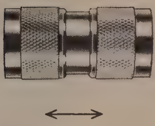


Allows the interconnection of two coaxial cables with Type "N" Plugs.

FEATURES:
- Non-Tarnish finish.
- 50 Ohm impedance.
- Teflon insulation.
- Gold flashed beryllium copper contacts.

MODEL 3841 QUANTITY DISC. CODE Ⓐ **NET 2.75**

ADAPTER — TYPE "N" PLUG TO PLUG

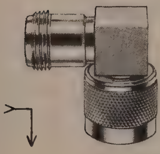


Allows the interconnection of two coaxial cables with type "N" Jacks.

FEATURES:
- Non-Tarnish finish.
- 50 Ohm impedance.
- Teflon insulation.
- Phosphor Bronze outer finger contacts. Gold flashed male contacts.

MODEL 3842 QUANTITY DISC. CODE Ⓐ **NET 3.50**

ADAPTER — RIGHT ANGLE TYPE "N" JACK TO TYPE "N" PLUG

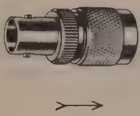


Adapts straight type "N" plug to right angle type "N" plug.

FEATURES:
- Non-Tarnish finish.
- 50 Ohm impedance.
- Teflon insulation.
- Phosphor Bronze outer finger contact.
- Gold flashed beryllium copper female and male contact.

MODEL 3843 QUANTITY DISC. CODE Ⓐ **NET 4.95**

ADAPTER — BNC JACK TO TNC PLUG

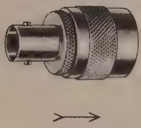


Allows the use of a BNC plug on equipment having a TNC jack.

FEATURES:
- Non-Tarnish finish.
- 50 Ohm impedance.
- Teflon insulation.
- Beryllium copper outer finger TNC contact.
- Gold flashed beryllium copper female BNC and TNC male contact.

MODEL 3844 QUANTITY DISC. CODE Ⓐ **NET 6.85**

ADAPTER — BNC JACK TO TYPE "C" PLUG

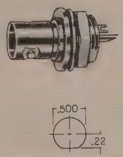


Allows the use of a BNC plug on equipment having a type "C" jack.

FEATURES:
- Non-Tarnish finish.
- 50 Ohm impedance.
- Teflon insulation.
- Beryllium copper type "C" outer finger contact.
- Gold flashed beryllium copper female BNC and TNC male contact.

MODEL 3845 QUANTITY DISC. CODE Ⓐ **NET 4.95**

BNC — ISOLATED GROUND BULKHEAD RECEPTACLE

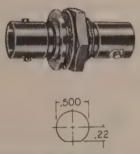


This connector has the outer conductor isolated from the panel. Excellent for use with equipment requiring a floating input.

FEATURES:
- Non-Tarnish finish.
- 50 Ohm impedance.
- Teflon insulation.
- Gold flashed beryllium copper contact.
- Mounts in panels up to .175" thick.

MODEL 3778 QUANTITY DISC. CODE Ⓐ **NET 4.95**

ADAPTER — ISOLATED GROUND BNC JACK TO JACK

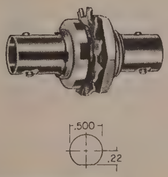


Outer conductor is isolated from the panel. Excellent for feeding through panels which require a floating shield.

FEATURES:
- Non-Tarnish finish.
- 50-Ohm impedance.
- Teflon insulation.
- Gold flashed beryllium copper contacts.
- Mounts in panels up to .175" thick.

MODEL 3846 QUANTITY DISC. CODE Ⓐ **NET 8.25**

ADAPTER — HERMETIC SEALED BNC JACK TO JACK



Excellent for use with equipment which requires a hermetic seal for pressure differences.

FEATURES:
- Non-Tarnish finish.
- 50 Ohm impedance.
- Teflon insulation.
- Gold flashed beryllium copper contacts.
- Silicone rubber O-ring. Mounts in panels up to .279" thick.

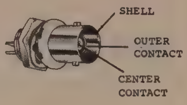
TWINAX JACKS, PLUGS AND PATCH CORDS

Due to the ever increasing need for low level signal patching and balanced line applications, Pomona introduces Twinax Patch cords and jacks. For use with 2 conductor shielded cable.

These connectors feature a concentric design with a center contact, outer contact and outer shell (see dwg.). This concentric design does not require matching of halves such as the Polarized stepped insulator connectors.



MATERIAL:
- Bodies and Fittings: Brass per QQ-B-626, Alloy #360.
- Insulators: Teflon per MIL-P-19468.
- Center Contacts:
  - Female — Beryllium copper per QQ-C-530 Cond. H.
  - Male — Brass per QQ-B-626, Alloy #360.
- Outer Contacts: Beryllium copper per QQ-C-530 Cond. H.

FINISH:
- Bodies and Fittings: Non-Tarnish.
- Center Contacts: Gold over copper plate.
- Outer Contacts: Gold over copper plate.

RATING:
- 500 VRMS

COMPONENT MOUNTING ISOLATION PLUGS

POMONA
ELECTRONICS

CREATE passive and active networks, voltage dividers, isolation networks or attenuators with the Split-Terminal isolation plugs described below.

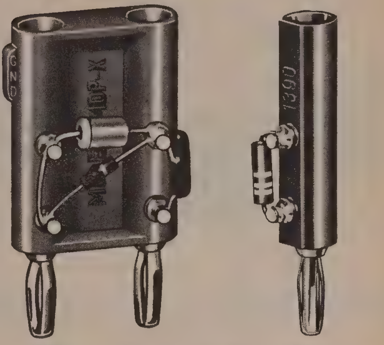
Gold flashed solder turret terminals provide permanent, reliable noise-free connections for component mounting.

Tough thermo-plastic material molded to plug body and connectors insures maximum strength, moisture resistance and excellent insulative properties.

Specifications for MDP-X, 1390, 1837, 1468:

- Fits standard 0.166 dia. banana jack.
- Spring, heat treated beryllium copper alloy 170 per QQ-C-533.
- Plug body, Brass per QQ-B-626, Alloy #360.
- Nickel plated per QQ-N-290, Class 2.
- Contact resistance less than 0.001 ohms per banana plug.

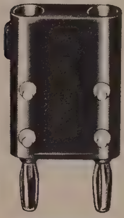
TYPICAL APPLICATION



ACTUAL SIZE

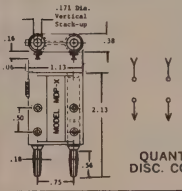
MODEL MDP-X **MODEL 1390**

DOUBLE BANANA PLUG, FOUR TERMINAL ISOLATION



MODEL MDP-X

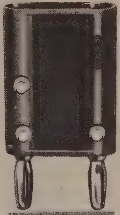
Provides four terminal isolation. Top Stack-Up receptacles isolated from lower plugs. Ideal for insertion of matching networks in laboratory VTVM's, signal generators, etc. Gold flashed solder turret terminals for permanent noise-free connections.



UPPER: Double banana jacks, .166 dia., on ¾″ centers.
LOWER: Double banana plug on ¾″ centers.
COLOR: Red.

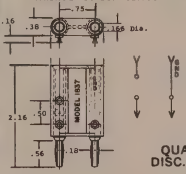
QUANTITY DISC. CODE Ⓐ **NET 3.50**

DOUBLE BANANA PLUG, THREE TERMINAL ISOLATION



MODEL 1837

Provides three terminal isolation. Excellent for "L" and "Pi" networks. Plug and receptacle nickel plated. Gold flashed solder turret terminals for permanent noise-free connections. "Ground" is straight feed-thru. Hot side isolated.

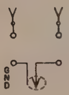


UPPER: Banana jacks, .166 dia. on ¾″ centers.
LOWER: Double banana plug on ¾″ centers.
COLOR: Blue.

QUANTITY DISC. CODE Ⓐ **NET 2.75**

ADAPTER — BINDING POSTS TO BNC PLUG, ISOLATION

MODEL 1459

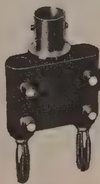


Permits single or double banana plugs to be used with equipment having BNC receptacle. Provides isolation for a four terminal network. Binding posts facilitate connections of test leads or additional components. Gold flashed solder turret terminals provide permanent noise-free connections.

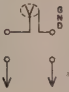
UPPER: Insulated binding posts, on ¾″ centers with .166 dia. jacks.
LOWER: BNC plug.
COLOR: Body, Black.
Binding Posts: Black/Red.

QUANTITY DISC. CODE Ⓐ **NET 10.85**

ADAPTER — BNC RECEPTACLE TO DOUBLE BANANA PLUG, ISOLATION



MODEL 1468



Permits BNC plug to be used with equipment having banana jacks. Provides isolation for a four terminal network. Excellent for matching pad networks. Gold flashed solder turret terminals for permanent noise-free connnections.

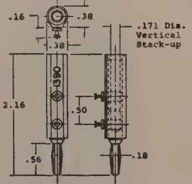
UPPER: BNC receptacle.
LOWER: Double banana plug, on ¾″ centers.
COLOR: Black.

QUANTITY DISC. CODE Ⓐ **NET 9.85**

PLUG — SINGLE BANANA, ISOLATION

Provides two terminal isolation. Top Stack-Up receptacle is isolated from lower plug to permit addition of series resistors, diodes, etc. Ideal for computers, lab. circuit design and testing. Gold flashed solder turret terminals for permanent noise-free connections.

UPPER: Banana jack, .166 dia.
LOWER: Banana plug.
COLORS: Black, Red.



MODEL 1390 (Specify color) QUANTITY DISC. CODE Ⓐ **NET 1.80**

PLUG — PIN TIP, ISOLATION

Pin tip jack is isolated from .080 pin tip plug. Provides for addition of series components. Ideal for use with computer boards, lab circuit designs, etc. Gold flashed solder turret terminals for permanent noise-free connections.

UPPER: Tip jack, beryllium copper, gold flashed; accepts .080 dia. pin.
LOWER: Pin tip, .080 dia. Brass, nickel plated.
COLORS: Black Red.

CONNECTOR TEST ADAPTERS

An ideal test adapter for the rapid testing of the hard to get at contacts of multi-pin MS type connectors such as miniature circular, standard circular and rack and panel. Excellent for testing of continuity, voltage and signal on individual contacts. Test adapter available in Pin and socket contacts sizes of 20, 16 and 12.

- Gold flashed contacts conform to "MS" Dimensions.
- Flexible tip prevents damage to connector contacts if test adapter is accidently bent.
- Flexible tip allows testing of adjacent contacts.
- Fully insulated to prevent accidental shorting.
- Accepts standard banana plug.

INSULATED BANANA JACKS, PIN TIP JACKS AND BANANA POSTS ADAPTERS

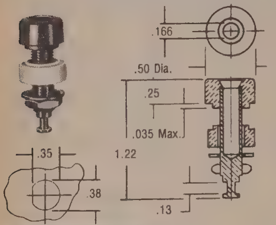
POMONA ELECTRONICS

INSULATED LEXAN POLYCARBONATE BANANA JACKS AND .080 PIN TIP JACKS

These jacks are molded of Lexan Polycarbonate thermoplastic which has high impact strength, low loss, low power factor and high insulation resistance.

FEATURES: (All Models)
- Insulator head molded directly to one piece brass body.
- Panel insulator molded of Lexan Polycarbonate.
- Solder turret or Wire-Wrap terminal.
- Nickel plated lockwasher and hex nut included unassembled.

BANANA JACK — SILVER PLATED



- Silver plated brass body.
- Closed entry receptacle, .166 dia.
- Rated 2,500 WVDC 15 AMPS. cont., 30 AMPS. int.
- Mounts in panels from .035" to .375" thick.
- ¼-32 thread.

COLORS: Black, Brown, Red, Orange, Yellow, Green, Blue, Violet, Gray, White.

STD. PKG. 10 (per color) unassembled.

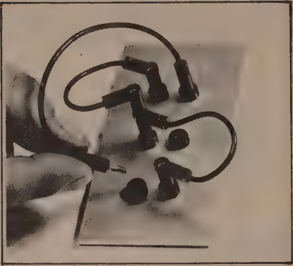
MINIATURE BANANA PLUG PATCH CORDS

POMONA ELECTRONICS



Miniature patch cords for use with .104 dia. miniature banana jacks. Excellent for miniaturization of test equipment and high density packaging for patch systems.

Banana plug springs precision formed of one piece beryllium copper, heat treated for maximum life and low contact resistance. Tough thermoplastic molded to plug body and wire.

FEATURES:

■ Fits .104 dia. miniature banana jacks ■ Plug body brass, per QQ-B-626, Alloy #360. ■ Gold flashed per MIL-G-45204 Type II (.00001/.00002). ■ Spring, one piece heat treated beryllium copper, alloy 170 per QQ-C-533.

SPECIFICATIONS:

■ WIRE: 20 AWG, Strand. 41 x 36 T.C. Extra flexible polyvinyl insulation .087" O.D. ■ RATED: 5 A. Cont., 10 A. Int., 5,000 V.D.C. ■ OPERATING TEMP.: —0°C to +105 C°

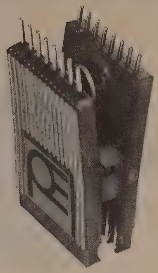
"DIP CLIP" T.M. IC TEST CLIP

POMONA ELECTRONICS



ACTUAL SIZE

FOR 14 OR 16 DUAL-IN-LINE PACKAGES

The "Dip-Clip" is specially designed to allow the attachment of test-probes to 14 or 16 lead DIPS. The clip greatly reduces the possibility of accidental shorting while testing live circuits. Numerous test probes may be quickly connected for hands-free testing.

FEATURES:

- Used on 14 or 16 pin lead DIP.
- Nickel Silver contacts.
- Spring loaded wiping action of contact pins gives good electrical connection.
- Provides hands-free testing of DIP.
- Special contact design gives positive positioning, preventing accident shorting of adjacent leads.
- Special friction-grip contacts.

MODEL 3916 QUANTITY DISC. CODE **C** NET 5.75

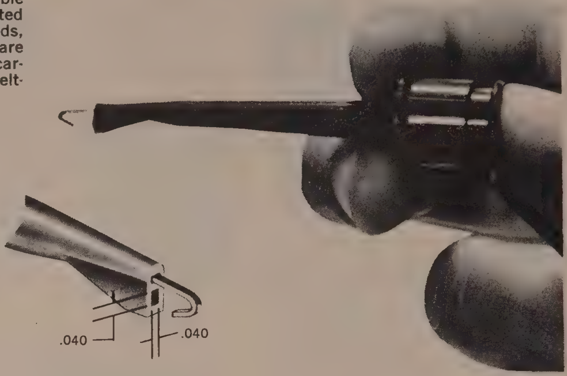
DO IT YOURSELF GRABBER

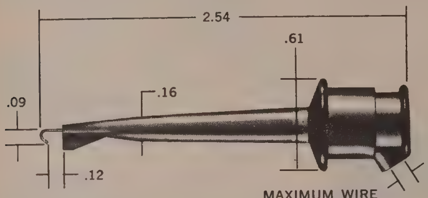
POMONA ELECTRONICS

This Do-It-Yourself Grabber provides the user with the ability to build his own leads. The unit is completely field serviceable and features a simplified assembly procedure. The gold plated contact hook can be connected rapidly to component leads, and the specially designed tip slides down over .025 square Wire-Wrap pins. The entire unit is molded of Lexan* Polycarbonate thermoplastic for strength and less chance of melting when soldering lead.

FEATURES:
- Plunger type action between thumb and two fingers
- Comfortable finger grip operation.
- Positive connection that won't pop off.
- No sharp teeth to damage or nick wires.
- Simplified assembly procedure.
- High temperature material that resists melting when soldering.
- Accepts wire up to .090" Dia.

MATERIALS:
- Molded Lexan* Polycarbonate body.
- Beryllium copper contact per QQ-C-533, Alloy 170.
- Gold plated per MIL-G-45204 type 1.
- Stainless steel spring.



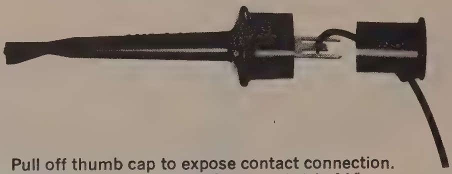


MAXIMUM WIRE SIZE .090" DIA.

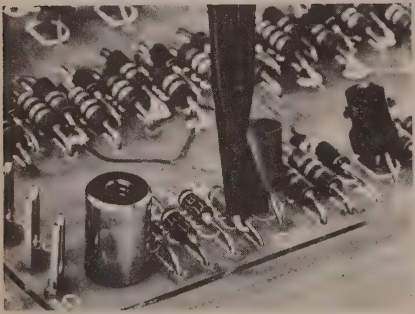
COLORS: Black, Red, Yellow, Green, Blue, White.

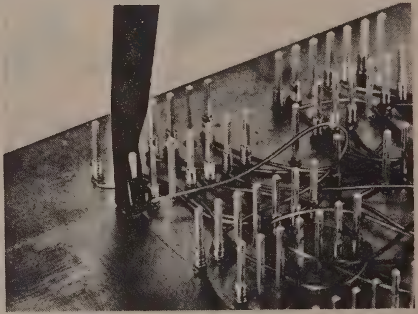
MODEL 3925 (Specify Color) QUANTITY DISC. CODE **A** NET .85

SIMPLIFIED ASSEMBLY PROCEDURE

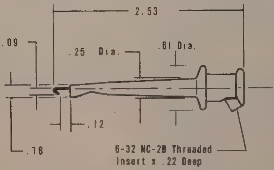


1. Pull off thumb cap to expose contact connection.
2. Thread wire through thumb cap and strip ⅛".
3. Insert stripped end through tapered hole on contact, and solder.
   NOTE: Stripped end should be placed into the large opening of the tapered hole.
4. Slide thumb cap back onto contact.





"GRABBER" WITH 6-32 THREAD



This "Grabber" can be used with oscilloscopes and leads equipped with a 6-32 screw on tip.
- Gold plated hook tip and threaded insert.
- Stainless steel spring.
- Molded nylon body per MIL-P-20693.
- COLORS: Black, Red.

MODEL 4011 (Specify Color) QUANTITY DISC. CODE **A** NET 1.50

MINI TEST CLIP GRABBER

POMONA ELECTRONICS

These plunger type action clips are called "grabbers." The gold plated contact hook can be connected rapidly to component leads and the specially designed tip slides down over .025 square Wire-Wrip pins. Nylon insulation molded directly onto clip and wire providing a strong, reliable integral unit. Clip is completely insulated to point of connection.

FEATURES:
- Plunger type action between thumb and two fingers.
- Comfortable finger grip operation.
- Positive connection that won't pop off.
- No sharp teeth to damage or nick wires.
- Beryllium copper conductor alloy 170 per QQ-C-533; gold plated per MIL-G-45204 Type I.
- Stainless steel spring.
- Molded nylon insulator per MIL-P-20693.

SHIELDED "BLACK BOXES" MINIATURE SIZE

POMONA ELECTRONICS

NOW AVAILABLE, *SHIELDED* "BLACK BOXES." Boxes that fulfill the requirement for RF applications.

Ideal for compact packaging, eg., voltage dividers, isolation networks, impedance matching networks, and other varied uses.

Cover and self-tapping screws included.

APPLICABLE SPECIFICATIONS: (ALL MODELS)

Operating Temp.: −55°C to +150°C.
Working Voltage: 500 V Peak (Model 2415, 1500 V Peak).
Noise Rejection: Greater than 70DB.

FEATURES:

- SHIELDED HOUSING; Die Cast Aluminum. FINISH: BLUE baked enamel per Federal Standard 595 #25109 over phosphoric etch per MIL-C-15328A.
- COVER; .040 Thick Aluminum #6061-T6 with clear anodized finish per MIL-A-8625A.
- Four screws secure cover for proper shielding.
- Solder turret terminals for permanent noise free connection of components.

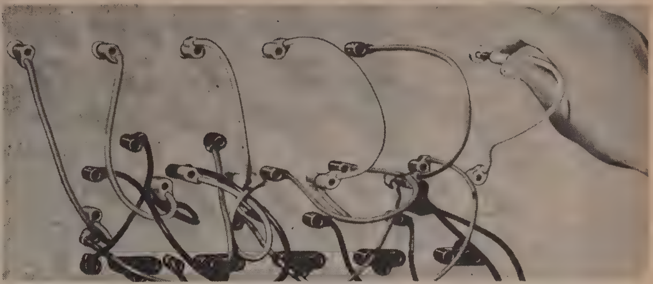
STANDARD BANANA PLUG PATCH CORDS

POMONA ELECTRONICS

POMONA BANANA PLUG PATCH CORDS

Tough thermoplastic insulation molds the plug and leads into a strong moisture resistant integral unit. Excellent for computer board and test equipment applications. Used by leading industries in applications where extreme reliability is of prime importance.



FEATURES

- One piece beryllium copper heat treated spring for maximum long life.
- Rounded spring design results in maximum contact area.
- Extra flexible polyvinyl insulation used on all leads.

SPECIFICATIONS

- Fits standard 0.166 dia. banana jacks.
- Spring, beryllium copper alloy 170 per QQ-C-533.
- Plug body, brass per QQ-B-626, Alloy #360.
- Nickel plated per QQ-N-290, Class 2.
- Contact resistance less than 0.001 ohms per banana plug.
- Operating Temp.: —0°C to +105°C.
- Wire, 18 AWG, stranding 65 x 36 T.C.
- Insulation, polyvinyl .144″ O.D.
- Ratings: 15 A. Cont., 30 A. Int. 10,000 W.V.D.C.

LOW THERMAL E.M.F. SPADE LUG JUMPERS

POMONA ELECTRONICS

TELLURIUM COPPER LEADS FOR PRECISION MEASUREMENTS

POMONA ELECTRONICS has advanced the state of the art in measurements where Thermoelectric Effects are significant sources of error. Comparators designed for use with the Kelvin-Varley voltage divider and microvolt leads were tested with Primary Standards Laboratory equipment.

Thermoelectric voltages were not detected until the most sensitive galvanometer range was used.

THERMOELECTRIC PROPERTIES—Tellurium copper gold plated spade lugs cold-staked to multi-stranded 12 gauge COPPER wire minimize thermoelectric effects—an absolute necessity for low voltage, high precision measurements.

LOW RESISTANCE—12 gauge multi-stranded COPPER wire results in extremely low cable resistance. Spade lugs plated with 50 micro inches gold for minimum contact resistance and minimum thermal EMF when using copper binding posts. (Less than 0.01 μv/c°).

TELLURIUM COPPER SPADE LUGS, SHIELDED LEAD

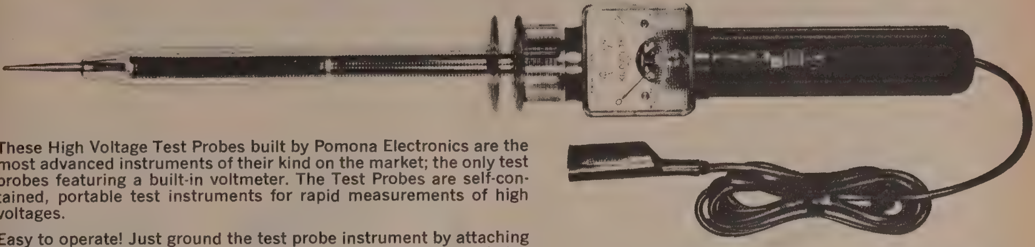
HIGH VOLTAGE TEST PROBES

POMONA
ELECTRONICS

DC HIGH VOLTAGE TEST PROBES WITH BUILT-IN METER



These High Voltage Test Probes built by Pomona Electronics are the most advanced instruments of their kind on the market; the only test probes featuring a built-in voltmeter. The Test Probes are self-contained, portable test instruments for rapid measurements of high voltages.

Easy to operate! Just ground the test probe instrument by attaching alligator clip to chassis, contact test probe tip to high voltage being measured and read voltage from the built-in meter. No warm-up time. No batteries.

SPECIFICATIONS:

RANGE: See below. **SENSITIVITY:** 20,000 ohms/volt (50 ua) movement. **ACCURACY:** ± 3% full scale. **MULTIPLIER RESISTANCE:** See below. **MATERIAL:** Handle—high impact thermoplastic. Probe—high impact polystyrene. **LENGTH:** 14¾″ overall. **WEIGHT:** 8 ounces.

¾ DOUBLE BANANA PLUG PATCH CORDS

POMONA ELECTRONICS

These patch cords are indispensable for bridge transformer connections, three terminal capacitor measurements and general hook-up for two wire systems. They are horizontally and vertically stackable in parallel.

Tough thermoplastic material molded to plug body and cable insures maximum strength, moisture resistance and excellent insulative properties.

Used by leading industries in applications where extreme reliability is of prime importance.

FEATURES . . .

- One piece beryllium copper heat treated spring for long life.
- Rounded spring design results in maximum contact area.
- GND., clearly molded on plug body and shell.
- Solder-bonded noise-free connections.

SPECIFICATIONS . . .

- Fits standard 0.166 dia. banana jacks, on ¾″ centers.
- Contact resistance less than 0.001 ohms per plug.
- Spring beryllium copper alloy 170 per QQ-C-533.
- Plug body brass per QQ-B-625, Alloy #360.
- Nickel plated per QQ-N-290, Class 2.

STRESS RELIEVED AND WEATHERPROOFED CRIMP BNC CABLE ASSEMBLIES

These new cable assemblies feature polyethylene collars which are injection molded directly onto cable jacket and connector body. The resulting encapsulation offers two outstanding advantages.

STRESS PROTECTION against failure from excess bending, flexing, and twisting.

WEATHERPROOF SEAL between cable and connector.

Connectors have non-tarnish finish and conform to MIL-C-39012.

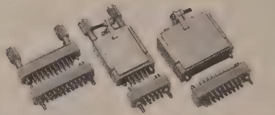
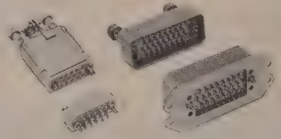
STANDARD CONNECTORS

RECTANGULAR, RACK & PANEL CONNECTORS



SGM AND SLM, SUB-MINIATURE RECTANGULAR CONNECTORS

Number of Contacts — 5, 7, 9, 14, 20, 26, 29, 34, 44, & 50.
Contacts — Copper Alloy, Gold Plated, 5 & 3 AMP Rated.
Insulator — Glass Filled DAP, SDG-F
Polarization — Guides or Rotating and Fixed Threadlocks, as Desired.
Termination — Solder Cup, Accepts 22 AWG Wire
Hoods — Available for Most Sizes

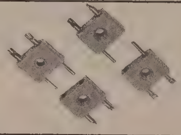


GM AND XGM SERIES, MINIATURE RECTANGULAR

Number of Contacts — 7, 8, 9, 14, 18, 20, 21, 26, 34, 41, & 50.
Contacts — Copper Alloy, Gold Plated, 7.5 AMP Rated.
Insulator — Glass Filled DAP, SDG-F
Polarization — Guides or Rotating and Fixed Threadlocks, as Desired.
Termination — Solder Cup, 20 AWG Wire, and Turret Style.
Hoods & Shells — Available on All Size Connectors. Hoods Have Both Top & Side Cable Opening:
Underwriters' Laboratory Listed*

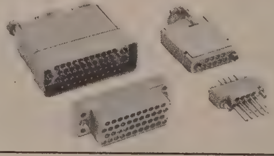
GH & MGH SERIES, MINIATURE AND SUB-MINIATURE HEXAGONAL

Number of Contacts — 4, 5, 7, 9, and 10, Miniature, 3 for Sub-Miniature.
Contacts — Copper Alloy, Gold Plated, 5 & 7.5 AMPS.
Termination — Solder Cup Accepts 20 & 22 AWG Wire
Insulator — Glass filled DAP, SDG-F
Polarization — Contact Placement Permits Proper Engagement.
Hoods — Glass Filled DAP, SDG-F & Aluminum. Order With or Without Strain Relief.
Accessories — Vibration Locks, Mounting Nuts and Lock Washers.



GF SERIES, MINIATURE, SIDE MOUNTING

Number of Contacts — 2 and 4.
Contacts — Copper Alloy, Gold Plated, 7.5 AMP Rated.
Termination — Solder Cup, Accepts 20 AWG Wire, Dip Solder, .025 Dia. for P.C. Mount.
Insulator — Glass Filled DAP, SDG-F and Glass Phenolic.
Polarization — Contact Arrangement Provides Polarization
Optional — Closed Entry Contacts



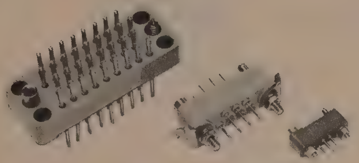
GMCT SERIES, MINIATURE RECTANGULAR REMOVABLE CONTACT CONNECTORS

Number of Contacts — 9, 14, 18, 20, 26, 34, 42, 50, 66, 75 & 104.
Removable Contacts — Copper Alloy, Gold Plated, 13 & 7.5 AMP Rated
Contact Termination — Solder, Dip Solder, Crimp and Wire Wrap Wire Size, 14 to 30 AWG
Insulator — Glass Filled DAP, SDG-F
Polarization — Guides or Fixed and Rotating Threadlocks, as Desired
Hoods & Shells — Aluminum, Available for all Sizes.
Underwriters' Laboratory Listed*

CONTACTS, REMOVABLE, SOLDER, DIP SOLDER, CRIMP AND WIRE WRAP

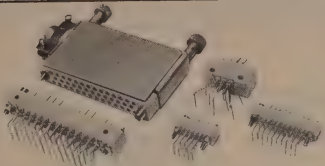
Removable contacts are for use with GMCT Series connector bodies. Contacts are machined copper alloy, gold plated over copper flash. Crimp and solder styles are sized to accept 14 to 30 AWG wire. Wire wrap terminations are .045 and .025 Sq.-dip solder terminations are .026 dia. Crimp and solder styles are available in both .062 and .040 pin diameters. Wire wrap and dip solder are .062 dia. Contacts may be purchased on reels of 2,000 for automatic installation. Contact crimping tools, insertion tools, and removal tools are available from stock.

PRINTED CIRCUIT CONNECTORS



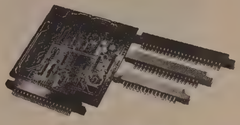
GM AND SGM SERIES, PERPENDICULAR MOUNTED ON P.C. BOARD, PIN OR SOCKET

Number of Contacts — 7, 8, 9, 14, 18, 20, 21, 26, 34, 41, and 50, GM Series.
— 5, 7, 9, 14, 20, 26, 29, 34, 44 and 50, SGM Series.
Contacts — Rated 5 AMPS for GM Series, and 3 AMPS for SGM Series. Copper Alloy, Gold Plated, Available Pin or Socket Type.
Termination — Dip Solder, .025 Dia. Tails, 4/32, 5/32 and 6/32 Long.
Spacing — .150 Between Contact Spacing for GM Series and .094 between Contacts on SGM Series.
Insulator — Glass filled DAP, SDG-F
Polarization — Guides and Threadlocks, Also May Be Used For Mechanical Mounting of Connector P.C. Board
Hoods — Available for Most Sizes of Mating Cable Connector
Underwriters' Laboratory Listed for GM Series*



GMPL AND SMPL SERIES, PARALLEL MOUNTED ON P.C. BOARD

Number of Contacts — 7, 8, 10, 14, 16, 19, 24, and 37 for GMPL Series.
— 5, 7, 9, 14, 20, 26, and 29 for SMPL Series.
Contacts — Available in Pin Type Only. 5 AMP Rating for GMPL Series and 3 AMPS for SMPL Series. Copper Alloy, Gold Plated.
Termination — Dip Solder, .040 and .025 Dia. for GMPL, .020 Dia. for SMPL Series
Spacing — .150 Between contact Spacing on Board for GMPL Series, and .094 Between Contacts for SMPL Series.
Insulator — Glass Filled, DAP, SDG-F.
Polarization — Guides and Threadlocks for Positive Alignment and Lock.
Mounting — Holes In Connector Body Allow For Fastener Mounting to P.C. Board. Also May Be Cemented to Board.
Mating Connector — Socket Cable. Select from GM or GMCT Series for GMPL and SGM Series for SMPL.



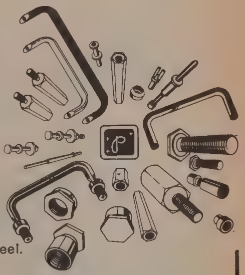
GDP, GKD, AND GQD SERIES, DOUBLE ROW, CARD RECEPTACLE, .156 CENTERS

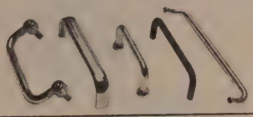
Number of Contacts — 10/20, 15/30, 18/36 and 22/44.
Contacts — Bellows, Gold Plated, Phosphor Bronze for GPD Series and Beryllium Copper for GKD and GQD Series. 5 AMP Rated.
Termination — Dip Solder or Eyelet Styles
Insulator — Glass Filled DAP, SDG-F For GPD and GQD Series. Phenolic For GKD Series.
Board Thickness — To Accommodate .054 through .071 P.C. Board Thickness.
Polarization — Between Contact Keys
Mounting — .128 Clearance Holes, Bushings or Threaded Inserts.

GPC SERIES, SINGLE ROW CARD RECEPTACLE, .156 CENTERS

Number of Contacts — 6, 10, 12, 15 and 22.
Contacts — Leaf Type, Gold Plated, Beryllium Copper. 5 AMP Rated.
Termination — Dip Solder or Eyelet Styles
Insulator — Glass Filled Phenolic.
Board Thickness — To Accommodate .054 Through .071 P.C. Board Thickness.
Polarization — In Contact and Between Contact Keys
Mounting — .128 Clearance Holes and Floating Bushings.

ELECTRONIC HARDWARE



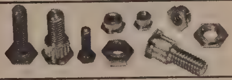


HANDLES — INTERNALLY THREADED. ROUND, OVAL FOLDING 90° AND 180°, 45° OFFSET AND SLANT STYLE.

Material — Aluminum, Brass and Stainless Steel
Finish — Anodize, Oxide, Nickel and Passivate.
Lengths — Sixteenth Inch Increments.
Leg Height — 1 Inch Minimum
(Specials Will Be Considered)

SPACERS — CLEARANCE HOLE, THREADED, STANDOFFS, MOUNTING POST, HEX and ROUND

Material — Aluminum, Brass, Nylon, and Stainless Steel.
Finish — Anodize, Cadmium, Nickel and Passivate.
Lengths — Based on Sixteenth Inch Increments
(Most Sizes, Lengths and Threads are Stocked)

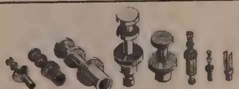


CLINCHON NUTS AND STUDS. FLUSH, STANDOFF, EXTENSION AND STANDARD

Material — Stainless Steel
Finish — Passivate
Diameters — 3/16", 1/4", 5/16" and 7/16".
Panel Thickness — .040, .062, .093, .125, .156, .187, .250 and .312

CONTACTS — PIN AND SOCKET, FLEXIBLE CIRCUIT AND PRINTED CIRCUIT

Material — Copper Alloy
Finish — Gold, Electrolytic Tin & Silver.
Termination — Swage, Solder, Crimp, Dip Solder and *Wire Wrap*
(Specials Will Be Considered)



TERMINALS — TURRET, FEED-THRU, BIFURCATED AND HOLLOW, NON-INSULATED

Applications — MIL-T55155, Industrial Standards. Micro-Miniature, Sub-Miniature, Miniature and Standard Sizes. NAS Also Available
Material — Copper Alloy
Finish — Electro-Tin, Silver, Tin-Lead and Hot Solder Dip
Termination — Solder and Swage.

DUAL CONTACT RELAY TEST SOCKETS

FOR USE WITH

RELAYS, SWITCHES, TRANSFORMERS, LAMPS, TRANSISTORS, HYBRIDS, ETC.

GENERAL INFORMATION

These test sockets are dual-contact (Kelvin type) with two mutually insulated contacts for each terminal. They permit precise contact resistance measurements by the four terminal method.

Qualco is now the sole manufacturer of this line of dual-contact relay test sockets and the model RT-905 Relay Tester.....formerly manufactured by Electronic Engineering Company of California (EECO) and, then, Photologic Company. We are manufacturing all of the old EECO and Photologic part numbers, as well as adding new types to keep up with today's demands. Some of the new standard types available are dual-contact sockets to fit most of the popular 0.100 in. grid relays, and some of the TO-5 transistor case relays. Also, some of the new DIP packages are available.

The socket line now includes more than 500 different configurations. Since 1960, the AS series sockets have been used by many of the major relay manufacturers, as well as relay users. Areas of use include QC, receiving inspection, production test and evaluation. Environmental testing is being done with the high temperature sockets.

Many standard sockets are maintained in stock for immediate delivery, and all standard sockets are available in two weeks or less. Should you desire a socket not shown on our list....that is, a special....it requires about 30 days and a small set-up charge.

SOCKET FEATURES

- Available in more than 500 different configurations.
- Accepts all types of terminals including solder hooks, flattened and pierced, rectangular, round, turret, etc.
- Permits precise relay contact resistance measurement by the four terminal method.
- Plug-in testing of any type solder terminal component.
- 0.1 inch grid dual contact sockets are now available.

SOCKET SPECIFICATIONS

CONTACTS=Gold plated beryllium copper. Two mutually insulated contacts for each terminal on the relay header.

BODY MAT'L=Molded epoxy.

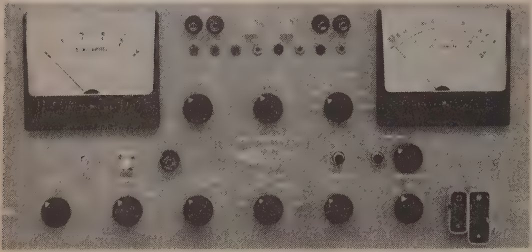
OPERATING=—40 to 175 degrees F (standard)
TEMPERATURE=—100 to 350 degrees F (extra cost).

SERVICE LIFE=More than 30,000 insertions.

CURRENT HANDLING=Up to ten amperes.

DIELECTRIC STRENGTH=400 volts.mil.

MODEL RT-905 RELAY TESTER



The RT-905 is a versatile and economical test set for checking moderate quantities of relays. It is ideal for incoming inspection service where tests must be made on many different types and styles of relays with a minimum of set-up time. Measures pull-in and drop-out voltage and current, contact resistance, coil resistance and contact operation. Provides automatic operation of the relay under test with outputs for oscilloscope measurement of contact bounce and pull-in and drop-out times. Also provides switching for insulation resistance tests. Complete specifications are available on request.

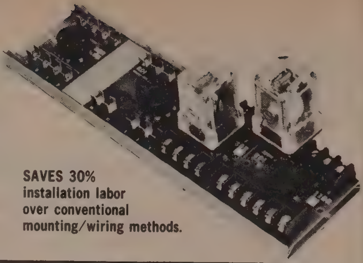
SNAPTRACK™ MOUNTING SYSTEM

The **SNAPTRACK™** mounting system provides a low cost convenient method for installing plug-in relays, timers and tubes in control equipment. Socket assemblies snap into position along continuous sections of SNAPTRACK, an extruded PVC, non-conductive mounting track, 3-5/32" wide and new 2-7/8" wide. The track may be installed with rivets or screws. Socket assemblies consist of a socket mounted to a G-10 epoxy glass P.C. board with choice of specially designed U.L. grade P.P. barrier type screw terminal blocks or 1/4" quick-connect tabs. The assembly is then wave soldered for circuit reliability. Terminal points are clearly numbered with epoxy ink. Screws are in the raised position and feature captive wire clamps which eliminate need for bending of, or attaching hook or ring terminals to wires. Wired-in 120V, 240V neon lamp to indicate power at coil terminals available as option. Add "1" or "2" to Catalog Number.



SAVES 30% installation labor over conventional mounting/wiring methods.

SNAPTRACK™ MOLDED SOCKET ASSEMBLIES

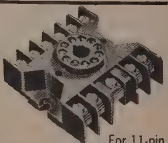
FEATURES

- **Rugged.** Molded of break and chip resistant U.L. recognized Lexan.
- **Positive Contact.** Phosphor bronze socket contacts.
- **Fast Wiring.** Screws feature captive wire-clamp plates, eliminate need for crimp-on terminals.
- **Versatile Mounting.** Mount singly or gang via optional 5TK2 series SNAPTRACK.

Rated 10 Amp., 300 Volts. Wire Range: 12 through 20 AWG.

For octal relays and timers. **SM8-C** (Screws w/wire-clamps) **SM8-A** w/binder head screws.

Save 30% labor over mounting singly by using **5TK2** series SNAPTRACK.



For 11-pin relays and timers. **SM11-C.** Screws have wire clamps.

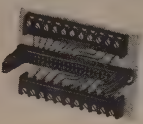
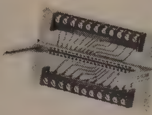
EDGE CONNECTOR ASSEMBLIES

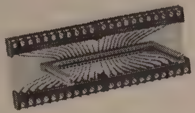
22PC
For single-sided straight cards. Utilizes Amphenol type 143 22-pin connector.



22PCB
For single-sided, notched cards. Utilizes Elco type 6022 22-pin connector.



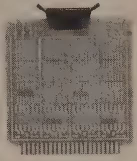
44PCB & 44PCA
For double-sided, notched cards with 44 output pins. Utilizes Elco type 6022 connector. **44PCB** has terminals numbered thru 44; **44PCA**, A thru Z and 1 thru 22.



Designed to conveniently panel mount 22-pin single and double-sided printed circuit cards with pins on .158" ctrs. Convert edge connectors to screw terminal wiring. The assemblies mount into SNAPTRACK mounting channel which also serve to insulate the board.

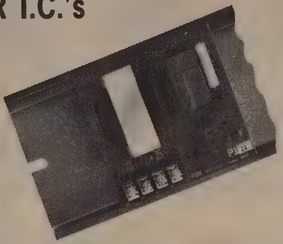
KLUGE CARD

A 22-pin universal G10 pcb compatible with the 22PCB assembly. Ideal for one-of-a-kind circuits requiring up to 12 I.C.'s (14-pin DIP) and 8 transistors. Handle included. Size: 4.5" w x 4.5" h x 1/16" th. Cat. No. **KB22.**



D.C. POWER SUPPLIES FOR I.C.'s

- DRIVE I.C.'s, REED RELAYS
- REGULATED
- MOUNT ON SNAPTRACK MOUNTING PANEL



Designed to drive small I.C. interface circuits, reed relays, photoelectric controls, etc. requiring regulated D.C. to 1.5 watts. Built-in overload and short circuit protection. Snaps into TK2 series SNAPTRACK for fast installation.

SPECIFICATIONS

Input: 105-135 VAC, 50/60 Hz., 80mA.
Regulation: ±1% for 10% line/load.
Overload Protection: Twice current.
Size: 3 x 3 x 2-7/8" high.

SNAPTRACK™ TERMINAL BLOCKS

Designed to snap into either of two SNAPTRACK widths, the BT series offer a choice of two screw sizes to fit all wire sizes from 22 to 12 AWG. Captive wire-clamp plates provide fast, secure connection without need for auxiliary terminals.
Terminal strips are wave soldered to a G-10 epoxy glass pcb. Space is provided for terminal identification between strips. **BT-6** provides 6 pairs of terminals utilizing #8-32 screws. **2BT-8** provides 8 pairs of terminals utilizing #4-40 screws. See Page 6 to order SNAPTRACK mounting channel.

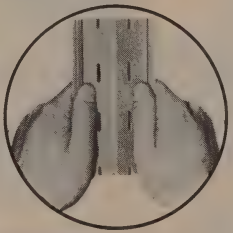
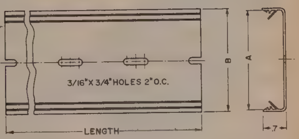
SNAPTRACK™ MOUNTING CHANNEL

Patented Wings hold pcb securely.





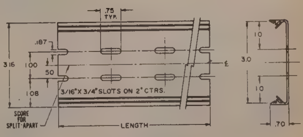
TK2, 2TK2 & 3TK2.

SNAPTRACK is a non-conductive, rigid extruded PVC chassis for mounting custom circuit boards. Available in a variety of fixed widths and a new Split-Apart model for wider pcb's, SNAPTRACK mounts to panels quickly with rivets or screws. P.C. Boards are simply snapped-in from front and are held securely via patented wings which also act as shock absorbers when pcb's are flexed. P.C.B.'s can be quickly removed from SNAPTRACK for field service. Slots on 2-inch centers are provided for fast, easy installation.

ORDERING INFORMATION

Dim. A Nominal P.C.B. Width (inches)	Dim. B Overall Track Width (inches)	RDI Cat. No. (48" lg.)
2.75	2.90	2TK2-48
3.00	3.16	TK2-48
3.25	3.40	3TK2-48
Split-Apart		4TK2-48

To specify lengths of 6, 12, or 24 inches, substitute **6**, **12**, or **24** in place of **"48"**.
Example: TK2-24 is 24 inches long.



4TK2-48

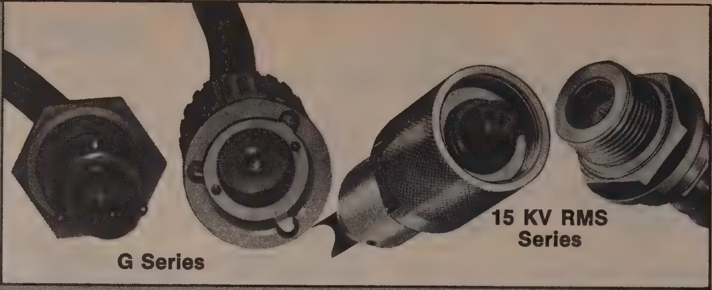
Rowe
Coaxial
Connectors and Cable Assemblies

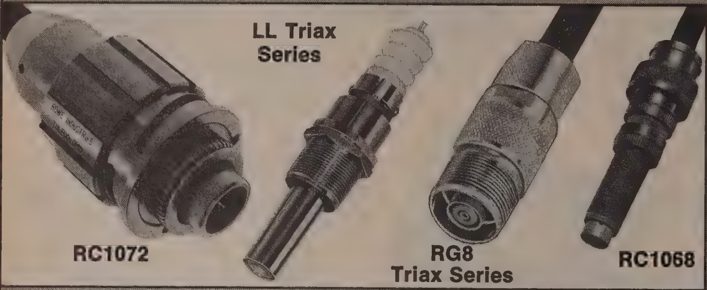
Employ high-voltage, corona-free design techniques. They are ideal for use in pulse as well as DC voltage applications, through 150 KV. A wide variety of molded-on or field assembly types are offered. Available in quick disconnect or screw couplings.



G Series
15 KV RMS Series

Rowe
Triaxial
Connectors and Cable Assemblies

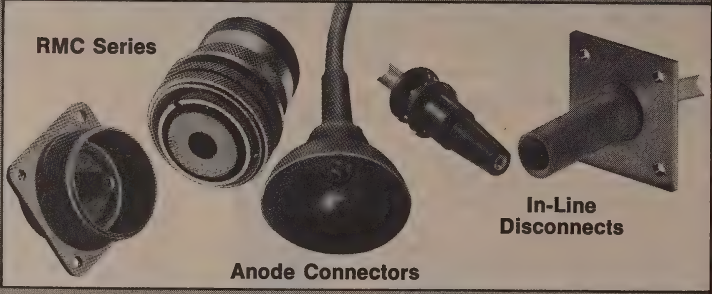
A full spectrum of both molded-on and field assembly types are available for a wide variety of cable types such as the triaxial version of RG-8, up through and including specialized construction for operation in excess of 100 KV.



LL Triax Series
RC1072
RG8 Triax Series
RC1068

Rowe
Single Contact
Connectors and Cable Assemblies

Offered is an extensive listing of single contact high-voltage assemblies, which include anode connectors, in-line disconnects and others which are used unshielded to solve your simple high-voltage interconnection problems.



RMC Series
In-Line Disconnects
Anode Connectors

Rowe
Multiple Contact
Connectors and Cable Assemblies

Offer contact arrangements from one to thirty contacts, panel receptacles, cable plugs, rack and panel combinations, in-line types and many others. Both field assemblies and molded-on types are standard in this line.

Rowe Industries has designed and developed over 700 specialized interconnections for which tooling is available.

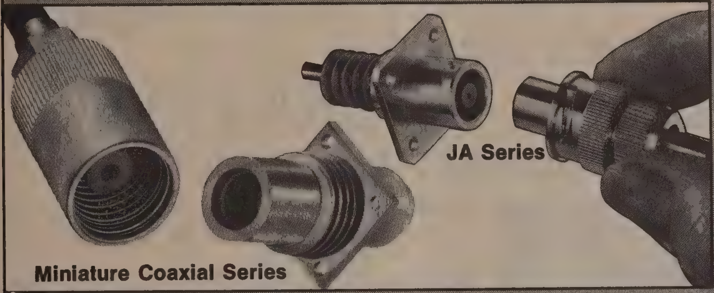
FOR YOUR COMMERCIAL, INDUSTRIAL OR MILITARY DESIGN NEEDS



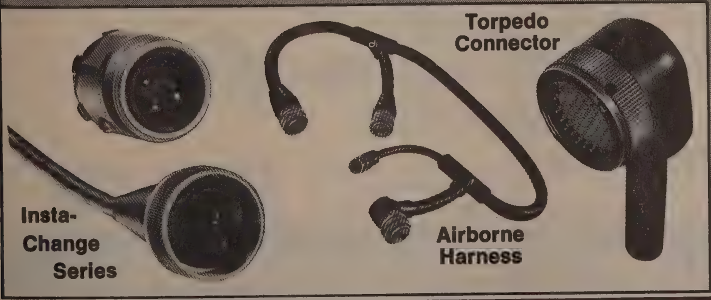
Rowe Miniature Coaxial Connectors and Cable Assemblies

Employ the same high-voltage design techniques as the coaxial series, but are much smaller in size for use in restricted spaces. Available in quick disconnect and screw couplings (the JA Series can be adapted to such standard type cables as RG 58 and RG 59).

Rowe Subminiature Coaxial Connectors and Cable Assemblies

Are ideally suited for use where space is at a premium. Employing the traditional Rowe high capability features, the subminiature sizes offer unusually high voltage operating capabilities, through 20 KV.

Subminiature Coaxial Series
Pancake Series



Rowe Low-Voltage, Molded-On Connectors and Cable Assemblies

For use in severe environments. We can mold standard connectors to cable for an environmental seal and provide a molded strain relief. Our exclusive Insta-Change series was designed for factory, mining, nuclear and oil well use.

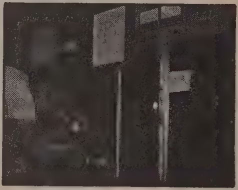
Since 1947, Rowe Industries has been foremost in the design and manufacture of high voltage, corona free and other specialized connectors and cable assemblies. So far, Rowe engineers have expanded the state of the art by designing and developing over 700 specialized interconnections for which tooling is available.

Modern facilities coupled with excellent engineering capabilities provide you with the fastest, most exacting and up-to-date specifications in the industry. Production equipment operated by skilled personnel provide you with quality components to exacting specifications.

Call us today — your specialized problem is our specialized challenge.

World's Leader in HIGH-VOLTAGE, CORONA-FREE INTERCONNECTIONS



ELECTRIC TESTING: Dielectric strength, Corona inception/extinction, Contact resistance, Continuity, RFI/EMI, DIT-MCO random access testing.

MECHANICAL TESTING: Insertion/withdrawal forces, Pressure/vacuum tests, Shock/vibration, X-Ray.

ENVIRONMENTAL TESTING: Altitude, Temperature/humidity, Corrosive atmospheres, Hydrostatic pressure

- **Send for Rowe technical literature. See complete list and mail coupon on the third page of our advertising in the wire section.**

A Prime Source of LOW-VOLTAGE, MOLDED-ON INTERCONNECTIONS

Rowe Industries can supply any type of connective device with molded, crimped or soldered type terminations.

APPLICATIONS:

Underwater Instrumentation
Extreme Environments
High-Pressure Feed-Thru
Nuclear Reactor
Deep Submergence
Hydrophone
Oil Well
Sonar
Mining

Phone Rowe (419-729-9761) for information

5-way® BINDING POSTS

5 WAYS TO CONNECT ● GOLD-PLATED BRASS PARTS ● RANGE OF COLORS

FLUTED NUT TYPES

Plastic parts of standard (not miniature) size types molded of Lexan polycarbonate resin; brass parts are gold-plated. Rated for 30 amperes, 1000 volts working. Nickel-plated brass types available on special order.

HEX NUT TYPES

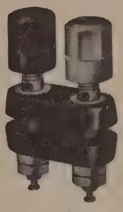
Rated for 30 amperes, 1000 volts working. Brass parts are gold-plated; plastic parts are of nylon compounded to meet military specifications MIL-P-20693A, Type IV. Nickel-plated brass types available on order.

GROUNDING TYPE

For making rapid connections to ground. Made of finely machined brass nickel-plated and polished. Panel grounding collar frozen to shaft has "D" type shoulder for locking in keyed panel hole.

MINIATURE TYPES

Fluted nut design only. Rated for 15 amperes, 1000 volts working. Gold-plated brass parts; nylon plastic parts compounded to meet military specification MIL-P-20693A, Type IV. Types with nickel-plated brass available also.



DOUBLE ASSEMBLY TYPES

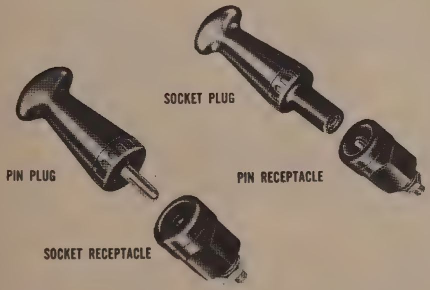
For instrument and equipment panels requiring binding posts mounted on ¾" centers. Rated for a current capacity of 30 amperes and a working voltage of 1000 volts. Brass parts are gold-plated; panel insulators in black only. Rugged, self-contained assembly makes mounting more accurate, faster and easier than two individual binding posts and gives maximum strength where connections are frequently made.

STYLE	TYPE
BINDING POSTS	
FLUTED NUT — STANDARD	DF31*
HEX NUT — STANDARD	DF30*
GROUNDING — ALL METAL	GP30NC
FLUTED NUT — MINIATURE	DF21*

STYLE	TYPE
DOUBLE ASSEMBLY TYPES	
BLACK & RED HEX NUTS	DF30-2-BRC

*Add desired color suffix to series designation number: BC (black), BLC (blue), RC (red), WTC (white), YC (yellow), GNC (green). For example: DF21BLC.

SUPERCON®
ELECTRICAL CONNECTORS



Nylon plastic parts; gold-plated brass current-carrying parts. Wiring connections to the same plug can be either soldered or solderless. Plug cable-fastening screws permit a wide range of cable sizes. Plug grips are of a simple, two-piece threaded construction for quick assembly. All receptacle plastic parts are molded of the same color to permit more rapid and accurate circuit identification front and back of panel when installed. The 25, 50 and 100 ampere types are listed by Underwriters' Laboratories, Inc.

AMPERES	PIN PLUGS TYPE†	SOCKET RECEPTACLES TYPE†	SOCKET PLUGS TYPE†	PIN RECEPTACLES TYPE†
25	PP25G	RS25G	PS25G	RP25G
50	PP50G	RS50G	PS50G	RP50G
100	PP100G	RS100G	PS100G	RP100G
250	PP250G	RS250G	PS250G	RP250G

†Add desired color suffix to series designation number: B (black), BL (blue), R (red), WT (white), Y (yellow), GN (green). For example: PS25GWT.

SKT-0804/016-8010 GUIDED ENTRY TEST POINT JACK FOR INCREASED CHASSIS PULL-OUT STRENGTH

Featuring a beryllium-copper formed lug, the SKT-0804 test point jack offers greater pull-out strength and high torque resistance. The jack is designed to provide guided-entry for an .080″ diameter probe.

SEALECTRO® PRESS-FIT® TEFLON* TERMINALS

*Reg. Trademark, E. I. Du Pont de Nemours & Co.

NEW! For chamfered or non-chamfered holes

Rivet-Loc™

patented

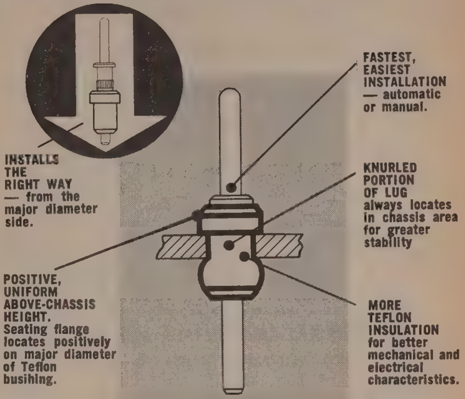
TEFLON INSULATED TERMINALS

Rivet-Loc terminals overcome all the inherent shortcomings of the older semi-assembled design which assembles by pushing the metal lug into the minor diameter of the Teflon bushing. Whereas the original semi-assembled design depended upon the mass of the metal lug displacing the Teflon, the Rivet-Loc employs a simple **Riveting** and **Locking** of the Teflon bushing assuring a better finished installation.

Rivet-Loc is installed in one simple, smooth operation with all insertion forces working together, instead of against each other as in the case of the previous semi-assembled design. Thus, the final seating and locking of the terminal in the chassis is uniform, even with wide parameters of tool settings.

Proved in millions of installations, Rivet-Loc not only offers far superior mechanical characteristics, it also has proved more dependable electrically. The smaller metal lug mass in proportion to the Teflon bushing provides far better dielectric strength. This extra protection of pure virgin Teflon enhances the dependability and performance of your equipment.

The numbers listed here are currently considered standard. However, new numbers are being added constantly. Virtually any terminal configuration or requirement can be met with the Rivet-Loc concept. Submit your requirements to Sealectro.



INSTALLS THE RIGHT WAY — from the major diameter side.

FASTEST, EASIEST INSTALLATION — automatic or manual.

KNURLED PORTION OF LUG always locates in chassis area for greater stability.

POSITIVE, UNIFORM ABOVE-CHASSIS HEIGHT. Seating flange locates positively on major diameter of Teflon busihing.

MORE TEFLON INSULATION for better mechanical and electrical characteristics.

* Supplied with MIL Spec. mounting hardware. If desired without mounting hardware: please specify;

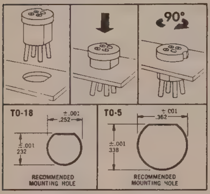
SE-099E-01	TM-300-TUR
SE-099E-02	TM-301-TUR-C1

•Transistor and IC Hardware

Needs no mounting hardware. Provides full insulation from metal chassis.

PRESS-FIT® ¼ TURN *Supercon* TRANSISTOR AND IC SOCKETS

- **Supercon high retention precision Contacts.**
- **D-hole mounting without interference fit or loose hardware.**



An exclusive Sealectro design that can save tremendous time and money on the assembly line. Merely drop ¼ turn unit through D-hole and manual or automatic tooling automatically turns it 90°. Flatted portion turns free, while rounded area is grooved against D-Flat, producing a positive locking action in chassis.

MATERIAL:

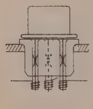
Insulator: Teflon

Shell: Brass

Contact: Beryllium Copper

Std. Plating: Gold over Copper

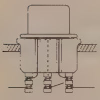
Supercon transistor and I.C. hardware features high-retention precision contacts. Allows fast easy replacement of transistor or I.C. Maintains retention, in excess of 50 grams per lead, through shock and vibration and repeated component insertions. Permits transistor or I.C. device interface into associated circuitry without electrical noise or signal dissipation due to contact resistance build-up.



PRESS-FIT SERIES 60:

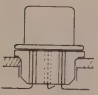
Transistor and I.C. sockets

Low-cost, high precision series 60 sockets. Permit plug-in and removal of TO-5, TO-18 cans and I.C. packages at will. Precise contact design provides a positive mechanical grip while making electrical contact with minimum resistance.



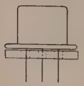
PRESS-FIT TRANSISTOR AND IC HOLDERS

Provides insulated chassis mounting with thru holes and soldering lugs for transistor leads and circuit connections.



PRESS-FIT TRANSISTOR AND IC BUSHINGS

Press-fit or grommet-type chassis mounting. Provides support for transistor can and thru-chassis hole plus strain relief for leads.



PRESS-FIT TRANSISTOR AND IC PADS

Provides insulation from mounting surface and strain relief for glass seals.

Sealectro Transistor and IC Socket and mounting devices provide the excellent electrical and mechanical characteristics of Teflon, and eliminate the need for loose mounting hardware such as quick-nuts, seating rings, screws, washers, etc.

Electrically, only the finest contact metals and platings are employed to assure lowest electrical noise, maximum contact retention and longest service life.

—Free 12 page catalog details all above transistor and IC hardware.

STOCKED BY LEADING DISTRIBUTORS NATIONWIDE

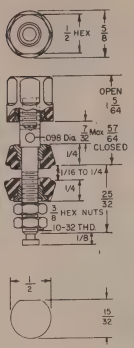
*Lexan is a GE Trademark

LEXAN 5-WAY BINDING POSTS

HEX AND FLUTED HEADS

HEX HEAD

257

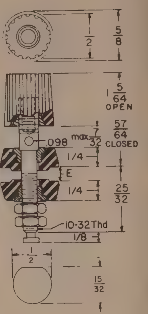


HEAD: CAPTIVE MOLDED LEXAN, WITH BRASS, GOLD PLATED INSERT.
BODY: Brass, Gold Plated
WASHERS: Molded Lexan, with Gold-Plated Brass insert.
RATINGS: 30 Amps AC for 10°C Temp. rise, continuous duty. 2 KV AC, 60 Hertz, continuous working voltage. 5.0 pf. capacitance to 1/8" thick aluminum panel.
ACCEPTS: Phone tip plug, spade lug, banana plug, alligator cip, stranded or solid wire up to 14 awg.
DESCR: Captivated Lexan head to prevent loss. Keyed, Lexan base washers completely insulate post from panel and prevent turning. Mounts in 1/2" round or single "D" hole as indicated. Wires directly to wrap-around solder turret, or to solder lug (not supplied) between nuts.
COLORS: Red, black, yellow, green, blue, white. Std. Pkg. 100

No.	Type	NET Per C
257	Hex Head	$65.00
459	Fluted Head	65.00

FLUTED HEAD

459



MIL-SPEC BINDING POSTS per MIL-P-55149/1

Same as Types 257 and 459 above, except meets requirements of MIL-P-55149/1, Dtd. 1 Nov. 1961. Brass per QQ-B-626, Comp. 22. Includes gold-plated flat washer and internal tooth lockwasher. Std. Pkg. 100

No.	Type	Head	NET Per C
267-102 (Red)	PBOIFAO3	Hex	$70.00

HEAD: MACHINED BUTYRATE, per Fed. Spec. L-P344, Type I, class MH. Red or Black. SPECIFY COLOR

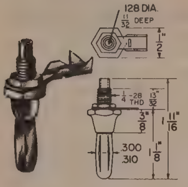
BODY: Brass, nickel plated.

RATING: 25 Amps AC for 10°C Temp. rise, continuous duty. 1 K Volts 60 cycle AC continuous working voltage. CAPACITANCE 7.0 pf.

DESCR.: Supplied with hex nut, fibre washer, lockwasher, and brass tinned lug. Jack body recessed for snug contact. Mounts in ½" hole in panel up to ¾" thick. **Std. Pkg. 50**

No.	NET Per C
287	$95.00

GIANT BANANA PLUG



BODY: HEX BRASS, nickel plated.

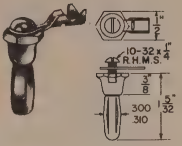
SPRING: Six-leaved phosphor bronze, nickel plated.

RATING: 25 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Supplied with hex nut and brass tinned lug. Large deep internal well for soldering heavy duty wire. **Std. Pkg. 50**

No.	NET Per C
185	$90.00

GIANT BANANA PLUG



BODY: HEX BRASS, nickel plated.

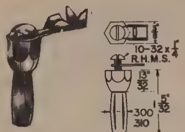
SPRING: Six-leaved phosphor bronze, nickel plated.

RATING: 25 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Supplied with screw and brass tinned lug. Internal female thread permits use on all size panels. **Std. Pkg. 50**

No.	NET Per C
186	$80.00

GIANT BANANA PLUG



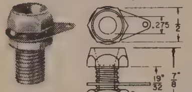
BODY: HEX BRASS, nickel plated.

SPRING: Six-leaved phosphor bronze, nickel plated.

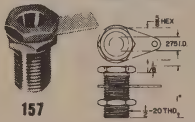
RATING: 25 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Supplied with screw and brass tinned lug. Internal female thread permits use on all size panels. **Std. Pkg. 50**

No.	NET Per C
188	$65.00



187



157

GIANT BANANA JACK

BODY: HEX BRASS, nickel plated.

RATING: 25 Amps AC for 10°C Temp. rise, continuous duty.

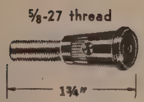
DESCR.: Supplied with hex nut and brass tinned lug. **Std. Pkg. 50**

No.	Mtg. Hole	Panel	NET Per C
187	⅜"	½"	$60.00
157	½"	⅝"	$70.00

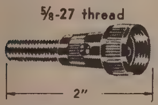
MICROPHONE CONNECTORS

MICROPHONE CONNECTORS

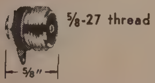
115



116



117



BODY: BRASS, chrome plated.

SPRING: Steel, cadmium plated.

INSUL.: XXXP PHENOLIC.

EYELET: Brass, hot tinned for easy soldering.

DESCR.: Designed for use with single conductor cable. Microphone connectors provided with flexible protector spring. Cable clamped firmly to connector by hollow point set screw. **Std. Pkg. 50**

MICROPHONE CONNECTORS

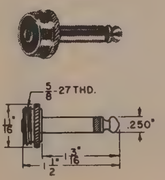
No.	Type	NET Per C
115	Single Contact Male	$39.00
116	Single Contact Female	65.00

CHASSIS CONNECTORS

Mount in .385 hole grounded; .500 hole insulated with shoulder washer.

No.	Type	Std. Pkg.	NET Per C
117	Single Contact Male	25	$60.00

PHONE PLUG ADAPTER



BODY: Body, tip, sleeve—Brass, nickel plated.

INSUL.: XXXP PHENOLIC.

RATING: 5 Amps AC for 10°C Temp. rise, continuous duty. 750 Volts 60 cycle AC continuous working voltage.

DESCR.: Assembled to insure positive contact with input wire of mating microphone connector. Molded styrene separator insures maximum insulation between conductors. Mates with No. 116 microphone connector. Fits standard phone jacks. **Std. Pkg. 25**

No.	NET Per C
113	$47.00

CAP and CHAIN

Brass Nickle Plated

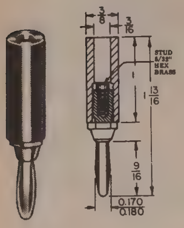
SPECIFY SMITH INSULATED BANANA PLUGS

STOCKED BY LEADING DISTRIBUTORS NATIONWIDE



INSULATED BANANA PLUG

HANDLE: MOLDED PHENOLIC plastic, Red, Black Yellow, Green, Blue, White. SPECIFY COLOR

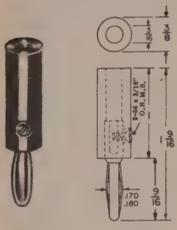
PLUG: Hex brass, nickel or silver plated.

SPRING: Four-leaved phosphor bronze or beryllium copper, nickel or silver plated.

RATING: 15 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Wire can be soldered to brass stud or directly into plug itself. Stud also locks wire to plug for solderless connection. Fits standard banana jacks. **Std. Pkg. 100**

No.	Spring Material	Plating	NET Per C
212	Phosphor Bronze	Nickel	$35.00
232	Phosphor Bronze	Silver	$39.00
242	Beryllium Copper	Nickel	$41.00
262	Beryllium Copper	Silver	$44.00



INSULATED BANANA PLUG

With Side Screw

HANDLE: MOLDED PHENOLIC plastic, Red, Black, Yellow, Green, Blue, White. SPECIFY COLOR

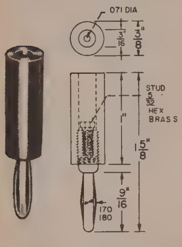
PLUG: Brass, nickel plated.

SPRING: Four-leaved phosphor bronze or beryllium copper, nickel plated.

RATING: 15 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Set screw secures wire without soldering. Fits standard banana jacks. **Std. Pkg. 100**

No.	Spring	NET Per C
204	Phosphor Bronze	$30.00
254	Beryllium Copper	$35.00



INSULATED BANANA PLUG

HANDLE: MOLDED PHENOLIC plastic, Red, Black, Yellow, Green, Blue, White. SPECIFY COLOR

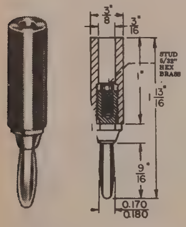
PLUG: Brass, nickel or silver plated.

SPRING: Four-leaved phosphor bronze or beryllium copper, nickel or silver plated.

RATING: 15 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Wire can be soldered to brass stud or directly into plug itself. Stud also locks wire to plug for solderless connection. Fits standard banana jacks. **Std. Pkg. 100**

No.	Spring Material	Plating	NET Per C
211	Phosphor Bronze	Nickel	$30.00
261	Phosphor Bronze	Silver	33.00
271	Beryllium Copper	Nickel	35.00
281	Beryllium Copper	Silver	39.00



HIGH TEMPERATURE BANANA PLUG

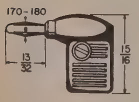
HANDLE: MOLDED PHENOLIC plastic, Red, Black Yellow, Green, Blue, White. SPECIFY COLOR

PLUG: Hex brass, nickel plated.

RATING: 15 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Withstands temperature to 1200 degrees F. Full resiliency—non-oxidizing. Excellent for thermo-couple connection on plastic extruding die heads. **Std. Pkg. 10**

No.	NET Per C
388	$120.00



METER BANANA PLUG

HANDLE: MOLDED PHENOLIC plastic, Red and Black. SPECIFY COLOR

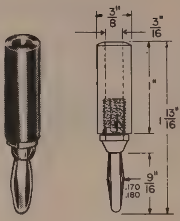
PLUG: Brass, nickel plated.

SPRING: Four-leaved phosphor bronze, nickel plated.

RATING: 10 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Molded in two halves for easy assembly with screw and nut. Fits standard banana jacks. **Std. Pkg. 50**

No.	Type	NET Per C
255		$48.00



INSULATED BANANA PLUG

Solderless

HANDLE: MOLDED PHENOLIC plastic, Red, Black, Yellow, Green, Blue, White. SPECIFY COLOR

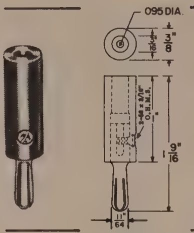
PLUG: Hex brass, nickel or silver plated.

SPRING: Four-leaved phosphor bronze or beryllium copper, nickel or silver plated.

RATING: 15 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Solderless: Wire fits through handle and body of tip then wrapped around screw portion. Fits standard banana jacks. **Std. Pkg. 100**

No.	Spring Material	Plating	NET Per C
295	Phosphor Bronze	Nickel	$42.00
296	Phosphor Bronze	Silver	$46.00
297	Beryllium Copper	Nickel	$48.00
298	Beryllium Copper	Silver	$51.00



INSULATED BANANA PLUG

Split Type With Side Screw

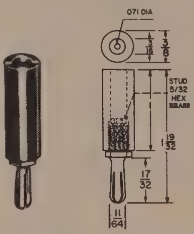
HANDLE: MOLDED PHENOLIC plastic, Red, Black, Yellow, Green, Blue, White. SPECIFY COLOR

PLUG: Brass, nickel plated.

RATING: 15 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Cross-slotted for spring tension. Set screw secures wire, without soldering. Fits standard banana jacks. **Std. Pkg. 100**

No.	NET Per C
213	$28.00



INSULATED BANANA PLUG

Split Type With Internal Stud

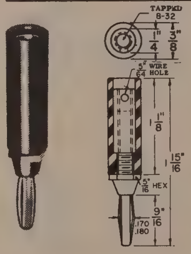
HANDLE: MOLDED PHENOLIC plastic, Red, Black, Yellow, Green, Blue, White. SPECIFY COLOR

PLUG: Brass, nickel plated.

RATING: 15 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Cross-slotted for spring tension. Wire can be soldered to brass stud or directly into plug itself. Stud also locks wire to plug for solderless connection. Fits standard banana jacks. **Std. Pkg. 100**

No.	NET Per C
253	$32.00



INSULATED BANANA PLUG

Solderless

HANDLE: MACHINED BUTYRATE, per Mil-P-10408A, Type I, Class II. Red or Black. SPECIFY COLOR

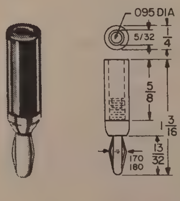
PLUG: Hex brass, nickel plated with mating brass spacer.

SPRING: Four-leaved phosphor bronze, nickel plated.

RATING: 15 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Cross drilled hole in spacer enables quick solderless connection of wire to plug. Fits standard banana jacks. **Std. Pkg. 100**

No.	NET Per C
236	$62.00



INSULATED BANANA PLUG

Midget Type

HANDLE: MACHINED BUTYRATE, per Mil-P-10408A, Type I, Class II. Red or Black. SPECIFY COLOR

PLUG: Brass, nickel or silver plated.

SPRING: Phosphor bronze or beryllium copper, nickel or silver plated.

RATING: 10 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Wire soldered directly into stud. Fits standard banana jacks. **Std. Pkg. 100**

No.	Spring Material	Plating	NET Per C
291	Phosphor Bronze	Nickel	$30.00
292	Phosphor Bronze	Silver	$33.00
293	Beryllium Copper	Nickel	$35.00
294	Beryllium Copper	Silver	$39.00

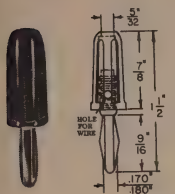
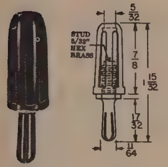
NYLON BANANA PLUG



HANDLE: MOLDED NYLON, per MIL-P-20693A.
COLORS: Available in 10 std. colors as coded above. (Specify color)
PLUG: Brass, nickel plated.
SPRING: Phosphor bronze or beryllium copper nickel or silver plated.
RATING: 15 Amps AC for 10°C Temp. rise, continuous duty.
DESCR.: Wire can be soldered to brass stud or directly into plug itself. Stud also locks wire to plug for solderless connection. Fits standard banana jacks. **Std. Pkg. 100**

No.	Spring Material	Plating	NET Per C
476	Phosphor Bronze	Nickel	$31.00
477	Phosphor Bronze	Silver	$34.00
478	Beryllium Copper	Nickel	$37.00
479	Beryllium Copper	Silver	$40.00

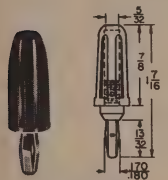
NYLON BANANA PLUG
Split Type



HANDLE: MOLDED NYLON, per MIL-P-20693A.
COLORS: Available in 10 std. colors as coded above. (Specify color)
PLUG: Brass, nickel plated.
RATING: 15 Amps AC for 10°C Temp. rise, continuous duty.
DESCR.: Cross-slotted for spring tension. Wire can be soldered to brass stud or directly into plug itself. Stud also locks wire to plug for solderless connection. Fits standard banana jacks. **Std. Pkg. 100**

No.	NET Per C
494	$28.00

NYLON BANANA PLUG
Short Spring



HANDLE: MOLDED NYLON, per MIL-P-20693A.
COLORS: Available in 10 std. colors as coded above. (Specify color)
PLUG: Brass, nickel or silver plated.
SPRING: Phosphor bronze or beryllium copper nickel or silver plated.
RATING: 15 Amps AC for 10°C Temp. rise, continuous duty.
DESCR.: Wire soldered directly into stud. Fits standard banana jacks. **Std. Pkg. 100**

No.	Spring Material	Plating	NET Per C
426	Phosphor Bronze	Nickel	$28.00
427	Phosphor Bronze	Silver	$31.00

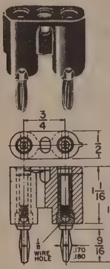
USE OUR MANUFACTURING AND ENGINEERING FACILITIES for variations and for special parts which we will be happy to manufacture TO YOUR SPECIFICATIONS!

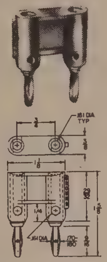
DUAL BANANA PLUG



BODY: MOLDED POLYSTYRENE, Red or Black. SPECIFY COLOR
PLUG: Brass, nickel plated.
SPRING: Four-leaved phosphor bronze, nickel plated.
SCREW: Steel, cadmium plated.
RATING: 15 Amps AC for 10°C Temp. rise, continuous duty. 5K Volts 60 cycle AC continuous working voltage. CAPACITANCE 1.0 pf. between conductors.
DESCR.: Mates with standard dual binding post ¾" centers. Polarity indicated on top and side. Wire held with internal set screw. Can be stacked for multiple connections. **Std. Pkg. 25**

No.	NET Per C
210	$100.00

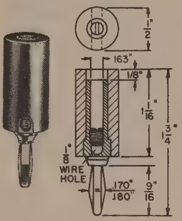
DUAL SHORTING PLUG



HANDLE: MOLDED BUTYRATE, per Fed. Spec. L-P349A, Type 3, Class MS. Red, Black, Yellow, Green, Blue, White Assemblies. SPECIFY COLOR
PLUG: Brass, nickel plated.
SPRING: Four-leaved beryllium copper, nickel plated.
RATING: 15 Amps. AC for 10°C Temp. rise, continuous duty. 5 KV 60 cycle AC continuous working voltage.
DESCR.: Internally shorted plug mates with standard dual binding posts on ¾" centers. Used for grounding or shorting input and output connections. Can be stacked for additional current rating. Rear banana jack holes allow connection to shorted posts. **Std. Pkg. 25**

No.	NET Per C
1516	$120.00

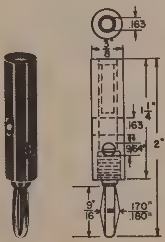
STACK BANANA PLUG



BODY: MOLDED POLYSTYRENE, Red or Black. SPECIFY COLOR
PLUG: Brass, nickel plated.
SPRING: Four-leaved phosphor bronze, nickel plated.
SCREW: Steel, cadmium plated.
RATING: 15 Amps AC for 10°C Temp. rise, continuous duty.
DESCR.: Internal set screw for wire or phone tip connection. Can be stacked for multiple connections. **Std. Pkg. 50**

No.	NET Per C
324	$58.00

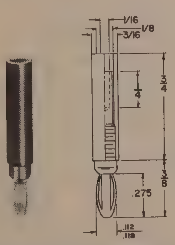
STACK BANANA PLUG
Solderless



HANDLE: MACHINED BUTYRATE, per MIL-P-10408A, Type I, Class II. Red Black, Yellow or Green. SPECIFY COLOR
BODY: Brass, nickel plated.
SPRING: Four-leaved phosphor bronze or beryllium copper, nickel plated.
RATING: 15 Amps AC for 10°C Temp. rise, continuous duty.
DESCR.: Solderless connection. Accepts standard banana plugs in top and side. Interconnects unlimited amount of multiple circuits. **Std. Pkg. 50**

No.	Spring Material	NET Per C
1511	Phosphor Bronze	$65.00
1512	Beryllium Copper	$73.00

MINIATURE INSULATED BANANA PLUG
Midget Type



HANDLE: MACHINED BUTYRATE, per Mil-P-10408A, Type I, Class II. Red or Black. SPECIFY COLOR
PLUG: Brass, nickel plated.
SPRING: Beryllium Copper, nickel plated.
RATING: 2 Amps AC for 10°C Temp. rise, continuous duty.
DESCR.: Wire soldered directly into stud. Fits miniature banana jacks. **Std. Pkg. 100**

No.	NET Per C
268	$30.00

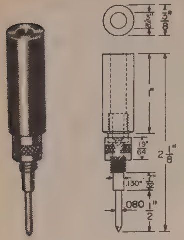
SPECIFY SMITH INSULATED PHONE TIP PLUGS



INSULATED TIP PLUG
Solderless

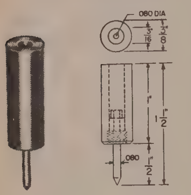
HANDLE: MOLDED PHENOLIC plastic, Red, Black, Yellow, Green, Blue, White. SPECIFY COLOR

PLUG: Brass, nickel plated.

RATING: 12 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Solderless: wire fits through body of tip then wrapped around screw portion and tightened with knurled collar. Threaded type. Fits standard phone tip jacks. **Std. Pkg. 100**

No.	Type	NET Per C
200	Senior	$25.00



INSULATED SHORT TIP PLUG

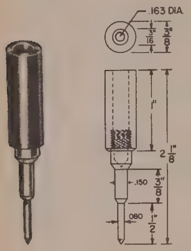
HANDLE: MOLDED PHENOLIC plastic, Red, Black Yellow, Green, Blue, White. SPECIFY COLOR

PLUG: Brass, nickel plated.

RATING: 12 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Inserts flush to insulated handle, no metal exposed; eliminates possibility of shock or grounding. Fits standard phone tip jacks. **Std. Pkg. 100**

No.	NET Per C
203	$22.00



INSULATED TIP PLUG
Heavy Duty Type

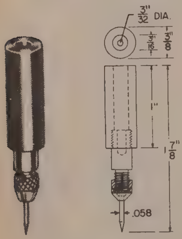
HANDLE: MOLDED PHENOLIC plastic, Red, Black Yellow, Green, Blue, White. SPECIFY COLOR

PLUG: Brass, nickel plated.

RATING: 12 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Large diameter well enables soldering of heavy duty wire directly into plug. Fits standard phone tip jacks. **Std. Pkg. 100**

No.	NET Per C
229	$26.00



INSULATED TIP PLUG
Phono Needle

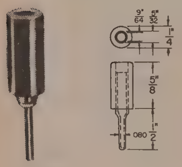
HANDLE: MOLDED PHENOLIC plastic, Red, Black, Yellow, Green, Blue, White. SPECIFY COLOR

PLUG: Brass, nickel plated.

RATING: 12 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Removable chuck for easy replacement of broken needle. Needle pierces corrosion or plating for positive reading. **Std. Pkg. 100**

No.	Net Per C
216	$34.00



INSULATED TIP PLUG
Solder Type

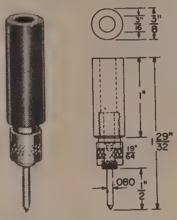
HANDLE: MOLDED BUTYRATE, per Fed. Spec. L-P349A, Type 3, Class MS. Red and Black. SPECIFY COLOR

PLUG: Brass, nickel plated our No. 158.

RATING: 12 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Drawn hollow tip for easy soldering. Fits standard phone tip jack. **Std. Pkg. 100**

No.	NET Per C
237	$10.00



INSULATED TIP PLUG
Solderless

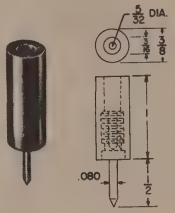
HANDLE: MOLDED PHENOLIC plastic, Red, Black, Yellow, Green, Blue, White. SPECIFY COLOR

PLUG: Brass, nickel plated.

RATING: 12 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Solderless: wire fits through body of tip then wrapped around screw portion and tightened with knurled collar. Threaded type. Fits standard phone tip jacks. **Std. Pkg. 100**

No.	Type	NET Per C
201	Junior	$25.00



INSULATED SHORT TIP PLUG
Solderless

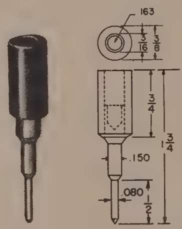
HANDLE: MOLDED PHENOLIC plastic, Red, Black Yellow, Green, Blue, White. SPECIFY COLOR

PLUG: Brass, nickel plated.

RATING: 12 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Solderless: wire fits through handle and body of tip then wrapped around screw portion. Inserts flush to insulated handle, no metal exposed, eliminates possibility of shock or grounding. Fits standard phone tip jacks. **Std. Pkg. 100**

No.	NET Per C
283	$22.00



ADAPTER
Banana Plug to Tip Plug

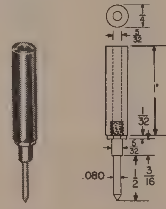
HANDLE: MOLDED BUTYRATE, per Fed. Spec. L-P349A, Type 3. Class MS. Red and Black. SPECIFY COLOR

PLUG: Brass, nickel plated.

RATING: 12 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Accepts standard banana plugs, adapts to standard tip plug. **Std. Pkg. 100**

No.	NET Per C
215	$26.00



SUB-MINIATURE TIP PLUG

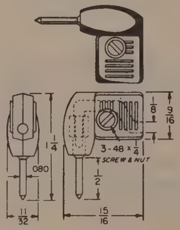
HANDLE: FIBRE, per MIL-F-1148A, Grade CH. Red, Black. SPECIFY COLOR

PLUG: Brass, nickel plated.

RATING: 12 Amps AC for 10°C Temp. rise, continuous duty.

DESCR: Ideally suited for checking sub-miniature equipment. Fits standard phone tip jacks. **Std. Pkg. 100**

No.	NET Per C
270	$30.00



METER TIP PLUG

HANDLE: MOLDED PHENOLIC plastic, Red and Black. SPECIFY COLOR

PLUG: Brass, nickel plated.

RATING: 12 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Molded in two halves for easy assembly with screw and nut. Fits standard phone tip jacks. **Std. Pkg. 50**

No.	NET Per C

NYLON TIP JACK

With Metal Shell

Made to Meet MS-16108 Rev. C.

COLORS: Available in White, Red, Black, Green, Blue, Orange, Yellow, Brown, Purple and Grey. Specify color as coded above.

Molded Nylon Tip Jack. Metal shell eliminates possibility of stripping threads during assembly. Meets following requirements:

1. Salt Spray Test — Withstands 100 hours
2. Rating — 15 Amps AC for 10°C Temp. rise, continuous duty. 2 K Volts 60 cycle AC continuous working voltage. CAPACITANCE 10.0 pf.
3. Insulation Resistance — 5000 megohms
4. Operating Conditions —
   A. Continuous: 23 hours on, 1 hour off
   B. Elevation: Up to 5,000 feet
   C. Temperature: −55 to +85°C
   D. Humidity: Up to 95%
5. Material Specifications —
   A. Insulator: Molded Nylon, per MIL-P-20693A. Specify color as coded above.
   B. Shell and Nut: Brass Nickel Plated Per QQ-N-290, type V (FC).
   C. Lockwasher: Phosphor Bronze Nickel Plated Per QQ-N-290, type V (FC).
   D. Center Contact: Heat treated Beryllium Copper, Silver plated per QQ-S-365, Gold plated overall.
6. Non-Operating Conditions —
   A. Elevation: Up to 50,000 feet
   B. Temperature: Continuous exposure for 72 hours at +160°F and 240 hours at −80°F.
   C. Humidity: Up to 100%

HIGH VOLTAGE NYLON JACKS

Made to meet MS-16107 Spec.

Heavy molded nylon body and cup washer prevent high-voltage flashover to panel. Meets following requirements:

1. Salt Spray Test—Withstands 100 hours.
2. Electrical Rating—15 Amps AC for 10°C Temp. rise, continuous duty. 5 KV 60 cycle AC continuous working voltage. Millivolt drop per MIL-J-6751. CAPACITANCE 2.0 pf.
3. Material Specifications—
   A. Insulator and Washer: — Molded Nylon, per MIL-P-20693A. Colors to Fed. Std. 595. Specify color as coded above.
   B. Insert Shell and Nut: Brass, Nickel plated per QQ-N-290, type V (FC).
   C. Contact: Phosphor bronze, Silver plated .0002" per QQ-S-365, Gold plated overall.

Specify color as coded above, 10 colors.

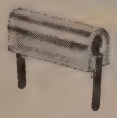
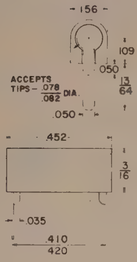
RIGHT ANGLE PRINTED CIRCUIT TEST JACK





ADDITIONAL
PRINTED CIRCUIT
TEST JACKS, PAGE 7

DESCR.: Double-entry design, probe inserts from either end of jack. Closed entry construction will not accept probes larger than .084", will contact probes down to .074". Closed bottom construction keeps jack from fouling with solder or flux. Locking ears hold jack firmly in board until soldered. Precise dimensions allow for automated assembly on boards.

COMMERCIAL TYPES

BODY: MOLDED NYLON, PER MIL-P-20693A. 10 colors, specify color as coded.

SPRING: Beryllium Copper, per QQ-C-533.

FINISH: Silver underplate, .0002" min., per QQ-S-365, Type I, with .00003" Gold overplate; per MIL-F-14072, M-310.

RATINGS: 5 Amps AC for 10°C Temp. rise, continuous duty. 1.5 KV. 60 cycle AC continuous working voltage. Contact resistance 5 milliohms max. at rated current. Capacitance less than 5 MHz, at 1 pf.

MOUNTING: Mounts in .052" dia. holes, on .400" centers, in boards up to 3⁄16" thick. Can be spaced side-by-side .160" on centers min.

MECHANICAL DATA: Thermal shock, vibration, humidity, insulation resistance, and salt spray tests per MIL-STD-202B. Solderability per MIL-S-6872. Insertion and withdrawal force: 8 oz. min., 5 lbs. max. with .080" (±.001") dia. probe.

BANANA PLUG

BODY: HEX BRASS, nickel plated.

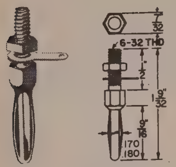
SPRING: Four-leaved phosphor bronze, nickel plated.

RATING: 15 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Supplied with hex nut and phosphor bronze tinned lug. Threaded stud for panel mounting. Fits standard banana jacks.

Std. Pkg. 100

No.	NET Per C
102	$34.00



BANANA PLUG

BODY: HEX BRASS, nickel plated.

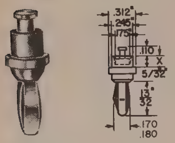
SPRING: Four-leaved phosphor bronze, nickel plated.

RATING: 15 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Supplied with hex nut and phosphor bronze tinned lug. Threaded stud for panel mounting. Fits standard banana jacks.

Std. Pkg. 100

No.	NET Per C
103	$29.00



RIVET TYPE BANANA PLUG

Wrap Around Type

BODY: BRASS, nickel plated.

SPRING: Four leaved, beryllium copper, nickel plated.

RATING: 10 Amps AC for 10°C Temp. rise, continuous duty.

DESCR.: Rivets to panel or bakelite board. Wire wraps around stud and is then soldered.

Std. Pkg. 100

No.	"X" Dim.	Panel	NET Per C
2082	.105	1/16"	$33.00
2083	.135	3/32"	$33.00

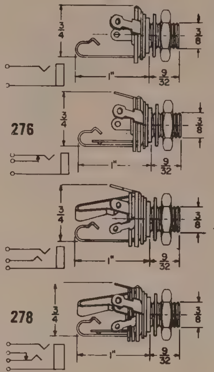
SPECIAL REQUIREMENTS?

Use our Engineering and Production Facilities to design and develop new products or modify existing components to meet your specific needs. "Specials are Standard with SMITH!"

TELEPHONE JACKS



BUSHING: BRASS, nickel plated.

INSUL.: Phenolic, type PBE-P per MIL-P-3115B.

SPRING: Nickel-Silver alloy, spring temper. New tapered design provides for ease of insertion while eliminating possibility of shorts.

SLEEVE TERM.: Brass, hot tinned.

RATING: 10 Amps AC for 10°C Temp. rise, continuous duty. 1.2 K Volts 60 cycle AC continuous working voltage.

DESCR.: Notched insulating washers accurately locate all parts, and eliminate possibility of shorts and arc-over. Springs designed for firm, low-resistance electrical contact. Bushings 1/4" long, threaded 3/8"-32. Mounts in 3/8" hole in panels up to 5/32" thick. Overall diameter 7/8", requires 1" clearance behind panel. Supplied with 1/2" hex brass nut and 5/8" steel panel washer, all nickel plated. **Std. Pkg. 50**

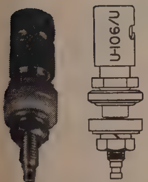
MIL-SPEC BINDING POST

MADE TO MEET MIL-P - 55149/8



HEAD & BODY: BRASS, SILVER PLATED

SPRING & CONTACT PLATE: STEEL

WASHERS: MOLDED NYLON

O-RINGS AND CAP: Silicon Rubber. Red or Black Cap, SPECIFY COLOR.

DESCR.: Style U-106/U binding post (Sig. Corp. Dwng. SC-C-16495). Meets requirements of Mil-P-55149/8, DTD 30 Sep 1963. Mounts in 5/16″ hole, in panels from 1/16″ to 1/18″ thick. "O" ring seals provide waterproof seal in panel. Push on cap opens slot in which wire is inserted. Releasing cap grips wire with heavy spring pressure on serrated steel plates for minimum contact resistance. Provided with either red or black silicon rubber insulating cap boot.

FITS STANDARD 19-INCH EQUIPMENT RACKS

- Simple Adjustments for Multiple Card Sizes
- Simple Adjustments for Card Spacing
- Front to Back Adjustment of Printed Circuit Card Connectors
- Simple Adjustments for Printed Circuit Connector Sizes
- Locking Bar to Secure P.C. Cards
- Complete with Board Guides

SPECIFICATIONS

CARD CAPACITY Up to 39 cards, depending on component height.

CARD SIZES 1/16" thick standard

With Locking Bar Feature:	Without Front Card Lock:
Maximum Card Width: 4³/4"	Maximum Card Length: 7¹/4"
Maximum Card Length: 6¹/2"	Minimum Card Length: 3¹/2"
Minimum Card Width: 2³/8"	
Minimum Card Length: 4³/8"	

CARD SPACING .400" Min. Centers. Adjustable in .400" increments.

CARD GUIDES Precision Molded Plastic. Four guides provided for each card to insure location accuracy. Guides nest together in staggered holes for minimum practical card spacing

ADJUSTABILITY All card guide and connector rails slide smoothly on Nylon bushings for ease in adjusting. Card rails adjust symmetrically to keep cards centered in rack. Connector rails adjust front-to-back to keep cards against locking rail. Adjust index marks permanently stamped on side plates for standard card sizes.

CONNECTOR SPACING Accomodates card-edge connectors with mounting centers from 0.936" minimum to 4.437" maximum.

CONSTRUCTION Heavy-gauge clear Anodized aluminum. Guide and alignment members are extrusions for maximum precision of fits.

DIMENSIONS Designed to fit standard 19" equipment racks, 5¹/4" panel space. Length 19"; Width 5¹/4"; Depth 8".

ASSEMBLY Supplied knocked-down. All hardware, card guides, and complete assembly instructions included.

SPECIAL FEATURES

LOCKING BAR Front locking bar holds cards securely against rear connectors. Held in place with captive screws for rapid card change. Card identification marking available on front of locking bar.

STACKING Can be stacked for wider panels in multiples of 5¹/4". Accessory brackets available for free-standing stacking.

SPECIALS Special color anodized finishes available on request. Non-standard sizes available on special order.

P.C. CARD RACK BLANK END PLATES

Anodized aluminum blank-end plates for P.C. card racks. Designed for use with the standard No. 3050 hardware, to design custom rack sizes. Flanged and notched for RETMA mounting. Drill templates furnished with each pair of end plates to facilitate drilling within the P.C. card size limitations. Available in pairs.

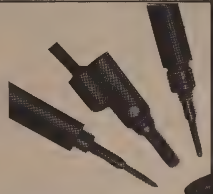
"HOOKON"

PROBE FOR HIGH DENSITY AREAS.

Easy to use . . . Versatile . . . Reaches into the densest wiring areas, quickly

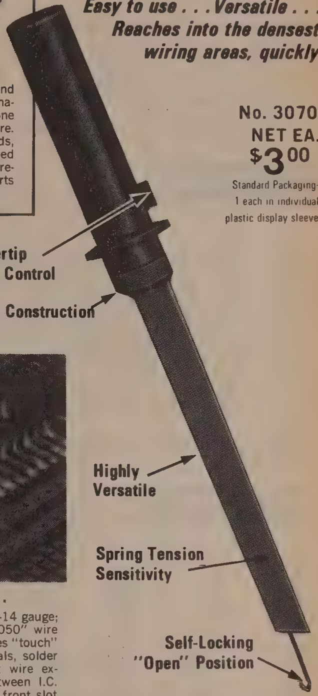


Universal Input Application

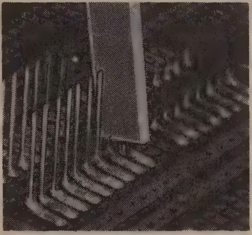
"The Hookon" accepts and adapts to existing terminations and banana plugs; phone tips, test prods and wire. When used with test prods, the overall length is increased to further reach into deeply restricted areas. All metal parts are completely enclosed.

No. 3070
NET EA.
$3.00

Standard Packaging 1 each in individual plastic display sleeve

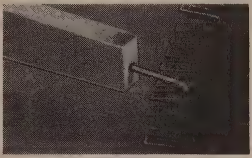


Fingertip Slide Control
Rugged Lexan* Construction
Highly Versatile
Spring Tension Sensitivity
Self-Locking "Open" Position



Test Point Capability . . .

connects to bare wires — 26-14 gauge; .025" square; and .025" x 050" wire wrap terminations. It simplifies "touch" contact to P.C. pads, terminals, solder junctions, etc., with contact wire extended and locked. Fits between I.C. terminals on .100" centers; front slot accepts tails without extending contact.



Contact Sensitivity . . .

"The Hookon" offers positive tensioned contact to all terminations without danger of damage or marring. The contact is made of corrosion resistant steel, while the entire unit is precision molded of sturdy Lexan* for long term durability, heat resistance and high levels of insulation. The slide button is in white and the body mold in red.

Use Vertically or Laterally . . .

"The Hookon" reaches through the densest wire jungles and hooks onto leads, pins, square wire wraps† for safe, sure connections. The fingertip slide control includes a self-locking open position and a "no hands spring grip" upon trigger release.

Designed for Scopes, DVM's, VTVM's and Other Test Gear; for Use in Field, or Laboratory. Probes all types of Discrete Components, Computer System Logic and Matrix P.C. Boards; Integrated Circuitry and High Density Electronic Circuitry.

*Lexan is a GE Trademark

SPECIFICATIONS

All boards are precision-punched and pre-cut to size with various spacings to accommodate and provide economical mounting of components in Electronic circuitry. They are ideal for production and prototype uses. They can be etched as required, drilled, punched or sawed. The following specifications apply:

XXXP—**Phenolic** unclad, Type PBE-P per MIL-P-3115, 250° F Max.
EXXXP — **Epoxy Paper,** Type PEE per MIL-P-22324, 250° F Max.
XXXPC — **Phenolic,** Copper Clad, Type PP per MIL-P-13949, 250° F Max.
G-10 — **Epoxy Glass,** unclad, Type GEE per MIL-P-18177, 300° F Max.
G-10 — **Epoxy Glass,** Copper Clad, Type GE per MIL-P-13949B, 300° Max.

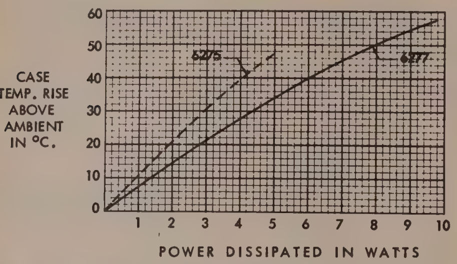
LIGHTWEIGHT - ECONOMICAL - VERSATILE
HEAT SINKS FOR SEMI-CONDUCTOR CIRCUITRY

The θca figures represent natural convection situations in a sea level atmosphere. Actual performance in individual situations depends upon air flow, proximity of interfering objects, thermal conductive effects of the chassis, and heat radiated or convected from other components.



THERMOVANES

Manufactured of pre-painted aluminum .060" thick. Designed for thru-board mounting, except Fig. 4 provided with mounting lugs.

ALL HEAT SINKS ARE FURNISHED WITH PRE-PUNCHED TRANSISTOR HOLE PATTERNS

AMP* AC FAULT FINDER

ELECTRICAL CIRCUIT CONDITIONS

- Open Ground
- Open Hot
- Open Neutral
- Correct
- Hot/Ground — Reversed
- Hot/Neutral — Reversed

This revolutionary AC Fault Finder has indicator lights and a chart on both sides to describe the condition for each lighting arrangement. Plug in and illuminated signals indicate: reverse polarity, faulty wiring, missing grounds and/or correct wiring conditions.

FEATURES:

- Just plug in — simple & easy-to-use.
- No tools, meters, wires needed.
- Easy to read from any angle —labeled on both sides.
- Break resistant plastic.
- Designed for conventional 3 wire 120 Volt AC outlets
- Checks dual wire outlets with use of polarized adapter and ground wire.

No. 3030 Standard Pkg.—12 **$5.95** Net Each

*All international rights reserved by AMP Incorporated. Products covered by U.S. and foreign patents and/or patents pending.

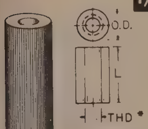
PHENOLIC THREADED SPACERS

MATERIAL:

PBE Grade MIL-P-79A, Natural Color

1/4" O.D.

Ideal for use in mounting chassis, components, etc. Good mechanical strength, resists abrasives and chemicals. Excellent dielectric and low moisture absorption. Std. Pkg. 100



*On threaded spacers ¾" and longer, tap is ⅜" from each end, and not continuous through.

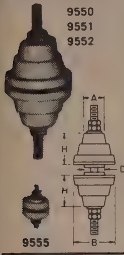
STEATITE & PORCELAIN INSULATORS

SPECIFY SMITH



STEATITE INSULATED THRU-PANEL BUSHINGS

Consists of a pair of identical steatite insulators along with cushion washers and hardware. The 9555 assembly has interlocking insulators which are self-centering in mounting hole and may be used on very thin panels.

No.	Std. Pkg.	H	B	D	A	Hdwre	Net Ea.

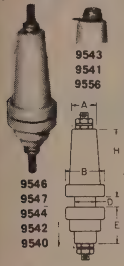
9552	10	1 1/8"	1 3/4"	1 7/32"	7/8"	1/4"-20	1.50



THRU-PANEL INSULATORS

Compression mounted by means of a stud throughout the entire length of the unit. Extrusion of insulator base extends thru mounting hole, increasing the breakdown rating. Units have flat mounting surfaces and are furnished with cushion washer. Types with jacks have terminal permitting connection above, as well as below, panel.

PORCELAIN ANTENNA STRAIN INSULATORS

The 9651, 9652, and 9653 have heavy 1 1/2" diameter wet process porcelain insulator with specially sealed end bells of non-corrosive aluminum alloy. Porcelain is glazed to prevent moisture absorption. Numbers 9607 and 9612 are wet process, 1" diameter glazed porcelain. Number 9604 is dry process, glazed 5/8" square. The 9632 is a compression type strain insulator for aircraft or guy wire applications — made of dry process glazed porcelain.

PORCELAIN FEEDER INSULATORS

Conventional feeder spreaders for constructing high efficiency, open-wire antenna feeders and transmission lines. Insulators are made of high grade, low absorption porcelain silicone impregnated for moisture resistance. Insulators have 3/8" x 1/2" cross section. The 9622 has extra notches for 1 1/2" line spacing.

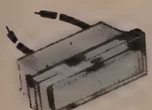
INDICATOR LIGHTS

Housings of White Nylon, lens of high impact plastic. Built-in resistors provide voltage ratings from 6.3V to 115V. Low voltage indicators use incandescent lamps, the 115V indicators use high brilliance Neon lamps. Lens colors available for incandescent indicators, Red, Green and Amber, for Neon indicators, Red, Clear and Amber. SPECIFY COLOR.



Self-mounting, snaps into a rectangular opening 1.28" x .391", panel thickness up to .090". Terminates with two 6" wire leads, 18 gauge, stripped ½". UL and CSA approved.
Std. Pkg. 10

No.	Voltage	NET Per C
1911	6.3 V	$190.00

SMITH BARREL STYLES

NON-INSULATED TERMINALS

BUTTED SEAM
- Eletrolytic pure copper, tin plated.
- Open end for visual inspection of wire contact.
- Tight grip, multiple barrel serrations for full wire contact.

BRAZED — Same as above except silver brazed barrel.

INSULATED TERMINALS

VINYL INSULATED
- Electrolytic pure copper, tin plated.
- Vinyl insulation,, butted seam.
- Flared for easy wire insertion.
- Color coded for proper wire selection.

NYLON INSULATED
- Electrolytic pure copper, tin plated.
- Flared for easy wire insertion.
- Nylon insulation.
- Butted seam with seamless brass sleeve attached.
- Color Coded.

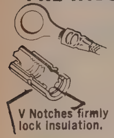
MODERN FACILITIES

We invite you to utilize our modern manufacturing facilities and methods for your molding, screw-machine, stamping or sub-assemblies. We are equipped for both the long run and the short run. From raw material to finished part, SMITH detailed workmanship and production efficiency assure a quality product, speedily and economically made.

IT'S SOUND PLANNING TO **"SPECIFY SMITH"** WHEN DESIGNING OR PURCHASING

SPECIFY SMITH AMP SOLDERLESS TERMINALS

"PRE-INSULATED DIAMOND GRIP" (P.I.D.G.)



V Notches firmly lock insulation.
Copper sleeve insulation support.

These terminals exceed all military specifications in regard to Tensile Strength Corrosion Resistance, Vibration Resistance and Heat Cycling Tests. Color coded for wire size. **Std. Pkg. 100**

SPECIFY SMITH CHASSIS PUNCHES / WIRE & CABLE

GREENLEE

RADIO CHASSIS PUNCHES

A complete line of chassis hole punches for swiftly cutting clean, accurately located holes in chassis and panels. An assortment of round, square, "D", and Keyed holes can be punched by inserting in drilled pilot hole, and turning with wrench. Finished hole is smooth, accurately sized without burrs. Round punches are provided with center-line markings for enlarging holes larger than pilot hole. Individually packed.

MINIATURE ILLUMINATED ROCKER SWITCHES

Designed to snap into a rectangular opening .729 x .662, panel thickness .040 to .125. Slow make and break, solder lug termination. Lamp circuit is independent with separate terminals for flexibility. Utilizes slide base bulb, readily replaceable from front panel, voltages from 6V to 220V. Rated at 5 Amps 125V AC, 28V DC. Translucent rocker available in colors, White, Red, Green, Amber, Grey, Black, Blue and Yellow — SPECIFY COLOR. Optional color-coded Nylon Bezel also available. Supplied less bulb and Bezel. Std. Pkg. 10

No.	C-H No.	Circuit†	NET Each
3139	SC2BX	A-B-A	$4.58
3140	SC2CX	A-D-A	4.58
3141	SC2GX	C-D-A	4.71

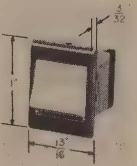
†A-ON, B-OFF, C-Momentary ON, D-None

REPLACEMENT BULBS

Available for 6, 12, 18, 24, 28 or *110/220 Volts. SPECIFY VOLTAGE. Std. Pkg. 25

No.	C-H No.	NET Each
3142	SW8F	$0.88

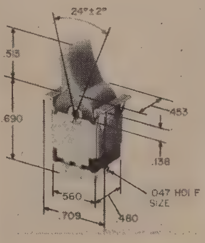
*Note: Neon lamp, use with 33K resistor for 110V, use 110K resistor for 220V.



DECORATOR PLASTIC BEZEL

Available in white, red, green, amber, gray, black, blue, yellow. SPECIFY COLOR. Std. Pkg. 100

No.	C-H No,	NET Per C
3148	SW2AA	$30.00



MINIATURE PADDLE SWITCHES

Designed to snap into a rectangular opening .610 x .490, panel thickness .040 to .125. Slow make and break operation, solder lug terminals. Rated at 5 Amps 125V AC, 28V. DC. Paddle available in White, Gray, Black and Red. SPECIFY COLOR. Supplied less Bezel. Std. Pkg. 10

No.	C-H No.	Circuit†	Type	NET Each

PLATING INFORMATION

FOR ALL SMITH TEFLON TERMINALS LISTED IN THIS DIRECTORY

-P1 and -P12 are STANDARD PLATING.

For Platings listed below, other than Standard, add $10.00 per M

Minimum Quantity 1000 Pieces.
For Platings other than listed below, please consult Factory.

Unless otherwise specified, these plating finishes will be supplied:

TEST JACKS & PROBES:	Plating -P1 (see below)
STANDOFFS & FEED-THRUS:	Plating -P12 (see below)

PLATING DASH NO.	TYPE OF PLATING	THICKNESS OF PLATE	APPLICABLE SPECIFICATIONS if any

FOR RAPID SELECTION: terminals are listed (within figure groups) in ascending order of the MOST PERTINENT DIMENSION:

A = MIN. DIA.
B = MAJ. DIA.
N = LGTH. OF MIN. DIA.
O = LGTH. OF MAJ. DIA.
M = LGTH. OF PIN
C = DIA. OF PIN
L = OVERALL LGTH.

MODERN FACILITIES

We invite you to utilize our modern manufacturing facilities and methods for your molding, screw-machine, stamping or sub-assemblies. We are equipped for both the long run and the short run. From raw material to finished part, SMITH detailed workmanship and production efficiency assure a quality product, speedily and economically made.

COLORS: Supplied in White (-101) unless otherwise specified. Ten colors available. **PLATING:** Standard (P-12) unless otherwise specified.
For COLOR CODE, PLATING SUFFIXES and QUANTITY DISCOUNT SCHEDULES see SMITH PAGE 2.884 in this directory

STAND-OFFS

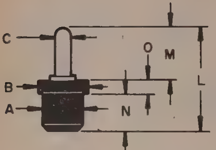

Fig. 1

FOR RAPID SELECTION: terminals are listed (within figure groups) in ascending order of the MOST PERTINENT DIMENSION:

A = MIN. DIA.
B = MAJ. DIA.
N = LGTH. OF MIN. DIA.
O = LGTH. OF MAJ. DIA.
M = LGTH. OF PIN
C = DIA. OF PIN
L = OVERALL LGTH.

COLORS: Supplied in White (-101) unless otherwise specified. Ten colors available. **PLATING:** Standard (P-12) unless otherwise specified. For **COLOR CODE, PLATING SUFFIXES** and **QUANTITY DISCOUNT SCHEDULES** see **SMITH PAGE 2.884** in this directory

TEFLON* TRANSISTOR HOLDERS

These holders provide insulated top and botton chassis mounting support of transistors. They have thru-holes and turreted solder terminals for wiring transistor leads and passive components, eliminating the need of a pad and providing total insulation and strain relief.

Holders shown represent the basic configurations available for JEDEC Packages TO-5 (.200" Dia. Pitch Circle) and TO-18 (.100" Dia. Pitch Circle.) Other styles and variations are constantly being added. Consult our ENGINEERING Dept for special requirements.

FOR RAPID SELECTION: terminals are listed (within figure groups) in ascending order of the MOST PERTINENT DIMENSION:

A = MIN. DIA.
B = MAJ. DIA.
N = LGTH. OF MIN. DIA.
O = LGTH. OF MAJ. DIA.
M = LGTH. OF PIN
C = DIA. OF PIN
L = OVERALL LGTH.

TECHNICAL DATA

Teflon insulated terminals have proven to have outstanding inherent quality characteristics, electrically, mechanically, chemically, and thermally made possible through the use of virgin *Teflon* resins. These terminals are manufactured to strict quality control standards based on MIL-spec requirements.

MATERIAL SPECIFICATIONS

TEFLON*

MIL-P-19468

● MECHANICAL PROPERTIES

TENSILE STRENGTH - 1500 - 2500 PSI
ELONGATION - 75 - 150%
MODULUS OF ELASTICITY - 55,000 PSI

● CHEMICAL PROPERTIES

Teflon is resistant to acids and alkalis of all concentration, solvents, fungus and rot.

TEMPERATURE RANGE - -100° C to +250° C.
WATER ABSORPTION - .01%

LUGS

BRASS - All lugs on Stand-offs, Feed-thrus, Probes, Plugs, unless otherwise specified are manufactured from Brass/QQB-626, Composition 22, 1/2 hard.

BERYLLIUM COPPER - Test Jacks are manufactured from Beryllium Copper per MIL-C-530 or MIL-C-533 and heat treated prior to plating.

● TOLERANCES

"A" (minor dia.) +.000, -.002
"E" (probe dia.) ± .001
All other dimensions ±.005

● ELECTRICAL PROPERTIES

DIELECTRIC STRENGTH - 400 to 450 volts/Mil.
DIELECTRIC CONSTANT - 2.0 to 2.2 (60 cycles to 10^6 cycles.)

Capacitance and voltage measured with terminals installed in aluminum chassis .050 Thick. Insulator protrudes a minimum of .040 below panel.

COAX JACKS PLUGS & PATCH CORDS
Product Family 60

HEADSETS
Product Family 01-29

JACK PANELS
Product Family 70

Bulletins covering each product family represented by typical parts illustrated above are available upon your request. Also, for further engineering assistance, outline drawings of specific items can be supplied. In addition, our nationwide network of distributors of Trimm industrial electronic products are ready to assist you by supplying any of our standard cataloged items.

TRW® CINCH CONNECTORS

PRODUCT INDEX

PRINTED CIRCUIT CONNECTORS (CAT. NO. C-24)

Description	EEM Page
General Index	2•900
"Tykon" Miniature Edge Connectors (.050 Spacing)	2•901
"Mini-Tyke" Miniature Edge Connector (.100 Spacing)	2•901
PC Board Connectors with .100" Terminal Centers	2•902
Miniature 2-Piece Right Angle Connector (.050 Spacing)	2•903
Standard 2-Piece Right Angle Connector (.125 Spacing)	2•903
Miniature Wire Wrap Connectors (.125 Spacing)	2•903
Miniature Wire Wrap Edge Connectors for Punched Plates	2•905
Miniature Wire Wrap PC Connector Modules (.125 Spacing)	2•905
Standard Wire Wrap Connector Modules (.200 Spacing)	2•905
NAFI 40 and 80 Contact PC Modules	2•906
Standard Wire Wrap Edge Connectors (.156 Spacing)	2•907
Low Cost PC Edge Connectors (.156 Spacing)	2•907
"Twin-Con" Crimp-On Snap-In Edge Connectors (.156 Spacing)	2•908
Assembly Tools and Machines	2•908
Standard Solder Tab Edge Connectors (.156 Spacing)	2•909
PC Board Connectors (.156 Spacing)	2•910
Special Purpose PC Board Connectors (.156 Spacing)	2•910
Standard Dip Solder Edge Connectors (.156 Spacing)	2•911
Standard Wrap Post Edge Connectors (.156 Spacing)	2•912
Special Center Bridge Edge Connectors	2•912
Economy Line Connectors — Series 90 (.156 Centers)	2•913
Edge Connectors for 3/32" PC Boards (.156 Spacing)	2•914
Edge Connectors for ⅛" PC Boards (.156 Spacing)	2•914
DIP Solder Terminal PC Connectors (.156 Centers)	2•915
Environmental and Electrical Specifications	2•916

SUBMINIATURE CONNECTORS (CAT. NO. C-46)

Description	EEM Page
General Description and Index	2•917
Burgon-D, Mark IV Connectors Connectors with Crimp Snap-In Contacts in 2-Piece Insulators with Integral Retension System	2•918
Royal D, Mark III Connectors Connectors with Crimp Snap-In Contacts in Monoblock Insulators Utilizing Little Caesar Rear Release Contact Assembly	2•934
Golden D, Mark I Connectors Connectors with Monoblock Insulators for Critical Application Requirements	2•929
Original D Connectors D Connectors with 2-Piece Insulators	2•927
General Ratings and Specifications (Royal D, Golden D, Original D)	2•926
Installation Instructions	2•936
Accessories	2•938
Dura-Con Series Connectors	2•940

RACK & PANEL CONNECTORS (CAT. NO. C-36)

Description	EEM Page
General Features, Description and Index	2•943
Solderless Ribbon Connectors	
Cable to Cable Mounting	2•944

RACK & PANEL CONNECTORS (Cont'd)

Description	EEM Page
Design Features	2•945
Performance Data	2•943
Systems for Terminating	2•946
Blue Ribbon Connectors	
Rack and Panel Mounting — Barrier Polarization Type	2•950
Rack and Panel Mounting — Pin Polarization Type	2•950

Cinch Ribbon Connectors	
Rack and Panel Mounting	2•947
Cable to Chassis Mounting	2•947
Cable to Cable Mounting	2•948
Rack and Panel Mounting (Special "High Barrier")	2•949
Cable to Cable Mounting (Special "High Barrier")	2•949
Polyethylene Dust Covers	2•949
Performance Data	2•943

BARRIER TERMINAL BLOCKS (CAT. NO. C-44)

Description	EEM Page
General Description, Ratings and Index	2•951
140 Series — #5-40 Screw — ⅜" Terminal Centers	2•952
140 Series with Wrapost Terminals	2•952
141 Series — #6-32 Screw — 7/16" Terminal Centers	2•953
141 Series with Quick-Clamp Terminals	2•953
142 Series — #8-32 Screw — 9/16" Terminal Centers	2•954
142 Series with Quick-Clamp Terminals	2•954
142 Series with Special High Barriers	2•955
150 Series — #10-32 Screw — 11/16" Terminal Centers	2•955
151 Series — #12-32 Screw — ⅞" Terminal Centers	2•955
152 Series — ¼-28 Screw — 1⅛" Terminal Centers	2•955
164 Series — #6-32 Screw — ⅜" Terminal Centers	2•956
171 Series — #2-56 Screw — ¼" Terminal Centers	2•956
172 Series — #2-56 Screw — ¼" Terminal Centers	2•956
173 Series — Sems Type B.H. Screws — ⅜" Centers	2•957
174 Series — Plain Type B.H. Screws — ⅜" Centers	2•957
240 Series — Solder Terminals — ⅜" Centers	2•957
241 Series — Solder Terminals — 7/16" Centers	2•957
242 Series — Solder Terminals — 9/16" Centers	2•957
250 Series — Solder Terminals — 11/16" Centers	2•957
251 Series — Solder Terminals — ⅞" Centers	2•957
252 Series — Solder Terminals — 1⅛" Centers	2•957
341 Series — Solderless Tabs — 7/16" Centers	2•958
342 Series — Solderless Tabs — 9/16" Centers	2•958
540 Series — Closed Back — #5-40 Screw — ⅜" Centers	2•958
541 Series — Closed Back — #6-32 Screw — 7/16" Centers	2•959
542 Series — Closed Back — #8-32 Screw — 9/16" Centers	2•959
Fanning Strips	2•960
Optional Terminals, Jumpers and Clamps	2•961
SEMS Screw Terminals	2•961

TRW® CINCH CONNECTORS

CINCH PRINTED CIRCUIT CONNECTORS

The connectors in this catalog are representative of TRW Cinch Connectors' broad capability in the design and production of printed circuit connectors. All of the units described are standard types which can be provided to the user on relatively short delivery cycles. Many of these connectors are available for immediate delivery through the nationwide network of Cinch Distributors.

Cinch specializes in the design and production of printed circuit connectors designed to fit specific customer applications. These connectors can be modifications of the devices described in this catalog or can be of a completely different design based on a detailed evaluation of your requirements. In addition to individual connectors, Cinch can supply complete modular assemblies mounted on aluminum plates. This can be done in virtually any configuration the customer may need.

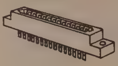
The ability of Cinch to provide high performance printed circuit connectors at surprisingly low prices is a result of special expertise in plating, plastic molding and connector assembly. Cinch has been a leader in the development of unique, proprietary selective plating techniques which permit deposition of gold or other precious metals **only** in the areas where they are required. The conventional barrel plating technique provides no control over the area of gold deposition. In order to obtain the necessary gold thickness at the contact area, the equivalent thickness must be plated over the entire contact area. Cinch can control the gold deposition to specific areas of the contact, thereby providing a device of high reliability that utilizes considerably less gold in the contact.

Cinch has special capabilities in plastic mold design and is recognized as a leader in molding equipment development. Manufacturers of molding equipment, of the type used in the connector industry, frequently come to Cinch for field evaluation and testing of their devices. Cinch engineers have made major contributions to the design of many plastic molding machines used today throughout the electronic industry. In addition, Cinch maintains its own mold design department known for its capability to develop molds that permit extremely high yields.

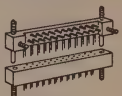
Our design engineering staff works closely with production engineering in the development of new connector designs. Techniques for automatic and semi-automatic assembly as well as special fixtures for hand assembly are planned in association with the product design. As a result, a high level of product uniformity and quality control as well as a low assembly cost is achieved.

BASIC TYPES

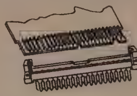
The most frequently used printed circuit connectors being manufactured today fall into three broad design categories: (1) the "edge" type in which the edge of the circuit board mates with a slotted connector; (2) a "two piece" type where one mating piece is permanently attached to the circuit board; and (3) a "hermaphroditic" connector which combines separately mounted contact banks and a card slot.



EDGE TYPE



TWO-PIECE



HERMAPHRODITIC TYPE

Cinch manufactures all three basic types; however, this catalog covers only the "edge" and "two-piece" types. Hermaphroditic connectors are described in the literature listed below.

CONTACT DESIGN & TERMINATIONS

Most of the connectors in this catalog utilize a patented bifurcated bellows contact design which has two spring-loaded contact surfaces instead of one. This provides a more reliable contact where vibration or PC board irregularities may be encountered. There are four basic termination designs available. (1) Tabs or cups for conventional soldering; (2) Dip solder tails for automatic or wave soldering; (3) .025" and .045" square tails or .030" x .060" wrappost tails for automatic and semi-automatic Wirewrap** equipment; and (4) Crimp-on pins which snap into receptacles molded into the connector. Not all types are provided for each connector, but non-standard types and modifications can be designed on special order.

SQUARE TAIL

OTHER PRINTED CIRCUIT CONNECTORS

If the printed circuit connector to meet your requirements is not illustrated in this catalog, please call your nearest sales office listed on the back cover, or write or call TRW Cinch Connectors, 1501 Morse Ave., Elk Grove Village, Ill. 60007, (312) 439-8800.

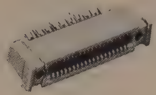
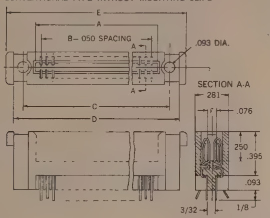
TRW® CINCH CONNECTORS

MINIATURE PC CONNECTORS

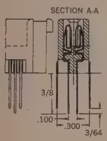
"TYKON" EDGE CONNECTORS/.050" SPACING - DOUBLE READOUT FOR 1/16" PRINTED CIRCUIT BOARDS



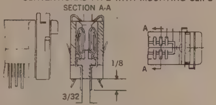
CONVENTIONAL TYPE WITHOUT MOUNTING CLIPS



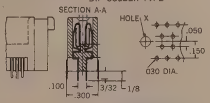
WRAP POST TAIL



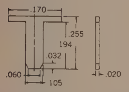
CONVENTIONAL TYPE WITH MOUNTING CLIPS



DIP SOLDER TYPE



POLARIZING KEY



RECOMMENDED CHASSIS OPENING 040 TO .062 THICK

FEATURES AND SPECIFICATIONS

SPECIAL FEATURES: High density (.050" centers) miniature edge connector with special ribbon-type contacts.

Potential applications include standard and thin film memory planes, diodes on insulating substrates and virtually any type of modular plug-in unit.

Available in wide range of sizes with variety of terminations and mounting styles.

SIZES: Available in 6, 10, 15, 20 and 25 contact position sizes with intermediate sizes available on special order.

TERMINATIONS: Available with conventional ribbon-type wiring tails; dip solder or wire wrap versions also available.

MOUNTING STYLES: Conventional wiring tail types available with special mounting clips for snap-in removable semi-flush panel mounting or without clips and using plain .093" dia. holes for standard mounting.

INSULATOR MATERIAL: Green glass-filled diallyl phthalate, type SDG-F per MIL-M-14.

CONTACT MATERIAL & PLATING: Beryllium copper with 30 micro-inches gold finish.

MOUNTING CLIP MATERIAL & PLATING: Carbon steel with cadmium plate plus yellow chromate finish.

POLARIZING KEY MATERIALS: Made of cellulose acetate and must be ordered separately.

PERFORMANCE SPECIFICATIONS: See page 18.

ORDERING INFORMATION

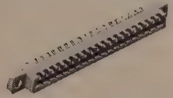
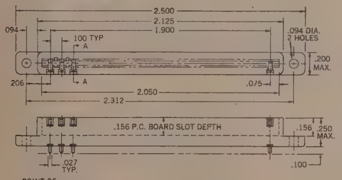
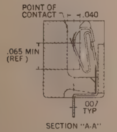
"MINI-TYKE" EDGE CONNECTOR/.100" SPACING - SINGLE READOUT FOR 1/32" PRINTED CIRCUIT BOARDS

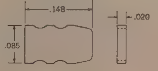






SECTION "A-A"

POLARIZING KEY



FEATURES AND SPECIFICATIONS

SPECIAL FEATURES: Extremely low profile connector for compact packaging — overall 1/4" height of connector less than half that of standard PC connectors.

Preloaded contact construction provides uniformity of gap and assures adequate contact pressure. Ideally suited for a wide range of miniature PC board plug-in applications including airborne equipment, test equipment and digital components.

SIZE: Available in 20 contact position size only.

TERMINATION: Dip solder tails for insertion and wave soldering in PC mother board.

MOUNTING STYLE: Plain .094" Dia. holes for standard mounting.

INSULATOR MATERIAL: Green glass-filled diallyl phthalate, type SDG-F per MIL-M-14.

CONTACT MATERIAL & PLATING: Beryllium copper with 50 micro-inches gold finish.

POLARIZING KEY MATERIAL: Made of nylon and must be ordered separately.

PERFORMANCE SPECIFICATIONS: See page 18 for environmental specifications. Consult factory for electrical data.

FEATURES AND SPECIFICATIONS

CURRENT RATING: 3 amperes.

RATED VOLTAGE (Sea Level): 600 VDC.

INSULATION RESISTANCE: 5000 megohms min.

CONTACT RESISTANCE: 16 milliohms max.

TERMINAL STYLES: Dip Solder, Wire Wrap or Solder Tab.

TOTAL INSERTION FORCE: A maximum of one lb. times the number of contact pairs when measured with a .070 in. thick steel blade in accordance with MIL-C-21097.

INDIVIDUAL SEPARATION FORCE: A minimum of one oz. per pair of contacts when measured with a .054 in. thick blade in accordance with MIL-C-21097.

INSULATOR MATERIAL: Diallyl phthalate, type SDG-F per MIL-M-14 Color Green.

POLARIZING KEY MATERIAL: Nylon.

CARD GUIDE MATERIAL: Polypropylene, Color Green.

CONTACT MATERIAL: Phosphor bronze QQ-B-750.

CONTACT PLATING MATERIAL: .00003 min. gold over .00005 min. nickel on contacting area .00001 gold on remainder of contact.

FEATURES AND SPECIFICATIONS

SPECIAL FEATURES: Two-piece right angle construction with contacts staggered on .100″ centers.

Primarily used in military type applications requiring considerable vibration resistance.

SIZES: Available in 23 contact size only for both plug and receptacle.

TERMINATION: Receptacle contacts have solder cups for 20 gauge wire.

MOUNTING STYLES: Plug is assembled direct to printed circuit board with right angle contact mounting studs; plug guide pins mate with bushings on receptacle.

INSULATOR MATERIAL: Both plug and receptacle are green glass-filled diallyl phthalate type SDG-F.

CONTACT MATERIALS & PLATING: Plug contacts are phosphor bronze with finish of gold flash over 200 micro-inches silver; receptacle contacts are beryllium copper with same finish.

GUIDE PIN & BUSHING MATERIAL: Guide pins and bushings are stainless steel.

PERFORMANCE SPECIFICATIONS: See page 18.

FEATURES AND SPECIFICATIONS

SPECIAL FEATURES: Rugged military qualified connector for environmental and shock resistant applications.

Two-piece right angle construction with contacts on .125″ center grid.

SIZE: Available in 18-position size only for both plug and receptacle.

TERMINATION: Receptacle contacts have .020″ square tail for dip solder termination.

MOUNTING STYLE: Plug is assembled directly to PC board with right angle contacts and mounting rivets; plug guide pins mate wtih bushings on receptacle.

INSULATOR MATERIAL: Both plug and receptacle are green glass-filled diallyl phthalate, type SDG-F per MIL-M-14.

CONTACT MATERIALS & PLATING: Plug contacts are brass with a finish of 50 micro-inches gold over 200 micro-inches silver; receptacle contacts are beryllium copper with same finish as on plug.

RIVET, GUIDE PIN & BUSHING MATERIAL & PLATING: Plug rivets, guide pins, and receptacle bushings are nickel-plated brass.

PERFORMANCE SPECIFICATIONS: See page 18.

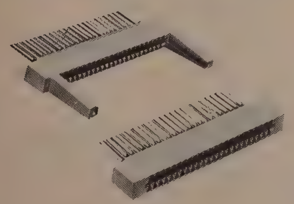
24-POSITION WIRE WRAP CONNECTORS/.125″ SPACING - DOUBLE READOUT FOR 1/16″ PRINTED CIRCUIT BOARDS



FEATURES AND SPECIFICATIONS

SPECIAL FEATURES: Special edge connector with or without card guides having .025″ square tails for hand or machine wire wrap.

Heat treated contacts take over 3 in. oz. torque.

Applications include fire control systems, environmental military ground equipment and shipboard sonar.

SIZE: Available in 24-position size with or without card guides.

TERMINATION: .025″ square tails on .125″ centers for wire wrap.

MOUNTING STYLE: Molded-in stainless steel bushings for #4-40 thread.

INSULATOR MATERIAL: Grey glass-filled diallyl phthalate, type SDG-F per MIL-M-14.

CONTACT MATERIAL & PLATING: Beryllium copper with 50 micro-inches gold finish over 25 micro-inches nickel.

POLARIZING KEY MATERIAL: Made of glass epoxy laminate and must be ordered separately.

FEATURES AND SPECIFICATIONS

SPECIAL FEATURES: Special edge connector with .025″ square tails for hand or machine wire wrap.

Ideally suited for variety of wire wrap interconnection applications on data processing, test and communications equipment.

SIZE: Available in 40-contact position size only.

TERMINATIONS: .025″ square tails on .125″ centers for wire wrapping.

MOUNTING STYLE: Plain holes for standard mounting.

INSULATOR MATERIAL: Green glass-filled diallyl phthalate, type SDG-F per MIL-M-14.

CONTACT MATERIAL & PLATING: Phosphor bronze with .100 micro-inches gold over 25 micro-inches nickel plate finish.

POLARIZING KEY MATERIAL: Made of glass epoxy laminate and must be ordered separately.

FEATURES AND SPECIFICATIONS

SPECIAL FEATURES: Designed for extreme ruggedness — insulator is impervious to normal cleaning solvents.

Special oversize bosses on insulator permit press-fit retention to aluminum plate.

SIZE: Available in 30-position size only with card guides.

TERMINATION: .025″ wire wrap square tails on .125″ centers.

MOUNTING STYLE: Connector insulator has special oversize bosses to press-fit into .080″ thick plate with .072 ±.001 dia. holes. (Bosses can be omitted at positions where grounding is desired.)

INSULATOR MATERIAL: Black glass-filled nylon.

CONTACT MATERIAL & PLATING: Phosphor bronze contacts with finish of 30 micro-inches gold.

NOTE: Contacts can also be selectively gold plated creating substantial reduction in overall connector costs. Contact factory for further details on Cinch selective plating process.

POLARIZING KEY MATERIAL: Made of Nylon and must be ordered separately.

PERFORMANCE SPECIFICATIONS: See page 18.

FEATURES AND SPECIFICATIONS

SPECIAL FEATURES: Extremely rugged design — with or without card guides. Molded oversize bosses at each end provide interference fit into punched holes in plate.

SIZE: Available in 36-position size with or without card guides.

TERMINATION: .025″ wire wrap square tails on .125″ centers.

CONTACT MATERIAL & PLATING: Phosphor bronze contacts with 30 micro-inches gold finish.

MOUNTING STYLE: Connectors have special oversize bosses at end to press-fit into .080″ thick plate with .072″ ±.001 dia. holes.

INSULATOR MATERIAL: Black lexan.

NOTE: Contacts can also be selectively plated with significant reduction in gold requirements. Contact factory for further details.

POLARIZING KEY MATERIAL: Made of nylon and must be ordered separately.

PERFORMANCE SPECIFICATIONS: See page 18.

FEATURES AND SPECIFICATIONS

SPECIAL FEATURES: Cantilever contact construction insures maximum contact pressure with minimum insertion force. Solid .045″ square tail section provides necessary rigidity and stability for wire wrap application. Oversize bosses on insulator permit interference fit into aluminum plate.

SIZES: Available in 2 or 3 position sizes.

TERMINATION: .045″ square tail for automatic semi-automatic wire wrapping.

MOUNTING STYLE: Module contacts have bosses that press-fit into .125″ thick chassis with .137″ ±.001 dia. holes.

INSULATOR MATERIAL: Grey nylon for all modules.

CONTACT MATERIAL & PLATING: All module contacts made of phosphor bronze with 30 micro-inches gold over 30 - 150 micro-inches nickel.

PERFORMANCE SPECIFICATIONS: Consult factory for specifications.

This miniature connector assembly can be quickly and easily disassembled and reassembled for wave solder installation of PC boards as well as for field servicing and retrofit.

These 40 and 80 pin connectors are designed to meet, or exceed, the requirements of NavOrd specification number WS-6116, and associated profile drawing number 2672600. Specifically, they comply with the design configurations delineated by NavOrd drawings 0102-655 and 0102-660, respectively.

These assemblies function as headers for the support of a printed circuit board measuring approximately 2 5/16″, or 5 5/16″ x 1 5/32″. They provide for the assembly of dual-in-line packages, the leads of which will extend through the cutouts in the metal frame portion, into the printed circuit board allowing for their interconnection by wave soldering. The metal frame acts as a heat sink to carry away the heat generated by the dual-in-line devices.

The connector contains 40 contacts, 2 rows of 20 each arranged in .100″ x .100″ centers, which are gold plated brass.

These assemblies may be mated to back panel assemblies with insulated or grounded mini-mod receptacles described on this page, or with any receptacle arrangement conforming to NavOrd specification WS6157.

ELECTRICAL SPECIFICATIONS

Current Rating: 3.0 amps.
Contact Resistance: 6.0 milliohms max.
Dielectric Strength: 1000V RMS, 1200V DC.
Insulation Resistance: 100,000 megohms min.

MATERIALS AND FINISHES

Contact Strip: Glass filled diallyl phthalate per MIL-M-14F, Type SDG.

Contact Pins: Brass alloy per QQ-B-613, 50 microinches gold minimum over nickel.
Frame: Black anodized aluminum per QQ-A-250.

MECHANICAL SPECIFICATIONS

Molded-in pins will withstand 20 oz. pull.
Guide ribs will withstand 10 in.-lbs. torque.
Extractor fin withstands 6 in.-lbs. torque.
Pin shield withstands 6 lbs. pull.

MINI-MOD MODULES

FEATURES

- Modular construction for wide latitude of configurations on .100″ x .100″, 125″ x .125″ and .150″ x .150″ grid.
- Meet stringent requirements for military airborne applications.
- Meet NAFI's standard packaging concept per WS-6157A.
- Nylon modules serve as both contact retention devices and as a dielectric.
- Available in colors for easy color coding and identification.
- Automatic assembly operations offer low overall costs.

PHYSICAL CHARACTERISTICS

Insulator Material: White nylon per MIL-M-20693A. Other colors available on request.

Ground Material: Aluminum per QQ-A-225.

Contact Material: Phosphor bronze per QQ-B-750. Comp. A or Beryllium copper per QQ-C-533.

Contact Plating: 30 microinches gold per MIL-G-45204B over copper flash. Other finishes available on request.

ELECTRICAL CHARACTERISTICS

Current Rating: 3 amps.

Withstanding Voltage: 1800V AC tested per EIA std. RS-364.

Operating Voltage: 600V AC — ⅓ withstanding voltage per EIA std. RS-364.

Contact Resistance: 8 milliohms max.

Insulation Resistance: 5000 megohms min.

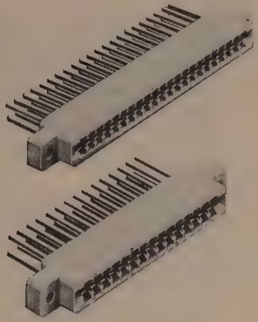
MECHANICAL DATA

Individual contact insertion and withdrawal with an .020 blade — 2-10 oz.
Individual contact retention — 8 lbs. min.

TRW® CINCH CONNECTORS

WIRE WRAP PC CONNECTORS

.045″ SQUARE TAIL WIRE WRAP CONNECTORS/.156″ SPACING - DOUBLE READOUT FOR 1/16″ PRINTED CIRCUIT BOARDS



FEATURES AND SPECIFICATIONS

SPECIAL FEATURES: Combines contact reliability of a flexing bifurcated contact with stability of a rigid .045″ square tail.

Tail section contains inner core of copper with outer cover of flexible contact material formed into .045″ square shape.

SIZES: Available in 15 and 22-position sizes.

TERMINATION: .045″ square tails for automatic and/or semi-automatic wire wrapping.

MOUNTING STYLE: Plain .128″ diameter holes for standard mounting.

INSULATOR MATERIAL: Green glass-filled diallyl phthalate, type SDG-F per MIL-M-14.

CONTACT MATERIAL & PLATING: Phosphor bronze contacts with 30 micro-inches gold finish.

POLARIZING KEY MATERIAL: Made of glass epoxy laminate and must be ordered separately.

PERFORMANCE SPECIFICATIONS: See page 18.

FEATURES AND SPECIFICATIONS

SPECIAL FEATURES: Cantilever contact construction combines maximum contact pressure with minimum insertion force. Gap uniformity is achieved through pre-loading contacts against insulator stop. Selective gold plating permits concentration of gold at contact area only, at substantially reduced cost.

SIZE: Available in 15 positions, 30 contact size only.

TERMINATION: Special contact tails for slip-on clip or wire wrap application.

MOUNTING HOLE: Cutout area for standard mounting.

INSULATOR MATERIAL: High impact general purpose black phenolic.

CONTACT MATERIAL & PLATING: Phosphor bronze with selective plating of 100 micro-inches gold over 50 micro-inches of copper at contact area and tails tin-lead coated on 2 sides only.

PERFORMANCE SPECIFICATIONS: See page 18.

FEATURES AND SPECIFICATIONS

1. Crimp-on removable wire pins provide widest range of wiring flexibility.
2. Probe-proof closed entry back plates protect wire leads and receptacles.
3. Wire pins "snap" into contact receptacles, held securely by detent action.
4. Twin-barrel contact receptacles permit 2 wires per contact, 4 wires per position.
5. Bifurcated contacts provide twin contact surfaces, assure positive contact.

SIZES: Available in 8, 15, 22 and 43 position sizes.

TERMINATION: Twin-barrel contact receptacles with crimp-on snap-in wire pins.

MOUNTING STYLE: Plain .128" dia. holes for standard mounting.

INSULATOR MATERIAL: Green glass-filled diallyl phthalate, type GDI-30F per MIL-M-19833.

CONTACT AND PIN MATERIAL & PLATING: Contacts are made of beryllium copper and wire pins are brass, both with a finish of 30 micro-inches gold over 200 micro-inches silver.

INSULATED JUMPER MATERIAL & PLATING: Jumpers are brass with red or black insulated area dipped and aired with plastisol coating; same finish as pins and contacts.

POLARIZING KEY MATERIAL: Made of nylon and must be ordered separately (Part No. 456-01-25-788). Pins and connectors indicated below can be supplied with 50 micro-inch gold finish to meet MIL-C-21097B.

PERFORMANCE SPECIFICATIONS: See page 18.

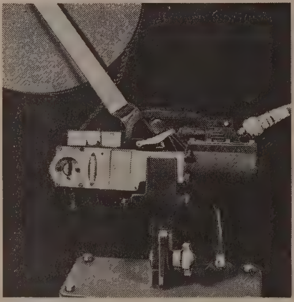
TOOLS AND MACHINES

HAND CRIMP TOOL

Part No. 599-11-11-108
Versatile, cycle-controlled Buchanan crimp tool. Positioners must be ordered separately. For #20 wire, order positioner No. 598-98-22-107. For #22-24 wire, order No. 598-98-22-108.

PIN INSERTION/REMOVAL TOOL

Part No. 599-11-11-102
Special metal hand tool with separate tips for inserting or removing wire pins from "Twin-Con" contact receptacles. Request Form ISM-51 for detailed operating instructions.



BENCH-MOUNTED SEMI-AUTOMATIC CRIMP MACHINE

Pneumatically operated, cycle-controlled tool with large capacity reel. Contacts fed to machine on strips. Order direct from Buchanan (their Catalog Nos. 11151 for machine base and 11566 for tool).

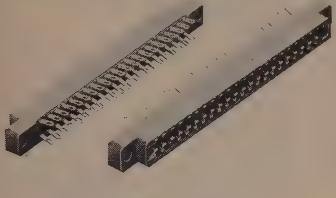
AUTOMATIC CRIMP MACHINE

Available only for extremely high production needs — contacts can be bulk fed into machine. Crimps over both wire and insulation at same time. Direct all inquiries to Factory.

TRW® CINCH CONNECTORS

STANDARD PC CONNECTORS

STANDARD EDGE CONNECTORS WITH SOLDER TAB CONTACTS/ .156″ SPACING - SINGLE OR DOUBLE READOUT FOR 1/16″ PRINTED CIRCUIT BOARDS



FEATURES AND SPECIFICATIONS

SPECIAL FEATURES: Patented bifurcated bellows contacts Pat. No. 3274532 provide added contact reliability especially in applications where vibration and board irregularities are involved.

SIZES: Both single and double readout versions are available in 6, 10, 12, 15, 18, 20, 22 and 25-contact position sizes.

TERMINATION: Bifurcated contacts with conventional .115″ x .050″ slot solder tabs.

MOUNTING STYLES: Available with either .128″ diameter holes for standard mounting molded-in bushings or floating bushings. .142″ diameter plain holes also available on special order.

INSULATOR MATERIAL: Green glass-filled diallyl phthalate, type SDG-F per MIL-M-14.

CONTACT MATERIALS & PLATING: Contacts are available in either phosphor bronze or beryllium copper. Standard finish is 30 micro-inches gold. Beryllium copper contacts can also be supplied with special finish of 50 micro-inches gold to meet MIL-C-21097B.

POLARIZING KEY MATERIALS: Two types of polarizing keys are available, and must be ordered separately as follows: Part No. 456-07-35-003 (for between-contact polarization) is made of glass epoxy; Part No. 474-11-54-200 (for in-contact polarization) is made of diallyl phthalate.

PERFORMANCE SPECIFICATIONS: See page 18.

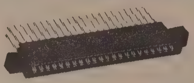
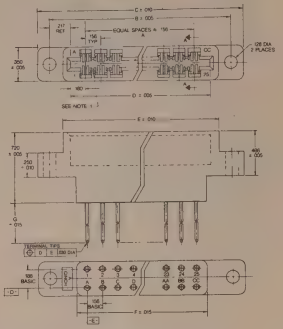
TRW® CINCH CONNECTORS

PC BOARD CONNECTORS WITH TERMINALS ON .156 CENTERS

PRINTED CIRCUIT BOARD CONNECTORS/WITH WIRE WRAP .031 x .062 TERMINALS ON .156 CENTERS





FEATURES AND SPECIFICATIONS

CURRENT RATING: 3 amperes. Based upon all contacts carrying specified current and a temperature rise of 30°C above ambient.
RATED VOLTAGE (Sea Level): 900 V AC RMS 1200 V DC. (Based on ⅓ voltage breakdown)
TEST VOLTAGE (Sea Level): 2000 V AC RMS 2700 V DC. (Based on 75% voltage breakdown)
CONTACT RESISTANCE (Millivolt Drop @ 3 Amp): 16 millivolt max.
TOTAL INSERTION FORCE: 20 lbs. max. Performed in accordance with Paragraph 4.6.6.2 of MIL-C-21097 using .070 inch thick blade.
INDIVIDUAL CONTACT ENGAGING AND SEPARATION FORCE: 2-16 oz. Performed in accordance with Paragraph 4.6.6.1.1 of MIL-C-21097B using .062 inch thick blade.
INDIVIDUAL SEPARATION FORCE: 1 oz. min. Performed in accordance with Paragraph 4.6.6.1.2 of MIL-C-21097 using .054 inch thick blade.
DURABILITY: 100 cycles with steel blade .070 inch thick. Contact resistance and individual contact separation force requirements met after test.
INSULATOR MATERIALS: General purpose impact phenolic — color black.
POLARIZING KEY: Nylon
CONTACT: Phosphor bronze
CONTACT PLATING: .00003 min. gold over .00005 min. nickel in contacting area .00001 min. gold on remainder of contact.
GENERAL DESCRIPTION: 22 contact positions (44 contacts) double read-out .156 center to center spacing. For 1/16 (.054-.070) thick printed circuit card. Bifurcated — cantilever type contacts. Wire wrap termination .031 x .062. Between contact polarizing.

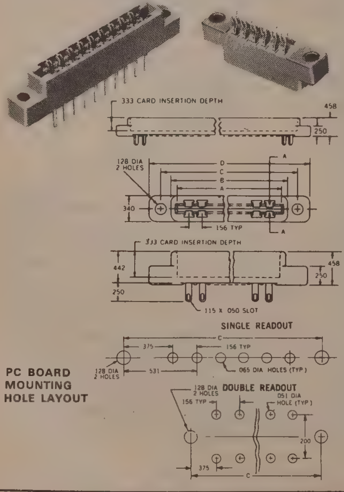
SPECIAL PURPOSE .156 CENTER PC BOARD EDGE CONNECTORS

PC BOARD EDGE CONNECTORS FOR INTERCONNECTING TWO OR MORE STANDARD 1/16" PRINTED CIRCUIT BOARDS



FEATURES AND SPECIFICATIONS

RATED VOLTAGE: AC RMS, adj. terminals 830 V (Sea Level) 300 V (3.4 Hg. 50,000 feet); 200 V (1.3 Hg. 70,000 feet).
CURRENT: 5.0 Amps.
CONTACT RESISTANCE: .005 Ohms at Rated Current.
INSULATION RESISTANCE: 5000 Megohms.
ENVIRONMENTAL: Per MIL-C-21097 and MIL-STD-202, latest versions.
SHOCK: 3 blows of 50G, Method 202B.
TEMPERATURE CYCLING: 5 continuous cycles per Method 107B, Test Condition B: Beryllium copper −65°C to 125°C; Phosphor bronze −65°C to 105°C.
SALT SPRAY: 48 hrs. per Method 101B, Condition B.
VIBRATION: Per Method 204A, Condition B.
HUMIDITY: Per Method 103B, Condition B.

FEATURES AND SPECIFICATIONS

SPECIAL FEATURES. Patented bifurcated bellows contacts Pat. No. 374532 provide added contact reliability especially in applications where vibration and board irregularities are involved.

SIZES: Both single and double readout versions are available in 6, 10, 12, 15, 18, 20, 22 and 25-contact position sizes.

TERMINATIONS: Bifurcated contacts with tails designed for dip soldering 5/32″ long. Other lengths available on special order.

MOUNTING STYLE: Plain .128″ diameter holes for standard mounting.

INSULATOR MATERIAL: Green glass-filled diallyl phthalate, type SDG-F per MIL-M-14.

CONTACT MATERIALS & PLATING: Contacts are available in either phosphor bronze or beryllium copper. Standard finish is 30 micro-inches gold. Connectors can also be supplied with a contact finish of 50 micro-inches gold to meet MIL-C-21097B.

POLARIZING KEY MATERIALS: Two types of polarizing keys are available, and must be ordered separately as follows: Part No. 456-07-35-003 (for between-contact polarization) is made of glass epoxy; Part No. 474-11-54-200 (for in-contact polarization) is made of diallyl phthalate.

PERFORMANCE SPECIFICATIONS: See page 18.

FEATURES AND SPECIFICATIONS

SPECIAL FEATURES: Available in wide range of sizes and mounting styles.

SIZES: Available in 6, 10, 12, 15, 18, 20 and 25 contact position sizes.

TERMINATION: Special wrap post contacts with .060″ x .030″ tails designed for wire wrapping.

MOUNTING STYLES: Available with plain .128″ diameter holes for standard mounting, molded-in bushings or floating bushings.

INSULATOR MATERIAL: Green glass-filled diallyl phthalate, type SDG-F per MIL-M-14.

CONTACT MATERIALS & PLATING: Contacts are available in either phosphor bronze or beryllium copper with 30 micro-inches gold finish.

POLARIZING KEY MATERIALS: Two types of polarizing keys are available and must be ordered separately as follows: Part No. 456-07-35-003 key (for between-contact polarization) is made of glass epoxy. Part No. 474-11-54-200 key (for in-contact polarization) is made of diallyl phthalate (see page 13).

FEATURES AND SPECIFICATIONS

SPECIAL FEATURES: Center bridge construction utilized in insulator to minimize warpage. Available with both solder tab and wrap post termination.

SIZE: Available in 30-position size only.

TERMINATIONS: Available with conventional solder tab tails or .060″ x .030″ wrap post contacts.

MOUNTING STYLE: Plain .178″ diameter holes for standard mounting.

INSULATOR MATERIAL: Green glass-filled diallyl phthalate, type SDG-F per MIL-M-14.

CONTACT MATERIALS & PLATING: Contacts are available in either phosphor bronze or beryllium copper with 30 micro-inches gold finish.

POLARIZING KEY MATERIALS: Available with "in-contact" polarization only; polarizing key is made of diallyl phthalate and must be ordered separately. (Part No. 474-11-54-200).

PERFORMANCE SPECIFICATIONS: See page 18.

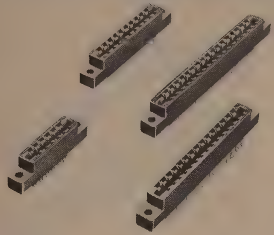
TRW® CINCH CONNECTORS

SERIES 90 ECONO-LINE LOW-COST P.C. EDGE CONNECTORS ON .156″ CENTERS FOR 1/16″ BOARDS — .333 DEEP CARD SLOT



Most of the performance features of TRW/Cinch Connectors standard printed circuit edge connectors are found in this low-cost version for commercial applications. Except for the reduced amount of gold-plating, the Series 90 Econo-Line connectors meet all the latest requirements of MIL-C-21097, Std. 202.

The Series 90 incorporates a newly developed high tensile brass, Alcoloy* 688, in its bifurcated bellow contacts. The contact area is selectively plated with 20 microinches of gold over 30 microinches of nickel that provides a non-migrating base. A green, glass-filled thermoplastic polyester replaces the more expensive diallyl phthalate used in the standard connector line.

Econo-Line connectors are supplied in 6, 10, 12, 15, 18, 22 and 25 positions, with either single or double readout in either conventional solder eyelet or dip solder tails.

*T.M. Olin Corporation.

PERFORMANCE DATA

MECHANICAL

Contact Insertion Force: 16 oz. max. per contact position.
Individual Separation Force: 1 oz. min. Performed in accordance with Para. 4.6.6.1.2 of MIL-C-21097 using .054-in. thick blade.
Durability: 100 cycles with steel blade .070-in. thick. Contact resistance and individual contact separation force requirements met after test.

ELECTRICAL

Voltage Rating (AC RMS, adjacent terminals): 830V (sea level): 300V (3.4″ Hg, 50,000 feet); 450V (1.3″ Hg, 70,000 feet).
Test Voltage (AC RMS, adjacent terminals): 1870V (sea level); 675V (3.4″ Hg, 50,000 feet); 450V (1.3″ Hg, 70,000 feet).
Current Rating: 5 amperes.
(Based upon all contacts carrying specified current and a temperature rise of 30°C. above ambient.)
Contact Resistance (at rated current): .005 ohms.
Insulation Resistance: 5000 Megohms.

ENVIRONMENTAL SPECIFICATIONS

(Per MIL-C-21097 and MIL-STD-202, latest versions)
Shock: 3 blows at 50G, Method 202B.
Temperature Cycling: 5 continuous cycles per Method 107B.
Test Condition B: −65°C to +125°C.
Salt Spray: 48 hours per Method 101B, Condition B.
Vibration: Per Method 204A, Condition B for bifurcated contacts.
Humidity: Per Method 103B, Condition B.

MATERIALS & FINISHES

Contacts: Alcoloy 688 high tensile brass.
Plating: Contact surface selectively plated with 20 microinches gold over 30 microinches nickel overall; solder-coated terminals.
Insulator: 30% glass-filled green polyester, SEO-rated.

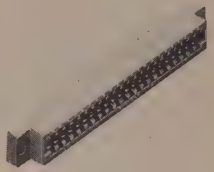
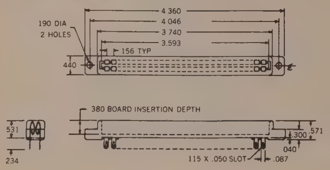
SPECIAL BOARD SIZE PC CONNECTORS .156 CENTER SPACING

SPECIAL EDGE CONNECTORS/.156″ SPACING - DOUBLE READOUT FOR 3/32″ PRINTED CIRCUIT BOARDS





FEATURES AND SPECIFICATIONS

SPECIAL FEATURES: Accommodates 3/32″ thick printed circuit boards. Bifurcated contact construction provides added reliability.

SIZE: Available in 22-position size only.

TERMINATION: Conventional .234 solder tabs. Printed circuit tails 5/32″ long available on special order. Consult factory.

MOUNTING STYLE: Plain .190″ diameter holes for standard mounting.

INSULATOR MATERIAL: Green glass-filled diallyl phthalate, type SDG-F per MIL-M-14.

CONTACT MATERIALS & PLATING: Bifurcated contacts available in either phosphor bronze or beryllium copper with 30 micro-inches gold finish.

PERFORMANCE SPECIFICATIONS: See page 18.

FEATURES AND SPECIFICATIONS

SPECIAL FEATURES: Accommodates 1/8″ thick printed circuit boards. Available in variety of sizes; all with patented bifurcated bellows contact construction. Pat. No. 3274532.

SIZES: Available in 8, 12, 15, 18 and 22-contact position sizes.

TERMINATION: Conventional 1/4″ solder tabs. Printed circuit tails 5/32″ long available on special order. Consult factory.

MOUNTING STYLE: Plain .128″ diameter holes for standard mounting.

INSULATOR MATERIAL: Green glass-filled diallyl phthalate, type SDG-F per MIL-M-14.

NOTE: Two different height insulators are used — the 8, 12 and 15-position connector insulators permit .333″ board insertion depth while the 18 and 22-position insulators permit .406″ depth.

CONTACT MATERIAL & PLATING: Bifurcated contacts available in either phosphor bronze or beryllium copper with 30 micro-inches gold finish.

PERFORMANCE SPECIFICATIONS: See page 18.

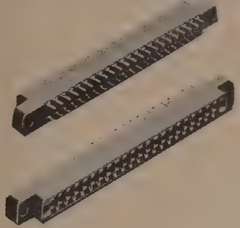
TRW® CINCH CONNECTORS

DIP SOLDER TERMINAL PC CONNECTORS
0.140″ SPACING BETWEEN ROWS 0.156″ CONTACT CENTERS



- Patented bifurcated bellows contacts for added contact reliability.
- Ideal for applications involving vibration or board irregularities.
- 6, 10, 12, 15, 18, 22 and 25-contact sizes, double readout.
- Available with or without mounting ears.
- Accepts single or double $\frac{1}{16}$″ thick sided boards.
- 0.125″ long dip solder terminations.

MATERIALS

Insulator Material: Green glass-filled diallyl phthalate, type SDG-F per MIL-M-14.

Contact Material: Contacts are available in phosphor bronze. Standard finish is 30 microinches gold.

Polarizing Key Materials: Two types of polarizing keys are available, and must be ordered separately as follows: Part No. 456-07-35-003 (for between contact polarization) is made of glass epoxy; Part No. 474-11-54-200 (for in-contact polarization) is made of diallyl phthalate.

ENVIRONMENTAL SPECIFICATIONS

Shock: 3 blows of 50G per MIL-STD-202C, Method 202B.

Temperature Cycling: 5 continuous cycles (−65°C to +105°C) per MIL-STD-202C, Method 107B, Test Condition B.

Salt Spray: 48 hours per MIL-STD-202C, Method 101B, Condition B.

Vibration: Per MIL-STD-202C, Method 204A, Test Condition B.

Humidity: Per MIL-STD-202C, Method 103B, Condition B.

ELECTRICAL SPECIFICATIONS

Test Voltage (AC RMS, adjacent terminals): 830V (sea level); 300V (3.4″ Hg, 50,000 feet); 200V (1.3″ Hg, 70,000 feet).

Current Rating: 5.0 amperes.

Contact Resistance at Rated Current: .005 ohms.

Insulation Resistance: 5000 megohms.

TRW® CINCH CONNECTORS

CINCH D-SUBMINIATURE CONNECTORS†

All Cinch D-Subminiature Connectors undergo final assembly and inspection in the ultra-modern, temperature controlled Cinch "clean room." In this room, contacts, insulators and shells are stored and assembled under tight quality control inspection. Ultrasonic cleaning capabilities are also available on request.

GENERAL DESCRIPTION

The Cinch D-Subminiature Connectors described in this catalog are designed for applications where space and weight are prime considerations. These high contact density connectors are especially well-suited for aircraft, missile and ground support installations. Although designed essentially for rack-and-panel installations, D series connectors may be adapted for cable attachment by means of accessory junction shells with integral clamps.

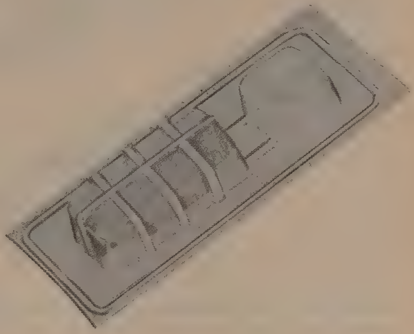
In addition to the original D series with solder pot contacts in a two piece insulator, Cinch now offers Golden D, Mark I Connectors with solder pot contacts in a monobloc insulator for improved moisture resistance; Royal D, Mark III connectors with crimp snap-in contacts in the Little Caesar assembly for high performance, high reliability applications, and the Burgun-D with insertable and removable stamped or machine contacts for commercial applications.

All D-Subminiature Connectors will inter-mate if insert arrangements correspond. Mark I and Mark III connectors are designed to meet or exceed the requirements of MIL-C-24308 Rev. A.

A wide range of insert arrangements is offered accommodating up to 50 contacts accepting standard AWG wire as indicated in the individual specifications. Combination layouts are available, with provisions for coaxial and/or high voltage contacts. Printed circuit and wire wrap terminations are also available. The versatility of the D series is further enhanced by the variety of insulating materials and finishes, as well as a complete line of accessories.

The D-Subminiature series is handled by leading electronic distributors throughout the country. Questions regarding modifications of these designs or any connector requirement should be addressed to your local Cinch representative and will receive his immediate attention.

CONNECTORS INDIVIDUALLY PACKED IN HEAT-SEALED CONTAINERS TO ASSURE EXTENDED SHELF-LIFE



To protect D-Subminiature Connectors from contamination and other corrosive elements in the air, Cinch individually packs each connector in heat-sealed polyvinylchloride containers (as shown). This assures every customer of an extended shelf life. A separate compartment is also provided in each container for the loose crimp-type contacts supplied with the Royal D Mark III Connectors. Connectors can also be packed in individual polyethylene bags if desired.

INDEX CONNECTORS

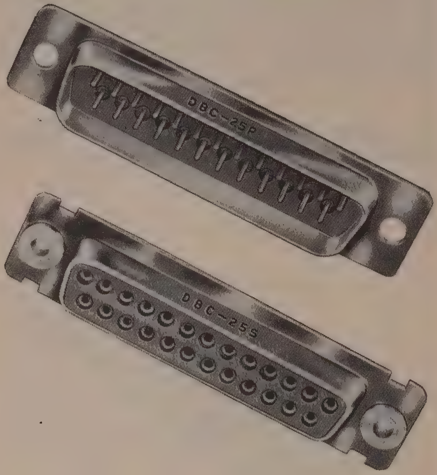
TRW® CINCH CONNECTORS

BURGUN-D MARK IV CONNECTORS



The TRW/Cinch Burgun-D subminiature connector is designed for commercial applications where space, weight, and economy are important considerations.

It is especially suited to plug-in module, cable to panel and cable to cable installations, in computers and peripherals, test equipment, communications equipment and a wide range of other applications.

The Burgun-D (Mark IV) Series utilizes rear-release crimp snap-in contacts, that are readily inserted and removed by means of a simple, expendable insertion/extraction tool.

It offers these important features:

- Mates with existing original D and Mark I, Mark II and Mark III connectors.
- Operates at temperatures to 250°F (120°C).
- Size 20 contacts accommodate wire size #18 through #30 AWG stranded wire. (Screw machine only.)
- Closed-entry sockets automatically corrects misaligned pins.
- Rated at 5 amperes for #20 wire.
- Available in 9, 15, 25, 37, and 50 contact arrangements.
- Variety of contacts for hand and machine assembly and PC board insertion.

A COMPLETE LINE OF HARDWARE and accessories including junction shells, hoods, dust caps and lock assemblies is available and listed in TRW/Cinch Catalogs CD-12, and C-46.

FOR IMMEDIATE DELIVERY from stock, contact your TRW/Cinch D-subminiature industrial distributor.

CONDENSED DATA

STANDARD MATERIALS & FINISHES

Shell: Steel, yellow chromate over cadmium plate.

Insulator: Glass-filled burgundy nylon (per Fed. Spec. L-P-395B).

Contacts:

Machined — Copper alloy.

Stamped — Cadmium copper.

Contact Plating:

Selective Stamped — 30 microinches of gold (min.) over 50 microinches of nickel (min.) at contacting area, with gold flash overall.

Overall Stamped — 20 microinches of gold (min.) over 60 microinches of nickel (min.).

Machined — 30 microinches of gold over nickel.

Rivets and Washers: Stainless steel.
(float mounting)

MECHANICAL FEATURES

Coupling: Friction and lock accessories.

Polarization: Keystone-shaped shells.

Contact Type: Crimp snap-in.

ELECTRICAL DATA

Contact Termination: Crimp.

Wire Size:

Size 20 contacts — #20, #22, and #24 AWG stranded wire.

Size 20-18 contacts — one #18 or two #22 AWG stranded wires.

Current Rating: Size 20 contacts — 5 amps.

VOLTAGE RATING

	Sea Level	20,000 ft.	70,000 ft.	120,000 ft.
Average Flashover:	1500V AC	1000V AC	500V AC	255V AC
Test:	1000V AC	650V AC	325V AC	175V AC

Voltage Drop: Size 20 contacts — 2.67 millivolts max. per amp when tested in accordance with MIL-STD-202, Method 307.

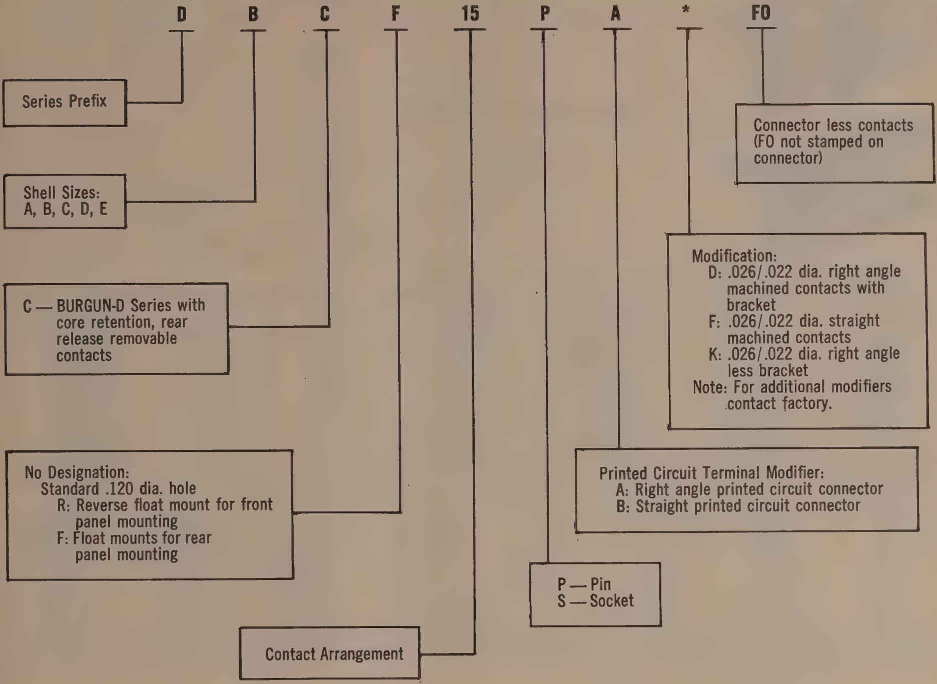
HOW TO ORDER BURGUN-D CONNECTORS



D B C F 15 P A * FO

Series Prefix

Shell Sizes:
A, B, C, D, E

C — BURGUN-D Series with core retention, rear release removable contacts

No Designation:
Standard .120 dia. hole
R: Reverse float mount for front panel mounting
F: Float mounts for rear panel mounting

Contact Arrangement

P — Pin
S — Socket

Printed Circuit Terminal Modifier:
A: Right angle printed circuit connector
B: Straight printed circuit connector

Modification:
D: .026/.022 dia. right angle machined contacts with bracket
F: .026/.022 dia. straight machined contacts
K: .026/.022 dia. right angle less bracket
Note: For additional modifiers contact factory.

Connector less contacts (FO not stamped on connector)

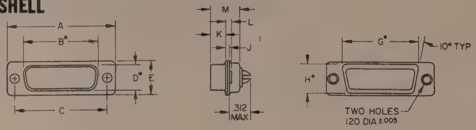
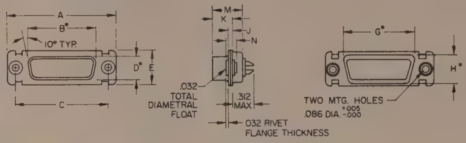
STANDARD SHELL



SHELL WITH FLOAT MOUNTS



It is recommended that only one assembly, either pin or socket, be float mounted. For front panel mounting use reverse float mount.

TRW® CINCH CONNECTORS

REAR RELEASE CONTACT RETENTION SYSTEM

The BURGUN-D connector features a rear insulator with integral, molded contact retaining tines. These plastic tines permit the insertion and extraction of contacts from the rear of the connector with a simple, expendable plastic insertion/extraction tool.

During contact insertion, the retaining tines expand as the contact passes thru. These rugged tines snap into place behind the contact shoulder when the contact is fully inserted. The tool is inserted to expand the tines, allowing easy extraction of the wired contact.

The retention system and the integral contact retaining tines guarantee functional reliability in many environments.

- Mates with existing D types.
- Operates in temperatures to +250°F.
- Crimp snap-in contacts.
- Highly reliable socket contacts.
- Insertion/extraction with expendable tool.
- Corrects misaligned contacts.

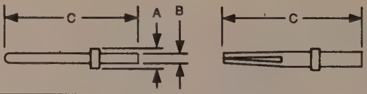
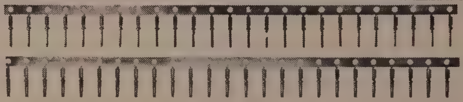
MACHINED CONTACTS

Machined contacts are supplied loose for use with hand crimp tools or in vibration hopper feeder crimp machines. A vibrator-feed, semi-automatic tool, 599-11-11-225 is available. These contacts are supplied in three wire cup sizes.



Description	Part No.	Cannon Reference	Wire Accommodation	A ±.002(.051)	B ±.002(.051)	C Max.
Pin 20	403-30-15-130-410	030-1952-000	#20, 22, 24	.067(1.70)	.042(1.07)	.537(13.64)
Pin 20-18	403-30-99-129-410	030-1954-000	#18 or 2-#22	.086(2.18)	.066(1.68)	.874(22.20)
Pin 20-26	403-30-99-126-410	030-1952-002	#26, 28, 30	.067(1.70)	.025(0.64)	.537(13.64)
Socket 20	414-30-14-227-410	030-1953-000	#20, 22, 24	.067(1.70)	.042(1.07)	.523(13.28)
Socket 20-18	414-30-99-236-410	030-1955-000	#18 or 2-#22	.086(2.18)	.062(1.68)	.852(21.64)
Socket 20-26	414-30-99-233-410	030-1953-002	#26, 28, 30	.067(1.70)	.025(0.64)	.523(13.28)

STAMPED CONTACTS



Stamped contacts are supplied loose for use with hand crimp tools, or on reels for use with the semiautomatic machines, selectively gold plated or with gold plate overall. These contacts will accommodate wire sizes #20 through #28 AWG by adjusting or changing the crimp die set. (For other wire sizes consult factory.)

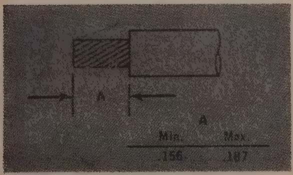
ASSEMBLY



WIRE STRIPPING

1. Cut wires to length. Strip insulation per above illustration. Check for broken or frayed wires.

CONTACT CRIMPING

2. Insert contact and wire into proper crimp tool (and locator, if required). Crimp contact to wire. Inspect crimp.

CONTACT INSERTION

3. Center wired contact in groove of insertion tool, with tool tip butting contact shoulder. Insert contact into cavity until a positive stop is felt. Inspect insertion.

4. To be sure contact is locked securely, pull back lightly on wire. Repeat for balance of contacts, working row by row across the insulator.

CONTACT EXTRACTION

5. Place wire into extraction tool tip.

6. Insert tool tip into contact cavity and rotate slowly. When slot in tool aligns with contact crimp, push tool until tip bottoms against contact shoulder. Hold wire against tool with finger and remove tool and contact. Repeat for balance of contacts.

TRW® CINCH CONNECTORS

HOW TO ORDER — TYPES D*MA, D*M & D CONNECTORS

D B MA M R 15 P A * FO

Series Prefix

Shell Sizes
A, B, C, D, E

No designator — 2 pc. nylon Insulator — solder type Contacts — original "D" series

M: Monobloc insert — solder type contacts Mark I series

MA: Monobloc insert — crimp type contacts Mark III series

M: For connectors having .00005 gold plate over .0001 min. copper plate on contacts — omit for standard Mark I and Mark III only.

No designator — standard .120 diameter hole
E — 4-40 clinch nut for rear panel mounting
F — float mounts for rear panel mounting
R — reverse float mount for front panel mounting

Contact Arrangement, See page 11.

P — Pin
S — Socket

Printed circuit terminal modifier — applicable to the Mark I Series (monobloc, solder type).

A — Right-angle printed circuit connector with .040 diameter terminals; with bracket assembly and accommodates printed circuit boards up to 1/16 maximum thickness. (Plug only.)

B — Straight printed circuit connector with .040 diameter terminals; accommodates printed circuit boards up to 3/32 maximum thickness.

H — Straight printed circuit connector with .040 diameter terminals; accommodates printed circuit boards up to 1/8 maximum thickness.

L — Right-angle printed circuit connector with .030 diameter terminals with bracket assembly and accommodates printed circuit boards up to 3/32 maximum thickness. (Plug only.)

Printed Circuit Terminal Modifier — Applicable to the original "D" series.

V — Straight printed circuit connector with .040 diameter terminals; accommodates printed circuit boards up to 1/16 maximum thickness.

Modification — consult factory

Connector less contacts (FO not stamped on connector)

TRW® CINCH CONNECTORS

GENERAL RATINGS AND SPECIFICATIONS

VOLTAGE RATINGS

All voltage figures are AC (rms), 60 cps. measured at approximately 77°F., 50% RH.

Connectors with Basic Arrangements
AWG #20 wire contacts only

All voltages are measured from contact to contact, and contact to shell, in unmated condition.

Connector Type		Altitude (feet) Sea Level	20,000	50,000	70,000
D*MA	Average Flashover	1500	1000	500	500
	Test	1000	650	325	325
D*M D*	Average Flashover	1700	1000	650	500
	Test	1250	750	475	375

Connectors with Combination Arrangements
AWG #20 wire contacts with coaxial, high power, and/or high voltage contacts
All voltages are for plugs and receptacles in both mated and unmated conditions.

Altitude (feet)		Sea Level		20,000		Sea Level		20,000	
Type of Contact		90°	Straight	90°	Straight	90°	Straight	90°	Straight
Center Conductor to Coaxial Shell	Average Flashover	1200	1500	900	1000	600	700	400	500
	Test	800	1000	600	650	400	475	275	325
High Power Contact and/or Coaxial Shell to Plug Shell	Average Flashover	1500	1500	1000	1000	500	500	500	500
	Test	1000	1000	650	650	325	325	325	325
Coaxial Shell to Nearest Standard Solder Pot Contact	Average Flashover	•	1500	•	1500	•	900	•	650
	Test	•	1000	•	1000	•	600	•	425
HV Contact to Nearest #20 Contact or to Shell	Average Flashover	3800	3800	2300	2300	500	900	650	650
	Test	2800	2800	1700	1700	675	675	475	475

• Not applicable due to variable rotation.

CURRENT RATINGS

Cinch vs. Military.

The Cinch rating for #20 contacts is 5 amps, which means 5 amps for all contacts simultaneously. MIL-W-5088 rates #20 contacts at 7.5 amps maximum. The explanation is as follows:

MIL-W-5088B, Paragraph 3-9-2-1-2 specifies:

"Table I current ratings for cables in bundles are based upon 15 or more cables carrying no more than 20% of the total carrying capacity of the bundle."

Table I specifies a current rating of 7.5 amps maximum for single wires in bundles of 15 or more wires. NOTE: Wires and contacts are both considered to be in the category of conductors.

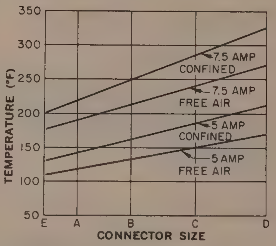
Explanation

If 15 wires (normally rated at 7.5 amps per wire maximum, or at a total bundle current of 112.5 amps) are not to carry more than 20% of the total 112.5 amps, the **average** current rating per wire is 20% of 112.5 amps (total bundle capacity) divided by 15 (number of wires).

Conclusion

The Military rating of #20 contacts or wires is 1.5 amps average (based on 15 wires per bundle or 15 contacts per connector) vs. a Cinch rating of 5 amps.

Average Maximum Temperature vs. Connector Size for various current ratings of mated pairs of D Subminiature Connectors.



Notes:

1. Free air condition. Connectors not shielded from ambient condition in any manner.
2. Confined condition. Connectors placed in insulated box (1 x 2 x 3.5) during test, with no moving air.
3. Average maximum temperature stabilization: 1 hour or less in all cases.
4. All contacts in each mated pair tested were wired in series with specified current flowing.
5. Ambient conditions 77°F. 50% rh.

MATERIAL AND PLATING SPECIFICATIONS

Material	Application	Per Specification

ORIGINAL D CONNECTORS

GENERAL INFORMATION

The Cinch Original D Plug utilizes a two-piece nylon insulator housed in a variety of five basic shell sizes: E, A, B, C, and D. These shell sizes contain 9, 15, 25, 37, and 50 #20 solder pot contacts respectively. Standard contact terminations accommodate up to #20 AWG stranded wire. Current rating is 5 amperes.*

The keystone shape of the shell assures proper polarization. Coupling is by means of friction; locking accessories are available. Also available are shells with float mounts. Connectors with #4-40 or #2-56 clinch nut mounts may be provided.

With standard nylon insulators, operating temperatures range from −65°F to +250°F (the limiting factor being the insulator material). When diallyl phthalate insulator is substituted, the operating temperature range is from −65°F to +275°F.

*Military rating of #20 contacts or wires is 1.5 amps average, and 7.5 amps maximum. See explanation on page 11.

MATERIALS AND FINISHES

Shells:	Steel, cadmium plated with yellow chromate supplementary coating.
Pin Contacts:	Brass, gold plated (.00003) over nickel plate (.000060 min.).
Socket Contacts:	Phosphor bronze, gold plated (.00003) over nickel plate (.000060 min.).
Insulators:	Nylon, two-piece.
Float Mounting Rivets and Washers:	Stainless steel.

For listing of applicable specifications see page 11.

PERFORMANCE DATA

Voltage Rating:	See tabulation on page 11.
Insulation Resistance:	Greater than 5,000 megohms, determined in accordance with MIL-STD-202D, Method 302, Condition B.
Contact Resistance:	2.7 milliohms maximum @ 7.5 amps.
Individual Contact Separation Force:	1 to 8 ounces.
Moisture Resistance:	Exceeds test requirements of MIL-STD-202D, Method 106.†
Vibration:	Exceeds test requirements of MIL-STD-202D, Method 204, Condition B.†
Shock:	Exceeds test requirements of MIL-STD-202D, Method 213, Condition G.†
Corrosion Resistance:	Exceeds requirements of 48 hr. exposure to salt spray in accordance with MIL-STD-202D, Method 101C, Condition B.†

†As referenced in MIL-C-24308.

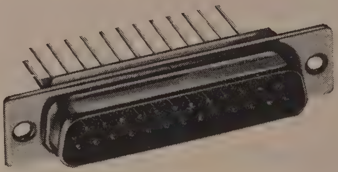
WIRE WRAP TERMINALS

RACK AND PANEL CONNECTORS WITH 0.025" SQUARE WIRE WRAP* TAILS

Cinch D-Subminiature Connectors are designed for applications where space and weight considerations are prime considerations. These high contact density connectors are especially well-suited for aircraft, missile and ground support installations. They are designed to meet or exceed most of the requirements of MIL-C-24308.

These wire-wrap versions are available in 9, 15, 25, 37 and 50 contact sizes in both plug and socket types. Two tail lengths are available: 3/8" long to accommodate two wires, and 37/64" long to accommodate three wires. Socket contacts and plug pins are copper alloy gold plated over silver. Insulators are two-piece nylon, and the outer shells are yellow chromate finished, cadmium-plated steel.



These D-Subminiature Connectors will intermate with any other D-Subminiature Connector of the same insert configuration. Mating connectors with standard termination may be adapted for cable attachment by means of accessory junction shells with integral clamps.

IMMEDIATE DELIVERY FROM CINCH DISTRIBUTORS can be provided on the 3/8" long termination types.

TRW® CINCH CONNECTORS

GOLDEN D MARK I CONNECTORS

GENERAL INFORMATION

Cinch D*M Connectors feature solder pot contacts in a monobloc insulator for improved temperature characteristics and increased moisture resistance. Two insulator types are available: (a) combination layouts with coaxial and/or high voltage contacts plus standard AWG wire contacts, and (b) layouts with standard AWG wire contacts only. The five amp* solder pot contacts accommodate wire sizes up to #20 AWG stranded wire. Socket contacts are of the closed entry type. Operating temperatures range from −65°F to +300°F.

Combination layouts are supplied with unfilled coaxial and/or HV contact cavities. Coaxial and HV contacts must be ordered separately, and may be used interchangeably in any of the layouts listed. HV contacts accommodate wire sizes up to #20. In both, coaxial and HV contacts, the center contacts have solder type termination. Braid, on coaxial contacts, may be soldered or crimped to the outer conductor. Both of the above contacts are snap-in, removable type.

Standard coaxial and HV plugs contain female center contacts; receptacles contain male center contacts. Special reversed versions are available. Pin connector assemblies accommodate coaxial and HV plugs only; socket assemblies accommodate receptacles. Connector assemblies and contact inserts are matched and color coded to ease assembly. Pins and plugs are coded red, sockets and receptacles are coded blue. No insertion tool is required. Coaxial and HV inserts may be removed with Cinch Tool CET-C6B.

Five basic shell sizes are available. Polarization is by means of the keystone cornered shell. Coupling is by friction; locking accessories are available. Shells with float mounts are also available.

Printed circuit plugs are listed on page 8 with other popular modifications. For additional modifications and special plugs, consult factory. Accessories such as junction shells are shown on pages 23 and 24.

*Military rating of #20 contacts or wires is 1.5 amps average, and 7.5 amps maximum. See explanation on page 11.

MATERIALS AND FINISHES

Shells: Steel, cadmium plated with yellow chromate supplementary coating.

Insulators: Diallyl phthalate, glass fibre filled, med. green color, monobloc construction.

#20 Contacts (Standard): Pins and sockets: brass, gold plated (.00003) over silver plate (.0001).

Coaxial Contacts (Standard):

- **Outer Contact —** Plug: Brass, gold plated (.00003) over silver plate (.0001). Receptacle: Beryllium copper, gold plated (.00003) over silver plate (.0001).
- **Center Female Contact —** Phosphor bronze, gold plated (.00003) over silver plate (.0001).
- **Center Male Contact —** Brass, gold plated (.00003) over silver plate (.0001).
- **Insulator —** Teflon.

High Voltage Contacts (Standard):

- **Socket Contact —** Phosphor bronze, gold plated (.00003) over silver plate (.0002).
- **Pin Contact —** Brass, gold plated (.00003) over silver plate (.0002).
- **Insulator —** Nylon (temperature range: −65°F to +250°F).

For listing of applicable specifications see page 11.

PERFORMANCE DATA

VOLTAGE RATING:

Insulation Resistance Ref. MIL-C-24308 — Greater than 5000 megohms in accordance with MIL-STD-202D, Method 302, Condition B

Contact Resistance Ref. MIL-C-24308 — (#20 contacts) 2.67 milliohms max. exceeds requirements of Para 3.53

Contact Engagement Force Ref. MIL-C-24308 — .7 to 12 oz. when tested with MS3197 test pin

Contact Separation Force Ref. MIL-C-24308 — .7 to 8 oz. when tested with MS3197 test pin

Moisture Resistance Ref. MIL-C-24308 — Exceeds test requirements of MIL-STD-202D, Method 106

Vibration Ref. MIL-C-24308 — Exceeds test requirements of MIL-STD-202D, Method 204, Condition B

Shock Ref. MIL-C-24308 — Exceeds test requirements of MIL-STD-202D, Method 213, Condition G

Corrosion Resistance Ref. MIL-C-24308 — Exceeds requirements of 48-hour exposure to salt spray in accordance with MIL-STD-202D, Method 101C, Condition B

High Potential Test Voltage Ref. MIL-C-24308 — MIL-STD-202D, Method 301

Temperature Cycling Ref. MIL-C-24308 — MIL-STD-202D, Method 102A, Condition D

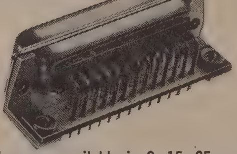
RIGHT ANGLE PC CONTACTS



These right-angle plugs are available in 9, 15, 25, and 37 contact configurations. The standard units listed herein are supplied with 0.040″ or 0.030″ nominal diameter pins that extend 0.093″ below the 90° bracket. Other pin diameters and lengths may be obtained on special order.

Design and construction of these connectors meets or exceeds many of the requirements of MIL-C-24308.

These right-angle D-Subminiature connectors will mate with any other D-Subminiature connector of the same insert configuration. Mating connectors may be adapted for cable attachment by means of accessory junction shells.

TRW® CINCH CONNECTORS

GOLDEN D MARK I CONNECTORS (Cont'd)

REMOVABLE COAXIAL, HIGH VOLTAGE, AND HIGH POWER CONTACTS

All coaxial and high voltage contacts have solder center contact. For coax, high voltage, and power contact material, see page 14.

COAXIAL CONTACT TERMINATIONS For D*M coaxial crimp tools, consult factory.

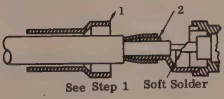
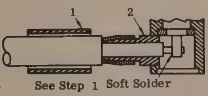
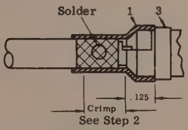
COAXIAL CABLE INSTALLATION INSTRUCTIONS

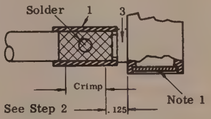
STRAIGHT COAXIAL **90° COAXIAL**





STEP 1. Slide outer ring (1) over cable jacket. Trim cable. Insert cable dielectric and center conductor into inside diameter of inner sleeve (2) solder center conductor to coaxial center contact.

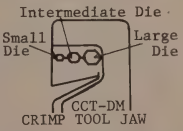




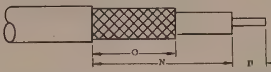
STEP 2. Slide outer ring (1) forward until flush with coaxial shell, (3) confining braid between outer ring and inner sleeve. For solder type coaxials, soft solder outer ring to assembly through cross-drilled solder hole. For crimp type coaxials, crimp with tool indicated being sure to crimp in area defined.

NOTES

1. Soft solder or stake access cap into shell after cable assembly on 90° type coaxials.
2. Crimp tool description — Cannon CCT-DM (to crimp outer sleeve only).
   - A. Use small die.
   - B. Use intermediate die.
   - C. Use large die.



3. Pin assemblies will accommodate high voltage and coaxial plugs only. Socket assemblies will accommodate high voltage and coaxial receptacles only.



TRIM COAXIAL CABLE TO THESE DIMENSIONS

TRW® CINCH CONNECTORS

ROYAL D MARK III CONNECTORS

GENERAL INFORMATION

The D*MA connector is a D-Subminiature Connector that utilizes the "Little Caesar" rear release contact assembly. This contact assembly allows rear insertion, release and extraction of crimp snap-in contacts. The simplified contact design with no undercuts offers greater bend resistance and a hard, closed entry socket insulator insures positive contact alignment. Crimp terminations accommodate #20, #22 and #24 AWG stranded wire and are rated for 5 amps.* ROYAL D-connectors are intermateable and interchangeable with all other D-Subminiature Connectors having compatible contact arrangement.

Polarization is by keystone shape of shell; coupling is by friction. Accessories are shown on pages 23 and 24. An extraction tool is supplied with ROYAL D-connectors. Extra contacts may be ordered for replacement purposes. See page 20 for ordering information.

MATERIALS, FINISHES AND TYPES

Shell:	Steel, cadmium plated with yellow chromate supplementary coating.
Insulator:	Diallyl phthalate, glass fibre filled, per MIL-P-19833, Type GDI-30F, royal purple color, monobloc construction.
Contacts:	Pin—leaded copper, gold plate over silver plate. Socket—copper alloy, gold plate over silver plate with stainless steel sleeves.
Current Rating:	(#20 Contacts) 5 amps.*
Contact Termination:	Crimp, accommodating #20, #22 or #24 AWG stranded wire. The 20-18 contacts accommodate one #18 or two #22 AWG stranded wires.
Contact Type:	Snap-in, removable, crimp, with rear release assembly. Contacts not interchangeable with other D Series.
Socket Type:	Closed entry.
Float Mounting	
Rivets & Washers:	Stainless steel.

For listing of applicable specifications, see page 11.

*Military rating of #20 contacts or wires is 1.5 amps average, and 7.5 amps maximum. See explanation on page 11.

PERFORMANCE DATA

VOLTAGE RATING:

Insulation Resistance Ref. MIL-C-24308	— Greater than 5000 megohms in accordance with MIL-STD-202D, Method 302, Condition B
Contact Resistance Exceeds Req'ts of MIL-C-24308	— (#20 contacts) 20 milliohms max. in accordance with Para 3.5.8
Contact Engagement Force Ref. MIL-C-24308	— .7 to 12 oz. when tested with MS3197 test pin
Contact Separation Force Ref. MIL-C-24308	— .7 to 8 oz. when tested with MS3197 test pin
Moisture Resistance Ref. MIL-C-24308	— Exceeds test requirements of MIL-STD-202D, Method 106
Vibration Ref. MIL-C-24308	— Meets test requirements of MIL-STD-202D, Method 204, Condition B
Shock Ref. MIL-C-24308	— Meets test requirements of MIL-STD-202D, Method 213, Condition G
Corrosion Resistance Ref. MIL-C-24308	— Exceeds requirements of 48-hour exposure to salt spray in accordance with MIL-STD-202D, Method 101A, Condition B
High Potential Test Voltage Ref. MIL-C-24308	— MIL-STD-202D, Method 301
Temperature Cycling Ref. MIL-C-24308	— MIL-STD-202D, Method 102A, Condition B

See tabulation on page 11.

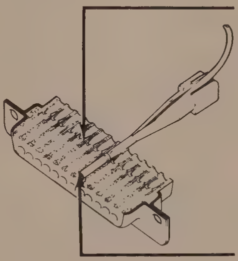
"LITTLE CAESAR" REAR RELEASE CONTACT ASSEMBLY

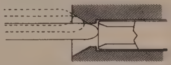
The "Little Caesar" rear release contact assembly permits contacts to be inserted by hand and to be released and extracted from the rear of the connector with a simple, expendable plastic tool.

The contact is inserted from the rear of the connector thru a cylindrical clip in the insulator until the indented tines of the clip snap securely behind the contact shoulder. The contact is released as the plastic tool is inserted into the rear of the connector, expanding the tines beyond the contact shoulder and permitting contact extraction. The simplified contact design improves bend resistance through a single holding shoulder with no undercuts.

The "Little Caesar" contact assembly was selected by the National Aerospace Standards Committee for use in a major industry connector specification for vital programs demanding great operational reliability.



Contact retaining clip.



Hard dielectric, closed-entry socket inserts realigns bent or misaligned pin contacts.

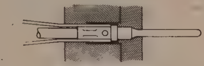
Simple stronger contact without undercuts for greater bend resistance.

CONTACT INSERTION

Contact partially inserted.

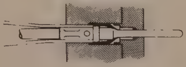
Tines snap behind contact shoulder when contact is fully inserted.

CONTACT EXTRACTION



Insert extraction tool to fully bottomed condition.

Tines expanded beyond contact shoulder.



Remove contact by pulling on wire.

Contact partially removed.

ORDERING INFORMATION FOR ADDITIONAL CONTACTS

All D*MA connectors are supplied with the proper number of crimp type contacts. Additional contacts may be ordered for replacement purposes as indicated.

INSTALLATION INSTRUCTIONS

RECOMMENDED PANEL MOUNTING CONFIGURATIONS

NOTES

1. A, B, and C minimum dimensions between panels represent a recommended limit to be approached in the design of the plug mounting means. The construction of this plug series permits normal operation when disengaged .030 above the minimum, indicated under any combination of mounting conditions.
2. On plugs with float hardware dimensions, apply as shown whether hardware is on socket (as illustrated) or pin side. Standard float mount plugs have sockets.
3. It is recommended that only one assembly, either pin or socket, be float mounted.
4. Float mount assemblies consist of .030 thick washers. Earlier versions (previous to September 1, 1961) contained .025 thick washers.
5. Standard pin assemblies contain .015 thick front shells on E and A sizes; .024 thick front shells on B, C and D sizes.
6. Standard plugs accommodate a number 4-screw. Float mounted plugs accommodate a #2 screw.

TRW® CINCH CONNECTORS

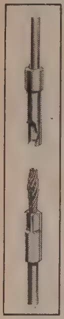
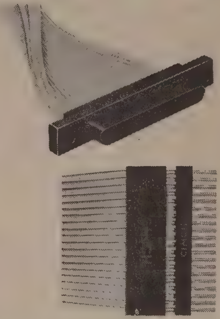
DURA-CON*SERIES MICROMINIATURE CONNECTORS ON .050" CENTERS



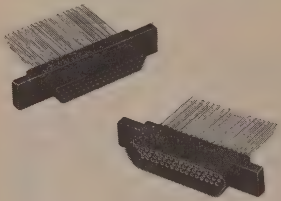


- High contact density with up to 266 contacts per square inch.
- Lightweight.
- Rugged, reliable contacts.
- Shock and vibration resistant.

The Cinch Dura-Con Series of Microminiature Strip and Rectangular connectors are ideally suited for space and weight reduction in miniaturized airborne electronics and for shorter signal paths in electronic data processing equipment. Both Cinch Dura-Con Series have rugged, high-performance contacts capable of providing shock and vibration proof continuity from dry circuit to three amperes current.

This is accomplished by making the pin the spring member. The Cinch Dura-Con is made from a precision miniature spring cable with a welded tip. The expanded cable provides seven spring members peripherally around the pin so that no matter what radial forces are applied, contact is maintained with the mating socket wall. Furthermore, this flexible spring pin can be bent many times without evidencing any metal fatigue. By protecting this pin in a recessed tolerance cavity, reliable mating is assured. Hence, despite its small size, the Cinch Dura-Con provides superior performance.

DURA-CON D RECTANGULAR MICROMINIATURE CONNECTORS



DURA-CON D RECTANGULAR CONNECTORS

This series of microminiature rectangular connectors is available in contact layouts with 9, 15, 21, 25, 37, and 51 positions. In addition to the ½" long #24 AWG solid copper leads and 18" long #26 AWG stranded Type E insulated wire terminations, this connector series can be supplied with custom terminations.

Contacts: 24 gage copper alloy, gold plated.
Insulator: Glass-filled polyester SE-0.

PERFORMANCE DATA

ELECTRICAL

Current Rating: 3 amperes.

Contact Resistance: Nominal 4 milliohms, maximum 8 milliohms

Dielectric Withstanding Voltage:
Sea Level: 900V RMS 60 Hz.
70,000 Ft.: 300V RMS 60 Hz.

Insulation Resistance: 5,000 megohms minimum.

MECHANICAL

Contact Engaging Force: 6 oz. per contact maximum.

Contact Separation Force: ½ oz. per contact minimum.

ENVIRONMENTAL

Temperature: −65°F to 300°F.

Vibration and Shock: No discontinuity detected (equipment sensitivity 6 nanoseconds) during 10 to 2,000 cps at .06" double amplitude or 50 g. 20 shocks 500 g.

Durability: Contact resistance still within specification after 500 cycles mating and unmating.

Salt Spray: No damage — Contact resistance still within specification after mated sample exposed 48 hours per MIL-STD-202B, Method 101A, Condition B.

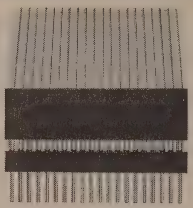
MICROMINIATURE STRIP CONNECTORS



DURA-CON STRIP CONNECTORS

For maximum flexibility of application, Cinch Dura-Con contacts are available in strips on .050" centers. By cutting, adding, or stacking, a variety of contact arrangements can be achieved. These versatile connector strips are available with up to 120 contact positions on special order. Moreover, guide pins that engage prior to the contact in the mating cycle, can be provided to assist in mating and polarization.

Contacts: 24 gage copper alloy, gold plated.

Insulator: Glass-filled polyester SE-0.

TRW® CINCH CONNECTORS

GENERAL FEATURES AND DESCRIPTION

CINCH SOLDERLESS RIBBON CONNECTORS

Now the popular Cinch Ribbon Connector is available with solderless terminations. This new Series of connectors is compatible in every way with 150,000,000 Cinch Ribbon Connectors now in use throughout the communications industry. The new Solderless Cinch Ribbon Connector Series can be assembled with automatic, semi-automatic or field assembly tools. They provide gas tight connections for both 24 and 26 gauge solid wire with speeds that far exceed conventional soldering techniques.

The newly designed Solderless Cinch Ribbon incorporates a built-in strain relief to prevent any inadvertant removal of wires. All existing Cinch Ribbon hardware is available on the new connectors.

BLUE RIBBON* CONNECTORS

Cinch's Blue Ribbon Connectors are ideal for a wide variety of applications. The smooth, easy insertion and extraction action and the self-wiping, self-cleaning features of both mating contact members give Blue Ribbon Connectors added reliability. The ribbon contact principal itself eliminates the possibility of bent contacts. Rack and panel plugs and receptacles are available with barrier-type polarization in four sizes: 8, 16, 24, and 32 contacts. Special 16-contact rack and panel plug and receptacle are also available with pin-type polarization.

CINCH RIBBON CONNECTORS

The extremely small Cinch Ribbon Connectors were designed to allow utilization of the unique "ribbon" contact features in miniaturization programs, particularly in airborne electronics and computer projects, for increased reliability. Available in as many as 50 contacts, it is possible to route a great many circuits through one or more small connectors at a great savings of space and weight. Mounting types include rack and panel, cable-to-chassis and cable-to-cable, each in 14, 24, 36, and 50-contact sizes. In addition, a special 50-contact "high barrier" plug and receptacle is also available for rack and panel or cable-to-cable mounting.

*Registered Trademark of Bunker-Ramo Corporation.

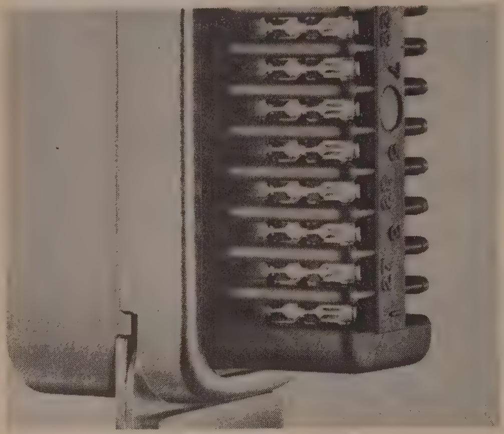
TRW® CINCH CONNECTORS

CINCH SOLDERLESS RIBBON CONNECTORS

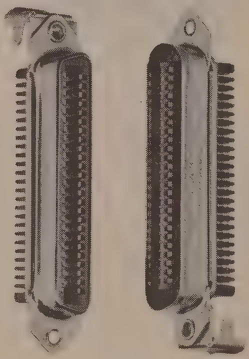


The Solderless Cinch Ribbon Connector has all the quality features of the solder type Cinch Ribbon Connectors, are intermateable and utilize all the same hardware.

The solderless Cinch Ribbon Series can be terminated with automatic, semi-automatic or field hand tools. Each contact provides four gas-tight connections for both 24 and 26 gauge solid wire. Termination speeds far exceed soldering techniques.

This newly designed connector incorporates a built-in strain relief in each contact to prevent any inadvertant removal of the wires; however, contacts can be reused without physical damage or electrical degradation.

CABLE-TO-CABLE PLUG & RECEPTACLE



Miniaturized rack and panel connectors utilizing "ribbon" contact feature. Smooth, easy insertion/extraction action plus the double-sided, self-cleaning, flexing action of both mating contact members provide added reliability. Shell-type polarization and float-mounted receptacle assure proper alignment. Insulator material is diallyl phthalate, Type MDG per MIL-M-14F. Plug and receptacle contacts are of cadmium bronze, ASTM-B-105, with a finish of .00002 gold per MIL-G-45204 Type II over copper flash. Shells are brass, ASTM-B-36 Alloy 6, with a finish of .0002 to .0004 zinc. No stripping of wires required for perfect connections, when terminated with Cinch Auto-Clinch, Clinch or Mini-Clinch tools.

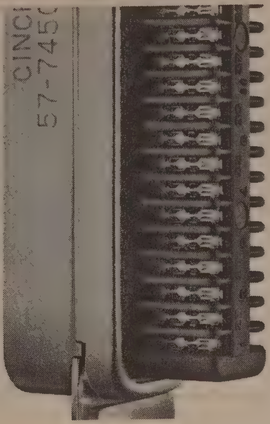
MATING PLUG & RECEPTACLE

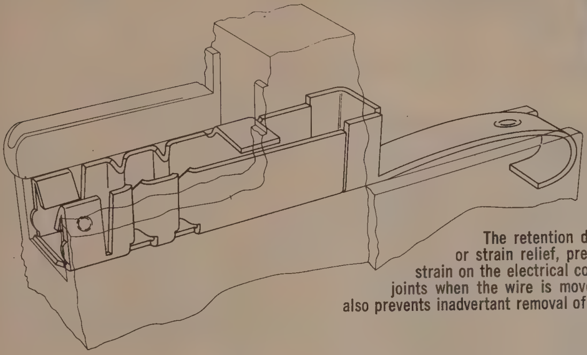
TRW® CINCH CONNECTORS

CINCH SOLDERLESS RIBBON CONNECTORS

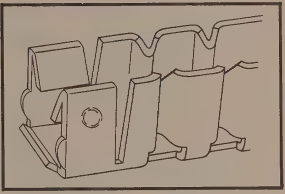
FEATURES

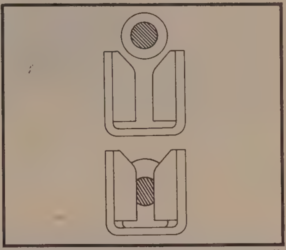
- Identical mating to standard solder type connector.
- Same contact material.
- Same mating and mounting dimensions.
- Will handle 24 and 26 gauge solid wire.
- Built-in wire restraint.
- 4 points of contact provide redundancy.
- Exactly same mounting and auxiliary hardware.
- Rapid field wiring.
- Totally interchangeable with existing Cinch Ribbon Connectors and hardware.



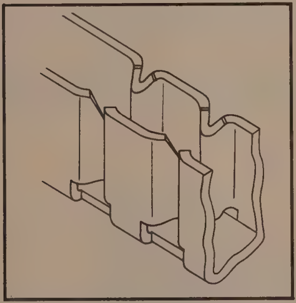


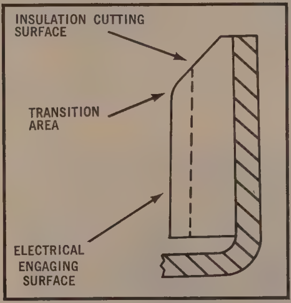
The retention device or strain relief, prevents strain on the electrical contact joints when the wire is moved. It also prevents inadvertant removal of wire.



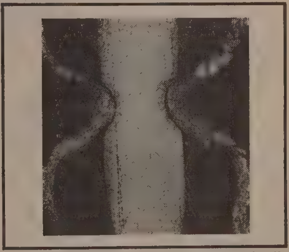


Insulation, both standard PVC and irradiated PVC is pierced sufficiently to facilitate electrical connection.





The shape of the wire terminating end of the contact is arranged with four indents. These indents are so constructed and shaped as to peel the insulation off the wire at these points. The step-by-step progression is as follows. As the wire enters, the insulation is peeled off by the ramp shape of the contact indents. This leads into a coined, relatively sharp area. As the wire, after the insulation is removed, progresses into the remaining contact pocket, the transition area permits the conductor to be deformed and held between each set of the two opposing indented sections. The result is four gas tight connections on each conductor.



Photomicrographic of 24 gauge longitudinal cross section of prime electrical contact area.

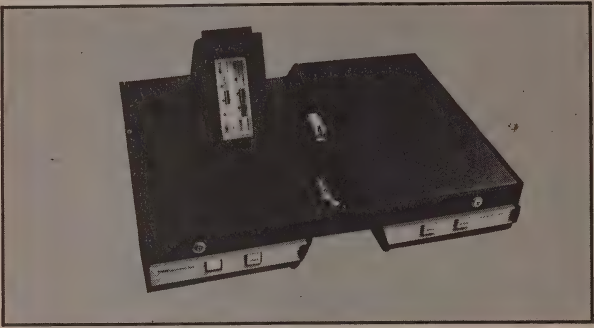
TRW® CINCH CONNECTORS

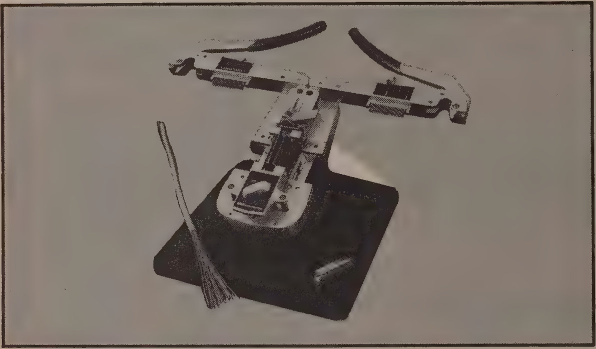
SYSTEMS FOR TERMINATING THE CINCH SOLDERLESS RIBBON CONNECTOR



AUTO-CLINCH

PART NO. 599-11-11-310

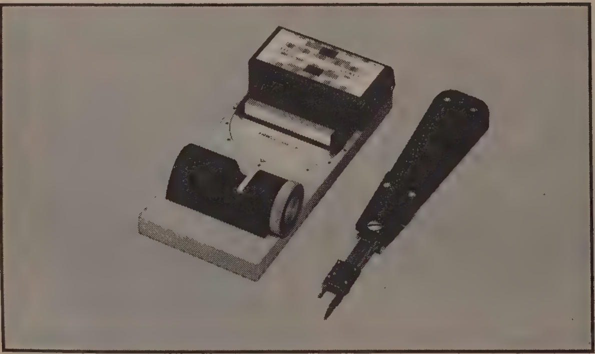
Auto-Clinch for rapid factory wiring. Completely terminates a 50-contact connector in less than 2 minutes. Has provision for omission of wires, inspection check during wiring, correction of errors and changing of wiring codes.



CLINCH

PART NO. 599-11-11-312

Clinch terminates a 50-contact connector in less than 4 minutes. Designed for field assembly and low production applications, it is readily portable and requires no set-up time.



MINI-CLINCH

PART NO. 599-11-11-309

Mini-Clinch is a lightweight belt-mounted unit that enables a serviceman in the field to terminate a 50-contact connector in less than 5 minutes. It can be used with 90° or 180° connectors. Wires are automatically cut as they are inserted into the terminals.

*Part numbers shown in listing have **clear** chromate finish. If finish of **yellow** chromate is desired, add "-1" to appropriate plug part number(s) in listing. (Example: 57-30240-1) and "-6" to appropriate receptacle part number(s). (Example: 57-40240-6.)

NOTES:

†These cable-to-cable receptacles are available for large volume requirements only; consult factory for details.

‡All dimensions are reference.

TRW/CINCH CONNECTORS, AN ELECTRONIC COMPONENTS DIV. OF TRW INC. / 1501 MORSE AVE. / ELK GROVE VILLAGE, ILL. 60007

CINCH RIBBON CONNECTORS (Cont'd)

SPECIAL "HIGH-BARRIER" RACK AND PANEL PLUG & RECEPTACLE

57-10500-6 57-20500-6

Available in 50-contact size only. Same as 50-contact rack and panel connector shown on page 5, except for a special "high barrier" (additional insulator material) interposed between opposite rows of contacts. Insulator body is molded of diallyl phthalate, type MDG per MIL-M-14F. Plug and receptacle contacts are of cadmium bronze, ASTM-B-105, with a finish of .00003 gold per MIL-G-45204 type II over gold flash per MIL-G-45204 type I over .00005 copper per MIL-C-14550. Shells are brass, ASTM-B-36 Alloy 6, with a finish of .0002 to .0004 zinc. Polyethylene dust covers also available as shown below.

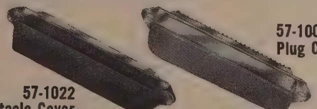
POLYETHYLENE DUST COVERS



57-1008 Plug Cover

57-1022 Receptacle Cover

The 50-contact Cinch Ribbon connectors can be supplied with optional polyethylene dust covers. Two types of covers are available: one for the plugs and one for the receptacles. The plug cover is blue and fits inside the shell. The receptacle cover is red and fits outside the shell. The covers can be used only with these 50-contact size connectors.

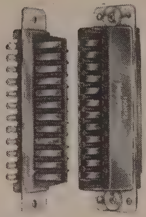
RACK AND PANEL PLUGS & RECEPTACLES — BARRIER POLARIZATION TYPE



26-4100-24P 26-4200-24S

The interlocking design of these mating plug and receptacle bodies provides positive polarization equal to any other type. This barrier-type polarization makes visual alignment unnecessary since it is not dependent on contact arrangement. The float-mounted receptacle allows for possible misalignment with the mating plug. Insulator material is diallyl phthalate, type MDG per MIL-M-14F. Plug contacts are of copper, ASTM-B-152, type ETP, with a finish of .00002 gold per MIL-G-45204 type II over copper flash. Receptacle contacts are of phosphor bronze, ASTM-B-103, MIL-B-892, Grade A, with the same finish as on the plug contacts. The mounting plate, of corrosion resistant, passivated stainless steel, provides a sturdy mounting.

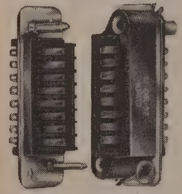
RACK AND PANEL PLUG & RECEPTACLE — PIN POLARIZATION TYPE



26-159-16 26-190-16

Combining pin-type polarization with unique spring contact construction, this plug and receptacle assure positive contact even under the most severe conditions of vibration. Receptacles are float-mounted to allow possible misalignment in mating with the plug. Insulator material is diallyl phthalate, type MDG per MIL-M-14F. Plug contacts are of copper, ASTM-B-152, type ETP, with a finish of .00002 gold per MIL-G-45204 type II over copper flash. Receptacle contacts are of phosphor bronze, ASTM-B-103, MIL-B-892, Grade A, with the same finish. Plug guide pins and receptacle guide pin bushings are aluminum. The mounting plate is corrosion resistant, passivated stainless steel. The only size available at the present time is 16-contact.

TRW/CINCH CONNECTORS, AN ELECTRONIC COMPONENTS DIV. OF TRW INC. / 1501 MORSE AVE. / ELK GROVE VILLAGE, ILL. 60007

TRW® CINCH CONNECTORS

GENERAL DESCRIPTION AND SPECIFICATIONS

The "Jones" Barrier Terminal Block is designed to offer increased insurance against failure of electrical/electronic circuitry. By interposing barriers between each adjacent terminal position, not only are much higher voltage ratings obtained, but an additional safeguard is created against frayed wire faults.

The various barrier block series shown in this catalog make it possible to select the combination of mechanical and electrical characteristics which best meet the exact requirements of the application. Over-sizing and under-rating are minimized, resulting in considerable cost savings. Also, the selection of optional terminals and fanning strips available permits the equipment designer to choose the method of termination most suitable for his environmental specifications and manufacturing requirements.

The standard barrier block insulator body is made of general purpose black phenolic. However, a large number of optional insulator materials are available upon request, including mica, diallyl phthalate, melamine and alkyd. Barrier block eyelets and binder head screws are made of brass nickel-plated. Optional terminals, such as the "W," "¾W" and "Y" are brass, hot solder finish. Fibre or XP phenolic marker strips are available on nearly all barrier blocks as indicated on each page. Fanning strips are all laminated XP black phenolic with cadmium-plated brass terminals.

Electrical ratings for all barrier block series are shown below. Otherwise, all the necessary ordering information for each series is shown complete on its own page. This includes specifications, dimensional data and a convenient part number listing. Refer to the index on this page to locate each individual series and its appropriate page number.

Many of the "Jones" barrier terminal blocks and accessories shown throughout this catalog are also available locally through **authorized Cinch Distributors** usually at a savings in delivery time and freight costs. For your convenience, those items normally carried in local stock by Cinch Distributors are indicated on each appropriate page of the catalog by the symbol Ⓒ.

ELECTRICAL RATINGS FOR BARRIER BLOCKS

Series	Max. Volts rms without Marker Strip	Max. Volts rms with Marker Strip	Max. Current in Amps	Max. Watts per Terminal

540†	2,300	2,300	15	3,750
541†	2,800	2,800	20	5,000
542†	4,000	4,000	30	7,500

*No marker strip available.

†Bottoms are closed; marker strip does not affect voltage rating.

‡The current rating of the 171, 173 and 174 Series is governed by the size of the wire being used. The ratings shown below would be typical when used with the following wire sizes:

Series	Wire	Rating
171	2 solid #18 wires	6 amps.
173	2 solid #16 wires	10 amps.
174	2 solid #16 wires	10 amps.

FOR CROSS-REFERENCE BETWEEN NEW AND OLD PART NUMBERS

Request Cinch Form C-44A from your local Cinch Representative or write us direct. This form provides a convenient cross-reference between the new Cinch part numbers shown in this catalog and the old "Jones" part numbers used previously.

TRW® CINCH CONNECTORS

140 SERIES

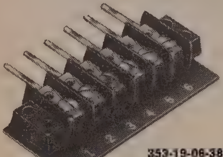
BARRIER TERMINAL BLOCKS AND MARKER STRIPS

353-11-06-001
Barrier Terminal Block with
363-11-06-011
Marker Strip (Imprinted)

Available in 1 to 25 terminal sizes with standard, "W," "¾W" and "Y" type terminals. Has 5-40 binder head screws. Accommodates up to #14 solid wire. Terminal centers are ⅜". Creepage distance from terminal to terminal and terminal to ground is ¼". Materials and finishes designated below. Electrical ratings are shown on the inside front cover.

Marker strips are available to mount beneath barrier block and afford additional insulation for metal mounting surface. "Single" marker strips that extend out on only one side are shown in listing below; "double" marker strips extending out on both sides are also available. Marker strips can be imprinted with terminal designations as described on page 12.

WITH WRAPOST TERMINALS



353-19-06-383
Barrier Terminal Block with
363-11-06-011
Marker Strip (Imprinted)

"Jones" Barrier Blocks with wrapost terminals on one side permit faster connections—four times faster than standard screw terminals. There are three terminal angles presently available—parallel to, at a 45° angle to, and perpendicular to the mounting surface. Choose the angle that best suits your application.

Available in 1 to 25-terminal sizes with each of the terminal angles. Has 5-40 binder head screw opposite terminal. Terminal centers are ⅜". Creepage distance is ¼". Materials and finishes designated below. Electrical ratings are shown on the inside front cover.

Standard 140 Series marker strips are available to mount beneath the barrier block and insulate against the metal mounting surface. "Single" or "double" marker strips are available. Marker strips can be imprinted with terminal designations as shown on page 12.

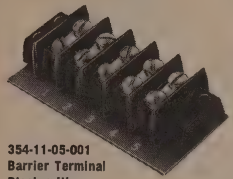
BARRIER TERMINAL BLOCKS AND MARKER STRIPS



354-11-05-001
Barrier Terminal
Block with
364-11-05-011
Marker Strip (Imprinted)

Available in 1 to 20-terminal sizes with standard, "W," "¾W" and "Y" type terminals. Has 6-32 binder head screws. Accommodates up to #12 solid wire. Terminal centers are 7⁄16". Creepage distance from terminal to terminal is ⅜" and terminal to ground is 5⁄16". Materials and finishes described below. Electrical ratings shown on inside front cover. Marker strips are available to mount beneath barrier block and provide insulation for metal mounting surface. "Single" or "double" marker strips are available. Marker strips can be imprinted with terminal designations as described on page 12.

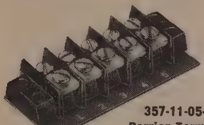
WITH QUICK-CLAMP* TERMINALS



357-11-05-001
Barrier Terminal
Block with
364-11-05-011
Marker Strip (Imprinted)

141 Series Barrier Blocks with Quick-Clamp Terminals permit efficient rapid assembly without costly wire terminals and without bending conductors around screws. Just insert the conductors and tighten screws to make positive contact.

Available in 1 to 20-terminal sizes for one side only, both sides, with "¾W" connection on one side and with "Y" connection through the panel. Uses 6-32 binder head screws. Terminal centers are 7⁄16". See page 12 for more complete description on the terminal itself and wire gauges accommodated. Materials and finishes described below. Electrical ratings are shown on the inside front cover.

141 Series marker strips are available to mount beneath the barrier block and provide insulation from the metal mounting surface. "Single" or "double" marker strips are available. Terminal designations can be imprinted on marker strips as shown on page 12.

* Patend Pending

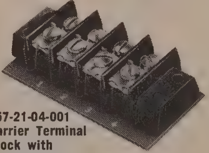
WITH QUICK-CLAMP* TERMINALS



357-21-04-001
Barrier Terminal
Block with
365-11-04-011
Marker Strip (Imprinted)

142 Series Barrier Blocks with Quick-Clamp Terminals permit fast, efficient assembly without costly wire terminals and without bending conductors around screws. Insert the conductors, tighten the screws and positive contact is made.

Available in 1 to 17-terminal sizes for one side only, both sides, with "¾W" connection on one side and with "Y" connection through the panel. 8-32 binder head screws are used. 9⁄16" terminal centers. Refer to page 12 for more complete description on the terminal itself and wire gauges accommodated. Materials and finishes described below. Electrical ratings are shown on the inside front cover.

142 Series marker strips are available to mount beneath the barrier block and afford insulation from the metal mounting surface. "Single" or "double" marker strips are available. Marker strips can be imprinted with terminal designations as shown on page 12.

*Patent Pending

INSULATOR MATERIAL: General Purpose Black Phenolic; Other Materials Available.

EYELET and SCREW MATERIAL and FINISH: Brass, Nickel-Plated.

"W," "¾W" and "Y" TERMINAL MATERIAL and FINISH: Brass, Hot Solder Dipped.

QUICK-CLAMP TERMINAL MATERIAL and FINISH: Brass, Electro-Tinned.

MARKER STRIP MATERIAL: 1⁄32" Black Fibre; Also Available in 1⁄32" XP Phenolic.

* Marker strip part numbers shown are "single sided" not imprinted type that extend out on only one side; equivalent "double" type strips extending out on both sides also available. To order change second field to 14. To order imprinted marker strips change fourth field from 010 to 011.

150 SERIES
BARRIER TERMINAL BLOCKS AND MARKER STRIPS

Available in 1 to 10-terminal sizes with standard, "W," "¾W" and "Y" type terminals. Uses 10-32 binder screws. Accommodates up to #10 wire or 50 amp solder lug for #6 stranded wire. Terminal centers are 1 1/16″. Creepage distance from terminal to terminal is ⅝″; from terminal to ground is 7/16″. Materials and finishes described below. Electrical ratings are shown on the inside front cover.

Marker strips are available to mount beneath barrier block and provide insulation for metal mounting surface. "Single" or "double" marker strips are available. Terminal designations can be imprinted on marker strips as shown on page 12.

151 SERIES
BARRIER TERMINAL BLOCKS AND MARKER STRIPS

Available in 1 to 8-terminal sizes with standard, "W" and "¾W" type terminals. Has 12-32 binder head screws. Accommodates up to #8 wire or 70 amp solder lug for #4 stranded wire. Creepage distance is ¾″ from terminal to terminal and ½″ from terminal to ground. ⅞″ terminal centers. Materials and finishes described below. Electrical ratings are shown on the inside front cover.

Marker strips to mount beneath barrier block and provide insulation for metal mounting surface are available. "Single" or "double" marker strips are available. Marker strips can be imprinted with terminal designations as described on page 12.

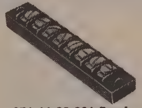
171 SERIES

BARRIER TERMINAL BLOCKS



351-11-08-001 Barrier Terminal Block

A miniature barrier terminal block with single screw terminals. Available in 1 to 8 terminal sizes with standard type terminal only. Has 2-56 x 3/16" binder head screws. Terminal centers are ¼". Insulator material is general purpose black phenolic. Eyelets and screws are brass with nickel-plated finish. Marker strips are not available for use with the 171 Series.

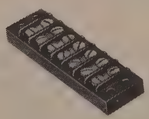
172 SERIES

BARRIER TERMINAL BLOCKS



351-21-08-001 Barrier Terminal Block

Miniature barrier terminal block with double screw terminals. Available in 1 to 14-terminal sizes with standard, "W," "¾W" and "Y" type terminals. 2-56 binder head screws. ¼" terminal centers. Insulator molded of general purpose black phenolic. Eyelets and screws are nickel-plated brass. "W," "¾W" and "Y" terminals are made of brass, hot solder dipped. Marker strips are available; write for details.

173/174 SERIES

BARRIER TERMINAL BLOCKS

352-11-08-001
Barrier Terminal Block

173 SERIES

Single-screw terminal barrier blocks available in 2 to 10-terminal sizes. Has 4-40 x 5⁄16″ Sems type binder head screws. Terminal centers are 3⁄8″. Insulator is general purpose black phenolic. Eyelets and screws are nickel-plated brass.

174 SERIES

Same as 173 Series except the screws are 4-40 x 1⁄4″ plain binder head type. 2 to 10-terminal sizes. 3⁄8″ terminal centers. Same insulator material. Same eyelet and screw material and finish.

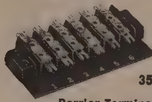
240/241/242 SERIES

BARRIER TERMINAL BLOCKS AND MARKER STRIPS



359-14-06-001
240 Series
Barrier Terminal Block with
363-11-06-011 Marker Strip
(Imprinted)

Similar to the 140, 141 and 142 Series except that solder terminals are used instead of screw terminals. These solder terminals are designed to accommodate one or more wires, which can be brought through slot into hole, simplifying soldering. Terminal sizes available are: 1-25 for the 240 Series, 1-20 for the 241 and 1-17 for the 242. Terminal centers are shown in the dimensional drawings. Materials and finishes are described below. Electrical ratings are shown on the inside front cover. Marker strips that mount beneath barrier block and afford insulation from metal mounting surfaces are available in either "single" or "double" type. See page 12 for information on imprinting terminal designations in these marker strips.

BARRIER TERMINAL BLOCKS AND MARKER STRIPS

359-44-03-001
250 Series
Barrier Terminal Block
with 366-11-03-011
Marker Strip (Imprinted)

Similar to the 150, 151 and 152 Series except for use of solder terminals instead of screw terminals. Solder terminals accommodate one or more wires that can be brought through slot into hole, simplifying solder operation. Terminal sizes available include: 1-10 for the 250 Series, 1-8 for the 251 and 1-6 for the 252. Refer to dimensional drawings for terminal centers. Materials and finishes are described below. Electrical ratings are shown on inside front cover. "Single" or "double" marker strips are available to mount beneath barrier block and provide insulation from metal mounting surface. Terminal designations can be imprinted on marker strips as described on page 12.

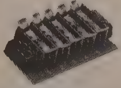
TRW® CINCH CONNECTORS

341/342 SERIES

BARRIER TERMINAL BLOCKS AND MARKER STRIPS



354-32-05-001 341 Series Barrier Terminal Block with 364-11-05-011 Marker Strip (Imprinted)

Similar to 141 and 142 Series except equipped with solderless-type terminals to accommodate either AMP tab receptacles or Ark-Les quick connects. (Contact manufacturer for exact part number.) Terminal sizes available are 1-20 for the 341 Series and 1-17 for the 342. A variety of terminal types are available for each series as shown. Refer to dimensional drawings for terminal centers. Materials and finishes are described below. Electrical ratings are shown on inside front cover.

"Single" or "double" type marker strips can be supplied to mount beneath barrier block and afford insulation from metal mounting surfaces. Terminal designations can be imprinted on marker strips as described on page 12.

9 different types of terminals can be supplied with any of the 341 or 342 Series barrier blocks. Identify these types by changing the **second field** of the part number to match the 341 or 342 series number opposite the desired terminal drawing below. For example, to order a 5-terminal 341 Series with both terminals at right angles (Type C), signify part no. 354-33-05-001. In addition, there are 4 more terminal types as shown which can be ordered in combination with the 9 regular terminal types. To order any of these 4 "combination" types, write direct to the factory for more further information, enclosing detailed drawings where possible.

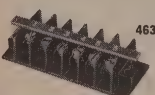
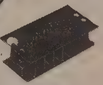
540 SERIES

BARRIER TERMINAL BLOCKS AND MARKER STRIPS



Drive Pin 463-10-22-015

353-21-06-001 Barrier Terminal Block with 363-21-06-071 Marker Strip (Imprinted)



353-21-06-001 Barrier Terminal Block with 363-31-06-020 "Cover"

Available in 1 to 31 terminal sizes with standard, "W," "¾W" and "Y" type terminals. Particularly recommended when electrical and mechanical performance requirements are especially critical. Same terminal centers (⅜") as 140 Series. Also uses same 5-40 binder head screws. Otherwise, has higher and wider barriers. Extra material between barriers at the base strengthens construction and maintains same ½" creepage distance between terminal to terminal and terminal to ground. Terminal designations can be imprinted on this base. Materials and finishes are described below. Electrical ratings are shown on inside front cover.

Bottoms are closed so that insulating strips are not required. However, knockouts are molded into the base so that "Y" terminals can be accommodated if desired. A top-mounted marker strip, ¼" wide is available and can be imprinted with ⅛" numbers or a "double" marker strip can be used as a "cover" with one end position slotted to facilitate swinging the cover clear for quick inspection. Character designations can be imprinted on one or both sides of the cover if desired as described on page 12.

INSULATOR MATERIAL: General Purpose Black Phenolic; Other Materials Available.
TERMINAL and SCREW MATERIAL and FINISH: Brass, Nickel-Plated.
"W," "¾W" and "Y" TERMINAL MATERIAL and FINISH: Brass, Hot Solder Dipped.

* Marker strip part numbers shown are "single sided" not imprinted type that extend out on only one side; equivalent "double" type strips extending out on both sides also available. To order change second field to 14. To order imprinted marker strips change fourth field from 010 to 011.

† See information on "341 and 342 Series Terminals" on how to signify desired terminal type by changing second field part numbers above. "31" and "21" are given as examples.

341 and 342 SERIES TERMINAL MATERIAL and FINISH: Brass, Cadmium-Plated.
341 and 342 SERIES MARKER STRIP MATERIAL: 1/32" Black Fibre; Also Available in 1/32" XP Phenolic.

‡ 17/64" spacers should be used with the 540 Series cover available on special request.

§ TOP-MOUNTED MARKER STRIP MATERIAL: 1/16" XP Phenolic.

¶ COVER (DOUBLE MARKER STRIP) MATERIAL: 1/32" XP Phenolic.

(CD) Indicates items normally available through Cinch Distributors.

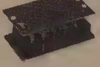
354-61-05-001 Barrier Terminal Block with 364-61-05-071 Marker Strip (Imprinted)



354-61-05-001 Barrier Terminal Block with 364-71-05-020 "Cover"

Available in 1 to 30 terminal sizes with standard, "W," "¾W" and "Y" type terminals. Ideal for higher voltage requirements. Same terminal centers (7/16″) as 141 Series. 6-32 binder head screws. Has higher and wider barriers with extra material between barriers at the base. Creepage distance is ⅝″ between terminal to terminal and terminal to ground. Terminal designations can be imprinted on base. Materials and finishes are described below. Electrical ratings are shown on inside front cover.

Insulating strips are not required because of closed bottoms on barrier block. However, "Y" terminals can still be accommodated if desired through use of knockouts molded into base. Top-mounted ¼″ wide marker strip is available and can be imprinted with ⅛″ numbers or a "double" marker strip can be used as a "cover" with one end position slotted to facilitate swinging clear. Cover can be imprinted with character designations on one or both sides as described on page 12.

355-31-04-001 Barrier Terminal Block with 365-31-04-071 Marker Strip (Imprinted)

355-31-04-001 Barrier Terminal Block with 365-41-04-020 "Cover"

Available in 1-26 terminal sizes with standard, "W," "¾W" and "Y" type terminals. Higher and wider barriers increase voltage ratings. Same 9/16″ terminal centers as 142 Series. Also uses 8-32 x 5/16″ binder head screws. Extra material between barriers at base adds strength and maintains same ¾″ creepage distance between terminal to terminal and terminal to ground. Terminal designations can be imprinted on base. Materials and finishes described below. Electrical ratings shown on inside front cover.

Bottoms are closed, eliminating need for insulating strips. Knockouts are molded into base to accommodate "Y" terminals if desired. Top mounted ¼″ wide marker strip is available and can be imprinted with ⅛″ numbers or a "double" marker strip can be used as a "cover" with one end position slotted to facilitate swinging clear for fast inspection. Character designations can be imprinted on one or both side of the cover if desired.

FANNING STRIPS

FOR CONNECTING TO BARRIER TERMINAL BLOCKS

161 Series Fanning Strip with Cable Clamp and 141 Series Barrier Terminal Block

Fanning strips serve as a convenient means for rapidly making and removing connections from barrier terminal blocks. They facilitate cable or harness wiring and minimize the possibility of subsequent wiring errors. Both straight and angle type fanning strips are available. Terminals are made of .032″ brass, cadmium-plated. The 3/32″ thick, ½″ wide XP black phenolic mounts are furnished with a hole, in either the right or left side, for securing the cable with lacing twine. For larger sizes, use of a cable clamp as shown on page 12 is recommended.

TRW® CINCH CONNECTORS

OPTIONAL TERMINALS, JUMPERS AND CABLE CLAMPS

SOLDER TERMINALS

"W"

"¾W"

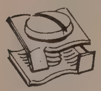
"Y"

"W," "¾W" and "Y" terminals are available optionally as separate terminals for use with 140, 141 and 142 Series barrier blocks as indicated below. Also specify hot solder dipped finish when ordering.

SOLDER TERMINALS PART NUMBER ORDERING INFORMATION

FOR:	"W" TYPE	"¾W" TYPE	"Y" TYPE
140 Series	495-11-11-017	495-11-11-019	495-12-11-016
141 Series	495-11-11-020	495-11-11-022	495-12-11-012
142 Series	495-11-11-023	495-11-11-025	495-12-11-011

QUICK-CLAMP* TERMINALS



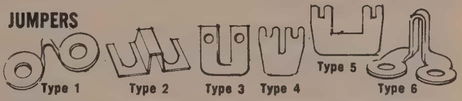
Simplifies engaging of wires to barrier blocks. Wire is inserted into flared opening and screw is tightened. Screws are nickel-plated brass, binder head type. Terminals are electro-tinned brass. Set includes two mating clamps and one screw. For use with 141 and 142 Series barrier blocks as shown below.

* Patent Pending

QUICK-CLAMP* TERMINALS PART NUMBER ORDERING INFORMATION

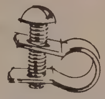
FOR:	PART NO.	WIRE GAUGES	SCREW SIZE
141 Series	422-14-11-143	14 thru 22	6-32 x 5⁄16"
142 Series	422-14-11-144	8 thru 16	8-32 x ⅜"

JUMPERS



Used for making permanent connections between adjacent barrier block terminals, except for type 5, which connects two alternate terminals bridging the intermediate terminal. Six types for use with 140, 141, 142, 540, 541 and 542 Series barrier blocks as shown. All jumpers are brass with nickel-plated satin finish.

CABLE CLAMPS



For use with "Jones" Fanning Strips shown on page 20. Recommended for securing the cable where at least several conductors are to be terminated with fanning strips. As indicated, six different inner diameter sizes are available. Clamps and 6-32 x ½" round head screws are brass, nickel-plated. For convenience cable clamps are supplied unassembled.

PART NUMBER ORDERING INFORMATION

JUMPERS			CABLE CLAMPS	
FOR:	PART NO.	TYPE	INNER DIA.	PART NO.
141 Series	422-13-11-026	1	¼"	422-04-11-109

SEMS SCREW TERMINALS

The Sems screw termination, with integral lockwasher, permits rapid, permanent attachment of solid or stranded wire leads or spade lug terminations to the barrier terminal block. The lockwasher teeth cut into the termination material, assuring excellent electrical contact and the ability to withstand substantial strain and vibration.

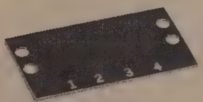
The Sems screws are nickel plated brass and the lockwasher is nickel plated phosphor bronze.

When ordering by ten digit manufacturing part number, change second digit from 11 to 12. (Example: 355-12-02-001)

When ordering by distributor part number, add letter (E). (Example: 2-140-E)

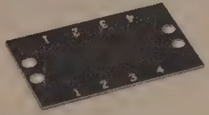
IMPRINTING INFORMATION ON MARKER STRIPS

"SINGLE" MARKER STRIPS



All "single" marker strips, extending out on only one side, as shown in this catalog, can be supplied at extra cost with terminal designations as desired, imprinted directly on the strips. Either 3⁄32" or ⅛" high letters, number, words or symbols can be imprinted in white. If no preference is given, the size best suited for the particular order will be used. Each imprinting order necessitates a set-up charge in addition to regular imprinting charges based on the number of characters and panels. Please make sure all imprinting instructions are clear and concise.

"DOUBLE" MARKER STRIPS



"Double" marker strips, extending out on both sides, can also have terminal designations imprinted at extra cost on one or two sides, if desired. Either 3⁄32" or ⅛" high letters, numbers, words or symbols can be imprinted in white and if no preference is given, the best suited size for the particular order will be used. When used as a "cover" for the 540, 541 or 542 Series, "double" marker strips can also be imprinted on either side, as specified. Regular imprinting and set-up charges apply. Please indicate whether the marker strip is being used as "double" or "cover."

SPECIAL TOP-MOUNTED MARKER STRIPS

Special marker strips used on top of 540, 541 and 542 Series barrier blocks can be imprinted with terminal designations at extra cost. Either ⅛" letters, numbers, words or symbols can be imprinted in white. Each imprinting order requires both set-up and regular imprinting charges. Please make sure all necessary instructions are included.

TRW® CINCH CONNECTORS

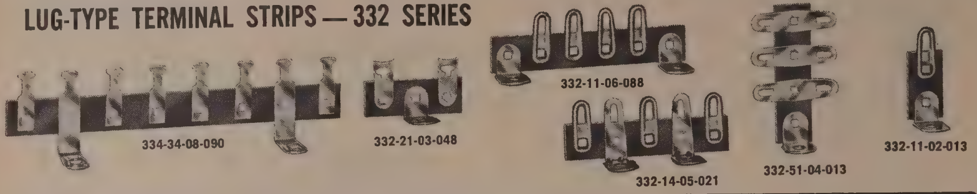
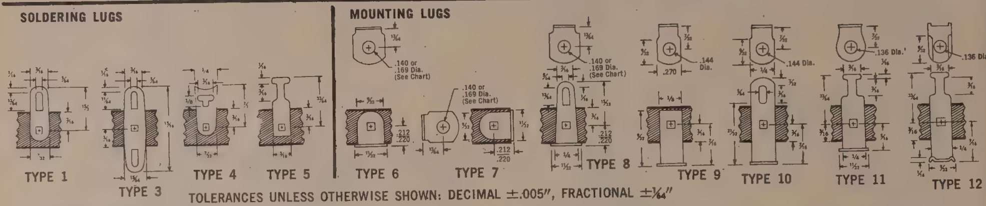
LUG-TYPE TERMINAL STRIPS — 332 SERIES





TOLERANCES UNLESS OTHERWISE SHOWN: DECIMAL ±.005″, FRACTIONAL ±¹⁄₆₄″

Two-lug to nine-lug strips made of ¹⁄₁₆″ thick by ⅜″ wide polyester UL approved 94V0 with cadmium plated steel lugs securely eyeletted in position. Brass lugs also available on request. ⅜″ or ½″ terminal centers. The chart above illustrates (with dimensions) the various soldering and mounting lug types available. These type numbers are shown in the part number listings below to designate the exact lug used in each position on the strip, in sequence from left to right.

TWO-LUG TERMINAL STRIP PART NUMBERS

Part No.	Lug Types Used In Positions: 1	2	Spacing Between Lugs	Terminal Strip Length	Mtg. Hole Dia.
332-11-02-001 (CD)	1	6	⅜″†	¾″	.140″

*Available for large volume requirements only; consult factory for details.

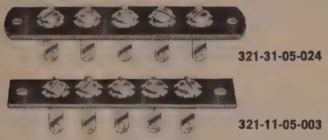
†Also available with ½″ spacing between lugs.

‡Also available with .169″ diameter mounting holes.

(CD) indicates items normally available through Cinch Distributors.

TRW® CINCH CONNECTORS

MINIATURE TERMINAL STRIPS — 321 SERIES



Screw type binding posts available with 7/16″, 15/32″, ½″, 21/32″, or ¾″ terminal centers in sizes as shown below. Insulation is polyester UL approved 94VO, 1/16″ thick for 1 to 6 terminal sizes, 3/32″ thick for all others. Screws are No. 6-32 x ⅜″ cadmium plated steel, binder head. Terminals are .032″ brass, cadmium plated. The link shown as Part No. 422-13-22-003 is .032″ cold rolled steel and can be swung to either right or left. Screw and terminal assembly can be ordered separately as shown.

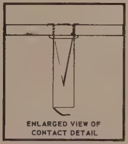
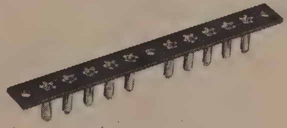
WIRE-GRIP TERMINAL STRIPS — 336 SERIES





Cinch wire-grip* terminal strips provide the ideal quick, low cost termination for radio . . . TV . . . phonograph chassis assembly. Patented solder well construction holds wires securely to facilitate multiple-dipping or individual soldering. Strips available in lengths up to 26 positions including mounting holes. Insulator material ½″ wide by 1/16″ thick is available in laminated phenolic, Stradoclad 102, or UTS 1478, or GPO-2. Terminal material is brass, available in either cadmium or electroless-tin finish. .136″ diameter holes available in any position for use with eyelets or screws.

TYPICAL ASSEMBLY DIMENSIONS

⅜″	.300

HOW TO ORDER

SPECIFY

1. No. of Terminals.
2. List Terminals (T) and Mounting Holes (MH) by Position.
3. Choose insulator material . . .
   a. Laminated Phenolic (Stradoclad 102)
   b. Laminated Phenolic (UTS, 1478)
   c. (GPO-2)
4. Terminal Finish . . . Electroless Tin Plate.

*Manufactured under license agreement with Malco Manufacturing Company.

EXAMPLE: (as for typical assembly shown above)

1. 10 Terminals.
2. Pos. 1-MH, Pos. 2-T, Pos. 3-T
   Pos. 4-T, Pos. 5-T, Pos. 6-T
   Pos. 7-MH, Pos. 8-T, Pos. 9-T
   Pos. 10-T, Pos. 11-T, Pos. 12-T
   Pos. 13-MH
3. UTS 1478 Laminated Phenolic.
4. Plated Electro Tin.

TRW® CINCH CONNECTORS

FLAME PROOF REQUIREMENTS For those who must consider the new requirements for flamability, all materials used in the parts listed in this catalog are considered self-extinguishing, and will, in general meet the UL requirements of Group II. Please consult factory for availability of parts meeting SE-1 or SE-0 as many are available on order.

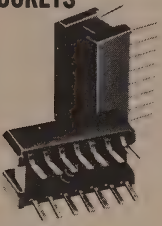
DIP SOCKETS



These dual-inline package sockets are designed for testing, prototype or production applications. They offer excellent resistance to corrosive atmospheres and to extremes of temperature and humidity. The unique bowed contact provides high contact forces, yet permits easy insertion and removal of the DIP.

The sockets will accept any standard 14, 16 or 24-lead DIP with round or flat centers. The socket leads are on the same centers as the DIP leads so the sockets can be used with PC boards designed for direct insertion of the DIP.

Cinch DIP sockets are available with diallyl phthalate, GP black phenolic or glass nylon insulation. Contacts on PC and solder tail versions are beryllium copper, and on wirewound versions are phosphor bronze. Contact plating is gold or electro-tin plate.

TRW® CINCH CONNECTORS

IC SOCKETS

TO-5 CASE SOCKETS

These Cinch miniature sockets are designed especially for integrated circuits mounted in 6, 8 or 10-lead TO-5 cases. They provide a convenient, dependable means of installing or removing IC's from the printed circuit board. Interconnections can be made without bending the leads, which substantially reduces the possibility of breaking leads or destroying the hermetic seal of the cases. Insulation material is diallyl phthalate Type SDG, contacts are beryllium copper with 30 micro-inches of gold over a copper flash.

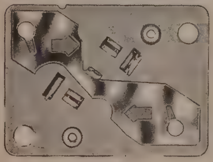
POWER TRANSISTOR SOCKETS



TYPE 14

Type 14 and 15 power transistor sockets with laminated top and bottom plates are used under the most severe vibration conditions because of high initial withdrawal force. Transistor can be grounded to collector plate and at the same time be completely insulated from the chassis. Type 14 and 15 top and bottom plates are made of Valox 310. Collector plates are cadmium-plated steel and contacts are made of cadmium-plated brass. Type 16 power transistor socket with molded insulator body is designed for mobile communication receivers. Type 16 socket has an insulating body of general purpose black phenolic (also available in mica and diallyl) and contacts are phosphor bronze, cadmium plated.

GENERAL PURPOSE TRANSISTOR SOCKETS TYPE 13

Multi-purpose all-molded sockets designed to the triangular base layout (.2″ x .1″ JETEC-30 contact centers) as well as the 3-contact in-line layout (.048″ x .192″ contact centers). Insulator material is either general purpose black phenolic or mica-filled low loss phenolic (Type MFE per MIL-M-14). Contacts are made of phosphor bronze, cadmium plated. Sockets may be used with E3-14, E3-15, E3-25, E3-32, E3-43, E3-44 and E3-51 EIA base designations.

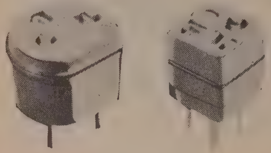
TRW® CINCH CONNECTORS

MINIATURE SEMICONDUCTOR SOCKETS

TO-5 AND TO-18 CASE DEVICES



This group of semiconductor sockets, for printed circuit board insertion, covers the standard configurations in most common use today.

Their low profile (.250″) makes them especially applicable in high density applications. All units are made of MFE, mica-filled phenolic, and the six position TO-5 socket, is also available in FEP fluoro-carbon resin.

These Cinch sockets have low contact resistance, low capacitance and insulation resistance of over 1000 megohms. They are rated at 1.0 amperes and 750 volts A.C.

MECHANICAL CRIMP MOUNTING TYPE

This type socket is fastened to the chassis by two tabs, which are an integral part of the metal saddle retaining the insulator body. These tabs are rolled against the underneath side of the chassis. Insulator material is mica-filled low loss phenolic (Type MFE), glass-filled diallyl phthalate (Type SDG-F per MIL-M-14). Contacts are made of brass, phosphor bronze or beryllium copper with finishes as shown below. Saddles are made of cold rolled steel or brass, with finishes as shown below.

Part No.	Insulator Material*	Contact Material	Contact Finish	Saddle Material	Saddle Finish

This tube socket is fastened to the chassis in the conventional manner, using screws, eyelets, rivets for self-tapping screws. Any #2 screw or 3/32" diameter rivet with a head diameter up to .190" may be used. Insulator material is mica-filled low loss phenolic (Type MFE). Contacts are made of cadmium-plated brass or silver-plated beryllium copper. Mounting saddle is either steel with copper flash plus cadmium plate finish or brass with cadmium plate plus yellow chromate finish.

Part No.	Insulator Material*	Contact Material	Contact Finish	Saddle Material	Saddle Finish
‡133-65-10-003	Mica	Brass	.0001 Cadmium	Steel	Copper Flash plus .0001 Cadmium

*Also available in general purpose black phenolic or glass-filled diallyl phthalate, Type SDG-F per MIL-M-14.

HEAT DISSIPATING TYPE

This socket with the fingered-style base, provides an excellent heat dissipator for VHF and industrial type Nuvistor tubes. As shown in the graph below, this socket is extremely effective in holding down the temperature rise of the tube metal shell relative to the chassis temperature. The socket adds 12 metal-shell-contact points to the heat paths provided by the base pins and indexing lugs which conduct tube-generated heat to the chassis. RF measurements through 1200 Mc made on the RCA-8058 double-ended Nuvistor triode in this socket show that the socket has the same effect as that obtained when the tube is soldered to the socket flange. Socket insulator material is mica-filled low loss phenolic (Type MFE). Contacts are made of brass, cadmium-plated. Saddle material is cold rolled steel, hot solder coated.

PC BOARD HOLE LAYOUT

This tube socket is a stand-off type for printed circuitry containing five contacts and two grounding terminals on the saddle. The tube socket is mounted to the printed circuit board by inserting the assembly into a pre-punched hole layout as shown. The socket is then soldered into the circuitry.

Part No.	Insulator Material*	Contact Material	Contact Finish	Saddle Material	Saddle Finish

Two types of subminiature stand-off sockets designed and tooled under military contract to meet MIL specifications. They are designed to drop through clearance holes arranged on a .050″ x .050″ grid layout. Insulator bodies are available in either mica-filled low loss phenolic (MFE) or diallyl phthalate (Type SDG). Both types have beryllium copper contacts, silver-plated, with tips hot solder dipped.

The Type S-1 subminiature socket has an eight button base for vertical tube position and has no center shield.

The Type S-3 socket is a seven-contact in-line subminiature right angle socket for horizontal tube position. A nickel-plated brass mounting bracket provides additional support when mounted to the printed circuit board.

TYPE 3

The first subminiature sockets ever produced. Type 1 and 2 three-contact sockets can be used with 3-prong transistors. Type 1, 3 and 4 sockets can be swaged or cemented into chassis or mounted with rings shown below. Type 2 is a stand-off style socket used primarily in printed circuitry but also suitable for conventional wiring. Insulating bodies are either general purpose black phenolic or mica-filled low loss phenolic (Type MFE per MIL-M-14). Contacts are of beryllium copper, either silver or cadmium plated as indicated.

†Also available in black. *Contact tails hot solder coated.

MOUNTING SPRING AND MOUNTING RINGS

No. 441-00-23-094 spring is designed for use with Type 1 and 2 three-contact sockets having a .093″ deep slot in the side of the insulator. Tempered spring steel material ensures positive retention of socket in chassis.

No. 441-00-11-082 ring is for use with Type 1, 2 and 3 sockets. No. 441-00-11-084 is for use with Type 4 and 5 sockets. Sharp teeth bite into side of insulator when ring is pressed on. Both rings are made of brass.

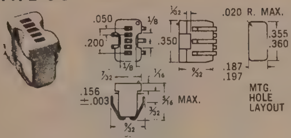
SUBMINIATURE TUBE SOCKETS (CONT'D)

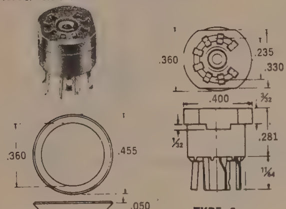
TYPE S-5



Type S-5 is a commercial 5-contact socket that presses into a non-polarized chassis cutout. For use on 1/16" thick boards. Insulator body is mica-filled low loss phenolic (MFE). Contacts are beryllium copper, silver-plated.

Part No.	No. of Contacts	Insulator Material	Contact Material
131-75-12-045	5	Mica	Beryllium Copper

RING MOUNT T-3 SOCKETS



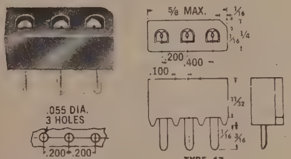
TYPE 6

These 8-contact sockets can be swaged or cemented into chassis or mounted with mounting ring No. 441-00-11-099. Insulator material is mica-filled low loss phenolic (Type MFE per MIL-M-14). Contacts have twisted tails and are made of beryllium copper with silver plated finish. Center shield is brass, cadmium plated. Mounting ring is .010 brass.

Part No.	Type	Insulator Material	Contact Finish	Contact Finish	Center Shield Material	Center Shield Finish
132-18-12-011	6	Mica	Beryllium Copper	Silver	Brass	Cadmium
132-18-12-017	6	Mica	Beryllium Copper	Silver*	Brass	Cadmium

*Contact tails and center shield hot solder coated.

DOUBLE DIODE SOCKET



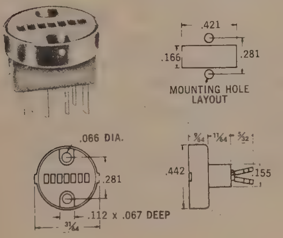
MOUNTING HOLE LAYOUT

TYPE 17

Special 3-contact socket used for mounting a diode in printed circuit applications. Used in horizontal phase detector. Insulator material is general purpose black phenolic. Contacts are made of brass with electro-tinned over copper flash finish.

Part No.	Type	Insulator Material	Contact Material	Contact Finish
203-91-03-029	17	Black	Brass	Electro-Tinned over Copper Flash

IN-LINE TYPE MILITARY SOCKETS

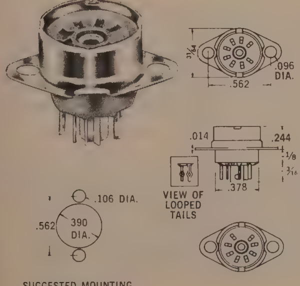


These in-line sockets are designed and tooled under military contact to meet MIL specifications. Available with or without nickel-plated brass mounting base. Either type can be mounted with No. 422-11-11-098 nickel-plated brass nut and No. 460-14-19-106 0-80 NF-2 stainless steel filister head type screws, which must be ordered separately. Insulator material is diallyl phthalate (Type SDG per MIL-M-14). Silver-plated beryllium copper contacts available with twisted tails as shown.

Part No.	Insulator Material	Contact Material	Contact Finish	Tail Type	Military Standard
131-27-92-011	Diallyl	Beryllium Copper	Silver*	Twisted	MS-35408-1
131-17-92-032	Diallyl	Beryllium Copper	Silver*	Twisted	—
131-17-92-034	Diallyl	Beryllium Copper	Silver	Looped	—

*Contact tails hot solder coated.

T-3 TYPE MILITARY SOCKETS



SUGGESTED MOUNTING HOLE LAYOUT

These sockets, utilizing the T-3 pin layout, are designed for military use in equipment subject to humidity or vibration conditions. Available with or without nickel-plated shield base type mounting saddle as shown. Insulator material is either diallyl phthalate (Type SDG per MIL-M-14) or mica-filled low loss phenolic (Type MFE per MIL-M-14). Contacts are beryllium copper, silver-plated. Sockets available with twisted or looped contact tails as indicated. Sockets also available with keyway rotated 90°. Center shields, when supplied, are brass, hot solder coated.

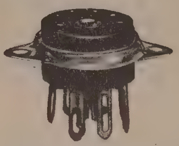
TRW® CINCH CONNECTORS

7-PIN MINIATURE TUBE SOCKETS

MOLDED MINIATURE SOCKETS WITH MOUNTING SADDLES



Securely holds all standard 7-pin miniature tubes. Available in top-mount, bottom-mount with ground lugs or bottom-mount with integral eyelets. Molded of high dielectric black phenolic, mica-filled low loss phenolic or ceramic material. Copper flash and electrolytic tin steel saddle with 7/8" mounting centers and .098 or .125 diameter mounting holes. Designed for mounting through chassis in 5/8" diameter hole. Center ground shield is brass. Positive grip contacts of spring temper brass alloy are cadmium-plated. Phosphor bronze and beryllium copper contacts are silver-plated. Standard contact length is 11/32", as shown in drawings; 3/16" and 1/4" contact lengths are also available on special order.

MINIATURE SHIELD BASE STAND-OFF SOCKETS TYPE MSB-1

These miniature sockets have an attached bayonet type shield base. Bases have ground tab where specified in listings below. May also be obtained with heli-coil insert for use with No. 4-40 NC-2 screw. Sockets listed are for use in 1/16" thick printed circuit board, but others may also be obtained for use in 3/32" and 1/8" boards. Insulator bodies are mica-filled low loss phenolic (MFE). Contacts are phosphor bronze with copper flash and electrolytic tin. Center shield is copper flash and electrolytic tin brass and shield base and ground tab are nickel-plated brass.

TRW® CINCH CONNECTORS

7-PIN MINIATURE TUBE SOCKETS (CONT'D)

MILITARY CONTRACT PC SOCKETS

TYPE MSB-2

TYPE MSB-3

Two types of miniature shield base sockets designed for military use to meet rigid MIL specifications. Both types drop through clearance holes arranged on a .1" x .1" grid layout. The Type MSB-2 socket has a mica-filled low loss phenolic (MFE) insulator body. Contacts are phosphor bronze, silver-plated with hot solder dipped tails. Center shield is brass, hot solder dipped, and shield base is brass, nickel-plated. Hot solder dipped ground tab is an integral part of the base. The Type MSB-3 socket, for right angle tube position, also has a mica-filled low loss phenolic (MFE) insulator body. Contacts are made of beryllium copper, silver-plated with hot solder dipped tails. Shield base is brass, copper flash and electrolytic tin.

IMPORTANT

All of the sockets shown on this panel can **only** be purchased with a Government contract number. No exceptions can be made.

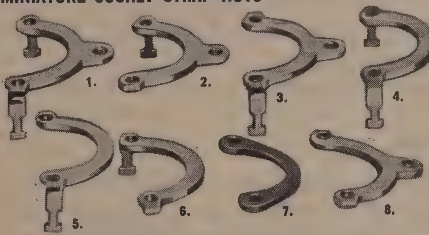
MINIATURE SOCKET STRAP NUTS



A Cinch development for ease and simplicity in mounting miniature sockets. One strap nut takes the place of two conventional type nuts. Generally used in assembling shield base sockets. 8 types are available, with hot tin dipped ground lugs attached for convenience in wiring. All are made of 1/16" brass. Three finishes are available with each type: .0005 cadmium-plated, .0005 cadmium-plated plus yellow chromate or .0003 electro-tin. Desired finish must be specified. Strap nuts with .104 diameter rivet hole can be used for mounting or for grounding to aluminum chassis. All mounting holes are tapped to accept No. 4-40 screws.

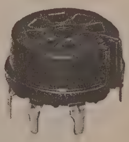
‡150-11-33-013	Steel	150-11-30-020	Brass	1	2¼"

Available with either cadmium-plated or heat resistant flat black enamel finish.

MINIATURE STAND-OFF SOCKETS TYPE M-1



Miniature stand-off sockets that rest on the shoulder of the contact tail and provide an air gap for cooling, thus eliminating the possibility of a moisture trap. Sockets are designed with contacts for ¹⁄₁₆", ³⁄₃₂" and ⅛" thick printed circuit boards. These sockets are represented by Styles A, B and C respectively. Style D sockets are also for ¹⁄₁₆" thick boards, but they provide a greater air gap than the Style A socket.

The insulating body is available in either general purpose black phenolic or mica-filled low loss phenolic (MFE). Contacts are made of either brass or phosphor bronze and given a copper flash and electrolytic tin unless otherwise specified. Some of the phosphor bronze contacts are silver plated with tails hot solder dipped, as designated. Where provided, the center shield is brass with hot solder finish.

NOVAL SHIELD BASE SOCKETS

Molded from high dielectric black phenolic, mica-filled low loss phenolic or ceramic material. One piece cadmium-plated steel shield base and saddle on 1⅛″ centers. Cadmium-plated brass contacts and copper flash and elctrolytic tin center shield. Mounts through top of chassis in 3/4″ diameter hole. Use Cinch J-Slot type shields with these sockets.

9-PIN NOVAL TUBE SOCKETS (CONT'D)

NOVAL STAND-OFF SOCKETS

Similar to miniature sockets shown on page 13 except noval size. Socket eliminates possibility of moisture trap by resting on shoulder of contact tail, thereby providing an air gap for cooling. Socket Styles A, B and C are designed with contacts for 1/16", 3/32" and 1/8" thick printed circuit boards, respectively.

Insulating bodies available in either general purpose black phenolic or mica-filled low loss phenolic (MFE). Contacts are either brass or phosphor bronze with copper flash and electrolytic tin, except that some of the phosphor bronze contacts are silver plated with tails hot solder dipped, as indicated. Center shield, where provided, is brass with copper flash and electrolytic tin.

TYPE 7A

For ease and simplicity in mounting noval sockets. One strap nut takes the place of two conventional type nuts. Generally used in assembling shield base sockets. 4 types are available, some with hot tin dipped ground lugs attached for convenience in wiring. All are made of 1/16″ brass, except for Type 7A, which is 1/16″ cold rolled steel. Three finishes are available with each type: .0005 cadmium-plated, .0005 cadmium-plated plus yellow chromate or .0003 electro-tin. Desired finish must be specified. Strap nuts with .104 diameter rivet hole can be used for mounting or for grounding to aluminum chassis. All mounting holes are tapped to accept No. 4-40 screws.

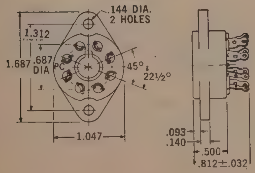
ALL-MOLDED OCTAL SOCKETS

Cinch's all-molded octal socket offers a complete one-piece construction for higher voltage applications. The saddle and body are a single casting, molded of high dielectric black phenolic or mica-filled low loss phenolic. Contacts are of brass, cadmium-plated. Mounting hole centers are 1$\frac{5}{16}$". This socket can also be supplied with keyway rotated 90°.



Part No.	Mtg. Hole Dia.	Insulator Material	Contact Material
‡101-06-00-199	.144	Black	Brass

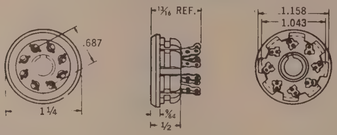
TRW® CINCH CONNECTORS

8-PIN OCTAL TUBE SOCKETS (CONT'D)

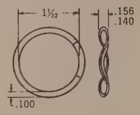
RING MOUNT MOLDED OCTAL SOCKETS

Used extensively on test equipment, public address amplifiers and on other apparatus where sockets are exposed. Mounts in 1¹¹⁄₆₄″ chassis hole. Molded keyways in side engage key in chassis hole, preventing socket from turning. Molded of high dielectric black phenolic or mica-filled low loss phenolic. Contacts are brass, cadmium-plated or phosphor bronze, silver-plated.



Part No.	Chassis Thickness	Insulator Material	Contact Material
101-03-00-033	¹⁄₁₆″	Black	Brass
101-03-10-059	¹⁄₁₆″	Mica	Brass

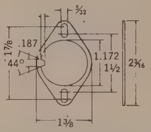
CRIMPED RETAINER RING



Formed of .020 spring steel, is used with ring mount sockets. Securely anchors sockets in place without requiring screws or rivets. Ring finishes available are cadmium-plated, nickel-plated and cadmium-plated plus yellow chromate. Specify finish.

‡(Part No. 441-00-23-072)

ADAPTOR PLATE



Is for use when the hole in chassis is too large to use crimped retainer ring alone. In such cases, this adaptor plate is anchored to the chassis and the ring clamps the appropriate ring-mount socket to the plate. Made of ¹⁄₁₆″ cold rolled steel with cadmium-plated or cadmium-plated plus yellow chromate finish. Specify finish.

‡(Part No. 441-37-22-001)

SPECIAL COMMERCIAL MOLDED OCTAL SOCKETS WITH MOUNTING SADDLE

Several variations of molded saddle octal sockets are also available for special commercial needs. Type 3 in the table below refer to material variations of these types shown in the previous standard molded saddle sections. Types 7 and 9 are designed for top mounting in chassis. Type 8 is the equivalent of octal socket Type 5, with 1⁵⁄₁₆″ mounting centers instead of 1½″. Type 10 provides "Kim" nuts for simplification of assembly and to prevent screws from loosening due to vibration. Type 11 shows a socket with "Pem" nuts attached to simplify assembly by eliminating conventional type nuts.

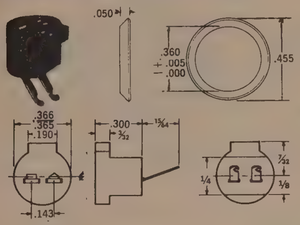
TRW® CINCH CONNECTORS

SPECIAL PURPOSE TUBE SOCKETS

CETRON TUBE SOCKETS (2-PIN)

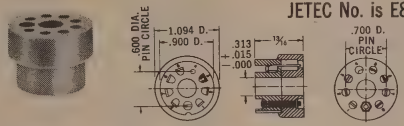


This socket is designed for use with Cetron Tubes CE701 and CE702 in such applications as electric eye doors and motion picture projectors. Molded from high dielectric black phenolic or mica-filled low loss phenolic. Contacts are of special alloy spring brass, cadmium-plated. May be mounted by press fit, gluing or by mounting ring 441-00-11-099. Mounting ring finishes available are cadmium-plated, nickel-plated or cadmium-plated plus yellow chromate. Specify finish.

Part No.	Insulator Material	Contact Material
‡149-12-00-001	Black	Brass
149-12-10-002	Mica	Brass

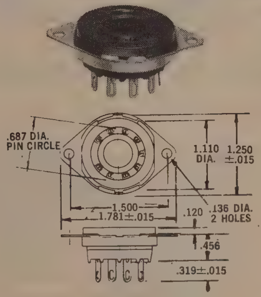
VIDICON TUBE SOCKET (7-PIN)

7-contact socket for RCA Vidicon Tube Nos. 6198 and 7038. Insulator material is mica-filled low loss phenolic. Contacts are of silver-plated phosphor bronze. JETEC No. is E8-11.



Part No.	Insulator Material	Contact Material
‡133-97-11-013	Mica	Phosphor Bronze

MOLDED NOVAR SOCKETS WITH MOUNTING SADDLE (9-PIN)

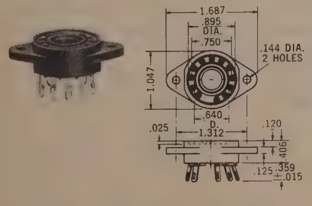


Sockets developed by Cinch for use with the Novar Tube. Since physical dimensions are the same as octal sockets, layouts and cutouts for octal sockets will accommodate Novar Sockets. Contact specifications provide max. fatigue strength and mating force with tube pins. Performance meets or surpasses EIA standards.

Novar sockets with mounting saddles are available bottom mount only. Molded from high dielectric black phenolic or mica-filled low loss phenolic. Cadmium-plated brass contacts. Cadmium-plated steel saddle. 1½″ mounting centers. Mounting holes are .136″ diameter.

Part No.	Insulator Material	Contact Material
‡149-19-00-033	Black	Brass
‡149-19-10-034	Mica	Brass

COMPACTRON TUBE SOCKETS (12-PIN)



Special all-molded multi-purpose 12-pin socket developed by Cinch for use with the Compactron Tube. Physical dimensions are the same as octal and novar sockets. Molded from high dielectric black phenolic or mica-filled low loss phenolic. Contacts are cadmium-plated brass. Mounting hole centers are 1 5/16″. Mounting holes are .144″ diameter.

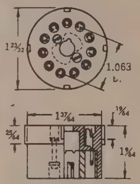
Part No.	Insulator Material	Contact Material
‡149-10-30-048	Black	Brass
‡149-10-10-049	Mica	Brass

‡These items available through Cinch Distributors.

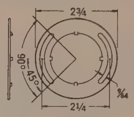
TRW® CINCH CONNECTORS

SPECIAL PURPOSE TUBE SOCKETS (CONT'D)

MAGNAL TUBE SOCKETS (11-PIN)



For use with 5BP1 and 2AP1 type cathode ray tubes. Molded from high dielectric black phenolic or mica-filled low loss phenolic. Full floating cadmium-plated phosphor bronze contacts ensure easy insertion of tube and provide excellent electrical connections. Navy type has silver-plated phosphor bronze contacts. Two-piece insulator consists of outer casting with required number of contacts assembled and inner casting assembled in position but not fastened. Supplied with two screws, two nuts and two lock washers for assembly. Also available with cadmium-plated or zinc-plated steel mounting ring 441-30-22-012. Specify mounting ring finish.



Part No.	Insulator Material	Contact Material	Navy Type No.

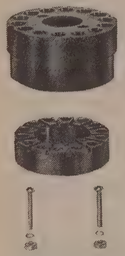
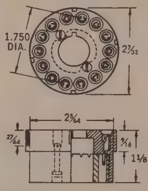
‡143-13-11-011	Mica	Phosphor Bronze†	CMG49707

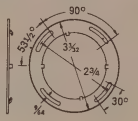
†Silver plated finish.

DIHEPTAL TUBE SOCKETS (14-PIN) STANDARD DIHEPTAL SOCKETS





Possess same features as Cinch Magnal Sockets shown above. Molded of high dielectric black phenolic or mica-filled low loss phenolic with full-floating cadmium-plated phosphor bronze contacts. Silver-plated phosphor bronze contacts also available in mica material. Two-piece insulator construction. Supplied with two screws, two nuts and two lock washers unassembled. Available with cadmium-plated, nickel-plated or zinc-plated steel mounting ring 441-30-22-038. Specify mounting ring finish.



Part No.	Type	Insulator Material	Contact Material	Navy Type No.

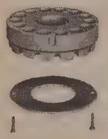
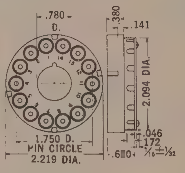
†Silver plated finish.

THIN DIHEPTAL SOCKET (14-PIN)



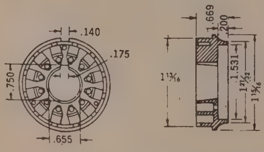


Thinner version of standard diheptal for tighter space requirements. Molded from mica-filled low loss phenolic with silver-plated beryllium copper contacts. Consists of one-piece socket base, back plate, contacts and two drive screws, all supplied unassembled.

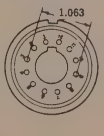
Part No.	Type	Insulator Material	Contact Material	Navy Type No.
143-44-12-028	Thin	Mica	Beryllium Copper†	—

†Silver plated finish.

DUODECAL TUBE SOCKETS (12-PIN)



For use with 10BP4, 2BP1, 5TP4 type tubes and RCA 6199 tube. Molded from high dielectric black phenolic with cadmium plated brass contacts or from mica-filled low loss phenolic with silver-plated beryllium copper contacts. Slightly larger in diameter than tube base and only slightly longer than tube pin, featuring wire strain relief as an integral part of the contact. Consists of socket base, back plate, contacts and three slotted-head self-tapping screws, all supplied unassembled for wiring to suit individual specifications.



Part No.	Insulator Material	Contact Material	Navy Type No.
‡143-24-00-011	Black	Brass	—

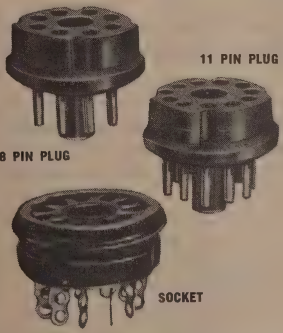
MISCELLANEOUS SOCKETS AND PLUGS

8-11 PIN CONNECTOR PLUGS AND SOCKETS



11 PIN PLUG
8 PIN PLUG
SOCKET

Ideal plugs and sockets for connector applications where power requirements are small and space is limited. Consists of 8-pin plug designed to fit any standard octal socket and mating 11-pin plug and socket. Molded of high dielectric black phenolic or mica-filled low loss phenolic. Plug pins are of nickel-plated brass with tapered ends for easy insertion. Socket contacts are cadmium-plated brass. Plugs are available with grooving for 1/16″ or 3/32″ chassis thicknesses or without grooving. Sockets are available with grooving for 1/16″ or 3/32″ or 1/8″ thicknesses. Both plugs and sockets mount on chassis with 441-00-23-072 retainer ring (as shown on page 11) and can be used with any of the shells shown below.

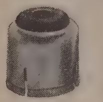
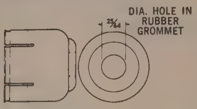
TRW® CINCH CONNECTORS

MISCELLANEOUS SOCKETS AND PLUGS

8-11 PIN CONNECTOR SHELLS





Shells are available to snap on to 8- and 11-pin connector plugs and sockets grooved for a 1/16″ chassis thickness. Shell has a 25/64″ diameter hole in a rubber grommet in the top. There is a screwdriver slot at the bottom of each shell to facilitate removal when necessary. All shells are made of cadmium-plated steel with an insulating liner. Part No. 209-23-23-205.

TYPE 4

1″ FP TYPE CAPACITOR SOCKET

Molded of high dielectric black phenolic. Steel saddle, with 4 ground lugs, is hot-solder-coated. 1½″ mounting centers. Contacts are phosphor bronze, cadmium-plated. Has 3 recessed center contacts for extended prongs of capacitor and two outer contacts flush with surface for short prongs of capacitor.

1⅜″ FP TYPE CAPACITOR SOCKET

Molded of high dielectric black phenolic. Sturdy cadmium-plated steel saddle has 1 27/32″ mounting centers. Contacts are phosphor bronze, cadmium-plated. Has four recessed center contacts for extended prongs of capacitor and three outer contacts flush with surface for short prongs of capacitor.

‡203-41-07-002	1⅜″	7	G.P. Black†	Phosphor Bronze

†Also available in mica material.

TYPE 1 — 2-PRONG .486″ CENTERS

Made of ceramic material. Silver-plated beryllium copper contacts with hot tinned tails, mounted on .486″ centers. ⅛″ mounting hole. Tails extend straight down. For all .050 pin crystals with HC-6/U holders.

TYPE 2 — 2-PRONG 31/64″ CENTERS

Molded of high dielectric black phenolic or mica-filled low loss phenolic. Silver-plated beryllium copper contacts. .120″ diameter recessed mounting hole. For use with crystals having .093 pins on .486″ centers.

TYPE 3 — 2-PRONG ½″ CENTERS

Molded of high dielectric black phenolic or mica-filled low loss phenolic. Silver-plated phosphor bronze contacts. No. 4-40 tap mounting hole. For crystals having .125 pins on .500 centers.

TYPE 4 — 4-PRONG

Molded of mica-filled low loss phenolic. Silver-plated beryllium copper contacts on 31/64″ centers. .150″ diameter mounting hole recessed 5/64″ from surface in 5/16″ diameter hole. Designed for use with two crystals having .093 pins on .486″ centers.

TRW® CINCH CONNECTORS

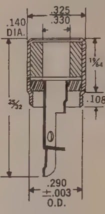
PHONO CONNECTORS AND SOCKETS

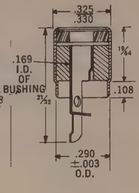
PHONO SOCKET

203-1901-027

203-1901-025



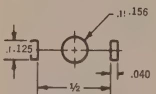
203-1901-025



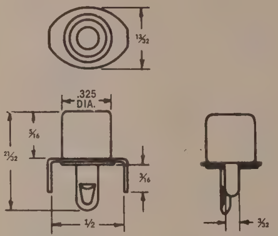
203-1901-027

Mates with either crimp or solder-type phono plug. Special internal bushing holds contact lengths. SHELL: Cold-rolled steel, cadmium-plated. CONTACT: Cadmium-plated brass. INSULATOR ASSEMBLY: Insulated washer with bushing.

PHONO CONNECTOR PC SOCKETS



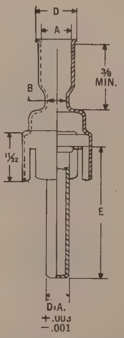
CHASSIS LAYOUT



Phono connector socket for printed circuit use. Can be used as a two-contact connector or for ground in phono applications. Insulator is general purpose black phenolic. Brass mounting bracket, brass contact and steel shell are cadmium-plated. Two styles available, one as shown and one with no wire hole in contact tail.

Part No.	Insulator Material	Contact Material	Wire Hole
203-11-01-016	Black	Brass	Yes
203-11-01-015	Black	Brass	No

PHONO PLUGS AND SOCKETS



Cinch's low cost crimp-type phono plugs provide the ideal phono connector for your TV — stereo — hi-fi chassis needs. Sturdy, reliable construction assures electrical continuity. Automatic crimping capability helps cut assembly costs to barest minimum. Different types available for use with .090, .125 or .135 diameter wire. SHELL: Cold-rolled steel, cadmium-plated. PIN ASSEMBLY: Nickel-plated brass pin with insulated washer.

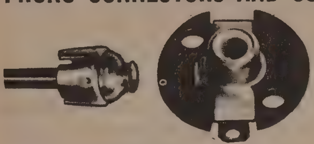
TRW® CINCH CONNECTORS

PHONO CONNECTORS AND SOCKETS (CONT'D)



Some of the most popular single connectors for use with phono pick-up applications were developed and made by Cinch over a period of years.

The shells of the male plugs are of the wiping action type, designed to ground on the housing of the mating part.

Part No. 452-23-14-129 insulator can be used with Part No. 201-11-01-001.

Part No. 201-11-01-018 is a small, compact unit especially designed for use in places where economy of space is essential.

COAXIAL PLUG AND SOCKET

MINIATURE, I.F. COAXIAL PLUG AND SOCKET

For Low Cost Shielded Contact in Non-critical VSWR Entertainment and Industrial Applications**

This revolutionary new miniature plug and socket is designed to replace standard phono plugs and sockets. Its features include:

- Approximately 1/3 smaller than standard phono plugs
- Higher reliability than standard phono plugs
- Less susceptibility to vibration
- Grounding before center contact
- Reduced wiring costs through automatic crimping of the plug

Only .200 inches in body diameter, this new Cinch connector will fit into many places where old style connectors are not suitable.

Greater reliability is obtained through the shrouded center pin design. The center pin, mounted in a Teflon insulator, cannot be shorted or bent by mishandling. To ensure correct mating, the conventional four fingered skirt, which is subject to bending, has been eliminated. High separation force due to long bearing surfaces assures that normal vibration of the lead will not separate the connector halves.

Shell grounding before center contact assures connection without bursts of hum in audio systems. It also protects components from overvoltages which can be generated when the center conductor connects first.

The shell and pin can be positioned to mount at varying heights off the chassis, by means of a special sleeve supplied with the connector. This provides a flexibility for mechanical design never before available.

**Not recommended for microwave devices.

‡These items available through Cinch Distributors.

SPECIFICATIONS

Dielectric Strength: 1,000 volts

Contact Current Rating: 1 ampere

Contact Resistance: .03 ohms max.

Insulation Resistance:
10,000 megohms minimum.

Contact Retention:
After 3 insertions of plug into socket the withdrawal force shall not be less than 8 ounces.

Durability:
After 10 cycles of insertions and withdrawals, the connector contact resistance shall not exceed specs

Insulation:
Socket: Teflon
Plug: Polyvinyl chloride
Contacts: Pre-tinned brass
Shell and Sleeve:
Steel, copper flashed and cadmium plated

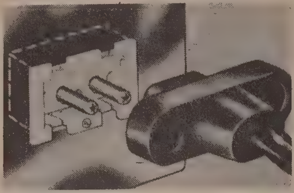
TRW® CINCH CONNECTORS

DISCONNECT PLUGS

125 VOLT A.C. CONNECTOR



A low cost Cinch 125 volt AC connector provides the ideal disconnect plug for radio . . . TV . . . phonographs and appliance chassis needs. The snap-in locking feature eliminates the need for riveting or eyeleting. Sturdy construction insures continuous, dependable performance. Insulator material is Black Lexan. Solid brass pins are cadmium plated. These parts are UL and CSA approved.

TRW® CINCH CONNECTORS

GENERAL DESCRIPTION

For more than a generation, "Jones" plugs and sockets have been a "by-word" of the electrical/electronic industry. Even today, the quality, reliability, convenience and basic excellence of the "Jones" design continues to meet the requirements of such exacting fields as communications and automatic vending equipment.

Within this catalog are listed each of the four basic lines of "Jones" plugs and sockets: 300, 400, 500, 2400 Series. The 300 Series, designed for light duty, has plug prongs $\frac{5}{32}$" wide by $\frac{3}{64}$" thick. The 400 Series, designed for medium work, has plug prongs $\frac{1}{4}$" wide by $\frac{1}{16}$" thick. The 500 Series, for heavy duty work, has plug prongs $\frac{5}{16}$" wide by $\frac{3}{32}$" thick. The 2400 Series, with the same characteristics as the 400 Series, carries a higher voltage rating.

In addition to the basic lines, also included are the 1400 Series and several other low-cost laminated plugs and sockets designed for simultaneous quick disconnect usage. Other units shown are special purpose plugs and sockets mounted in wall plates for terminating TV antennas or general industrial applications and a special line of audio connectors for high frequency connections.

For those individuals desiring a cross-reference between the "Jones" part numbers shown throughout this catalog and the new Cinch 10-digit factory part numbers, a separate form is available for this purpose. This free cross-reference guide, known as form C-1A, can be obtained by writing us direct or contacting your local Cinch representative.

Many of the "Jones" plugs and sockets shown throughout this catalog are also available locally through **authorized Cinch Distributors** usually at a savings in delivery time and freight costs. For your convenience those items normally carried in local stock by Cinch Distributors are indicated on each appropriate page of the catalog by the symbol. (CD)

ELECTRICAL RATINGS

	Rated Voltage* (V. RMS)	Current Capacity (Amps)	Max. Wattage on any Contact
300 SERIES	(Listed below)		
400 SERIES	1,100	15	3,750
2400 SERIES	1,700	10	2,500
500 SERIES	3,000	25	5,000
1400 SERIES	1,700	10	2,500

AUDIO CONNECTORS

	Rated Voltage* (V. RMS)	Current Capacity (Amps)	Max. Wattage on any Contact
101 SERIES	800	10	2,500
201 SERIES	1,300	10	2,500
202 SERIES	730	7.5	1,875

*Rated Voltage is ⅓ Voltage Breakdown.

300 SERIES

All connector ratings are based on a continuously mated condition. "Rated Voltage" is ⅓ of Voltage Breakdown.

Rated Voltage	730 Volts rms.
Contact Resistance	0.16 Ohms max.
Rated Current	(See at right)

Under most normal operating conditions where not all contacts are carrying susbtantially full rated current, maximum current per contact is rated at 10 amperes. The "Jones" 300 Series plugs and sockets are recognized under the Component Program of Underwriters' Laboratories, Inc. In accordance with UL Standard #498, the Underwriters' Laboratories ratings are derived from the condition whereby all contacts are carrying "rated" current simultaneously. The resultant ratings are as follows:

Rated Current

(2-12 contacts)	7.5 amperes
(15-33 contacts)	4.5 amperes

Rated Wattage

(2-12 contacts)	1875 watts
(15-33 contacts)	1125 watts

FOR CROSS-REFERENCE BETWEEN "JONES" AND CINCH PART NUMBERS:

Request Cinch Form C-1A from your local Cinch Representative or write us direct. This form provides a convenient cross-reference between the "Jones" part numbers used in this catalog and the new Cinch 10-digit factory part numbers.

TRW® CINCH CONNECTORS

300 SERIES WITH STANDARD TERMINATION

The "Jones" 300 Series plugs and sockets, designed for light and medium duty applications, are small in size with good separation between contacts. This series is available in sizes from 2 to 33 contacts, arranged for either cap or panel mounting. All plugs and sockets are polarized so that plugs of one size cannot fit with sockets of another size. 24 to 33-contact plugs with standard termination also have a special polarizing pin to facilitate faster positioning of the mating plug and socket.

The insulating material is general purpose black phenolic. Phosphor bronze "knife-switch" type socket contacts engage both sides of flat brass plug contacts, providing double contact area. All contacts are cadmium-plated. Plug prongs are 5/32″ wide and 3/64″ thick. All solder lugs provided with size .093″ x .062″ wiring hole. Formed metal caps have black wrinkle finish with insulating liners. Other finishes and material available. Consult factory.

The 300 Series plugs and sockets feature MONOBLOCK (one-piece) construction. MONOBLOCK eliminates internal moisture traps. Furthermore, MONOBLOCK's new patented* snap-in socket contacts permit external prewiring, as well as removal and replacement of individual contacts if necessary. Contacts are "locked-in" to withstand wiring stress.

Note: All 2-contact plugs and sockets are round; all other sizes are rectangular.

*U.S. Pat. Nos. 2688123 & 2980881

TRW® CINCH CONNECTORS

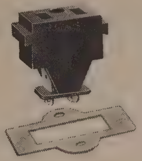
400 SERIES WITH STANDARD TERMINATION

The "400" Series plugs and sockets from the famous "Jones" line of quality components are rated for duty beyond the range of the 300 Series. Maximum rating is 1200 volts r.m.s. at 15 amperes.

400 Series plugs and sockets are available in sizes of 2, 4, 6, 8, 10 and 12 contacts, each size being polarized and suitable for either cap or panel mounting. "Knife-switch" type socket contacts are made of cadmium-plated phosphor bronze. These contacts engage both sides of the flat plug contacts, providing double the contact area.

Plug prongs are made of cadmium-plated brass ¼″ wide by 1/16″ thick. Caps are finished in black wrinkle and equipped with insulating lining. Other finishes and material available. Consult factory.

Should a connector be required which is rated for higher voltages, the "Jones" 2400 Series plugs and sockets are similar to the 400 Series except that the 2400 Series has a higher voltage rating.



Note: The 2-contact angle bracket (AB) type socket will not accept the standard angle bracket as shown in the S-406-AB illustration below. Instead, a special bracket is supplied for mounting to a panel or chassis. The illustration at the left shows the S-402-AB socket with the special bracket.

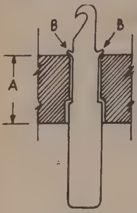
TRW® CINCH CONNECTORS

400 SERIES WITH STANDARD TERMINATION (cont'd)



NOTE REGARDING LOOSE CONTACTS ON 400 SERIES PLUGS

This illustration shows the method of staking 400 Series plug contacts in the phenolic body. Manufacturing tolerances permit a slight variation in the "A" dimension during the molding process. Thus, in some instances the fit between the contact and the body at points "B" may not be perfectly snug. When this condition occurs, the contact appears to be "loose" in the connector body. However, the security of the contact is in no way jeopardized and the performance of the connector is not impaired.

It is recommended that personnel responsible for inspection and installation of the connectors be informed of this condition to avoid unnecessary delays and correspondence arising from a mistaken conclusion that the connectors are faulty. In case of doubt, however, it is advisable to check with the local Cinch representative or contact the factory before any action is taken.

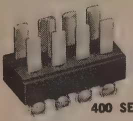
400 SERIES—WITH SCREW TERMINALS



400 SERIES PLUG

400 SERIES SOCKET

400 SERIES PLUGS AND SOCKETS WITH SCREW TERMINALS

In addition to the solder-type terminals, the 400 Series is also available with screw terminals as listed below. The plug and socket bodies are of slightly different construction from those used with the standard solder-type. This is necessary in order to accommodate the screw terminals. However, the overall dimensions for installation purposes are compatible with the standard type. (To order see top pg. 11.)

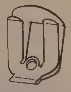
Capped Connector Member Showing Extrusion for Engaged Auxiliary Lock



Auxiliary Lock 63A
Factory No.
422-12-14-012

Complete Auxiliary Locking Assembly

AUXILIARY LOCK 63A—FACTORY NO. 422-1214012

Where connectors are subject to shock or vibration, the Auxiliary Locking Arrangement (No. 63A) is recommended. It can be used with the 300 Series end bracket (EB), shallow bracket (SB) or deep bracket (DB) types. It consists of a set of spring locks secured by the mounted bolts which engage extrusions on the cap creating a secure, shakeproof mating condition.

The No. 63A locks must be ordered separately, one pair for each plug and socket. The part numbers for the plugs and sockets with the special extrusions on the caps are found in the table below. Note that there are two types of caps, one with extrusions placed for end bracket or shallow bracket mates (S-type) and the other for deep bracket mates (D-type).

IMPORTANT: As indicated below, the caps with the S-type mates are the only ones which can be used with FHE and CCE plugs and sockets.

PLUGS AND SOCKETS WITH D-TYPE EXTRUSIONS
For Deep Bracket (DB) Mates

PLUGS AND SOCKETS WITH S-TYPE EXTRUSIONS

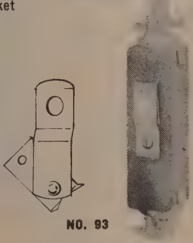
NO. 63



NO. 93

AUXILIARY LOCK NO. 63—FACTORY NO. 422-12-14-011

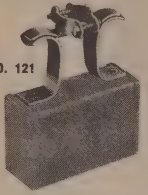
Spring Lock For Use With 400 Series Panel-Mounted Plugs and Sockets: Can be used with Type AB or SB. Proper operation requires that the mounted plug or socket body be flush with the top of the panel. The standard binder head screws furnished for fastening the mating connector body to a cap must be replaced by filister head screws.

AUXILIARY LOCK NO. 93—FACTORY NO. 319-01-99-003

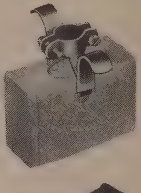
Extension-Cable Lock For Use With 400 Series: Can be used with any 400 Series unmounted (cap-type) plug or socket when both mating units are attached to cables. The lock is attached to the plug cap with the screw which holds the cap to the connector body. The binder head screws in the socket cap must be replaced with filister head screws and the opening in the lock snaps over the filister head screws, completing the lock.

TRW/CINCH CONNECTORS, AN ELECTRONIC COMPONENTS DIV. OF TRW INC. / 1501 MORSE AVE. / ELK GROVE VILLAGE, ILL. 60007

TRW® CINCH CONNECTORS



NO. 121



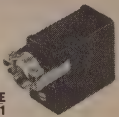
NO. 120

COMBINATION CABLE CLAMPS AND HANDLES

These units provide relief from strain on connector wiring and also facilitate connector separation in close quarters. Can be used for both plugs and sockets. Cap is not included.

No. 120 fits all Type CCT plugs and sockets of the 400 and 2400 Series and 15-33 contact plugs and sockets of the 300 Series.

No. 121 fits the following Type FHT plugs and sockets of the 300, 400 and 2400 Series: 300 Series — 24, 27, 30 and 33 contact; 400 Series — 10 and 12 contact; 2400 Series — 10 and 12 contact.

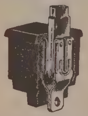


No. S-2408-CCE with #21851

CABLE CLAMP FOR CCE CAPS — When Used with Deep Bracket

When ordering CCE caps for 315-333, 402-412, 2402-2412 Series plugs or sockets that are to be mated with DB plugs or sockets specify cable clamp No. 21851. (For example, P-2408-CCE with No. 2185.) There is no difference in price. Standard cable clamps normally furnished with all CCE will mate with SB plugs and sockets only.

2400 SERIES WITH STANDARD TERMINATION



Cross-section of 2400 Series socket showing four-surfaced contact with plug prong.

Solder-connecting side of plug body showing recessed pockets with barriers around contacts. Plug contacts are also in recessed pockets on opposite side.

Solder-connecting side of socket body showing recessed pockets with barriers around contacts. Socket contacts are also in recessed pockets on opposite side.

The "Jones" 2400 Series plugs and sockets are designed for excellent electrical and mechanical performance. Ratings for the 2400 Series **voltage** (for which the 2400 Series carries a 50% higher rating). Note the electrical rating chart on the inside front cover.

An entirely new type of socket contact designed is utilized in the 2400 Series as shown in the above illustration. Four individual flexing surfaces make contact over practically their entire length. Note in the illustration how they exert maximum pressure at every point. Also note the unique method of anchoring terminals in the block — they cannot be moved up or down.

The contact-to-contact and contact-to-ground distance has been considerably increased by mounting the contacts into recessed pockets with a phenolic barrier surrounding and extending above. This method is used on both the top and bottom side of both plugs and sockets, greatly increasing the leakage path.

All units of the 2400 Series are interchangeable with corresponding units of the 400 Series. The same 2, 4, 6, 8, 10 and 12-contact plug and socket sizes are available, each size being polarized and suitable for either cap or panel mounting.

Plug and socket bodies are molded of general purpose black phenolic. Socket prongs are of heavy brass 1/4" x 1/16", cadmium-plated. The formed metal caps have a black wrinkle finish with insulating liners.

A shoulder extends around the mating side of the 2400 Series plug and socket presenting a finished appearance when mounted in bracket or cap. Because of this shoulder, when angle brackets are used, they must first be removed from the plug or socket. The unit is then inserted into the chassis with the brackets replaced underneath the panel.

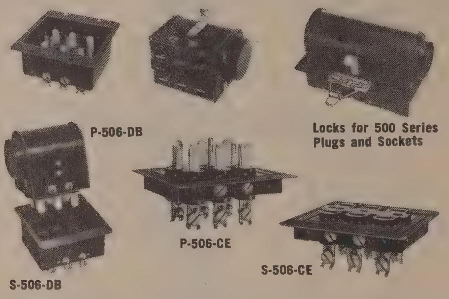
---

500 SERIES — WITH STANDARD SCREW TERMINALS / MOUNTING DATA



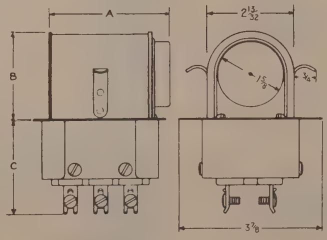
No. 500-L Lock fits any deep bracket and cap combination. It holds securely, but can be released instantly. The lock is fastened by the same screw or rivet that holds the deep bracket to the panel. Two locks are required. Cannot be used on shallow brackets.

The "Jones" 500 Series plugs and sockets are designed for use in extremely heavy-duty applications. Ratings are somewhat dependent on the parameters of the associated circuitry, but maximum voltage is nominally 3000 volts and maximum current is nominally 25 amperes per contact. Wattage per contact should not exceed 5000 watts.

500 Series plugs and sockets are available in sizes of 2, 4, 6, 8, 10 and 12 contacts, each size being polarized so as to prevent accidental mismating with any other size. The units have been designed to allow maximum accessibility under plug caps for making terminal connections and also subsequent inspection. Plug and socket blocks will accept all appropriately-sized caps and brackets interchangeably.

Male contacts are brass and female contacts are phosphor bronze, cadmium-plated. Metal parts of caps and brackets are steel and made rustproof by parkerizing. All caps are insulated with canvas bakelite. Plug prong cross section is 5/16″ by 3/32″.

IMPORTANT: When used with high voltages present, it is recommended that a deep bracket type (DB) be used as one plug or socket and that its mate has a cap. Shallow brackets (Type SB) are for use only in connecting to mates of the same type.



For Type DB connectors, dimension B is 2¼″ and Dimension C is 2⅝″ reference on the socket and 2 7/16″ reference on the plug. For Type SB connectors, dimension C is 1 9/16″, cap height is 2 57/64″.

MOUNTING DATA

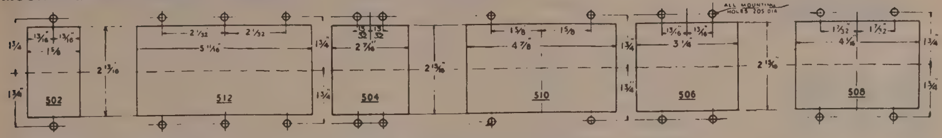
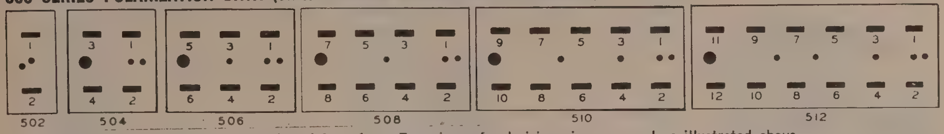
MOUNTING SPECIFICATIONS FOR DEEP OR SHALLOW BRACKETS



500 SERIES POLARIZATION DATA (VIEWED FROM WIRING SIDE OF SOCKET)



The contacts of the 500 Series are numbered from 1 up. Two sizes of polarizing pins are used as illustrated above.

PROPER WITHDRAWAL OF PLUG FROM SOCKET

As indicated in the descriptions of the 300, 400, 2400 and 500 Series plugs and sockets, the insulator bodies are made of general purpose black phenolic. This choice is based on the excellent electrical insulating properties of the material, rather than on its mechanical characteristics. Despite Cinch's achievement in designing as rugged a construction as other parameters will allow, some care is required in the mating and disconnecting of the plugs and sockets in order to avoid damage to the insulator bodies and contacts.

Figure 1 shows the correct method of inserting and withdrawing plugs from sockets — **only by direct pull straight out at right angles to the mounting surface.** Pulling alternately at one end of the connector and then the other as shown in Figure 2 is incorrect. Figure 3 shows the possible damage that may occur if one end of the plug is extracted before the other. When contacts are bent and insulator bodies cracked in this manner, the connector must be completely replaced in order to assure reliable operation.

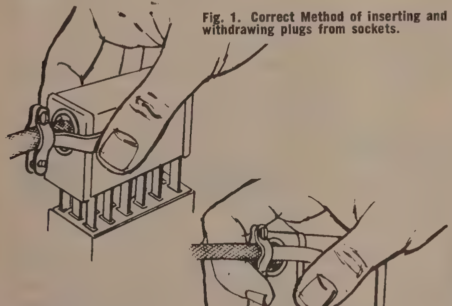


Fig. 1. Correct Method of inserting and withdrawing plugs from sockets.

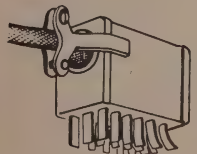

Fig. 2. Incorrect Method of inserting and withdrawing plugs from sockets.

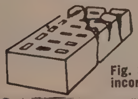

Fig. 3. Possible Damage caused by incorrect withdrawal of plug.

RECOMMENDATIONS ON SOLDERING TERMINAL WIRES

Although "Jones" plugs and sockets are designed to minimize the effects of wiring stress on the contacts, especially those with the new monoblock design, it is desirable to observe good wiring and soldering practices when attaching wires to the contacts. The wires should be of sufficient length and properly stripped so that they can be soldered to the terminals without placing undue stress on the contacts. Figure 4 shows a properly terminated wiring harness.

When soldering with leads that are too short or attempting to twist the wires into a compact assembly as illustrated in Figure 5, contacts may become distorted as shown in Figure 6. In extreme cases, socket contacts may be dislocated to the extent that insertion of the plug prong is impossible.

Good soldering technique is always a necessity to assure reliability. Despite plating of plug and socket contact tails to facilitate proper solder joints, oxidizing of unwrapped contacts and exposure to contaminated air may cause the contacts to become difficult to solder. The contacts may be easily cleaned with sandpaper or a small brush and then will be ready for proper soldering.

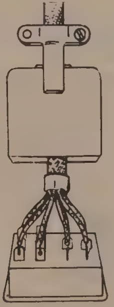

Fig. 4. Proper termination of wiring harness.

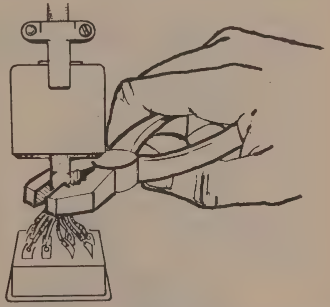

Fig. 5. Incorrect practice caused by allowing insufficient wire length and stripping.

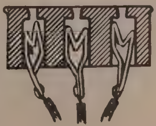

Fig. 6. Possible result of twisting improperly terminated wires.

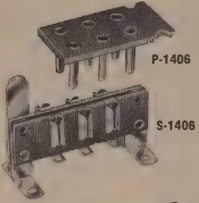
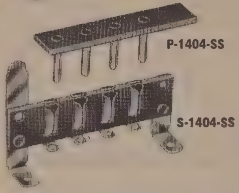
TRW® CINCH CONNECTORS

1400 SERIES LAMINATED PLUGS AND SOCKETS





TWO-SIDE 1400 SERIES

Designed for use where a quick disconnect point is needed simultaneously for various circuits at low cost. Due to exposed metal parts, 1400 Series plugs and sockets are recommended for use when the complete unit is within a housing. All of the advantages of multiple-circuit connectors are offered including polarization to prevent incorrect connections.

Insulation is XP phenolic. Contacts are made of spring-tempered cadmium-plated brass. Socket mounting brackets are made of steel. In addition to the units indicated, others with more contacts are available on special order. However, with 20 or more contacts it is recommended that two or more plugs be used since a single long plug is not mechanically strong. However, the mating socket can feasibly be manufactured as a single assembly.

SINGLE-SIDE 1400 SERIES

The 1400 Series is also available with single-side plugs and sockets. Contacts are arranged in a single row, so that these units are actually half the size of the standard two-side plug or socket. Otherwise, all features are the same.

No. of Contacts	Plug Part No.	Socket Part No.	Socket Mounting Centers

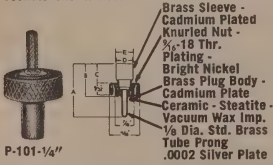
SPECIAL PURPOSE AUDIO CONNECTORS

These audio connectors have been designed for use in those applications where reliability under extreme environmental conditions is an absolute necessity. They have been designed to provide low-loss connections over a range of frequencies even beyond the audio spectrum.

SERIES 101 PLUGS

The "Jones" 101 Series audio connectors are designed to provide low-loss connections, even at high frequencies. The ¼″ and .290 have a one piece body and ferrule, which is cadmium-plated. All metal parts are brass. The plugs fit all of the No. 101 Series sockets shown below.



Brass Sleeve - Cadmium Plated
Knurled Nut - 9/16-18 Thr.
Plating - Bright Nickel
Brass Plug Body - Cadmium Plate
Ceramic - Steatite - Vacuum Wax Imp.

SERIES 101 SOCKETS

The No. 101 Series sockets are furnished in three types as shown below. Base is of brass, bright nickel finish. Brass contact is silver-plated. Insulation is of low-loss natural color XXX phenolic. The S-101-D is similar to the S-101 except that the phenolic is recessed in the base. S-101-D Mod. is the same as S-101-D except that two sides of the base are milled as shown.

S-101-D Mod.	13/16″	30

SERIES 202 PLUGS

The 202 Series plugs and sockets have two polarized contacts. Metal parts are of brass with bright nickel finish. Insulation is of molded phenolic. Phosphor bronze "knife-switch" type socket contacts engage both sides of flat brass plug contacts, doubling contact area. Formed fibre linings in caps. Knurled nut has ¾″-27 thread.

SPECIAL PURPOSE PLUGS AND SOCKETS MOUNTED ON WALL PLATES

The plugs and sockets shown on these pages are based on the designs of the 300, 400 and 2400 Series plugs and sockets described on pages 3-13 of this catalog. They are mounted on wall plates as illustrated below and are intended to mate with appropriate plugs and sockets of the same series.

These plugs and sockets are normally used in general industrial applications where conventional chassis-mounted units are not practical. Those described below are used primarily for patching communications devices such as television antennas and rotators.

The wall plates shown below are made of heavy steel and are designed to fit a standard outlet box. They are finished in black wrinkle to match the mating plugs and sockets. When a 400 or 2400 Series plug is to be mounted on the wall plate, a deep bracket is used so that the plug prongs will be recessed, giving them necessary protection. However, if it should be desired that the plug contacts extend above the plate, delete the DB from the plug part number below and the angle bracket type of plate-mounted plug will be furnished.

SPECIAL PURPOSE WALL PLATES FOR TERMINATING TV ANTENNAS

302 SERIES CHROME-PLATED WALL PLATES

The 302 Series wall plates are available as shown with various combinations of 2-contact, 4-contact and 8-contact sockets mounted in the heavy chrome-plated steel plates. The plates fit a standard outlet box and provide a convenient junction between the antenna lead-in and a TV or FM set, or even a low-power transmitter. Mounting screws are furnished.

- Ⓒᴅ **S-302-WPC** provides a connection for antenna lead-in only.
- Ⓒᴅ **S-302-4-WPC** provides connections for antenna lead-in and up to a 4-contact rotor control system.
- Ⓒᴅ **S-302-8-WPC** is similar and will accommodate an 8-contact rotor contact system.
- Ⓒᴅ **S-302-2-8-WPC** (not shown) is similar to the S-302-8-WPC except that it has two 2-contact sockets instead of one.

The plugs shown in the illustrations are suggested mates for the rotor sockets.

Ⓒᴅ Indicates items normally available through Cinch Distributors.

TRW® CINCH CONNECTORS

INTEGRATED CIRCUIT LOGIC BOARDS

Integrated circuit logic boards are designed to provide flexibility in breadboarding — by enabling the circuit designer to make rapid changes in either components or interconnect wiring at little or no expense — and in special purpose circuit layout for custom applications.

This flexibility is accomplished through the use of a specially designed, high reliability socket terminal that can accept directly the leads of standard dual-in-line IC packages and discrete components. These sockets are arrayed on one side of the epoxy glass boards to accommodate 14, 16, 24, 36, or 40-pin DIP packages, depending upon the series selected.

The reverse side of the board contains precision machined .025″ square terminals suitable for wire wrapping.* The boards themselves are designed for the layout of either mother, or daughter, board applications, and contain a ground plane on one side, and a power plane on the other, with discrete terminals connected to each plane.

A wide variety of board configurations and sizes are available to accommodate every need. To complement the line, various accessory hardware — such as input-output connectors, discrete component adaptors, and special purpose pins — are offered to provide the designer everything he needs to make the job of circuit layout easier.

FEATURES

- Wire wrapping pins available in two tail lengths: .370 and .510.
- Sockets accept rectangular DIP leads varying from as small as .009 x .016 to as large as .013 x .020.
- Sockets accept round pins ranging from .018 diameter to .023 diameter.
- Pins individually replaceable.
- Two board thicknesses: .062 and .125.
- Available with plated through holes.

MATERIALS

Wire Wrap Terminals: Brass per QQ-B-626.

Contacts: Beryllium copper per QQ-C-530.

PC Boards: FR-4 Epoxy Glass with 2 oz. copper.

Finishes:
- a. **Terminals:** .0002 tin plate per MIL-T-10727, or .00003 gold over .00005 nickel.
- b. **Contacts:** .00003 gold over .00005 nickel.
- c. **PC Boards:** Reflowed Solder and .00005 gold over .00005 nickel where applicable.

MECHANICAL & ELECTRICAL CHARACTERISTICS

Terminal to Board Retention: 8 lbs. minimum, (no movement of pin relative to board when 2.5 in.-oz. of torque applied).

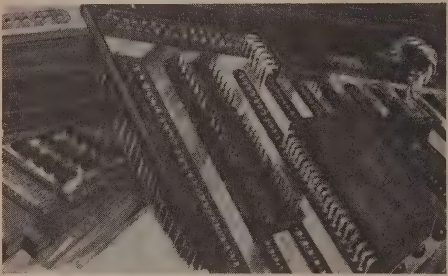
Maximum Insertion Force with Nominal Size Pin: 16 oz.

Minimum Withdrawal Force with Nominal Size Pin: 2 oz.

Current Rating: 5 amps.

Contact Resistance: 10 Milliohms maximum.

CUSTOM BOARDS



TRW/Cinch Connectors Division possesses extensive facilities to handle custom board requirements. Our complete manufacturing facilities, including drilling, etching, assembly, pin straightening, etc., enable us to provide customized IC logic boards made to individual customer specifications. Turn around time is minimized through flexible scheduling and total in-house manufacturing capability.

Although the standard logic boards described in this catalog are ⅛″ glass epoxy, 1/16″ thick boards are also available, as well as our line of standard 1/16″ PC board edge connectors.

To obtain a prompt proposal based on your specific requirements, submit a sketch and supporting details to New Products Manager, TRW/Cinch Connectors, An Electronic Components Division of TRW Inc., 1501 Morse Avenue, Elk Grove Village, Illinois 60007.

TRW® CINCH CONNECTORS

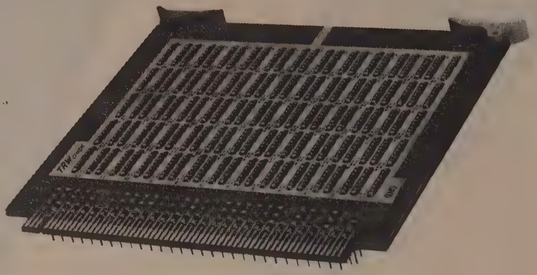
HIGH DENSITY DIP PACKAGING PANEL WITH CONNECTOR TAKE-OFF



60-HC SERIES — 60 PATTERNS

Edge connector takeoff accepts Cinch 61 position, double readout edge connectors. (See Page **2•1014**)

Ground and power planes connected to contacts or dummy pins at each pattern.

Contacts are gold plated all over and supplied for 3 level wrap.

ADAPTOR PLUGS

- Designed for interposing discrete components and as a base for modular construction and special plug assemblies.
- Terminals plug directly into 14- and 16-pin patterns on 60-HPG, 60-HP, 60-HC, and 60-HMC panels, or universal patterns on other panels.
- Round, solder pocket, and slotted pin styles available. Pins also available separately.

PLUG ASSEMBLIES

Designed for input-output connections, interfacing, and testing terminals on the same plane as the IC patterns.

Available with top wire entry, terminated as a single or double ended assembly. Strain relief cover.

PLUG ASSEMBLIES (CRIMP CONTACT)

Distributor Part No.*	Factory Part No.**	No. of Pins	Pin Dia.	Wire Length***
PA-1412-T	299-11-00-001	14	.018	12″
PA-1424-T	299-11-00-003	14	.018	24″
PA-1436-T	299-11-00-005	14	.018	36″
PA-1612-T	299-11-00-007	16	.018	12″
PA-1624-T	299-11-00-009	16	.018	24″
PA-1636-T	299-11-00-011	16	.018	36″

ALL ABOVE TOP ENTRY

*For double-ended plug assemblies replace -T suffix with -DE. Example: PA-1412-DE

**For double-ended plug assemblies, add "1" to final digit: Example: 14 pins, 12″ — 299-11-00-002.

***Standard lengths are 12, 24, and 36″. Other lengths available, upon request.

PLUG ONLY (UNASSEMBLED)

Distributor Part No.	Factory Part No.	Pin Termination	Pin Dia.

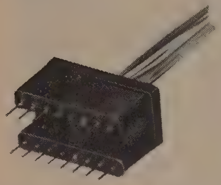
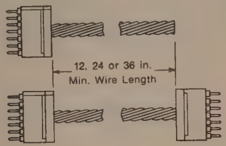
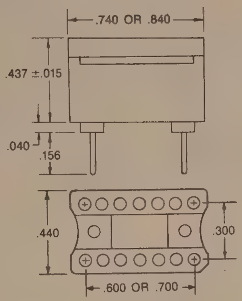
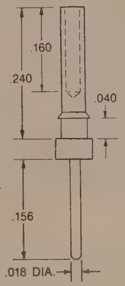
P-16-C	299-11-00-016	Crimp*	.018

*Use Buchanan Tool No. 612118 and Locator No. 613427.









MATERIALS

Insulator: Glass-filled nylon.
Pins: Brass, gold over nickel plated.
Screws: Steel, nickel plated.
Wire: #26 AWG stranded copper, Type B per MIL-W-16878.

FEATURES

1. Wire in single ended plug is color coded per MIL-STD-681.
2. Wire in double ended plug is all black.

EXTRACTOR TOOL

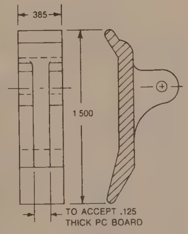
Distributor Part No. RT-60
Factory Part No. 599-11-11-184

Designed to speed handling of IC's and to minimize damage to leads. Permits easy removal of IC's from top of board, especially in high density packaging conditions.

Tool available separately.

EJECTOR KEYS

For use on plug-in type boards.
Material: Nylon



Distributor Part No.	Factory Part No.	Color	Board Thickness

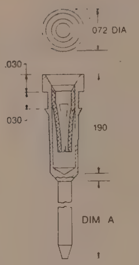
EK-8R	474-11-77-429	Red	⅛″

TRW® CINCH CONNECTORS

SOCKET/TERMINALS

Four standard pins and terminals are available to meet individual requirements. Modifications are simplified since no staking or special assembly tool is required. All pins and terminals are self-locking into insulated board by simply pressing into recommended mounting hole (.055 ±.001 dia.).



SOCKET/TERMINALS (AVAILABLE SEPARATELY)

Recommended Mtg. Hole: .055 ±.001 Dia. (Pressed into place without special tools.)

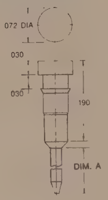
Distributor Part No.	Factory Part No.	Dimension "A"	Plating
60-S3	318-01-99-502	.510 (3 level)	Gold Contact and Sleeve
60-S3T	318-01-99-503	.510 (3 level)	Gold Contact, Tin Sleeve
60-S2	318-01-99-504	.370 (2 level)	Gold Contact and Sleeve
60-S2T	318-01-99-485	.370 (2 level)	Gold Contact, Tin Sleeve

DUMMY PIN (NO CONTACT)

Distributor Part No.	Factory Part No.	Dimension "A"
60-PD1	462-14-11-043	.510
60-PD2	462-14-11-035	.370

(Brass, Gold over Nickel Plated)

Recommended Mtg. Hole #54 drill (.055 dia. ref.) .062 min. board thickness.

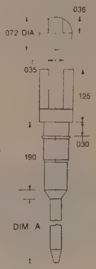


SLOTTED PIN

Distributor Part No.	Factory Part No.	Dimension "A"
60-PC1	462-14-11-041	.510
60-PC2	462-14-11-042	.370

(Brass, Gold over Nickel Plated)

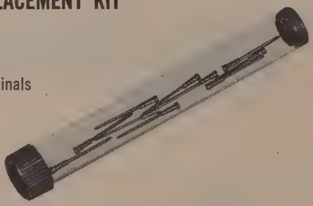
Recommended Mtg. Hole #54 drill (.055 dia. ref.) .062 min. board thickness.

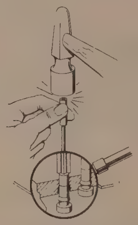


SOCKET/TERMINAL REPLACEMENT KIT

Distributor Part No. RK-60
Factory Part No. 318-01-99-505

Contains 20 60-S3 Socket/Terminals





To remove damaged Socket/Terminals, tap out from back side.
